

# Rediscover Brother®

## Sequin Device

Why not add a little sparkle and dazzle to your garments? Many decorators have found that adding sequins to their embroidered products actually adds more bling bling to their bottom line. The Sequin Device is easy-to-use, works with a wide variety of sequin sizes and shapes, and promises to embellish your garments to the delight of your customers.

### Functions and Features:

- **Reliable & Stable Control** – an independent control system ensures reliability and stability, plus precision in cutting, feeding, and sewing sequins.
- **Adjustable Sequin Size** – Ability to change the sequin working size from 3mm to 9mm without having to change any parts of the device. The control system is adjusted by simply turning the knobs on the main controller, making it convenient and reliable.
- **High Working Speed** – Up to 1000 spm applicable (800-850 spm recommended) for all size ranges of 3-7mm chain sequins.
- **Uses Many Sequin Sizes and Shapes** – various sequin shapes can be used (round, oval, flower, octagon, and more) in different sizes.
- **Automatic Functions** – supports all automatic and manual embroidery functions: auto/manual thread trimming and embroidery mending, up-down sequin device automatically or manually, individual head embroidering, and individual head lock.
- **Unique Compact Design** – device fits all Brother single head embroidery machines well and optimizes the embroidery field.
- **Easy to Install** – simple installation and adjustment, available for right, left, or both sides of embroidery head.

Our Vision is on the Future.
