

## Julie Fei-Fan Balzer

Looking for a way to show your love with a personalized touch on Valentine's Day (or any day)? We've got an awesome little gift idea that is sure to amaze. Follow along and let your creativity shine in this easy glitter magnet tutorial. We will even show you how to wrangle your glitter. Imagine - no more glitter bits all over the house!

### MATERIALS:

ScanNCut; Deep Cut Blade; Standard Blade; Standard Mat; Adhesive-Backed Magnet Sheet; Stencil Material; Spatula; Deli Paper; Glitter; Glue/Sealant

**step 1.** Open "Patterns" > "Standard Shapes" >> "Heart". Size as desired. Click "Set".

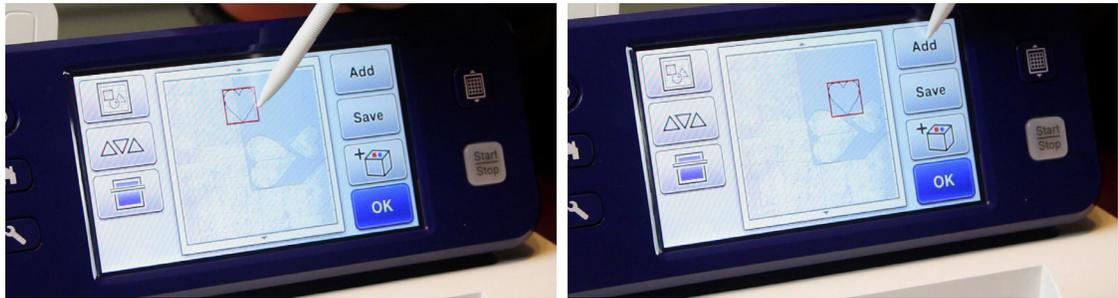

**step 2.**

Place adhesive-backed magnet sheet with the magnet side facing down onto the mat. Select "Load Mat" > "Scan".

- step 3.** Drag the heart shape onto the magnet material, and perform a test cut. (Be sure to drag the heart shape onto the material.)

- step 4.** Using the Deep Cut Blade, perform a test cut. (Settings of “Cut Speed”: 1 and “Cut Pressure”: 5 were used.)

- step 5.** Once cutting has completed, unload the mat.

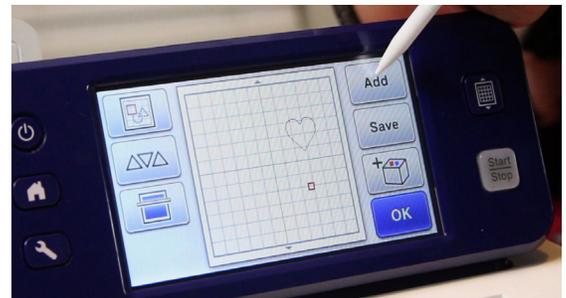

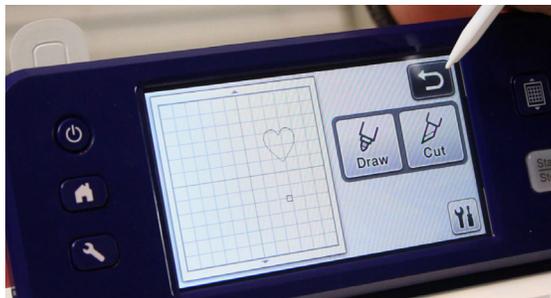

- step 6.** Remove the heart shape (and remaining material) from the mat.

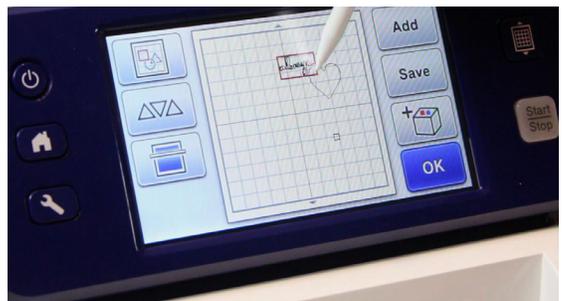

**step 7.** Place stencil material on a mat. Select “Load Mat”.

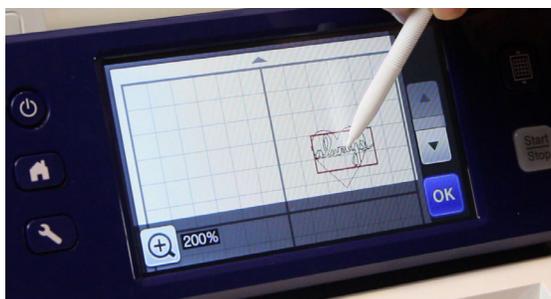

**step 8.** Press the “Back” button and (leaving the previous heart on the screen), press “Add”.

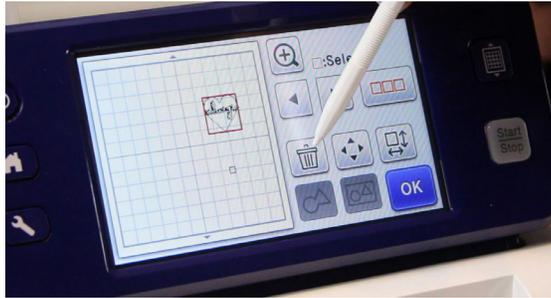

**step 9.** Add handmade script, or other text, and place over the heart shape.

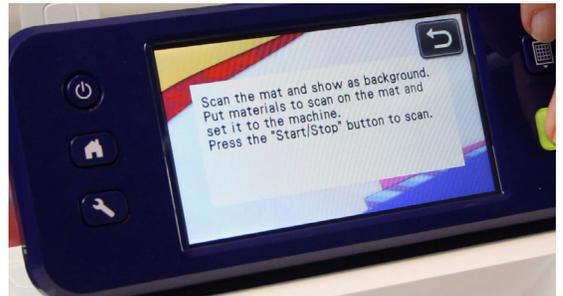

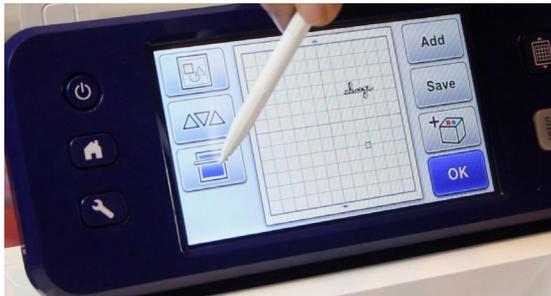

**step 10.** To adjust to fit in the hearts, go to “Edit” > “Zoom” >> “Resize”. Adjust so there is a slight overlap on the edges

**step 11.** Choose the heart shape and delete (but leaving the wording and test cut). Click “OK”.

**step 12.** Scan in stencil material.

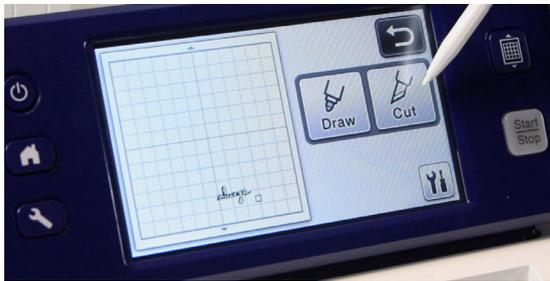

**Tip:** Draw a black line around the material so you can see it easier once it has been scanned.

**step 13.** Place the test cut and the wording. Switch the Deep Cut Blade back to a Standard Blade, and click “OK”.

**step 14.** Perform the test cut, and cut the wording. Select “Unload Mat.”

**step 15.** Remove all pieces. (The Spatula Tool is best for delicate items, such as the wording.)

**step 16.** Place the magnet onto a piece of deli paper and remove the backing.

**step 17.** Stick the stencil down onto the revealed adhesive in the center.

**Tip:** To ensure the stencil is stuck down, press the release paper back over the heart shape to press all over.

**step 18.** Take one color of glitter and cover the heart shape. Gently pick up the heart shape, and shake off glitter.

**Tip:** Use a soft-bristled brush to remove excess glitter

**step 19.** Over a new piece of deli paper, carefully remove the stencil.

**step 20.** With a second color of glitter, shake off extra glitter.

**step 21.** To ensure the glitter is permanent, cover with a clear sealant.
