The New MPrint micro printer from Brother

Even in these "electronic" times, there are many occasions when a hard copy is needed – and it's usually when you're away from your desk or out of the office. Now it's no longer a problem, with the compact Brother MPrint micro printer which lets you print from your PDA or laptop, wherever you may be.

MPRINT

MW-140BT  Bluetooth®

Designed for modern business

Today's business requirements demand mobility, and modern business tools allow us to communicate wherever we are, and whenever we need to. From PDAs to laptops we are able to send and receive messages and files around our business world. Until now, the ability to print these files with the same degree of mobility and flexibility, has been less advanced.

The Brother MPrint micro printer is lightweight, compact and can print from tablets, laptops and both Palm® and PocketPC® based PDAs. Its "pocket size" means it can be carried effortlessly in a bag or even a jacket pocket. It uses ThermaPlus® M paper that automatically feeds from its own internal paper cassette, eliminating the need to individually feed each sheet, thus ensuring the paper is easy to handle and doesn't curl.

Quality printing anywhere, anytime.

Endless printing applications

With 5 paper cassette types available, the MPrint micro printer delivers true printing versatility;

- **ThermaPlus M paper:** a lightweight paper ideal for work in progress and information sharing.
 - Feels like plain paper
 - Easy to write on
 - Works with standard highlighters
 - Reduces print fading

- **Carbon Copy:** 2-ply sheets allow duplication when authorization or proof of receipt is required.†
- **Labels:** Self-adhesive label for meeting notes and mailing labels.
- **Cut labels (4):** Small labels ready cut, ideal for address labels, notes and marking reports.
- **Cut labels (2):** Larger horizontal labels ideal for envelopes or custom made conference badges.

† Development of a custom application using a Software Development Kit from Brother is necessary to print on carbon copy paper.

The SDK is available at www.brother.com

At just 0.70 inch thick the Brother MPrint micro printer's "pocket size" means it can be carried effortlessly in a bag or even a jacket pocket.

Print from your laptop - wherever you may be, via the USB connection supplied

Print from PDAs and Tablets via the Bluetooth® interface

- Print from up to 30 ft. away.
- Does not require "line of sight."
- Faster data transfer than IRDA interface.

Technologically superior

At only 0.70 inch thick and weighing less than 10 ounces the Brother MPrint micro printer is feature-packed with the latest technology:

- Stationary printhead - virtually silent printing.
- High speed printing (up to 4 pages per minute) so there's no frustrating wait for printouts.
- No liquid ink or toner - no fear when travelling of spilling into your bags or pockets, or when being used. Never run out of ink or toner.

- No warm up time - instantly available when switched on.
- Internal paper cassette - quickly and easily exchange paper cassettes.
- Built-in rechargeable lithium ion battery improves portability as there is no need for cables.
- Supplied with printing application software that reduces 8 1/2" x 11" sized documents to A7 size.

MPrint micro printer gives the printing flexibility a mobile workforce really needs

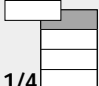

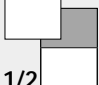

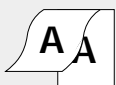

The MPrint micro printer's compact size and contemporary styling take mobile printing to a new dimension
