

COURT SYSTEM SOLUTIONS FROM BROTHER

Accessible and Dependable Printing, Scanning,
and Labeling for Courts

Smart Print Management Designed for Courts

No matter where your court system is on the road to digital transformation, paper documents continue to be part of the workflow. The challenge is in integrating paper and digital content, while also streamlining daily operations and maintaining security. Brother offers document management technology and solutions for your court system that can make a measurable difference in optimizing print environments, while helping to meet the increasing demands for compliance and security.

PROTECT AGAINST INTERNAL AND EXTERNAL SECURITY THREATS

Securing sensitive data and confidential information is a top priority for courts. Brother printers, MFPs, and scanners offer triple layer security features that can help ensure the security of sensitive documents, devices, and networks – and protect important information from internal and external security threats.

FACILITATE DIGITAL TRANSFORMATION

Transform paper-based materials to digital documents and enable online sharing via computers, mobile devices, or the cloud. Brother scanners and MFPs are used in connected courtrooms across the country to digitize paper records, improve productivity, and cut down on storage costs. You can integrate your scanner with other hardware devices you need for filing, processing, and case management. The user interface can be customized with different backgrounds, icons, and available machine features to help streamline workflows.

KOFAX

Leverage Kofax ControlSuite within select Brother printers and MFPs for best-in-class document capture, print management, and output management capabilities, as well as additional benefits in support of digital transformation initiatives.

Brother Can Help Your Court System

Help Reduce Costs

Right size your print and capture environment to meet your court system's workflow, budget, and facilities requirements. Select devices provide a low total cost of ownership for a fiscally responsible investment and performance you can trust.

Manage a Mobile Workforce

Print from and scan to virtually all the major mobile devices¹, operating systems, and popular business cloud services², allowing for business continuity and collaboration among remote environments.

Capture and Share Information

Brother offers a Barcode Utility value service to enable documents that have a barcode or QR code (case files, depositions, evidence, etc.) to be scanned, saved, and filed using structured workflows and document routing technology. Save time, improve security, and reduce errors in job separation, file renaming, or folder / destination filing.

Streamline Processes and Optimize Workflows

Print more efficiently so that you can focus your time on what really matters. Having dependable technology is crucial to ensuring seamless daily operations, while also streamlining your document management processes.

Mobile Printing and Labeling Solutions for Court Systems

Brother mobile printing and labeling solutions enable you to easily print barcode document labels when needed and accurately identify documents, case files, court dockets, and more. Brother QL label printers produce cost-effective, professional labels for visitor management, general mailing, and more. Brother P-touch label makers are ideal for areas where quick identification of binders, folders, and storage bins save valuable time.

1 Requires connection to a wireless network.
2 Requires an Internet connection and an account with desired service.
