Upgrading the version

1. Turn on the power of the machine.

2. After the home position is detected, the standby screen appears.

3. Press ⬛ twice while the standby screen is displayed.

4. Select the version upgrade icon with ◁ ▷, and press ↵.

5. The password input screen appears. Input "961", and press ↵.

6. The OK-to-upgrade screen appears. Press ↵.

7. After the screen displays as follows, insert the setup disk, and press ↵.

```
Insert setup disk.
↵ ESC
```

8. Installation of the setup disk starts. After the installation of the setup disk has completed, the screen displays as follows. Insert the disk 1, and press ↵.
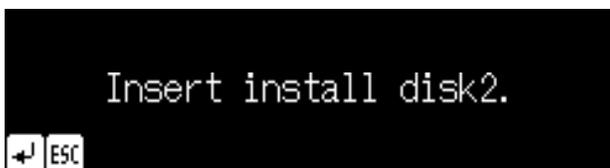

```
Insert install disk1.
↵ ESC
```

10. If the message shown below appears on the screen, there is possibility that the disk 1 for different model has been inserted. Check it, insert the correct FD if it is wrong, and press ↵.

```
Improper machine specification
↵ ESC
```

11. Installation of the disk 1 starts.

12. After the installation of the disk 1 has completed, the screen displays as follows. Insert the disk 2, and press ↵.

```
Insert install disk2.
↵ ESC
```

13. Installation of the disk 2 starts. When there are four version upgrade floppy disks in a set, the screen displays as follows after the installation of the disk 2 has completed. Insert the disk 3, and press ↵. When there are three floppy disks in a set, move on to STEP 16.

```
Insert install disk3.
