

July 24, 2025

Dear Valued Customer:

As part of our commitment to product innovation and performance, we've enhanced the F3 models (1/8 to 3 HP) by adding a B14 flange to the casing. This update increases mounting flexibility, making it easier to attach a torque arm across a range of applications and positions, while maintaining existing housing and mounting dimensions. The enhancement affects only one side of the gearbox, effective October 2018.

**Illustration of Changes**

**Detail of Changes**

**AC INDUCTION MOTORS**

- **Models:** F3S Hollow Shaft and F3F Solid Shaft
- **Ratio:** 1/5~1/60
- **No Change to the following:** 3 HP with ratios of 1/40, 1/50 and 1/60

We look forward to a long-term partnership with our customers and we welcome your feedback. If you have questions about this product enhancement, please reach out to our team.
