Back Cover Removal

Remove the Rear Cover (see Rear Cover Removal Guide for assistance)

- 1. The platen should be ejected and the power off.
- 2. Remove the power cord from the back of the printer if it is connected.
- 3. Remove the USB cable and Ethernet cable if it is attached.

- 4. Remove the four screws along the bottom of the cover.
- 5. Remove the four screws along the top edge of the cover but hold on to the cover as you remove the last screw so it does not fall.
- 6. Lift the cover from the back of the machine; be careful not to pull the waste ink tube as you lift the cover from the machine.

Note: only the Rear Cover and Cables need to be removed for the Back Cover to be removed.
