

The Brother Special Solutions Team (SST) creates out-of-the-box solutions for environments with specific configuration and deployment requirements and unique document management needs.

## Automated Device Deployment

Maximize uptime with automated deployment and easily configure multiple machines at one time, including configuration of advanced feature settings.

### Mass Deployment Tool

Manage and remotely deploy device settings from a central location.

### Driver Deployment Wizard

Customized print driver deployment to a PC.

### Auto Installer

Prestage plug-and-play drivers.

## Device Preconfiguration

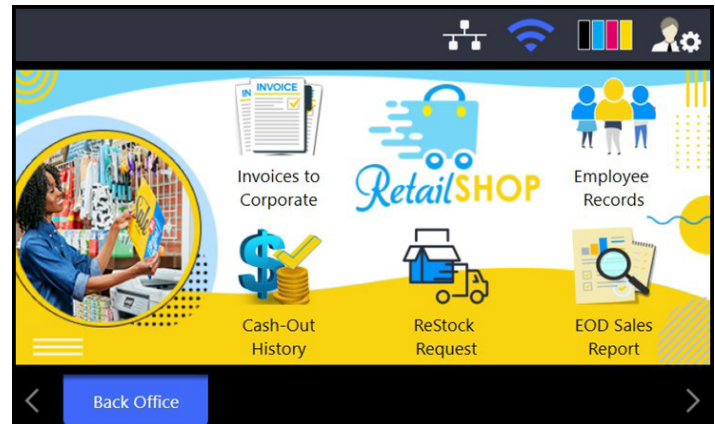

Ensures devices are ready to operate in line with business requirements, right out of the box.

## Features and Interfaces Disablement

Customizes the device to meet specific requirements and disables access to selected functions.

## Custom Tailored Solutions

Solutions built to match your specific needs and requirements.

A **Custom User Interface** can be developed with pre-configured shortcuts, specifically designed for a company's unique workflow. A customized home screen can include only required features and can be branded with the company's logo.

## The Brother Special Solutions Team Workflow

From initial assessment to final delivery, each phase is executed by our skilled team to provide solutions that meet customer-specific needs.

### ACTIVE ENGAGEMENT

We work closely with mid- to large-sized businesses to understand their specific challenges and requirements.

### COLLABORATIVE EXPERTISE

By combining expertise from Brother field engineers, and dedicated training for channel partners, we ensure that our solutions are comprehensive and effective.

### RIGOROUS TESTING

Every solution is tested to ensure optimal performance and reliability.

### UNIQUE SOLUTIONS

We address critical network and application issues, delivering customized solutions for diverse environments.
