

CERNER VALIDATED PRODUCTS FROM BROTHER

Printing and scanning solutions to help meet healthcare providers' needs

Brother offers printers, all-in-ones, and scanners that have been validated by Cerner for compatibility with Cerner's Millennium application. This solution is used by healthcare providers to manage critical healthcare processes including documenting patient care proceedings, running tests, and filling medications. Electronic medical record (EMR) problems, including printing issues, can disrupt these critical processes and may delay patient care.

Healthcare facilities that use Cerner's Millennium application can confidently choose any Cerner validated Brother product to reliably print, copy, and scan to and from Cerner's system - seamlessly and securely. This validation with Cerner demonstrates Brother's commitment to providing healthcare facilities with effective printing and scanning technology that addresses the needs and challenges of the healthcare industry.
