Right Side Cover Removal

Access to the Main PCB

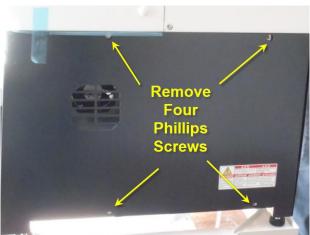

Power off the machine and remove the power cord (note, if a circuit board is to be removed or inspected, the power cord MUST be reconnected for the required grounding strap to access ground)

- 1. Open the top cover (if in place), and remove the right most Black Phillips Screw from the part of the right side cover that wraps around to the front side.
- 2. Remove the Silver Phillips Screw that at is located under the Panel assembly.

3. Remove the Four Silver Phillips Screws from the side cover and lift the cover from the machine.

Your dealer(s)-distributor(s) are your first line of support, please contact them for prompt assistance. If you do not have a dealer(s)-distributor(s) refer to our website http://www.brotherusa.com.
