INPUT AND OUTPUT SOLUTIONS FOR PHYSICIAN PRACTICES

It never lets up. Moving patients efficiently through your practice while handling the necessary workflow to keep it operating is a daily challenge. Patient registration forms, lab results, scanning ID cards, labeling patient records, and more. A busy office demands robust input and output solutions that can meet compliance needs, maintain security and deliver reliable uptime – day in and day out. Brother is at your side. We offer a variety of print, capture, and labeling solutions that can meet the demands of your busy practice while delivering an effective Total Cost of Ownership (TCO). STRATEGIC CONCERNS

- Limited space
- HIPAA compliance
- Compatibility with Electronic Healthcare Records (EHR) systems

COMMON DOCUMENTS

- Patient records
- ID cards
- Registration forms
- Lab results

APPLICATIONS

- Patient labels
- Records
- Insurance cards
- Intake forms
- Registration forms

BROTHER BENEFITS

- Labeling patient files
- Integration with EHR systems
- Low TCO

COMPATIBILITY

- EPIC
- Meditech
- Cerner (MFC-L9570CDW & MFC-L5700DW)

STRATEGIC CONCERNS	MACHINE FEATURES	BENEFIT
Health Insurance Portability and Accountability Act (HIPAA) - assists with meeting regulatory demands and compliance initiatives	Secure Function Lock	Administrator-level controls and user-based permissions to help regulate usage and protect against unauthorized device and document access on a per user or group basis
	Active Directory	Requires proper user ID/password authentication to enable printing
	Secure print	Helps ensure that sensitive documents do not print until a password is entered via the machine's control panel
	Scan to secure PDF	Helps protect files by requiring users enter a four-digit PIN
	Integrated NFC card reader / Support for optional 3rd party HID card readers	Integration with 3rd party cost recovery/management/security applications such as PaperCut™ MF/nddPrint for easy user authentication to release print jobs, access other machine functions, control user access, and enable chargebacks♦
	No internal/external hard drive	Reduces risk of data theft
	Supports Protected Trust for secure end to end scanning^	Simple and secure email encryption that faciliates patient communication while ensuring privacy and compliance. Provides confidence that only the sender and intended recipients have access to private messages.
	ID Copy/Scan	Admissions personnel can easily copy/scan identification cards (insurance and driver's licenses) during patient check-in
Helps increase office and personnel productivity	Large, 7" tablet-like color Touchscreen display	Easy menu navigation with the ability to create up to 64 customized shortcuts to simplify complex and frequently used tasks.
	Brother special solutions team	Can work with your IT department to develop customized solutions to help improve productivity or compliance
	Support for a broad range of mobile devices (Apple® iOS, Android™, Windows phone, Chromebook™)	Support your BYOD (Bring your Own Device) initiatives. Print patient information as needed from tablets. Supports interaction with Chromebooks via support for Google Cloud Print™ and Scan to Google Drive™.
	Cerner certified and Meditech tested◊	Reliably print, copy, fax or scan – seamlessly and securely
Compatibility with electronic health records	Fastest in class scan speeds including two-sided scanning with support for a wide range of scan to locations such as SSH Server (SFTP)* for secure end to end scanning	Supports EHR interoperability through a variety of scanning solutions that leverage imaging capture technologies to help transform paper forms into usable data quickly and easily.
