S-7250A SAFETY INSTRUCTIONS

Thank you very much for buying a BROTHER sewing machine.

Before using your new machine, please read the safety instructions and the explanations given in the instruction manual. Please keep this manual within easy reach for quick reference.

With industrial sewing machines, it is normal to carry out work while positioned directly in front of moving parts such as the needle and thread take-up, and consequently there is always a danger of injury that can be caused by these parts. Follow the instructions from training personnel and instructors regarding safe and correct operation before operating the machine so that you will know how to use it correctly.

[1] Safety indications and their meanings

This instruction manual and the indications and symbols that are used on the machine itself are provided in order to ensure safe operation of the machine and to prevent accidents and injuries to yourself or other people. The meanings of these indications and symbols are given below.

Indications

DANGER

The instructions which follow this term indicate situations where failure to follow the instructions could result in death or serious injury.

WARNING

The instructions which follow this term indicate situations where failure to follow the instructions could result in death or serious injury.

CAUTION

The instructions which follow this term indicate situations where failure to follow the instructions could result in minor or moderate injury.

Symbols

DANGER - This symbol (△) indicates something that you must not do. The picture inside the triangle indicates the nature of the caution that must be taken.

WARNING - This symbol (●) indicates something that you should be careful of. The picture inside the triangle indicates the nature of the caution that must be taken.

CAUTION - This symbol (○) indicates something that you must do. The picture inside the circle indicates the nature of the caution that must be taken.

[2] Notes on safety

DANGER

Do not allow any liquids to get into this sewing machine, otherwise fire, electric shocks or operating problems may occur.

WARNING

If any liquid gets into the sewing machine (rear head or control box), immediately turn off the power and disconnect the power plug from the electrical outlet, and then contact the place of purchase or a qualified technician.

CAUTION

- Install the machine on a level, sound floor. Install the machine unattended.

- Do not carry the machine while it is turned on or in operation. Do not sit on the machine.

- Do not touch any of the moving parts or press any functional or control buttons while the machine is in operation.

- Make sure the motor cover is securely fastened to the machine.

- Do not touch the motor while it is operating. The motor may become very hot.

- Never attempt to repair the machine yourself. Brother will not be held responsible for any damage or injury that may result.

- When replacing the bobbin and needle, be sure to use the right parts.

- Be sure to use protective goggles and gloves when handling the lubricating oil and grease, so that they will not get into your eyes or onto your skin. Otherwise, it may cause severe burns.

- Be sure to use the lubricating oil indicated in the instruction manual. Using other lubricating oils may cause problems with the operation of the machine.

- Be sure to use the lubricating oil that is indicated in the instruction manual. Using other lubricating oils may cause problems with the operation of the machine.

- Keep the oil out of the reach of children.

- Do not carry the machine while it is turned on or in operation. Do not sit on the machine.

- Do not touch any of the moving parts or press any functional or control buttons while the machine is in operation.

- Make sure the motor cover is securely fastened to the machine.

- Do not touch the motor while it is operating. The motor may become very hot.

- Never attempt to repair the machine yourself. Brother will not be held responsible for any damage or injury that may result.

- Keep the oil out of the reach of children.

- When replacing the bobbin and needle, be sure to use the right parts.
About the machine set-up location

- Do not set up this sewing machine near other equipment such as televisions, radios or cordless telephones, otherwise such equipment may be affected by electronic interference from the sewing machine.
- The sewing machine should be plugged directly into an AC wall outlet. Operation problems may result if extension cords are used.

Carrying the machine

- The sewing machine should be carried by the arm and the motor cover by two people as shown in the illustration.
  * Do not hold by any part other than the motor cover. If this is not observed, it may result in damage to the sewing machine.

Tilting back the machine head

- Hold section (A) with your foot so that the table does not move, and then push the arm with both hands to tilt back the machine head.

Returning the machine head to the upright position

1. Clear away any tools, etc. which may be near the table holes.
2. While holding the face plate with your left hand, gently return the machine head to the upright position with your right hand.

Warning labels

The following warning labels appear on the sewing machine. Please follow the instructions on the labels at all times when using the machine. If the labels have been removed or are difficult to read, please contact your nearest Brother dealer.

1. Be careful not to get your hands caught when returning the machine head to its original position after it has been tilted.
2. Be careful to avoid injury from the moving thread take-up.
3. Be careful to avoid injury from the moving thread take-up.
4. Be careful not to get your hands caught when returning the machine head to its original position after it has been tilted.
5. Be careful to avoid injury from the moving thread take-up.
6. Be careful not to get your hands caught when returning the machine head to its original position after it has been tilted.
7. Be careful to avoid injury from the moving thread take-up.
8. Be careful not to get your hands caught when returning the machine head to its original position after it has been tilted.
9. Be careful to avoid injury from the moving thread take-up.
10. Do not hold. Problems with operation or injury may occur.
11. Do not place your hands inside the bottom cover. Problems with operation or injury may occur.
