Balancing a personal checkbook is hard enough.

When you run a small business, you really need help.

Introducing *CheckWriter* – the easiest, most accurate way to balance your books.

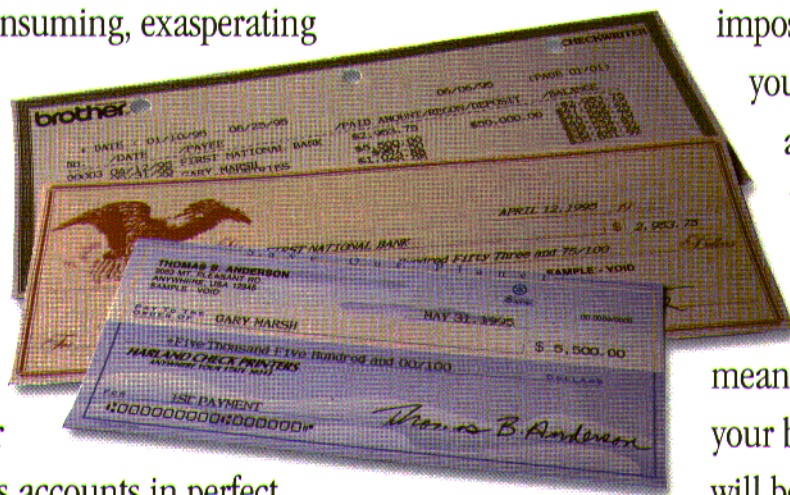

Nothing should be easier than balancing a checkbook. But it's usually a frustrating, time consuming, exasperating experience. Unless you have an accountant. Or a Brother CheckWriter.

The CheckWriter is the new, fast and easy way to keep your personal and business accounts in perfect order. It prints business and personal size checks, while it automatically keeps a running

balance and a reconciled balance for two separate accounts. It makes it almost

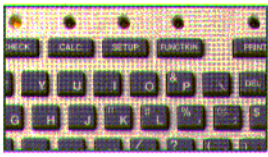

impossible to forget you've written a check. Or to make a mathematical error. Which means that reconciling your bank statement will be a breeze. And

you'll never have to worry about overdraft charges again.

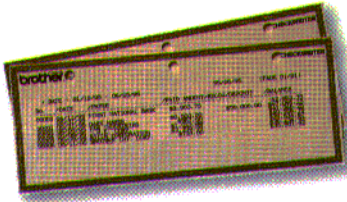

We're at your side.

# cw600

**It's easy to use...**with a standard typewriter-style keyboard and extra large number keypad.

**It prints summary reports...**weekly, monthly, quarterly... sorted anyway you want.

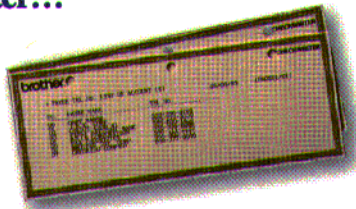

**It is easy to read...**with a sharp 2 line x 20 character LCD.

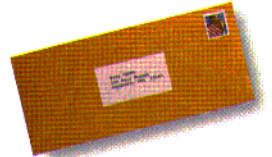

**It has a built-in ink jet printer...**to cleanly and quietly print checks, transaction summaries and several kinds of lists. Ink prevents check tampering.

**It sorts your register...**by check number, payee or category.

**It scans your records...**to match a category, or search for all reconciled checks. Reports can be displayed sequentially or printed as a list on special report-sized paper.

**It prints mailing labels...**making it easy to pay bills that come without envelopes.

**It has a password security system...**to discourage unauthorized use.

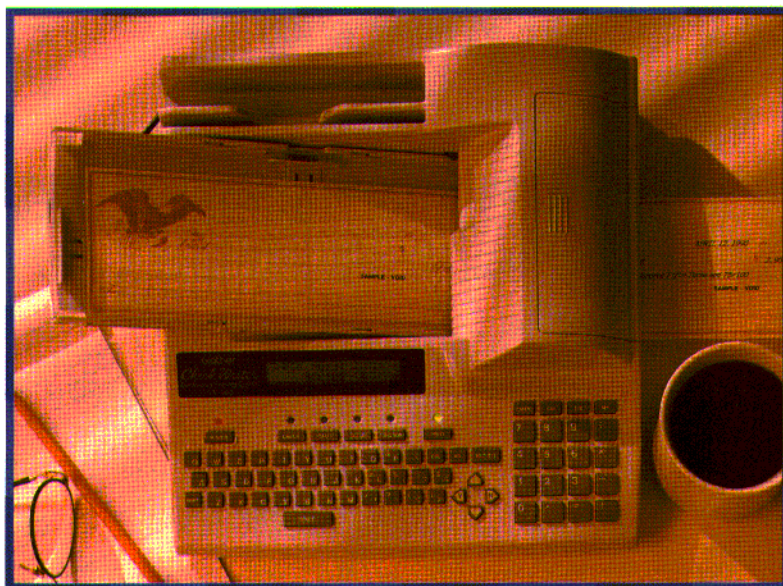

**It has a large memory...**to keep track of up to 600 checks, withdrawals or deposits.

*The Brother Check Writer.  
It takes care of your checkbook,  
so you can take care of business.*
