

Enable Your Workforce Through Digital Transformation

Your enterprise can't function without transmitting information countless times every day, through both physical and digital documents. Kofax ControlSuite is now embedded on select Brother printers, all-in-ones, and scanners, allowing users to perform capture and print management tasks in a single-user interface for even greater productivity.

Now you can secure, govern, and manage your documents with content-aware unified printing, document capture, and workflow process automation — right from your Brother device.

Manage and protect your business document information

Increase productivity by ensuring documents get to the right people at the right time

Meet compliance regulations with automatically generated audit trails

Drive end-to-end process orchestration across the enterprise

Enhance your digital transformation with intelligent capture capabilities

Simplify fleet administration

Why Kofax ControlSuite?

Kofax ControlSuite integrates best-in-class document capture, print management, and output management capabilities to deliver key benefits in support of digital transformation initiatives, including:

- 1. Securing your business information** to prevent unauthorized use and to maintain the organization's reputation and customer trust.
- 2. Increasing the productivity and efficiency of your workforce** by enriching information quality, while simultaneously reducing errors and redundant manual tasks.
- 3. Ensuring that operational processes remain compliant** by applying business rules automatically and by tracking the movement of documents and information.

Advanced Security on Brother Products

Brother offers triple layer security features on many of its business devices to help protect documents, devices, and networks from security threats. Organizations now get broadened security offerings through the embedded Kofax ControlSuite solution by enabling secure management and governance of documents, while automatically generating audit trails that track documents, how they are accessed, and how they are used to ensure compliance.

Kofax ControlSuite Core Offerings

Print Management Services

- Unified authentication (MFP and mobile)
- Secure print release
- Usage tracking and auditing

Capture Services

- Multichannel capture integration (mobile, MFP, desktop, email, etc.)
- OCR conversion
- System-to-system connectors

Output Management Services

- Information monitoring
- Information redaction
- Secure document quarantine and release

Digital Transformation in Five Easy Steps...

1.

After a business owner prints a document, a unique barcode is automatically applied to the printed page.

2.

ControlSuite creates and routes a PDF of the unsigned document to a customer.

3.

The customer signs the document and can return it by mail, email, or fax.

4.

Mailed documents are scanned in a single batch. Barcodes identify documents and routes them to the appropriate folders. Faxed and emailed documents are automatically processed.

5.

A notification is sent to the business owner, with a link to final document.
