For visually-impaired users
You can read this manual with Screen Reader ‘text-to-speech’ software.

You must set up the hardware and install the driver before you can use the machine.

Please use the Quick Setup Guide to set up the machine. You can find a printed copy in the box.

Please read this User’s Guide thoroughly before you use the machine.

Please visit us at http://solutions.brother.com/ where you can get product support, the latest driver updates and utilities, and answers to frequently asked questions (FAQs) and technical questions.

Note: Not all models are available in all countries.
Using this guide

Symbols used in this guide

The following symbols and conventions are used throughout the documentation.

⚠️ WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.

⚠️ CAUTION

CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.

⚠️ IMPORTANT

IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.

⚠️ Hot Surface icons warn you not to touch machine parts that are hot.

📝 Note

Notes tell you how you should respond to a situation that may arise or give tips about how the operation works with other features.

Acceptable paper and other print media

Print quality may vary according to the type of paper you are using.

You can use the following types of print media: thin paper, plain paper, thick paper, bond paper, recycled paper, labels or envelopes.

For best results, follow the instructions below:

- DO NOT put different types of paper in the paper tray at the same time because it may cause paper jams or misfeeds.
- For proper printing, you must choose the same paper size from your software application as the paper in the tray.
- Avoid touching the printed surface of the paper immediately after printing.
- Before you buy a lot of paper, test a small quantity to make sure that the paper is suitable.

Recommended paper and print media

<table>

<td>Surface resistivity</td>
<td>10³-10¹² ohm-cm</td>
</tr>
<tr>
<td>Filler</td>
<td>CaCO₃ (Neutral)</td>
</tr>
<tr>
<td>Ash content</td>
<td>Below 23 wt%</td>
</tr>
<tr>
<td>Brightness</td>
<td>Higher than 80%</td>
</tr>
<tr>
<td>Opacity</td>
<td>Higher than 85%</td>
</tr>
</tbody>
</table>

- Use paper that is made for plain-paper copying.
- Use paper that is 75 to 90 g/m² (20 to 24 lb).
- Use long grain paper with a neutral Ph value, and a moisture content of approx. 5%.
- This machine can use recycled paper that meets DIN 19309 specifications.

(To help you choose which paper to use with this machine, see *Important information for choosing your paper* on page 126.)
Handling and using special paper

The machine is designed to work well with most types of xerographic and bond paper. However, some paper variables may have an effect on print quality or handling reliability. Always test samples of paper before purchasing to ensure desirable performance. Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

Some important guidelines when selecting paper are:

■ DO NOT use inkjet paper because it may cause a paper jam or damage your machine.

■ Preprinted paper must use ink that can withstand the temperature of the machine’s fusing process 200 degrees centigrade (392 degrees Fahrenheit).

■ If you use bond paper, paper having a rough surface or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Types of paper to avoid

![IMPORTANT]

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:

• that is highly textured

• that is extremely smooth or shiny

• that is curled or warped

1 A curl of 2 mm (0.08 in.) or greater may cause jams to occur.

• that is coated or has a chemical finish

• that is damaged, creased or folded

• that exceeds the recommended weight specification in this guide

• with tabs and staples

• with letterheads using low temperature dyes or thermography

• that is multipart or carbonless

• that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.
Envelopes

Most envelopes designed for laser printers will be suitable for your machine. However, some envelopes may have feed and print-quality problems because of the way they have been made. A suitable envelope should have edges with straight, well-creased folds and the leading edge should not be thicker than two sheets of paper. The envelope should lie flat and not be of baggy or flimsy construction. You should buy quality envelopes from a supplier who understands that you will be using the envelopes in a laser machine.

We recommend that you print a test envelope to make sure the print results are what you want.

Types of envelopes to avoid

**IMPORTANT**

DO NOT use envelopes:

- that are damaged, curled, wrinkled, irregularly shaped, extremely shiny or textured envelopes.
- with clasps, staples, snaps, tie strings, self-adhesive components, windows, holes, cutouts or perforations.
- that are of a baggy construction, not sharply creased, embossed (have raised writing on them) or preprinted on the inside.
- that were previously printed by a laser / LED printer.
- that cannot be arranged when put in a pile.
- that are made of paper that weighs more than the paper weight specifications for the machine.
- with edges that are not straight or consistently square.
- with glue on surface as shown in figure below

- with double flaps as shown in figure below

- with sealing flaps that are not folded down when purchased
- with sealing flaps as shown in figure below
• with each side folded as shown in figure below

If you use any of the types of envelopes listed above, they may damage your machine. This damage may not be covered under any Brother warranty or service agreement.

Labels
The machine will print on most types of labels designed for use with a laser printer. Labels should have an adhesive that is acrylic-based since this material is more stable at the high temperatures in the fuser unit. Adhesives should not come in contact with any part of the machine, because the label stock may stick to the drum unit or rollers and cause jams and print quality problems. No adhesive should be exposed between the labels. Labels should be arranged so that they cover the entire length and width of the sheet. Using labels with spaces may result in labels peeling off and causing serious jams or print problems.

All labels used in this machine must be able to withstand a temperature of 200 degrees centigrade (392 degrees Fahrenheit) for a period of 0.1 seconds.

Do not feed a label sheet through the machine more than one time.

Types of labels to avoid
Do not use labels that are damaged, curled, wrinkled or an unusual shape.

![Image of labels to avoid]

**IMPORTANT**

• Avoid feeding labels with the carrier sheet exposed because your machine will be damaged.

• Label sheets should not exceed the paper weight specifications described in this *User’s Guide*. Labels exceeding this specification may not feed or print properly and may cause damage to your machine.
Unprintable area

The area of the paper that cannot be printed on is shown in the table below:

Printing methods

Printing on plain paper, recycled paper, bond paper, thin paper or thick paper

Printing from the paper tray (plain paper, recycled paper and thin paper only)
(For the recommended paper to use, see Type and size of paper on page 3.)

1. Pull the paper tray completely out of the machine.

2. While pressing the green paper-guide release lever, slide the paper guides to fit the paper size. Make sure that the guides are firmly in the slots.
Note
For Legal or Folio size paper, press the release button in the bottom of the paper tray and then pull out the back of the paper tray. (Legal or Folio size paper is not available in some regions.)

3. Put paper in the tray and make sure:
   - The paper is below the maximum paper mark (▼▼▼). Over filling the paper tray will cause paper jams.
   - The side to be printed on must be face down.
   - The paper guides touch the sides of the paper so it will feed properly.

4. Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.
5. Lift up the support flap 1 to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.

6. Choose the following from each drop-down list of the printer driver.

   - **Paper Size**
     - A4
     - Letter
     - Legal
     - Executive
     - A5
     - B5
     - B6
     - A6
     - Folio

   - **Media Type**
     - Plain Paper
     - Thin Paper
     - Recycled Paper

   - **Paper Source**
     - Tray 1

   For any other settings, see *Driver and Software* in Chapter 2.

7. Send the print data to the machine.
## Printing from the Manual feed slot

(For the recommended paper to use, see *Type and size of paper* on page 3.)

**Note**

The machine automatically turns on the Manual Feed mode when you put paper in the manual feed slot.

1. Lift up the support flap 1 to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.

2. Open the manual feed slot cover.
3. Using both hands, slide the manual feed paper guides to the width of the paper that you are going to use.

4. Using both hands, put one piece of paper in the manual feed slot until the front edge of the paper touches the paper feed roller. When you feel the machine pull in the paper, let go.

Note
• Put the paper into the manual feed slot with the side to be printed face up.
• Make sure that the paper is straight and in the correct position on the manual feed slot. If it is not, the paper may not be fed properly, resulting in a skewed printout or a paper jam.
• DO NOT put more than one piece of paper in the manual feed slot at any one time, as it may cause a jam.
• If you put any media in the manual feed slot before the machine is in the Ready mode, the media may be ejected without being printed on.
Choose the following from each drop-down list of the printer driver.

- **Paper Size**
  
  Width: 76.2 to 216 mm (3 to 8.5 in.)
  Length: 116 to 406.4 mm (4.6 to 16 in.)

  You can use all paper sizes specified for the tray which you use.

- **Media Type**
  

- **Paper Source**
  
  Manual

  For any other settings, see *Driver and Software* in Chapter 2.

6 Send the print data to the machine.

7 After the printed page comes out of the machine, put in the next sheet of paper as in Step 4 above. Repeat for each page that you want to print.

**Printing on labels or envelopes**

When the face-up output tray is pulled down, the machine has a straight paper path from the manual feed slot through to the back of the machine. Use this paper feed and output method when you want to print on labels or envelopes. (For the recommended paper to use, see *Acceptable paper and other print media* on page 3 and *Types of envelopes to avoid* on page 7.)

- **Note**
  The machine automatically turns on the Manual Feed mode when you put paper in the manual feed slot.

1 Open the back cover (face-up output tray).
Printing Methods

2. <For printing envelopes only> Pull down the two green levers, one on the left-hand side and one on the right-hand side, as shown in the illustration below.

3. Open the manual feed slot cover.
Using both hands, slide the manual feed paper guides to the width of the paper that you are going to use.

Using both hands, put one full sheet of labels or one envelope in the manual feed slot until the front edge touches the paper feed roller. When you feel the machine pull it in, let go.

**Note**
- Put one full sheet of labels or one envelope into the manual feed slot with the side to be printed face up.
- Make sure that the full sheet of labels or the envelope is straight and in the proper position on the manual feed slot. If it is not, it may not be fed properly, resulting in a skewed printout or a paper jam.
- DO NOT put more than one full sheet of labels or one envelope in the manual feed slot at any one time, as it may cause a jam.
- DO NOT insert a labels sheet that has previously been used or is missing any labels.
- If you put any Media (paper, envelope and so on) in the manual feed slot before the machine is in the Ready mode, the media may be ejected without being printed on.
Choose the following from each drop-down list menu of the printer driver.

- **Paper Size**
  - Envelopes
    - Com-10
    - DL
    - C5
    - Monarch
    - DL Long Edge
    - Customized paper size

  1 You can define your original paper size by choosing **User Defined...** in Windows® printer driver or **Manage Custom Sizes...** in Macintosh printer drivers.

- **Label**
  - A4
  - Letter

- **Media Type**
  - Envelopes
  - Env. Thin
  - Env. Thick
  - Label

- **Paper Source**
  - Manual

**Note**
- When you use Envelope #10, choose **Com-10** for the **Paper Size**.
- For other envelopes that are not listed in the printer driver, such as Envelope #9 or Envelope C6, choose **User Defined...** (for Windows® printer driver) or **Manage Custom Sizes...** (for Macintosh printer driver). For more information on envelope sizes, see *Paper size* on page 127.

Send the print data to the machine.

After the printed page comes out of the machine, put in the next full sheet of labels or envelope as shown in Step 6. Repeat for each page that you want to print.

<For printing envelopes only>When you have finished printing, reset the two green levers that were pulled down in step 2 back to their original positions.
Note

• Remove each sheet of labels or envelope as soon as it has been printed. Stacking them may cause the paper to jam or curl.

• If an envelope is creased after they are printed, see Improving the print quality on page 111.

• If envelopes get smudged during printing set the Media Type to Thick Paper or Thicker Paper to increase the fixing temperature.

• (For Windows® users) If the DL size double flap envelopes are creased after printing, choose DL Long Edge in Paper Size, from the Basic tab. Put a new DL size double-flap envelope in the manual feed slot with the longest edge of the envelope in first, then print again.

• Envelope joints that are sealed by the manufacturer should be secure.

• All sides of the envelope should be properly folded without wrinkles or creases.
Duplex printing

The supplied printer drivers for Windows® 2000 or greater and Mac OS X 10.4.11 or greater all enable duplex printing. For more information about how to choose the settings, see the Help text in the printer driver.

Guidelines for printing on both sides of the paper

- If the paper is thin, it may wrinkle.
- If paper is curled, straighten it and then put it back in the paper tray or the manual feed slot. If the paper continues to curl, replace the paper.
- If the paper is not feeding properly, it may be curled. Remove the paper and straighten it. If the paper continues to curl, replace the paper.
- When you use the manual duplex function, it is possible that there may be paper jams or poor print quality. (If there is a paper jam, see Paper jams and how to clear them on page 104. If you have a print quality problem, see Improving the print quality on page 111.)

Note

- Make sure that the paper tray is completely inserted to the machine.
- You should use plain paper, recycled paper or thin paper. Do not use bond paper.
Automatic duplex printing (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only)

If you are using the Macintosh Printer Driver, see Automatic Duplex Printing (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only) on page 48.

1. Choose the following settings from each menu of the printer driver.
   - **Paper Size**
     - Letter
     - Legal ¹
     - Folio ¹
     ¹ Legal or Folio size paper is not available in some regions outside the USA and Canada.
   - **Media Type**
     - Plain Paper
     - Thin Paper
     - Recycled Paper
   - **Paper Source**
     - Tray 1
     - Manual
   - **Duplex / Booklet**
     - **Duplex Type** in Duplex Settings
       - There are four options for each orientation. (See Duplex / Booklet on page 28.)
     - **Binding Offset** in Duplex Settings
       - You can specify the offset for binding. (See Duplex / Booklet on page 28.)
   - For any other settings, see Driver and Software in Chapter 2.

2. Send the print data to the machine. The machine will print on both sides of the paper automatically.
Manual duplex printing

If you are using the Macintosh Printer Driver, see Manual Duplex Printing on page 47.

1 Choose the following settings from each drop-down list of the printer driver.

- **Paper Size**
  You can use all the paper sizes specified for the tray you are using.

- **Media Type**
  You can use all the media types specified for the tray you are using except media that has a specified print side, such as envelopes and labels.

- **Paper Source**
  
  Tray 1 Manual

- **Duplex / Booklet**

  Duplex (Manual)

  - **Duplex Type in Duplex Settings**
    There are four options for each orientation. (See Duplex / Booklet on page 28.)

  - **Binding Offset in Duplex Settings**
    You can specify the offset for binding. (See Duplex / Booklet on page 28.)

For any other settings, see Driver and Software in Chapter 2.

2 Send the print data to the machine. The machine will print all the even-numbered pages on one side of the paper first. Then, the Windows® driver instructs you (with a pop-up message) to reinsert the paper to print the odd-numbered pages.

**Note**

Before reinserting the paper, straighten it well, or you may get a paper jam. Very thin or thick paper is not recommended.
Printer driver

A printer driver is software that translates data from the format used by a computer to the format that a particular machine needs. Typically, this format is page description language (PDL).

The printer drivers for the supported versions of Windows® and Macintosh are on the CD-ROM we have supplied or on the Brother Solutions Center at http://solutions.brother.com/. Install the drivers by following the Quick Setup Guide. The latest printer driver can be downloaded from the Brother Solutions Center at http://solutions.brother.com/.

(If you want to uninstall the printer driver, see Uninstalling the printer driver on page 51.)

For Windows®

- Windows® printer driver

For Macintosh

- Macintosh printer driver

For Linux¹ ²

- CUPS printer driver
- LPD / LPRng printer driver

¹ Download the printer driver for Linux from http://solutions.brother.com/ or a link on the supplied CD-ROM.

² Depending on Linux distributions, the driver may not be available.

Note

- For more information about Linux printer driver, visit us at http://solutions.brother.com/.
- The printer driver for Linux may be released after the initial release of this product.
You can change the following printer settings when you print from your computer:

- Paper Size
- Orientation
- Copies
- Media Type
- Resolution
- Print Settings
- Multiple Page
- Duplex / Booklet
- Paper Source
- Scaling
- Reverse Print
- Use Watermark
- Header-Footer Print
- Toner Save Mode
- Administrator
- Use Reprint
- Sleep Time
- Macro
- Density Adjustment
- Error Message Printout
- Improve Print Output
- Skip Blank Page
- Print Profiles

1 These settings are not available with the Macintosh printer driver.
2 These settings are not available with the HL-2230, HL-2240, HL-2240D and HL-2242D.
Features in the printer driver (for Windows®)

(For more information, see the Help text in the printer driver.)

Note

- The screens in this section are from Windows® XP. The screens on your computer will vary depending on your operating system.
- You can access the Printing Preferences dialog box by clicking Printing Preferences... in the General tab of the Printer Properties dialog box.

Basic tab
You can also change settings by clicking the illustration on the left side of the Basic tab.

1. Choose Paper Size, Orientation, Copies, Media Type, Resolution and Print Settings (1).
2. Choose Multiple Page and Duplex / Booklet setting (2).
3. Choose Paper Source (3).
4. Click OK to apply your chosen settings.
   To return to the default settings, click Default, then OK.
Note
This area (4) shows the current settings.

Paper Size
From the drop-down box choose the Paper Size you are using.

Orientation
Orientation selects the position of how your document will be printed (Portrait or Landscape).

<table>
<thead>
<tr>
<th>Portrait</th>
<th>Landscape</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Portrait" /></td>
<td><img src="image" alt="Landscape" /></td>
</tr>
</tbody>
</table>

Copies
The copies selection sets the number of copies that will be printed.

- Collate
  With the Collate check box selected, one complete copy of your document will be printed and then will be repeated for the number of copies you selected. If the Collate check box is not selected, then each page will be printed for all the copies selected before the next page of the document is printed.

- Collate checked
- Collate non-checked

<table>
<thead>
<tr>
<th>Collate checked</th>
<th>Collate non-checked</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Collate checked" /></td>
<td><img src="image" alt="Collate non-checked" /></td>
</tr>
</tbody>
</table>
Media Type
You can use the following types of media in your machine. For the best print quality, select the type of media that you wish to use.

Envelopes  Env. Thick  Env. Thin  Recycled Paper  Label

Note
• When using ordinary plain paper (75 to 105 g/m² (20 to 28 lb)) choose Plain Paper. When using heavier weight paper or rough paper choose Thick Paper or Thicker Paper. For bond paper, choose Bond Paper.
• When you use envelopes, choose Envelopes. If the toner is not fixed to the envelope correctly when Envelopes has been selected, choose Env. Thick. If the envelope is crumpled when Envelopes has been selected, choose Env. Thin.

Resolution
You can choose the resolution as follows.
- 300 dpi
- 600 dpi
- HQ 1200

Print Settings
You can manually change the print setting.
- Graphics
  This is the best mode for printing documents that contain graphics.
- Text
  This is the best mode for printing text documents.
- Manual
  You can change the settings manually by choosing Manual and clicking the Manual Settings... button.
  You can set brightness, contrast and other settings.

Multiple Page
The Multiple Page selection can reduce the image size of a page allowing multiple pages to be printed on one sheet of paper or can enlarge the image size for printing one page on multiple sheets of paper.
- Page Order
  When N in 1 option is selected, the page order can be selected from the drop-down list.
- Border Line
  When printing multiple pages onto one sheet, with the Multiple Page feature, you can choose to have a solid border, dash border or no border around each page on the sheet.
Print cut-out line
When 1 in NxN pages option is selected, the Print cut-out line option can be selected. This option allows you to print a faint cut-out line around the printable area.

Duplex / Booklet
When you want to print a booklet or do duplex printing, use this function.

None
Disable duplex printing.

Duplex / Duplex (Manual)
When you want to do duplex printing, use these options.

• Duplex (HL-2240D / HL-2242D / HL-2250DN/ HL-2270DW only)
The machine prints on both sides of the paper automatically.

• Duplex (Manual)
The machine prints all the even numbered pages first. Then the printer driver will stop and show the instructions required to re-install the paper. When you click OK the odd numbered pages will be printed.

When you choose Duplex or Duplex (Manual), the Duplex Settings... button becomes available to choose. You can set following settings in the Duplex Settings dialog box.

• Duplex Type
There are four types of duplex binding direction available for each orientation.

Portrait
Long Edge (Left) | Long Edge (Right) | Short Edge (Top) | Short Edge (Bottom)
---|---|---|---
![Diagram of Portrait Long Edge (Left)](image1) | ![Diagram of Portrait Long Edge (Right)](image2) | ![Diagram of Portrait Short Edge (Top)](image3) | ![Diagram of Portrait Short Edge (Bottom)](image4)

Landscape
Long Edge (Top) | Long Edge (Bottom) | Short Edge (Left) | Short Edge (Right)
---|---|---|---
![Diagram of Landscape Long Edge (Top)](image5) | ![Diagram of Landscape Long Edge (Bottom)](image6) | ![Diagram of Landscape Short Edge (Left)](image7) | ![Diagram of Landscape Short Edge (Right)](image8)

• Binding Offset
When you check Binding Offset, you can also specify the offset for binding in inches or millimeters.
**Booklet / Booklet (Manual)**

Use this option to print a document in booklet format using duplex printing; it will arrange the document according to the correct page number and allows you to fold at the center of the print output without having to change the order of the page number.

- **Booklet (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only)**
  
The machine prints on both sides of the paper automatically.

- **Booklet (Manual)**
  
The machine prints all the even numbered sides first. Then the printer driver will stop and show the instructions required to re-install the paper. When you click **OK** the odd numbered sides will be printed.

When you choose **Booklet** or **Booklet (Manual)**, the **Duplex Settings...** button becomes available to choose. You can set following settings in the **Duplex Settings** dialog box.

- **Duplex Type**
  
There are two types of duplex binding direction available for each orientation.

### Portrait

**Left Binding**

```
3 4 5
```

**Right Binding**

```
5 4 3 2
```

### Landscape

**Top Binding**

```
3 4 5
```

**Bottom Binding**

```
3 4 5
```

- **Booklet Printing Method**

  When **Divide into Sets** is selected: This option allows you to print the whole booklet into smaller individual booklet sets, it still allows you to fold at the center of the smaller individual booklet sets without having to change the order of the page number. You can specify the number of sheets in each smaller booklet set, from 1 to 15. This option can help when folding the printed booklet that has a large number of pages.

- **Binding Offset**

  When you check **Binding Offset**, you can also specify the offset for binding in inches or millimeters.

**Paper Source**

You can choose **Auto Select**, **Tray1**, **Manual** and specify separate trays for printing the first page and for printing from the second page onwards.
Advanced tab

Change the tab settings by clicking one of the following icons:

- **Scaling** (1)
- **Reverse Print** (2)
- **Use Watermark** (3)
- **Header-Footer Print** (4)
- **Toner Save Mode** (5)
- **Administrator** (6)
- **Other Print Options** (7)

**Scaling**
You can change the print image scaling.

**Reverse Print**
Check **Reverse Print** to rotate the print result by 180 degrees.
Use Watermark
You can put a logo or text into your documents as a watermark.
You can choose one of the preset watermarks, or you can use a bitmap file or text that you have created.
When you use a bitmap file as a watermark, you can change the size of the watermark and put it anywhere you like on the page.
When you use text as a watermark, you can change the Text, Font, Style, Size and Darkness settings.

Header-Footer Print
When this feature is enabled, it will print the date and time on your document from your computer’s system clock and the PC login user name or the text you entered. By clicking Settings... you can customize the information.

ID Print
If you select Login User Name, your PC login user name will print. If you select Custom and enter the text in the Custom edit box, the text you entered will print.

Toner Save Mode
You can conserve toner use with this feature. When you set Toner Save Mode to On, print appears lighter. The default setting is Off.

Note
• We do not recommend Toner Save Mode for printing Photo or Gray Scale images.
• Toner Save Mode is not available for HQ 1200 resolution.

Administrator
Administrators have the authority to limit access to functions such as scaling and watermark.

Password
Enter the password into this box.

Set Password...
Click here to change the password.

Set
Click here current password. Then you can change the settings.

Copies Lock
Lock the copy pages selection to prevent multiple copy printing.

Multiple Page & Scaling Lock
Lock the current settings of the Multiple Page and Scaling options to prevent changes being made.

Watermark Lock
Lock the current settings of the Watermark option to prevent changes being made.
Header-Footer Print Lock
Lock the current settings of the Header-Footer Print option to prevent changes being made.

Other Print Options...
You can set the following in Printer Function:
- Use Reprint
- Sleep Time
- Macro (HL-2250DN / HL-2270DW only)
- Density Adjustment
- Error Message Printout
- Improve Print Output
- Skip Blank Page

Use Reprint
The machine keeps the last print job sent to it in memory.
You can reprint the last job without sending the data again from your computer. For more information about the Reprint function, see Go button on page 60.

Note
If you want to prevent other people from printing your data using the reprint function, uncheck the Use Reprint check box.

Sleep Time
When the machine does not receive data for a certain period of time, it enters sleep mode. In sleep mode, the machine acts as though it were turned off. When you choose Printer Default, the timeout setting will be reset to the specific time set at the factory; this can be altered in the driver. Intelligent Sleep Mode automatically adjusts to the most suitable timeout setting depending on the frequency of your machine use.
While the machine is in sleep mode, the Ready LED is dimmed, but the machine can still receive data. Receiving a print file or document or pressing Go will automatically wake up the machine to start printing.

Macro (HL-2250DN / HL-2270DW only)
You can save a page of a document as a macro to machine memory. You can also execute the saved macro (you can use the saved macro as an overlay on any documents). This will save time and increase printing speed for often used information such as forms, company logos, letterhead formats or invoices.

Density Adjustment
Increase or decrease the print density.

Note
The Density Adjustment is not available when you set the Resolution to HQ 1200.
Error Message Printout
You can choose whether the machine reports problems by printing an error page.
Selections are Printer Default, On and Off.

Improve Print Output
This feature allows you to improve a print quality problem.

- Improvement Settings
  - Reduce Paper Curl
    If you choose this setting, the paper curl may be reduced. If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in Media Type to a thin setting.
  - Improve Toner Fixing
    If you choose this setting, the toner fixing on paper may be improved. If this selection does not provide enough improvement, change the printer driver setting in Media Type to a thick setting.

- Reduce Ghosting
  If you are using the machine in a high humidity environment this setting may reduce ghosting on the paper. Do not use this setting if the humidity is below 30% or ghosting may increase.

  Note
  This feature may not reduce ghosting for all types of paper. Before you buy a lot of paper, test a small quantity to make sure that the paper is suitable.

Skip Blank Page
If Skip Blank Page is checked, the printer driver automatically detects blank pages and excludes them from printing.

  Note
  This feature does not work when you choose the following features:
  - Use Watermark
  - Header-Footer Print
  - N in 1 and 1 in NxN pages in Multiple Page
  - Duplex (Manual), Booklet, Booklet (Manual) and Duplex with Binding Offset in Duplex / Booklet
  - (HL-2240D only) Duplex with HQ 1200 in Resolution
Print Profiles tab

- **Print Profiles (1)**
  The printer driver of the machine has the preset print profiles. Select the desired profile and click **OK** to configure the desirable print settings easily.

- **Edit a profile (2)**
  You can edit and save a new print profile.

- **Restore default profiles (3)**
  Click to restore all the default print profiles.

- **Always show Print Profile tab first (4)**
  When you always want to show the **Print Profiles** tab first, select this check box.
Editing a print profile

1. Configure the print settings in the print driver. See Basic tab on page 25 and Advanced tab on page 30.
2. Click the Print Profiles tab.
3. Click the Edit a profile button.

4. Choose the icon from the drop-down list (1) and enter a profile name (2).
5. Choose the print profile you want to overwrite and click OK.

Note
You can overwrite the preset print profiles.
Support

Note
You can access the Support dialog box by clicking Support... in the Printing Preferences dialog box.

- **Brother Solutions Center** (1)
  The Brother Solutions Center (http://solutions.brother.com/) is a Website offering information about your Brother product including FAQs (Frequently Asked Questions), User’s Guides, driver updates and tips for using your machine.

- **Genuine Supplies Website** (2)
  You can visit our Website for genuine Brother supplies by clicking this button.

- **Brother CreativeCenter** (3)
  You can visit our Website for a free and easy online solution for business and home uses by clicking this button.

- **Print Settings** (4)
  This will print the pages that show how the internal settings of the machine have been configured.

- **Check Setting...** (5)
  You can check the current driver settings.

- **About...** (6)
  This will show the list of the printer driver files and version information.

- **Print Fonts** (7) (HL-2250DN / HL-2270DW only)
  This will print the pages that show all the internal fonts of the machine.
Tray Settings

Note

From the Start menu, select Printers and Faxes ¹. Right-click the Brother HL-2230/HL-2240/HL-2240D/HL-2242D/HL-2250DN/HL-2270DW series icon and select Properties to access the Tray Settings tab.

¹ Select Settings and then Printers for Windows® 2000 users.

You can define the paper size for each paper tray and auto detect the serial number in the Tray Settings tab as follows.

- **Paper Source Setting (1)**
  
  This feature identifies the paper size defined for each paper tray.

  - **Paper Size**
    
    This setting allows you to define which paper size is used for the tray and manual feed slot. Highlight the paper source you want to define and then choose the paper size from the drop-down list. Click Update to apply the setting to the tray.

  - **Default Source**
    
    This setting allows you to choose the default paper source that your document will be printed from. Choose the Default Source from the drop-down list and click Update to save your setting. The Auto Select setting will automatically pull paper from any paper source (tray or manual feed slot) that has a defined paper size that matches your document.
Serial No. (2)

By clicking Auto Detect, the printer driver will query the machine and display its serial number. If it fails to receive the information, the screen will display "---------------".

Note

The Auto Detect function is not available under the following machine conditions:

- The machine's power switch is off.
- The machine is in an error mode.
- The machine is in a network shared environment.
- The cable is not connected to the machine correctly.

Status Monitor

This reports the machine status (any errors that may happen with the machine) when printing. If you would like to turn the status monitor on, follow these steps:

Click the Start button, All Programs ¹, Brother, your machine (e.g. Brother HL-2270DW), and then Status Monitor.

¹ Programs for Windows® 2000 users
Features in the printer driver (for Macintosh)

This machine supports Mac OS X 10.4.11, 10.5.x and 10.6.x.

Note

The screens in this section are based on Mac OS X 10.5.x. The screens on your Macintosh will vary depending on your operating system.

Choosing page setup options

1. From an application such as Apple TextEdit, click File, then Page Setup. Make sure HL-XXXX (where XXXX is your model name) is chosen in the Format for pop-up menu. You can change the settings for Paper Size, Orientation and Scale, then click OK.

2. From an application such as Apple TextEdit, click File, then Print to start printing.
   - For Mac OS X 10.4.11
For Mac OS X 10.5.x and 10.6.x

For more page setup options, click the disclosure triangle beside the Printer pop-up menu.

Choosing printing options

To control special printing features, choose the options in the Print dialog box. For the details of available options, see the following descriptions of each option.
Cover Page

You can make the following cover page settings:

- **Print Cover Page**
  If you want to add a cover page to your document, use this function.

- **Cover Page Type**
  Choose a template for the cover page.

- **Billing Info**
  If you want to add the billing information to the cover page, enter text in the *Billing Info* box.

Layout

- **Pages per Sheet**
  Choose how many pages will appear on each side of the paper.

- **Layout Direction**
  When you specify the pages per sheet, you can also specify the direction of the layout.
Border
If you want to add a border, use this function.

Two-Sided

Reverse Page Orientation (Mac OS X 10.5.x and 10.6.x only)
Check Reverse Page Orientation to reverse the data from up to down.

Flip Horizontally (Mac OS X 10.6.x only)
Check Flip Horizontally to print as a reflection flipped left-to-right.
**Print Settings**

You can change settings by choosing a setting in the **Print Settings** list:

**Basic tab**

- **Media Type**
  - You can change the media type to one of the following:
    - Plain Paper
    - Thin Paper
    - Thick Paper
    - Thicker Paper
    - Bond Paper
    - Envelopes
    - Env. Thick
    - Env. Thin
    - Recycled Paper
    - Label

- **Resolution**
  - You can change the resolution as follows:
    - 300 dpi
    - 600 dpi
    - HQ 1200
- **Toner Save Mode**
  You can conserve toner using this feature. When you set Toner Save Mode to On, print appears lighter. The default setting is Off.

**Note**
- We do not recommend Toner Save Mode for printing Photo or Gray Scale images.
- Toner Save Mode is not available for HQ 1200 resolution.

- **Paper Source**
  You can choose Auto Select, Tray 1 or Manual.

- **Reverse Print** (For Mac OS X 10.4.11 only)
  Check Reverse Print to rotate the data by 180 degrees.

**Advanced tab**

- **Graphics Quality**
  You can change the print quality as follows:
  - **Graphics**
    This is a graphics mode (contrast priority). Choose this setting for printing text and figures, such as business and presentation documents. You can represent sharp contrasts between shaded areas.
  - **Text**
    This is the best mode for printing text documents.

- **Skip Blank Page**
  If Skip Blank Page is checked, the printer driver automatically detects blank pages and excludes them from printing.
Improve Print Output
This feature allows you to improve a print quality problem.

- **Reduce Paper Curl**
  If you choose this setting, the paper curl may be reduced. If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in **Media Type** to a thin setting.

- **Improve Toner Fixing**
  If you choose this setting, the toner fixing on paper may be improved. If this selection does not provide enough improvement, change the printer driver setting in **Media Type** to a thick setting.

- **Reduce Ghosting**
  If you are using the machine in a high humidity environment this setting may reduce ghosting on the paper. Do not use this setting if the humidity is below 30% or ghosting may increase.

**Note**
This feature may not reduce ghosting for all types of paper. Before you buy a lot of paper, test a small quantity to make sure that the paper is suitable.

Sleep Time
When the machine does not receive data for a certain period of time, it enters sleep mode. In sleep mode, the machine acts as though it were turned off. When you choose **Printer Default**, the timeout setting will be reset to the default time; this can be altered in the driver. If you want to change the sleep time, choose **Manual** and then enter the time in the text box on the driver.

While the machine is in sleep mode, the **Ready** LED is dimmed, but the machine can still receive data. Receiving a print file or document or pressing **Go** will automatically wake up the machine to start printing.
Support

- **Brother Solution Center**
  The Brother Solutions Center (http://solutions.brother.com/) is a Website offering information about your Brother product including FAQs (Frequently Asked Questions), User’s Guides, driver updates and tips for using your machine.

- **Visit the Genuine Supplies website**
  You can visit our website for genuine Brother supplies by clicking this button.

- **Brother CreativeCenter**
  You can visit our Website for a free and easy online solution for business and home uses by clicking this button.
Manual Duplex Printing

For Mac OS X 10.4.11

1. Select Paper Handling.
2. Choose Odd numbered pages and click Print.

Turn the paper over and reload it in the tray, and then choose Even numbered pages and click Print.

For Mac OS X 10.5.x and 10.6.x

1. Select Paper Handling.
2. Choose Odd only in Pages To Print and click Print.

Turn the paper over and reload it in the tray, and then choose Even only in Pages To Print and click Print.
Automatic Duplex Printing (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only)

For Mac OS X 10.4.11

1. Select Layout.
2. Choose Long-edged binding or Short-edged binding in Two-Sided.

4. Choose All pages in Print and click Print. You can print pages on both sides of the paper.
For Mac OS X 10.5.x and 10.6.x

1. Select **Layout**.
2. Choose **Long-edge binding** or **Short-edge binding** in **Two-Sided**. Automatically the **Two-Sided** check box is checked.

3. Select **Paper Handling**.
4. Choose **All pages** in **Pages To Print** and click **Print**. You can print pages on both sides of the paper.
**Status Monitor**

This reports the machine status (any errors that may happen with the machine) when printing. If you would like to turn the status monitor on, follow these steps:

- For Mac OS X 10.4.11
  1. Run the **Printer Setup Utility** (from the Go menu, choose **Applications, Utilities**), then choose the machine.
  2. Click the **Utility**, then the status monitor will start up.

- For Mac OS X 10.5.x
  1. Run the **System Preferences**, select **Print & Fax**, then choose the machine.
  2. Click the **Open Print Queue...**, then click **Utility**. The status monitor will start up.

- For Mac OS X 10.6.x
  1. Run the **System Preferences**, select **Print & Fax**, then choose the machine.
  2. Click the **Open Print Queue...**, then click **Printer Setup**. Select the **Utility** tab then click **Open Printer Utility**. The status monitor will start up.
Uninstalling the printer driver

You can uninstall the printer driver that you have installed with the following steps.

Note

• This is not available if you installed the printer driver from the Windows® Add a printer function.
• After uninstalling, we recommend that you restart your computer to remove files that were in use during the uninstall.

Printer driver for Windows®

1  Click the Start button, point to All Programs 1, Brother, and then to your machine name.
2  Click Uninstall.
3  Follow the instructions on the screen.

1  Programs for Windows® 2000 users

Printer driver for Macintosh

For Mac OS X 10.4.11

1  Disconnect the USB cable between the Macintosh and your machine.
2  Log on as an ‘Administrator’.
3  Run the Printer Setup Utility (from Go menu, choose Applications, Utilities), then choose the machine you want to remove and remove it by clicking the Delete button.

For Mac OS X 10.5.x and 10.6.x

1  Disconnect the USB cable between the Macintosh and your machine.
2  Log on as an ‘Administrator’.
3  From the Apple menu, choose System Preferences. Click Print & Fax, then choose the machine you want to remove and remove it by clicking the - button.
Software

Software for networks (HL-2250DN / HL-2270DW only)

For the information about network utility software, see Chapter 1 of the *Network User's Guide*.

Remote Printer Console  (For Windows® only)

Remote Printer Console is software to change many of the printer settings independently of your application. For example, you can change the settings for printer margin, sleep mode, character set and so on. These settings are then remembered and used by the machine. The application and printer driver settings will take priority over the Remote Printer Console settings.

How to use and install the Remote Printer Console software

To use the Remote Printer Console software, follow the steps below.

1. Put the supplied installation CD-ROM into your CD-ROM drive and close the opening screen when it appears.
2. Open Windows® Explorer and choose the CD-ROM drive.
3. Double-click the *tools* folder.
4. Double-click the *RPC* folder.
5. Refer to the *RPC_User's_Guide.pdf* for how to install and use the Remote Printer Console.
3 Control Panel

LEDs (Light Emitting Diodes)

This section refers to four LEDs Toner, Drum, Error, Ready and Go button on the control panel.

1. **Toner LED**
   The Toner LED indicates that the Toner is low.

2. **Drum LED**
   The Drum LED indicates that the Drum will need to be replaced soon.

3. **Error LED**
   The Error LED indicates when the machine is in one of the following states:
   - No paper / Paper jam / Cover open

4. **Ready LED**
   The Ready LED will flash depending on the machine status.

5. **Go button**
   Wake-up / Error recovery / Form feed / Job Cancel / Reprint / Enable or Disable the wireless network (HL-2270DW only)

The LED indications shown in the table below are used in the illustrations in this chapter.

<table>
<thead>
<tr>
<th>LED</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Toner LED" /></td>
<td>LED is off.</td>
</tr>
<tr>
<td><img src="image" alt="Drum LED" /></td>
<td>LED is on.</td>
</tr>
<tr>
<td><img src="image" alt="Error LED" /></td>
<td>The LED is dimmed.</td>
</tr>
<tr>
<td><img src="image" alt="Ready LED" /></td>
<td>LED is flashing.</td>
</tr>
</tbody>
</table>
The machine is in Sleep mode (Power Save mode). The machine acts as though it were turned off. Receiving data or pressing Go wakes up the machine from Sleep mode to Ready mode.

The machine is in Deep Sleep mode (reducing more power consumption than Sleep mode). The machine acts as though it were turned off. If the machine does not receive data for a certain length of time while it is in Sleep mode, it enters Deep Sleep mode automatically. Receiving data or pressing Go wakes up the machine from Deep Sleep mode to Ready mode.

HL-2270DW only: If a wireless network is enabled, the machine does not enter Deep Sleep mode. To disable the wireless network, see chapter 5 of the Network User's Guide.

The machine is ready to print.

The machine is printing.

The machine is warming up.

The machine is cooling down. Wait for a few seconds until the inside of the machine has cooled down.

The machine is either receiving data from the computer or processing data in the memory.

There is remaining print data in the machine memory. If the Ready LED is flashing for a long time and nothing has printed, press Go to print the remaining data in the memory.

Close the front cover of the machine. |
| Drum | FUSER COVER OPEN  
Close the fuser cover located behind the back cover of the machine. |
| Error | JAM TRAY 1 / JAM INSIDE / JAM REAR / JAM DUPLEX  
Clear the paper jam. See Paper jams and how to clear them on page 104. If the machine does not start printing, press Go. |
| Ready | MEMORY FULL  
The machine memory is full and the machine cannot print full pages of a document. See Solving print problems on page 118. |
| Toner | PRINT OVERRUN  
A print overrun occurred and the machine cannot print full pages of a document. See Solving print problems on page 118. |
| Drum | SIZE ERROR DX (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only)  
Set the correct paper that you want to use, or load the same size paper that you selected in the current driver setting. Press Go. The paper size you can use for automatic duplex printing is A4, Letter, Legal or Folio. |
| Error | DUPLEX DISABLED (HL-2240D / HL-2242D / HL-2250DN / HL-2270DW only)  
Put the duplex tray in the machine and close the back cover. |
| Toner | DRUM ERROR  
The corona wire needs to be cleaned. See Cleaning the corona wire on page 84. |
| Drum | DRUM STOP  
Replace the drum unit with a new one. See Replacing the drum unit on page 78. |
Service call indications

If there is an error that cannot be cleared by the user, the machine will show that a service call is needed by lighting up all the LEDs as shown below.

If you see the service call indication shown above, turn off the power switch, and then turn it back on and try to print again.

If the error is not cleared after turning the power switch off and then back on, press Go, the LEDs will light up as shown in the table below to identify the error.

<table>

\(^1\) If this error occurs, turn off the machine’s power switch, wait a few seconds, and then turn it on again. Leave the machine for approx. 15 minutes with the power on. If the error occurs again, call your dealer or Brother Customer Service.

For example, the LED indication below shows a fuser unit failure.

Make a note of the indication, referring to the table on page 58, and report the error status to your dealer or Brother Customer Service.
Note

Make sure that the front cover is completely closed before you report a service call.
Go button

The Go button has the following functions:

■ Cancel printing
  Cancel the current job being printed: While printing press Go for about 4 seconds until all the LEDs light up and then release it. The Ready and Error LEDs will flash as the job is being canceled.
  Cancel all the received jobs: To delete all jobs, press Go for about 4 seconds until all the LEDs light up and then release it. Press Go again. The Ready and Error LEDs will flash as the job(s) is being canceled.

■ Wake-up
  If the machine is in sleep mode, press Go to wake the machine up and go to the Ready mode.

■ Error recovery
  If there is an error, the machine will recover automatically from some errors. If an error is not automatically cleared, press Go to clear the error, and then continue to use the machine.

■ Form feed
  If the Ready LED flashes for a long time, press Go. The machine will print any data that is left in the machine’s memory.

■ Reprint
  To reprint the last document, press Go for about 4 seconds until all the LEDs light up and then release it. Within 2 seconds press Go the number of times you want to reprint. If you don’t press Go within 2 seconds, a single copy will be printed.
  If you print with the Windows® printer driver we have supplied with the printer, the settings for Use Reprint in the printer driver will take priority over the settings made on the control panel. (For more information, see Use Reprint on page 32.)

■ Enable or Disable the wireless network
  If you want to switch the wireless network to enabled/disabled (disabled is the default), hold down Go for 10 seconds in the Ready mode. Then release Go when the machine prints a Network Configuration page that indicates the current network settings. (For more information, see Chapter 5 of the Network User’s Guide.)
Print a test page

You can use Go or the printer driver to print a test page.

Using the Go button

1. Turn off the machine.
2. Make sure that the front cover is closed and the power cord is plugged in.
3. Hold down Go as you turn on the power switch. Keep Go pressed down until the Toner, Drum and Error LEDs light up. Release Go. Make sure that the Toner, Drum and Error LEDs are off.
4. Press Go again. The machine will print a test page.

Using the printer driver

If you are using the Windows® printer driver, click the Print Test Page button in the General tab of the printer driver.
Print a Printer Settings page

You can print the current settings using the control panel button or printer driver.

Using the Go button

1. Make sure that the front cover is closed and the power cord is plugged in.
2. Turn on the machine and wait until the machine is in the Ready mode.
3. Press Go three times within 2 seconds. The machine will print the current printer settings page.

Using the printer driver

If you are using the Windows® printer driver, you can print the current printer settings page by clicking the Print Settings button in the Support dialog.
Print Fonts (HL-2250DN / HL-2270DW only)

You can print a list of the internal fonts using the control panel button or printer driver.

**Using the Go button**

1. Turn off the machine.
2. Make sure that the front cover is closed and the power cord is plugged in.
3. Hold down Go as you turn on the power switch. Keep Go pressed down until the Toner, Drum and Error LEDs light up. Release Go. Make sure that the Toner, Drum and Error LEDs are off.
4. Press Go twice. The machine will print a list of the internal fonts.

**Using the printer driver**

If you are using the Brother’s Windows® printer driver, you can print a list of the internal fonts by clicking the Print Fonts button in the Support dialog.
Print a WLAN report (HL-2270DW only)

You can use Go to print machine's wireless status report. See chapter 5 of the Network User's Guide.

Default settings

The machine has three levels of default settings; the default settings have been set at the factory before shipment.

- Network default settings
- Factory reset
- Settings reset

**Note**

- You can not modify the preset default settings.
- Page counter can never be changed.

Network default settings (HL-2250DN / HL-2270DW only)

1. Turn off the machine.
2. Make sure that the front cover is closed and the power cord is plugged in.
3. Hold down Go as you turn on the power switch. Keep Go pressed down until all the LEDs light up and then the Ready LED turns off.
4. Release Go. Make sure that all the LEDs turn off.
5. Press Go six times. Make sure that all the LEDs light up to indicate the print server has been reset to its factory default settings. The machine will restart.

Factory Reset

You can partially reset the machine back to its default printer settings. The network settings will not be reset:

1. Turn off the machine.
2. Make sure that the front cover is closed and the power cord is plugged in.
3. Hold down Go as you turn on the power switch. Keep Go pressed down until all the LEDs light up and then the Ready LED turns off.
4. Release Go. Make sure that all the LEDs turn off.
5. Press Go eight times. Make sure that all the LEDs light up to indicate the machine has been reset to its factory default settings (except the network settings). The machine will restart.
**Settings Reset**

This operation will reset all the machine settings back to the settings that were set at the factory:

1. Turn off the machine.
2. Make sure that the front cover is closed and the power cord is plugged in.
3. Hold down Go as you turn on the power switch. Keep Go pressed down until all the LEDs light up and then the Ready LED turns off.
4. Release Go. Make sure that all the LEDs turn off.
5. Press Go ten times. The machine will automatically restart.
You will need to clean the machine regularly and replace the consumable items.

### Replacing consumable items

The machine will indicate when it is time to replace the consumable items. (See *LEDs (Light Emitting Diodes)* on page 53)

### Consumables

<table>
<thead>
<tr>

<td>Order No.DR-420</td>
</tr>
</tbody>
</table>

![Toner cartridge](image1.png) ![Drum unit](image2.png)
Before replacing the consumable items

Please read the following instructions before replacing the consumable items.

**WARNING**

DO NOT put a toner cartridge into a fire. It could explode, resulting in injuries.

DO NOT use cleaning materials that contain ammonia, alcohol, any type of spray, or any type of flammable substance to clean the outside or inside of the machine. Doing this may cause a fire or electrical shock. See *Cleaning* on page 82 for how to clean the machine.

Be careful not to inhale toner.

**CAUTION**

**HOT SURFACE**

- After you have just used the printer, some internal parts will be extremely hot. Wait at least 10 minutes for the printer to cool down before continuing to the next step.
- To prevent any degradation to the print quality, DO NOT touch the shaded parts shown in the illustrations.
**IMPORTANT**

- Brother strongly recommends that you do not refill the toner cartridge provided with your machine. We also strongly recommend that you continue to use only genuine Brother brand replacement toner cartridges. Use or attempted use of potentially incompatible toner and/or cartridges in the Brother machine may cause damage to the machine and/or may result in unsatisfactory print quality. Our warranty coverage does not apply to any problem that is caused by the use of unauthorized third party toner and/or cartridges. To protect your investment and obtain premium performance from the Brother machine, we strongly recommend the use of genuine Brother supplies.

- We recommend that you place the drum unit and toner cartridge assembly on a clean, flat surface with a piece of disposable paper underneath it in case you accidentally spill or scatter toner.

- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, wipe or wash it off with cold water at once.

- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

- We recommend that you clean the machine when you replace the consumables. See *Cleaning* on page 82.
• DO NOT unpack a spare toner cartridge until immediately before you put it into the machine. If toner cartridges are left unpacked for a long time the toner life may be shortened.

• DO NOT unpack a spare drum unit until immediately before you put it into the machine. If drum unit is exposed to sunlight or room light the unit may be damaged.

• While removing the drum unit, handle it carefully because it may contain toner.

Note

• Be sure to seal up the used toner cartridge tightly in a suitable bag so that toner powder does not spill out of the cartridge.

• Go to http://www.brother.com/original/index.html for instructions on how to return the used toner cartridge to the brother collection program. If you choose not to return your used toner cartridge, please discard the used toner cartridge according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office.

• To ensure high quality printing, we recommend that you use only genuine Brother toner cartridges. When you want to buy toner cartridges, call your dealer.
Routine Maintenance

**Toner cartridge**

The original toner cartridge that came with the machine may be either a starter, standard or a high yield toner cartridge ¹, and depends on the model and country you bought the machine in.

¹ The starter toner cartridge will print approximately 700 pages, the Standard toner cartridges will print approximately 1,200 pages and the High yield toner cartridges will print approximately 2,600 pages. Pages refers to A4 or Letter-size single-sided pages. Approximate cartridge yield is declared in accordance with ISO/IEC 19752. (A4 or Letter)

**Note**

- The amount of toner used varies according to what is printed on the page and the print density setting.
- If you change the print density setting for lighter or darker printing, the amount of toner used will change.

**TONER LOW**

The Toner LED will turn on for 2 seconds and off for 3 seconds and repeats this pattern.

![Toner LED](image)

If the LEDs show this indication, the toner is low. Buy a new toner cartridge and have it ready before you get a Replace Toner indication. To replace the toner cartridge, see *Replacing the toner cartridge* on page 71.

**Note**

- The Toner LED will flash continuously if the toner is low.
- If the printout is faint, hold the drum unit and toner cartridge assembly level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.
REPLACE TONER
The machine will stop printing until you replace the toner cartridge. A new and unused genuine Brother toner cartridge will reset the REPLACE TONER mode.

Replacing the toner cartridge
Before you replace the toner cartridges, see Before replacing the consumable items on page 67.

1. Make sure that the machine is turned on. Leave the machine for at least 10 minutes to cool down.
2. Open the front cover.
3. Take out the drum unit and toner cartridge assembly.
4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new toner cartridge. Hold the cartridge level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.
6. Pull off the protective cover.

7. Put the new toner cartridge firmly into the drum unit until you hear it lock into place. If you put it in properly, the green lock lever will lift automatically.
8. Clean the primary corona wire inside the drum unit by gently sliding the green tab from right to left and left to right several times.

**Note**
Be sure to return the tab to the home position (▲) (1). If you do not, printed pages may have a vertical stripe.

9. Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.

**Note**
DO NOT turn off the machine’s power switch or open the front cover until the **Ready** LED lights up.
The printing operation varies depending on the machine setting:

- **Default setting (Stop mode)**
  The machine will stop printing until you replace the toner cartridge with a new one when the LEDs indicate **REPLACE TONER**.

- **Continue mode**
  To force the machine to continue printing after the LEDs indicate **REPLACE TONER**, press **Go** seven times to enter Continue mode (all the LEDs flash twice, and then the **Ready** LED turns on). The machine will continue printing until the LEDs indicate **TONER ENDED**.
  To return to the default setting (Stop mode), press **Go** seven times (all the LEDs flash once).

  **Note**
  - Make sure that the front cover is closed before you change the mode.
  - When the LEDs indicate an error mode, you cannot change the mode.
  - If you continue printing in the Continue mode, we cannot guarantee the print quality.
  - While using Continue mode the print may appear faint.

- **Ready mode**
  When you replace the toner cartridge with a new one, the machine returns to the Ready mode.

**TONER ENDED**

The machine stops printing until you replace the toner cartridge with a new one. See *Replacing the toner cartridge* on page 71.
Drum unit

A new drum unit can print approximately 12,000 A4 or Letter size single-sided pages at 1 page / job.

Note

• There are many factors that determine the actual drum life, such as the temperature, humidity, type of paper, type of toner used, number of pages per print job and so on. Under ideal conditions, the average drum life is estimated at approximately 12,000 pages. The actual number of pages that your drum will print may be significantly less than this estimate. Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

• For best performance, use only genuine Brother toner. The machine should be used only in a clean, dust-free environment with adequate ventilation.

• Printing with a non-Brother drum unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage does not apply to problems caused by the use of a non-Brother drum unit.

DRUM END SOON

If the Drum LED flashes, it means the drum unit will need to be replaced soon. We recommend that you replace the drum unit with a new one before there is a noticeable deterioration in the print quality.
**REPLACE DRUM**
If the Drum LED is on, it means the drum unit should be replaced. Please replace it with a new Brother drum unit.

- Toner
- Drum
- Error
- Ready

**DRUM STOP**
If the Drum and Error LEDs are on, it means the drum unit must be replaced. Replace it with a new Brother drum unit.

- Toner
- Drum
- Error
- Ready
Replacing the drum unit

Before you replace the drum unit, see Before replacing the consumable items on page 67.

When you replace the drum unit with a new one, you need to reset the drum counter by completing the following steps:

1. Make sure that the machine is turned on and the Drum LED is flashing. Leave the machine for at least 10 minutes to cool down.

2. Open the front cover.

3. Take out the drum unit and toner cartridge assembly.
4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new drum unit.
6. Put the toner cartridge firmly into the new drum unit until you hear it lock into place. If you put the cartridge in properly, the green lock lever will lift automatically.

7. Put the drum unit and toner cartridge assembly back into the machine. Do not close the front cover yet.
8 Press and hold down Go for about 4 seconds until all the LEDs light up. Once all four LEDs are lit, release Go.

![Diagram showing Go button and LEDs]

**IMPORTANT**
Do not reset the drum counter when you only replace the toner cartridge.

9 Close the front cover.

10 Make sure that the Drum LED is now off.
Cleaning

Clean the outside and inside of the machine regularly with a dry, lint-free cloth. When you replace the toner cartridge or the drum unit, make sure that you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

**WARNING**

DO NOT use cleaning materials that contain ammonia, alcohol, any type of spray, or any type of flammable substance to clean the outside or inside of the machine. Doing this may cause a fire or electrical shock.

Be careful not to inhale toner.

**IMPORTANT**

Use neutral detergents. Cleaning with volatile liquids such as thinner or benzine will damage the surface of the machine.
Routine Maintenance

Cleaning the outside of the machine

1. Turn off the machine's power switch. Disconnect all cables, and then unplug the power cord from the AC power outlet.

2. Pull the paper tray completely out of the machine.

3. Wipe the outside of the machine with a dry, lint-free cloth to remove dust.

4. Remove all the paper, and anything that is stuck inside, from the paper tray.

5. Wipe the inside of the paper tray with a dry, lint-free cloth to remove dust.

6. Put the paper back in the paper tray.

7. Put the paper tray back in the machine.

8. Plug the machine's power cord back into the AC power outlet first, and then reconnect all cables. Turn on the machine's power switch.
Cleaning the corona wire

If you have print quality problems, clean the corona wire as follows:

1. Open the front cover and leave the machine for at least 10 minutes to cool down.

2. Take out the drum unit and toner cartridge assembly.

**IMPORTANT**

- We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
3 Clean the primary corona wire inside the drum unit by gently sliding the green tab from right to left and left to right several times.

Note
Be sure to return the tab to the home position (▲) (1). If you do not, printed pages may have a vertical stripe.

4 Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.
Routine Maintenance

Cleaning the drum unit

If your printout has white or black spots at 94 mm (3.71 in.) intervals, follow the steps below to solve the problem.

1. Prepare blank A4 or Letter size paper.
2. Make sure the machine is in the Ready mode.
3. Open the front cover and the back cover (face-up output tray).
Routine Maintenance

Note

Make sure that the two green envelope levers on the left and right hand sides are in the up position.

4 Press Go five times.

5 Close the front cover. The machine will prepare the Drum Cleaning process. When the machine is ready for the Drum Cleaning process, the Ready LED turns on.

6 Open the manual feed slot cover.
Using both hands, slide the manual feed paper guides to the width of the paper that you are going to use.

Using both hands, put one piece of A4 or Letter size paper in the manual feed slot until the top edge of the paper touches the paper feed roller. When you feel the machine pull in the paper, let go. The machine will start the Drum Cleaning process. The Ready LED flashes during the Drum Cleaning process.

**Note**
- The machine makes a mechanical noise during the Drum Cleaning process because the machine rotates the OPC drum in reverse. This noise is not due to a malfunction of the machine.
- DO NOT put more than one sheet of paper in the manual feed slot at any one time, as it may cause a jam.
- If the paper in the manual feed slot is other than A4 or Letter size, the machine will stop the Drum Cleaning process and eject the paper.
- Make sure that the paper is straight and in the proper position on the manual feed slot. If it is not, it may not be fed properly, resulting in a skewed printout or a paper jam.
- DO NOT close the back cover (face-up output tray) during the Drum Cleaning process. The machine will stop the Drum Cleaning process and eject the paper. It may cause a jam.
- If the machine receives a print job before you put one sheet of paper in the manual feed slot, the machine will stop the Drum Cleaning process and print the print job.
When the machine has finished cleaning it returns to the Ready mode.

Repeat steps 3 to 5 two more times using a new blank sheet of paper each time. Upon completion please discard the used paper.

If the problem is not solved yet, follow the steps below:

1. Turn off the machine’s power switch. Disconnect all the cables, and then unplug the power cord from the AC power outlet. Leave the machine turned off for at least 10 minutes to cool down.

2. Open the front cover.

3. Take out the drum unit and toner cartridge assembly.
**IMPORTANT**

- We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4 Push down the green lock lever and take the toner cartridge out of the drum unit.
5. Put the print sample in front of the drum unit, and find the exact position of the poor print.

6. Turn the drum unit gear by hand while looking at the surface of the OPC drum (1).

7. When you have found the mark on the drum that matches the print sample, wipe the surface of the OPC drum with a dry cotton swab until the dust or glue on the surface comes off.
IMPORTANT
DO NOT clean the surface of the photosensitive drum with a sharp object.

8. Put the toner cartridge back into the drum unit until you hear it lock into place. If you put the cartridge in properly, the green lock lever will lift automatically.

9. Open the front cover. Put the drum unit and toner cartridge assembly back into the machine.

10. Put the paper tray firmly back in the machine.

11. Close the front cover.
Plug the machine's power cord back into the AC power outlet first, and then reconnect all cables. Turn on the machine's power switch.

**Cleaning the paper pick-up roller**

If the paper pick-up roller is dirty, the machine may not feed paper. In that case, clean the paper pick-up roller as follows:

1. Turn off the machine's power switch. Disconnect all cables, and then unplug the power cord from the AC power outlet.
2. Pull the paper tray out of the machine.
3. Remove all the paper, and anything that is stuck inside, from the paper tray.
4. Tightly wring out a lint-free cloth soaked in lukewarm water, and then in the paper tray wipe the separator pad (1) to remove any dust.
Routine Maintenance

5. Wipe the two paper pick-up rollers (1) inside the machine.

6. Put the paper back in the paper tray.

7. Put the paper tray back in the machine.

8. Plug the machine’s power cord back into the AC power outlet first, and then reconnect all cables. Turn on the machine’s power switch.
Packing and shipping the machine

Note
If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier.

1. Turn off the machine's power switch. Disconnect all the cables, and then unplug the power cord from the AC power outlet. Leave the machine turned off for at least 10 minutes to cool down.

2. Open the front cover.

3. Take out the drum unit and toner cartridge assembly.

IMPORTANT
- We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
4. Put the protective material in the machine with the "REMOVE" text to the left, as shown in the illustration.

5. Put the drum unit and toner cartridge assembly back into the machine.

6. Put the elastic band over the handle of the drum unit, as shown in the illustration.

7. Close the front cover.

8. Put the machine into the bag it originally came in.
9 Put the styrofoam piece marked "RIGHT" on the right side of the machine. Put the styrofoam piece marked "LEFT" on the left side of the machine.

10 Put the machine into the original carton.
11. Put the AC power cord and printed materials in the original carton as shown in the illustration.

12. Close the carton and tape it shut.
You can correct most problems by yourself. If you need additional help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips. Visit us at http://solutions.brother.com/.

Identifying your problem

First, check the following:
- The AC power cord is connected properly and the machine is turned on.
- All of the protective parts have been removed.
- The toner cartridge and drum unit is installed properly.
- The front cover, back cover, and fuser cover are completely closed.
- Paper is inserted properly in the paper tray.
- The interface cable is securely connected to the machine and the computer.
- The correct driver for the machine has been chosen and is installed.
- The computer is set up to connect to the correct machine port.

Machine does not print:
If you did not solve your problem with the above checks, identify your problem and then go to the page suggested below.

- **Machine’s LEDs are flashing**
  See LEDs (Light Emitting Diodes) on page 53.
- **Status Monitor Error Message appears**
  See Error messages in the Status Monitor on page 100.
- **Paper handling**
  (See Paper handling on page 102 and Paper jams and how to clear them on page 104.)
- **Other problems**
  (See Other problems on page 119.)

Pages are printed, but there are problems with:

- **Print quality**
  (See Improving the print quality on page 111.)
- **Printout is incorrect**
  (See Solving print problems on page 118.)
# Error messages in the Status Monitor

The Status Monitor will report problems with the machine. Take the proper action by referring to the following table.

If you want to turn the status monitor on, see *Status Monitor* on page 38 (For Windows® user) or *Status Monitor* on page 50 (For Macintosh users).

## Paper handling

First, make sure that you are using paper that meets Brother’s recommended paper specifications. (See Acceptable paper and other print media on page 3.)

<table>
<thead>
<tr>
<th>Problem</th>
<th>Recommendation</th>
</tr>
</thead>
</table>
| The machine does not feed paper.       | - If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it before printing. Sometimes it is helpful to remove the paper, turn the stack over, and then put it back in the paper tray. If the paper continues to curl, replace the paper.  
- Reduce the amount of paper in the paper tray, and then try again.  
- Make sure that manual feed mode is not chosen in the printer driver.  
- Clean the paper pick-up roller. See Cleaning the paper pick-up roller on page 93. |
| The machine does not feed paper from the manual feed slot. | - Put only one sheet of paper in the manual feed slot.  
- Make sure that you have chosen Manual in Paper Source of the printer driver. |
| The machine does not feed envelopes.    | - The machine feeds envelopes from the manual feed slot. You must set up your application to print on the size of envelopes you are using. This is usually done in the page setup or document setup menu of your software. (See your application manual.) |
| A paper jam has occurred.               | - Clear the jammed paper. (See Paper jams and how to clear them on page 104.) |
| The machine does not print.             | - Make sure that the cable is connected to the machine.  
- Make sure the machine is powered on and that no error LEDs are lit on the machine control panel.  
- Make sure that you have chosen the correct printer driver. |
| When printing on normal paper, it creases. | - Change the printer driver setting in Media Type to a thin setting. |
### Troubleshooting

Paper jams and how to clear them

If a paper jam occurs, the machine will flash the Error LED as shown below.

- Toner
- Drum
- Error
- Ready

⚠️ CAUTION

⚠️ HOT SURFACE
- After you have just used the printer, some internal parts will be extremely hot. Wait at least 10 minutes for the machine to cool down.
- To prevent any degradation to the print quality, DO NOT touch the shaded parts shown in the illustrations.

Clear the jammed paper as follows.

If the jammed paper is removed completely by following the steps below, you can install the paper tray first, and then close the front cover. The machine will resume printing automatically.

If the machine does not start printing automatically, press Go. If the machine still does not start printing, check that all the remaining jammed paper has been removed from the machine. Then try printing again.
Note

- Always remove all paper from the paper tray and straighten the stack when you add new paper. This helps prevent multiple sheets of paper from feeding through the machine at one time and prevents paper jams.
- Please confirm that you have installed both a toner cartridge and a drum unit in the machine. If you have not installed a drum unit or have installed the drum unit improperly, then this may cause a paper jam in your Brother machine.

1. Open the front cover and leave the machine for at least 10 minutes to cool down.

2. Slowly take out the drum unit and toner cartridge assembly. The jammed paper may be pulled out with the drum unit and toner cartridge assembly, or this may release the paper so you can pull it out of the paper tray opening.
**IMPORTANT**

- We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.
- To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

3 Close the front cover.

**Note**

Do not put the drum unit and toner cartridge assembly back in at this point.

4 Pull the paper tray completely out of the machine.

5 Use both hands to slowly pull out the jammed paper.
6 Open the back cover (face-up output tray).

7 Pull down the tabs at the left and right hand sides to open the fuser cover (1).

8 Using both hands, gently pull the jammed paper out of the fuser unit.

9 Close the fuser cover and the back cover (face-up output tray).
10. Pull the duplex tray completely out of the machine.

11. Pull the jammed paper out of the machine or the duplex tray.

12. Make sure that the jammed paper does not remain under the machine from static electricity.

13. Put the duplex tray back in the machine.
14 Put the paper tray firmly back in the machine.

15 Push down the green lock lever and take the toner cartridge out of the drum unit. Clear the jammed paper if there is any inside the drum unit.

**IMPORTANT**

- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, wipe or wash it off with cold water at once.
- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
16 Put the toner cartridge back into the drum unit until you hear it lock into place. If you put the cartridge in properly, the green lock lever will lift automatically.

17 Open the front cover. Put the drum unit and toner cartridge assembly back into the machine.

18 Close the front cover.

19 Make sure that the Error LED is off and then, the Ready LED lights. If the machine does not start printing automatically, press Go.
## Improving the print quality

If you have a print quality problem, print a test page first (see *Print a test page* on page 61). If the printout looks good, the problem is probably not the machine. Check the interface cable or try the machine on another computer.

Using non-Brother supplies may affect the print quality, hardware performance, and machine reliability.

This section gives information on the following topics.

<table>

</thead>
</table>
| ▪ Choose **Reduce Paper Curl** mode in the printer driver when you do not use our recommended paper. See **Improve Print Output** in **Other Print Options...** on page 32 (For Windows®) or **Print Settings** on page 43 (For Macintosh).  
▪ Turn the paper over in the paper tray, and print again. (Excluding letterhead paper) If the problems remains, switch the Anti-Curl Levers as follows:  
  1. Open the back cover.  
  2. Lift the lever (1) and slide the two gray levers (2) in the direction of the arrow. |
# Solving print problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Recommendation</th>
</tr>
</thead>
</table>
| The machine prints unexpectedly or it prints garbage data.             | - Make sure that the printer cable is not too long. We recommend that you use a USB cable that is no longer than 2 meters (6.5 feet).  
- Make sure that the printer cable is not damaged or broken.  
- If you are using an interface-switching device, remove it. Connect your computer directly to your machine, and then try again.  
- Make sure that you have chosen the correct printer driver with ‘Set as Default Printer’.  
- Make sure that the machine is not connected to the same port that is also connected to a storage device or scanner. Remove all other devices and connect the machine to the port only. |
| The machine cannot print full pages of a document. An error message MEMORY FULL appears. | - Press Go to print the remaining data in the machine’s memory. Cancel the print job if you want to delete the remaining data in the machine memory. (See Go button on page 60.)  
- Reduce the complexity of your document or reduce the print resolution. |
| The machine cannot print full pages of a document. An error message PRINT OVERRUN appears. | - Press Go to print the remaining data in the machine memory. Cancel the print job if you want to delete the remaining data in the machine memory. See Go button on page 60.  
- Reduce the complexity of your document or select a lower print resolution.  
- (HL-2250DN / HL-2270DW only)  
  Change the following settings in the supplied Windows® driver and try again. The best combination of these settings will vary depending on your document:  
  - Graphics  
  - TrueType mode  
  - Use Printer TrueType® Fonts  
  1 Choose the Basic tab, choose Manual in Print Settings, and then click Manual Settings... |
| The headers or footers appear when the document displays on the screen but they do not show up when it is printed. | - Adjust the top and bottom margins of your document. |
Network problems (HL-2250DN / HL-2270DW only)

For problems concerning using your machine on a Network, see the Network User’s Guide. The latest Network User’s Guide in PDF format is available by accessing the Brother Solutions Center (http://solutions.brother.com/).

---

\(^1\) The printing speed may change depending on the type of document you print.

\(^2\) Print speed may be slower when the machine is connected by wireless LAN (HL-2270DW only).

\(^3\) From standard paper tray.

\(^4\) First print out time may change if the machine is calibrating or registering itself.

Important information for choosing your paper

This section gives information to help you choose paper to use with this machine.

Note
If you use paper that is not recommended, a paper jam or misfeed may occur in the machine.

Before you buy a large quantity of paper
Make sure that the paper is suitable for the machine.

Paper for plain paper copies
Paper is divided by usage, such as paper for printing and paper for copying. The usage is usually written on the paper’s package. Check the package to see whether it is suitable for laser printers. Use paper that is suitable for laser printers.

Basis weight
The basis weight of the paper in general use varies in different countries. We recommend that you use paper that weighs 75 to 90 g/m² (20 to 24 lb), although this machine is able to cope with thinner or thicker paper than these weights.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Europe</th>
<th>USA</th>
</tr>
</thead>
<tbody>
<tr>
<td>g/m²</td>
<td>80 to 90</td>
<td>75 to 90</td>
</tr>
<tr>
<td>lb</td>
<td></td>
<td>20 to 24</td>
</tr>
</tbody>
</table>

Long grain and short grain
The pulp fiber of the paper is aligned during paper manufacturing. Paper can be classified into two types, long grain and short grain.

Long grain paper fibers run in the same direction as the long edge of the paper. Short grain paper fibers run perpendicular to the long edge of the paper. Though most plain paper for copying is long grain, some is short grain. We recommend that you use long grain paper for this machine. Short grain paper is too weak for the paper transport of the machine.

Acid paper and neutralized paper
Paper can be classified as either acid paper or neutralized paper.

Though modern paper manufacture methods started with acid paper, neutralized paper is recently taking the place of acid paper because of environmental issues.

However, many forms of acid paper can be found in recycled paper. We recommend that you use neutralized paper for this machine.

You can use an acid paper check pen to distinguish acid paper from neutral paper.
Print surface
The characteristics of the face side and reverse side of a sheet of paper may vary a little.
Usually, the opening side of the paper ream package is the print side. Follow the instructions on the paper package. Typically, the print side is indicated by an arrow.

Moisture content
Moisture content is the amount of water left in the paper after manufacture. It is one of the important characteristics of the paper. This can change greatly depending on the storage environment, although usually paper contains about 5% water by weight. Because paper often absorbs water, the amount of water can sometimes be about 10% in a high humidity environment. When the amount of water increases, the characteristics of the paper changes greatly. The fixing of the toner may become worse. For storage of the paper and during use, we recommend that the humidity of the surrounding environment be between 50% and 60%.

Symbol and character sets (HL-2250DN / HL-2270DW only)

For the HP LaserJet emulation modes, you can choose the symbol and character sets using Web Based Management (Web browser) when connected to a network.

How to use Web Based Management (Web browser)

To use Web Based Management (Web browser), follow the steps below.

1. Start your Web browser.
2. Type http://printer_ip_address/ into your browser. (Where printer_ip_address is the IP address or the node name)
   - For example: http://192.168.1.2/ (if the machine’s IP address is 192.168.1.2.)
3. Click Printer Settings.
4. Enter a user name and a password.
5. Click OK.
6. Choose the HP LaserJet tab and click Font Setup. Choose a symbol set you want to use from the Symbol Set list box.

Note

- We recommend Microsoft® Internet Explorer® 6.0 (or greater) or Firefox 3.0 (or greater) for Windows® and Safari 3.0 (or greater) for Macintosh. Please also make sure that JavaScript and cookies are always enabled in whichever browser you use. To use a Web browser, you will need to know the IP address of the print server.

- If you have edited the hosts file on your computer or are using a Domain Name System, you can also enter the DNS name of the print server.

- For Windows® users, as the print server supports TCP/IP and NetBIOS, you can also enter the NetBIOS name of the print server. The NetBIOS name can be seen on the printer settings page. The NetBIOS name assigned is the first 15 characters of the node name and by default it will appear as “BRNxxxxxxxxxxxx” for a wired network or “BRWxxxxxxxxxxxx” for a wireless network.

- For Macintosh users, you can also have easy access to Web Based Management by clicking the machine icon on Status Monitor screen.

Note

- The login name for the Administrator is “admin” (case sensitive) and the default password is “access”.

Quick reference for bar code control commands  
(HL-2250DN / HL-2270DW only)

The machine can print bar codes in the HP LaserJet emulation modes.

Print bar codes or expanded characters

<table>
<thead>
<tr>
<th>Code</th>
<th>ESC i</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dec</td>
<td>27 105</td>
</tr>
<tr>
<td>Hex</td>
<td>1B 69</td>
</tr>
</tbody>
</table>

Format: ESC i n ... n \n
Creates bar codes or expanded characters according to the segment of parameters ‘n ... n’. For more information about parameters, see the following Definition of Parameters. This command must end with the ‘\’ code (5CH).

Definition of parameters

This bar code command can have the following parameters in the parameter segment (n ... n). As parameters are effective within the single command syntax ESC i n ... n \, they do not apply in the bar code commands. If certain parameters are not given, they take the preset settings. The last parameter must be the bar code data start (‘b’ or ‘B’) or the expanded character data start (‘l’ or ‘L’). Other parameters can be given in any sequence. Each parameter can start with a lower-case or upper-case character, for example, ‘t0’ or ‘T0’, ‘s3’ or ‘S3’ and so one.

Bar code mode

n = ‘t0’ or ‘T0’          CODE 39 (default)  
n = ‘t1’ or ‘T1’          Interleaved 2 of 5  
n = ‘t3’ or ‘T3’          FIM (US-Post Net)  
n = ‘t4’ or ‘T4’          Post Net (US-Post Net)  
n = ‘t5’ or ‘T5’          EAN 8, EAN 13, or UPC A  
n = ‘t6’ or ‘T6’          UPC E  
n = ‘t9’ or ‘T9’          Codabar  
n = ‘t12’ or ‘T12’        Code 128 set A  
n = ‘t13’ or ‘T13’        Code 128 set B  
n = ‘t14’ or ‘T14’        Code 128 set C  
n = ‘t130’ or ‘T130’      ISBN (EAN)  
n = ‘t131’ or ‘T131’      ISBN (UPC-E)  
n = ‘t132’ or ‘T132’      EAN 128 set A  
n = ‘t133’ or ‘T133’      EAN 128 set B
This parameter selects the bar code mode as shown above. When n is ‘t5’ or ‘T5’ the bar code mode (EAN 8, EAN 13, or UPC A) varies according to the number of characters in the data.

**Bar code, expanded character, line block drawing and box drawing**

- n = ‘s0’ or ‘S0’
- n = ‘s1’ or ‘S1’
- n = ‘s3’ or ‘S3’

This parameter chooses the bar code style as above. When the EAN 8, EAN 13, UPC-A, Code 128 or EAN 128 bar code mode is chosen, this bar code style parameter is ignored.

**Expanded Character**

- ‘S’
  - 0 = White
  - 1 = Black
  - 2 = Vertical stripes
  - 3 = Horizontal stripes
  - 4 = Cross hatch

For example ‘S’ n1 n2

- n1 = Background fill pattern
- n2 = Foreground fill pattern

If ‘S’ is followed by only one parameter, the parameter is a foreground fill pattern.

**Line block drawing & box drawing**

- ‘S’
  - 1 = Black
  - 2 = Vertical stripes
  - 3 = Horizontal stripes
  - 4 = Cross hatch

**Bar code**

- n = ‘mnnn’ or ‘Mnnn’ (nnn = 0 ~ 32767)

This parameter shows the bar code width. The unit of ‘nnn’ is a percentage.

**Bar code human readable line ON or OFF**

- n = ‘r0’ or ‘R0’ Human readable line OFF
- n = ‘r1’ or ‘R1’ Human readable line ON
### Appendix

#### Preset: Human readable line ON

1. ‘T5’ or ‘t5’
2. ‘T6’ or ‘t6’
3. ‘T130’ or ‘t130’
4. ‘T131’ or ‘t131’

#### Preset: Human readable line OFF

All others

This parameter shows whether the machine prints the human readable line below the bar code. Human readable characters are always printed with OCR-B font of 10 pitch and all the current character style enhancements are masked. The default setting is determined by the bar code mode selected by ‘t’ or ‘T’.

### Quiet zone

\[ n = 'onnn' \text{ or } 'Onnn' \quad (nnn = 0 \sim 32767) \]

Quiet zone is the space on both sides of the bar codes. Its width can be shown using the units that are set by the ‘u’ or ‘U’ parameter. (For the description of ‘u’ or ‘U’ parameter, see the next section.) The default setting of the quiet-zone width is 1 inch.

### Bar code, expanded character unit, line block drawing and box drawing

\[ n = 'u0' \text{ or } 'U0' \quad \text{mm (preset)} \]
\[ n = 'u1' \text{ or } 'U1' \quad 1/10 \]
\[ n = 'u2' \text{ or } 'U2' \quad 1/100 \]
\[ n = 'u3' \text{ or } 'U3' \quad 1/12 \]
\[ n = 'u4' \text{ or } 'U4' \quad 1/120 \]
\[ n = 'u5' \text{ or } 'U5' \quad 1/10 \text{ mm} \]
\[ n = 'u6' \text{ or } 'U6' \quad 1/300 \]
\[ n = 'u7' \text{ or } 'U7' \quad 1/720 \]

This parameter shows the measurement units of X-axis offset, Y-axis offset, and bar code height.

### Bar code, expanded character, line block drawing and box drawing offset in X-axis

\[ n = 'xnnn' \text{ or } 'Xnnn' \]

This parameter shows the offset from the left margin in the ‘u’- or ‘U’-specified unit.

### Bar code & expanded character offset in Y-axis

\[ n = 'ynnn' \text{ or } 'Ynnn' \]

This parameter shows the downward offset from the current print position in the ‘u’- or ‘U’-specified unit.
Appendix

Bar code, expanded character, line block drawing and box drawing height

\[ n = 'hnnn', 'Hnnn', 'dnnn', or 'Dnnn' \]

1. EAN13, EAN8, UPC-A, ISBN (EAN13, EAN8, UPC-A), ISBN (UPC-E): 22 mm
2. UPC-E: 18 mm
3. Others: 12 mm

Expanded characters \( \rightarrow 2.2 \) mm (preset)
Line block drawing and box drawing \( \rightarrow 1 \) dot

This parameter shows the height of bar codes or expanded characters as shown above. It can start with 'h', 'H', 'd', or 'D'. The height of bar codes is shown in the 'u'- or 'U'-specified unit. The default setting of the bar code height (12 mm, 18 mm or 22 mm) is determined by the bar code mode selected by 't' or 'T'.

Expanded character width, line block drawing and box drawing

\[ n = 'wnnn' or 'Wnnn' \]

Expanded character \( \rightarrow 1.2 \) mm
Line block drawing and box drawing \( \rightarrow 1 \) dot

This parameter shows the width of expanded characters as shown above.

Expanded character rotation

\[ \begin{align*}
  n & = 'a0' or 'A0' & \text{'Upright (preset)'} \\
  n & = 'a1' or 'A1' & \text{'Rotated 90 degrees'} \\
  n & = 'a2' or 'A2' & \text{'Upside down, rotated 180 degrees'} \\
  n & = 'a3' or 'A3' & \text{'Rotated 270 degrees'}
\end{align*} \]

Bar code data start

\[ n = 'b' or 'B' \]

Data that follows 'b' or 'B' is read in as bar code data. Bar code data must end with the ' \' code (5CH), which also ends this command. The acceptable bar code data is determined by the bar code mode selected by 't' or 'T'.

- When CODE 39 is chosen with the parameter 't0' or 'T0'
  
  Forty three characters '0' to '9', 'A' to 'Z', '-', '.', '(', space)', ',', '/', '\', '+', and '%' can be accepted as bar code data. Other characters will cause a data error. The number of characters for bar codes is not limited. The bar code data automatically starts and ends with an asterisk ' * ' (start character and stop character). If the received data has an asterisk ' * ' at the beginning or end, the asterisk is regarded as a start character or stop character.

- When Interleaved 2 of 5 is selected with the parameter 't1' or 'T1':
  
  Ten numerical characters '0' to '9' can be accepted as bar code data. Other characters cause a data error. The number of characters for bar codes is not limited. This mode of bar codes needs even characters. If the bar code data has odd characters, '0' is automatically added to the end of the bar code data.
When FIM (US-Post Net) is selected with the parameter ‘t3’ or ‘T3’
   Characters ‘A’ to ‘D’ are valid and one digit of data can be printed. Upper-case and lower-case alphabet characters can be accepted.

When Post Net (US-Post Net) is selected with the parameter ‘t4’ or ‘T4’
   Numbers ‘0’ to ‘9’ can be data and it must end with a check digit. ‘?’ can be used instead of the check digit.

When EAN 8, EAN 13, or UPC A is selected with the parameter ‘t5’ or ‘T5’
   Ten numbers ‘0’ to ‘9’ can be accepted as bar code data. The number of characters for bar codes is limited as follows:
   EAN 8: Total 8 digits (7 digits + 1 check digit)
   EAN 13: Total 13 digits (12 digits + 1 check digit)
   UPC A: Total 12 digits (11 digits + 1 check digit)
   A number of characters other than those stated above will cause a data error that results in the bar code data being printed as normal print data. If the check digit is not correct, the machine decides the correct check digit automatically so that the correct bar code data will be printed. When EAN13 is selected, adding ‘+’ and a two-digit or five-digit number after the data can create an add-on code.

When UPC-E is selected with the parameter ‘t6’ or ‘T6’:
   The numbers ‘0’ to ‘9’ can be accepted as bar code data.

   Eight digits 1 2 (standard format) The first character must be ‘0’ and the data must end with a check digit.
   Total eight digits = ‘0’ plus 6 digits plus 1 check digit.
   Six digits 2 The first character and the last check digit are removed from the eight digit data.

1 ‘?’ can be used instead of a check digit.
2 Adding ‘+’ and two-digit or five-digit number after the data creates an add-on code.

When Codebar is chosen with the parameter ‘t9’ or ‘T9’
   Characters ‘0’ to ‘9’, ‘-’, ‘.’, ‘/’, ‘+’, ‘:’ can be printed. Characters ‘A’ to ‘D’ can be printed as a start-stop code, which can be upper case or lower case. If there is no start-stop code, errors will happen. A check digit cannot be added and using ‘?’ causes errors.

When Code 128 Set A, Set B, or Set C is selected with the parameter ‘t12’ or ‘T12’, ‘t13’ or ‘T13’, or ‘t14’ or ‘T14’
   Code 128 sets A, B and C can be individually selected. Set A shows characters Hex 00 to 5F. Set B includes characters Hex 20 to 7F. Set C includes the pairs 00 to 99. Switching is allowed between the code sets by sending %A, %B, or %C. FNC 1, 2, 3, and 4 are produced with %1, %2, %3, and %4. The SHIFT code, %S, allows temporary switching (for one character only) from set A to set B and vice versa. The ‘%’ character can be encoded by sending it twice.

When ISBN (EAN) is selected with the parameter ‘t130’ or ‘T130’
   The same rules apply as for ‘t5’ or ‘T5’.

When ISBN (UPC-E) is selected with the parameter ‘t131’ or ‘T131’:
   The same rules apply as for ‘t6’ or ‘T6’.
When EAN 128 set A, set B or set C is selected with the parameter ‘t132’ or ‘T132’, ‘t133’ or ‘T133’ or ‘t134’ or ‘T134’
The same rules apply as for ‘t12’ or ‘T12’, ‘t13’ or ‘T13’, or ‘t14’ or ‘T14’.

**Box drawing**
ESC i ... E (or e)
‘E’ or ‘e’ is a terminator.

**Line block drawing**
ESC i ... V (or v)
‘V’ or ‘v’ is a terminator.

**Expanded character data start**
n = ‘l’ or ‘L’
Data that follows ‘l’ or ‘L’ is read as expanded character data (or labeling data). Expanded character data must end with the ‘\’ code (5CH), which also ends this command.
# Table of Code (EAN) 128 set C

Code (EAN) 128 set C describes an original command. The correspondence table is as follows.

<table>
<thead>
<tr>
<th>No.</th>
<th>Code 128 Set C</th>

Appendix (for Europe and Other Countries)

Brother numbers

**IMPORTANT**
For technical and operational help, you must call the country where you bought the machine. Calls must be made *from within* that country.

Register your product
Please complete the Brother Warranty Registration or, for your convenience and most efficient way to register your new product, register on-line at

```
http://www.brother.com/registration/
```

Frequently asked questions (FAQs)
The Brother Solutions Center is our one-stop resource for all your machine needs. You can download the latest drivers, software and utilities, read FAQs and troubleshooting tips to learn how to get the most from your Brother product.

```
http://solutions.brother.com/
```

You can check here for Brother driver updates.

Customer Service
Visit [http://www.brother.com](http://www.brother.com/) for contact information on your local Brother office.

Service center locations
For service centres in Europe, contact your local Brother Office. Address and telephone contact information for European offices can be found at [http://www.brother.com](http://www.brother.com/) by selecting your country.

Internet Addresses
Brother Global Web Site: [http://www.brother.com](http://www.brother.com/)

Brother numbers

For technical and operational help, you must call the country where you bought the machine. Calls must be made from within that country.

Register your product
By registering your product with Brother International Corporation, you will be recorded as the original owner of the product.

Your registration with Brother:
- may serve as a confirmation of the purchase date of your product should you lose your receipt;
- may support an insurance claim by you in the event of product loss covered by insurance; and,
- will help us notify you of enhancements to your product and special offers.

Please complete the Brother Warranty Registration or, for your convenience and most efficient way to register your new product, register on-line at
