

# S-6200A

brother®  
at your side

New Generation Built-in type motor driven  
Single Needle Straight Lock Stitcher  
with Thread Trimmer

- High energy saving
- Exceptional responsiveness for comfortable sewing
- High quality sewing
- Clean sewing without oil staining from needle bar
- A downsized and flat control box providing a much larger leg space to be utilized

S-6200A has high energy saving and exceptional responsiveness with an original motor and a control box developed by Brother. High quality sewing has been realized with the performance of S-6200A, which contributes to improving the customer's productivity.

High energy saving and exceptional responsiveness with an original motor and control box developed by Brother.

## High energy saving

High energy saving with the original motor. The power consumption of S-6200A has been reduced by 41% compared to the V-belt driven system (with an AC servo motor). S-6200A is designed to be efficiently operated with less amount of electricity.

## Exceptional responsiveness for comfortable sewing

Loss of power transmission has been reduced compared to previous models by equipping the motor behind the machine head and transferring power with the timing belt. Exceptional responsiveness with brother original motor and control box at starting and stopping of sewing will contribute to improving customer's productivity.

## The efficiency of the operation has improved

A downsized and flat control box can provide a far larger leg space to be utilized. The efficiency of the operation has been improved.

## Clean sewing without oil staining

Supplying minimum lubrication to the needle bar and thread take-up area. Oil leakage from the needle bar can be prevented, realizing clean sewing. Also, sewing products will not be stained without V-belt.

## Specifications

S-6200A-□□0□

	Quick back	Thread wiper		Use
