Flower part (red): 0.91" x 0.94"
Leaves (yellow-green): 2.96" x 3.62"

Simple bag, leather bond, vinyl bond

Tip You can make an attractive charm simply by cutting two identical pieces using the same built-in pattern. Then glue them together and add a chain.

1 Measure the third-party bag you want to embellish, and decide on the designs to use.

2 Make the decorative pieces.
Select the built-in patterns for the wine bottle, glass, flower, and leaves and the semicircular basic shape, then flip them.
Built-in Patterns: AR-E020
 AR-A020
 BA-A053
 AR-E024
 AR-A025

3 Cut the leather.
Replace the blade on the machine with the deep cutting blade specifically designed for thick material, mount the leather on a cutting mat with its top (outer) surface facing the mat, then perform cutting.

4 Enter the text using a built-in font, then angle it as shown in the photo.
Built-in Pattern: FO-A004

5 Add the square from the basic shapes. Position it with the pieces from step 4, use Unify to group them, then flip and cut.

6 When all decorative pieces have been cut, use leather and vinyl bond to attach them to the bag.
