Notice – Disclaimer of Warranties
(For USA and Canada)

BROTHER’S LICensor(s), and their directors, officers, employees or agents
(collectively BROTHER’S LICensor) make no warranties, express or implied,
including without limitation the implied warranties of merchantability and
fitness for a particular purpose, regarding the software. BROTHER’S LICensor(s)
does not warrant, guarantee or make any representations regarding the use or
the results of the use of the software in terms of its correctness, accuracy,
reliability, currentness or otherwise. The entire risk as to the results and
performance of the software is assumed by you. The exclusion of implied
warranties is not permitted by some states in the usa and some provinces in
Canada. The above exclusion may not apply to you.

In no event will Brother’s LICensor(s) be liable to you for any consequential,
incidental or indirect damages (including damages for loss of business profits,
business interruption, loss of business information, and the like) arising out of the
use or inability to use the software even if Brother’s LICensor has been advised of
the possibility of such damages. Because some states in the USA and some provinces
in Canada do not allow the exclusion or limitation of liability for consequential
or incidental damages, the above limitations may not apply to you. In any event
Brother’s LICensor’s liability to you for actual damages from any cause
whatsoever, and regardless of the form of the action (whether in contract, tort
(including negligence), product liability or otherwise), will be limited to $50.

Compilation and Publication Notice

Under the supervision of Brother Industries Ltd., this manual has been compiled and
published, covering the latest product descriptions and specifications.

The contents of this manual and the specifications of this product are subject to
change without notice.

Brother reserves the right to make changes without notice in the specifications and
materials contained herein and shall not be responsible for any damages (including
consequential) caused by reliance on the materials presented, including but not
limited to typographical and other errors relating to the publication.

Disclaimer – User Installation of Memory Board(s)

In some cases, product may be modified by adding and/or replacing the memory board(s) with
approved replacements. Any damage to the product, the memory board(s) to be inserted therein
or otherwise, caused as a result of improper installation (including installation of other than
approved memory board(s)) is not covered by the Limited Warranty. If you do not feel
comfortable with the installation of approved memory board(s), contact a Brother Authorized
Service Center to perform the installation of the memory board(s) for you. If you elect to use a
Brother Authorized Service Center, you will be responsible for a moderate service charge. For
the name and location of a convenient Authorized Service Center, please call 1-800-521-2846.
**Brother® One Year Limited Warranty and Replacement Service (USA only)**

Who is covered:
- This limited warranty ("warranty") is given only to the original end-use/retail purchaser (referred to in this warranty as "Original Purchaser") of the accompanying product, consumables and accessories (collectively referred to in this warranty as "this Product").
- If you purchased a product from someone other than an authorized Brother reseller in the United States or if the product was used (including but not limited to floor models or refurbished product), prior to your purchase you are not the Original Purchaser and the product that you purchased is not covered by this warranty.

What is covered:
- This Product includes a Machine and Consumable and Accessory Items. Consumable and Accessory Items include but are not limited to print heads, toner, drums, ink cartridges, print cartridges, refill ribbons, therma PLUS paper and thermal paper.
- Except as otherwise provided herein, Brother warrants that the Machine and the accompanying Consumable and Accessory Items will be free from defects in materials and workmanship, when used under normal conditions.
- This warranty applies only to products purchased and used in the United States. For products purchased in, but used outside, the United States, this warranty covers only warranty service within the United States (and does not include shipping outside the United States).

What is the length of the Warranty Periods:
- Machines: one year from the original purchase date.
- Accompanying Consumable and Accessory Items: 90 days from the original purchase date or the rated life of consumable, whichever comes first.

What is NOT covered:
- This warranty does not cover:
  1. Physical damage to this Product;
  2. Damage caused by improper installation, improper or abnormal use, misuse, neglect or accident (including but not limited to transporting this Product without the proper preparation and/or packaging);
  3. Damage caused by another device or software used with this Product (including but not limited to damage resulting from use of non Brother®-brand parts and Consumable and Accessory Items);
  4. Consumable and Accessory Items that expired in accordance with a rated life; and,
  5. Problems arising from other than defects in materials or workmanship.
- Normal Periodic Maintenance Items, such as Paper Feeding Kit, Fuser and Laser Units.

This limited warranty is VOID if this Product has been altered or modified in any way (including but not limited to attempted warranty repair without authorization from Brother and/or alteration/removal of the serial number).

What to do if you think your Product is eligible for warranty service:
Report your issue to either our Customer Service Hotline at 1-800-284-4329 for Fax, MFC and DCP and 1-800-276-7746 for Printers, or to a Brother Authorized Service Center within the applicable warranty period. Supply Brother or the Brother Authorized Service Center with a copy of your dated bill of sale showing that this Product was purchased within the U.S. For the name of local Brother Authorized Service Center(s), call 1-800-521-2846.

What Brother will ask you to do:
After contacting Brother or a Brother Authorized Service Center, you may be required to deliver (by hand if you prefer) or send the Product properly packaged, freight prepaid, to the Authorized Service Center together with a photocopy of your bill of sale. You are responsible for the cost of shipping, packing product, and insurance (if you desire). You are also responsible for loss or damage to this Product in shipping.

What Brother will do:
If the problem reported concerning your Machine and/or accompanying Consumable and Accessory Items is covered by this warranty and if you first reported the problem to Brother or an Authorized Service Center within the applicable warranty period, Brother or its Authorized Service Center will repair or replace the Machine and/or accompanying Consumable and Accessory Items at no charge to you for parts or labor. The decision as to whether to repair or replace the Machine and/or accompanying Consumable and Accessory Items is made by Brother in its sole discretion.
Brother reserves the right to supply a refurbished or remanufactured replacement Machine and/or accompanying Consumable and Accessory Items and use refurbished parts provided such replacement products conform to the manufacturer's specifications for new product/parts. The repaired or replacement Machine and/or accompanying Consumable and Accessory Items will be returned to you freight prepaid or made available for you to pick up at a conveniently located Authorized Service Center.

If the Machine and/or accompanying Consumable and Accessory Items are not covered by this warranty (either stage), you will be charged for shipping the Machine and/or accompanying Consumable and Accessory Items back to you and charged for any service and/or replacement parts/products at Brother's then current published rates.

The foregoing are your sole (i.e., only) and exclusive remedies under this warranty.

What happens when Brother elects to replace your Machine:

When a replacement Machine is authorized by Brother, and you have delivered the Machine to an Authorized Service Center, the Authorized Service Center will provide you with a replacement Machine after receiving one from Brother. If you are dealing directly with Brother, Brother will send to you a replacement Machine with the understanding that you will, after receipt of the replacement Machine, supply the required proof of purchase information, together with the Machine that Brother agreed to replace. You are then expected to pack the Machine that Brother agreed to replace in the package from the replacement Machine and return it to Brother using the pre-paid freight bill supplied by Brother in accordance with the instructions provided by Brother. Since you will be in possession of two machines, Brother will require that you provide a valid major credit card number. Brother will issue a hold against the credit card account number that you provide until Brother receives your original Product and determines that your original Product is entitled to warranty coverage. Your credit card will be charged up to the cost of a new Product only if: (i) you do not return your original Product to Brother within five (5) business days; (ii) the problems with your original Product are not covered by the limited warranty; (iii) the proper packaging instructions are not followed and has caused damage to the product; or (iv) the warranty period on your original Product has expired or has not been sufficiently validated with a copy of the proof of purchase (bill of sale). The replacement Machine you receive (even if refurbished or remanufactured) will be covered by the balance of the limited warranty period remaining on the original Product, plus an additional thirty (30) days. You will keep the replacement Machine that is sent to you and your original Machine shall become the property of Brother. Retain your original Accessory Items and a copy of the return freight bill, signed by the courier.

Limitations:

Brother is not responsible for damage to or loss of any equipment, media, programs or data related to the use of this Product. Except for that repair or replacement as described above, Brother shall not be liable for any direct, indirect, incidental or consequential damages or specific relief. Because some states do not allow the exclusion or limitation of consequential or incidental damages, the above limitation may not apply to you.

This warranty gives you certain rights and you may also have other rights that may vary from state to state.

This Limited Warranty (and Brother's obligation to you) may not be changed in any way unless you and Brother sign the same piece of paper in which we (1) refer to this Product and your bill of sale date, (2) describe the change to this warranty and (3) agree to make that change.

Important:

We recommend that you keep all original packing materials, in the event that you ship this Product.
Pursuant to this limited warranty of 1 year from the date of purchase for labour and parts, Brother International Corporation (Canada) Ltd. (“Brother”), or its Authorized Service Centers, will repair this MFC/Facsimile machine free of charge if defective in material or workmanship. This Limited Warranty does not include cleaning, consumables (including, without limitation, print cartridges, print head, toner and drum) or damage caused by accident, neglect, misuse or improper installation or operation, any damage caused from service, maintenance, modifications, or tampering by anyone other than a Brother Authorized Service Representative, or from the use of supplies or consumable items that are non-Brother products. Operation of the MFC/Facsimile machine in excess of the specifications or with the Serial Number or Rating Label removed shall be deemed abuse and all repairs thereafter shall be the sole liability of the end-user/purchaser. In order to obtain warranty service, the MFC/Facsimile machine must be delivered or shipped freight prepaid by the end user/purchaser to a “Brother” Authorized Service Center, together with your Proof of Purchase in the form of a Sales Receipt.

For laser products: Failure to remove the Toner Cartridge (and Toner Drum Unit on applicable models) during shipping will cause severe damage to the MFC/Facsimile and will VOID the Warranty. (Refer to your Owner’s Manual for proper packaging.)

For ink-jet products: Do not remove the ink cartridges during shipping. Damage to your print head resulting from packing without the ink cartridges will VOID your warranty. (Refer to your Owner’s Manual for proper packaging.)

BROTHER DISCLAIMS ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EXCEPT TO THE EXTENT THAT ANY WARRANTIES IMPLIED BY LAW CANNOT BE VALIDLY WAIVED.

No oral or written information, advice or representation provided by Brother, its Authorized Service Centers, Distributors, Dealers, Agents or employees, shall create another warranty or modify this warranty. This warranty states Brother’s entire liability and your exclusive remedy against Brother for any failure of the MFC/Facsimile machine to operate properly.

Neither Brother nor anyone else involved in the development, production, or delivery of this MFC/Facsimile machine shall be liable for any indirect, incidental, special, consequential, exemplary, or punitive damages, including lost profits, arising from the use of or inability to use the product, even if advised by the end user/purchaser of the possibility of such damages. Since some Provinces do not allow the above limitation of liability, such limitation may not apply to you.

This Limited Warranty gives you specific legal rights and you may also have other rights which vary from Providence to Providence.

Warranty Service is available at Brother Authorized Service Centers throughout Canada. For Technical Support or for the name and location of your nearest Authorized Service Center call 1-877-BROTHER.

Storing Numbers

Storing One Touch Dial Numbers

1 Press Menu, 2, 3, 1.
2 Press the One Touch key where you want to store the number.
3 Enter a number (up to 20 digits), and then press Set.
4 Enter a name (or leave it blank), and then press Set.
5 Press Stop/Exit.

Storing Speed Dial Numbers

1 Press Menu, 2, 3, 2.
2 Enter a three-digit (a two-digit for FAX-4100e) Speed Dial number, and then press Set.
3 Enter a number (up to 20 digits), and then press Set.
4 Enter a name (or leave it blank), and then press Set.
5 Press Stop/Exit.

Telephone Operation

One Touch Dialing/Speed Dialing

1 Pick up the handset—OR—Press Hook and listen for a dial tone.
2 When you hear the dial tone, press the One Touch key of the location you want to call—OR—Press Search/Speed Dial, press #, and then press the three-digit (two-digit for FAX-4100e) Speed Dial number. (If you pressed Hook to dial, pick up the handset when the other party answers.)
3 To hang up, replace the handset.

Search/Speed Dial

1 Press Search/Speed Dial, then enter the first letter of the name you’re looking for.
2 Press ← or → to search the memory.
3 When the name is displayed, lift the handset—OR—Press Hook.
4 Press Fax Start to dial. (If you pressed Hook to dial, pick up the handset when the other party answers.)
5 To hang up, replace the handset.

Making Copies

Single Copy

1 Place the original face down in the ADF.
2 Press Copy.

Sorting Multiple Copies

1 Place the original face down in the ADF.
2 Use the dial pad to enter the number of copies you want (up to 99).
3 Press Options, press ← or → to select OPT:STACK/SORT, and then press Set. Press ← or → to select SORT, and then press Set.
4 Press Copy.
For FAX-5750e Only
How to Access the Complete Owner's Manual

This Owner's Manual does not contain the information for the Printer, Scanner and PC Fax. When you are ready to learn detailed information about these operations, read the complete Owner's Manual that is included on the CD-ROM.

To View On-Line Documentation (For Windows®):
1 Turn on your PC. Insert the CD-ROM into your CD-ROM drive.
2 If the model name screen appears, click your model name.
   The CD-ROM main menu will appear.
3 Click On-Line Documentation.
4 Click the documentation you want to read.
   Note If this window does not appear, use Windows® Explorer to run the setup.exe program from the root directory of the Brother CD-ROM.

To View On-Line Documentation (For Macintosh®):
1 Turn on your Macintosh. Insert the CD-ROM into your CD-ROM drive.
   The following window will appear.
2 Double-click the Documents icon.
3 If you see English and French folders, double-click your language.
4 Double-click the icon for the documentation you want to read.
For FAX-5750e Only
How to Access Brother Support (For Windows® Only)

You can find all the contacts you will need, such as Web support (Brother Solutions Center), Customer Service and Brother Authorized Service Centers.

- Click **Brother Support** on the main menu.

The following screen will appear:

- To access our web site (www.brother.com), click **Brother Home Page**.
- To view all Brother Numbers, including Customer Service numbers for the USA and Canada, click **Support Information**.
- To access the USA Brother online shopping mall (www.brothermall.com) for additional product and services information, click **Brother Mall.com**.
- For the latest news and product support information (http://solutions.brother.com), click **Brother Solutions Center**.
- To return to the main page, click **Back**—**OR**—If you have finished your setup, click **Exit**.

**TABLE OF CONTENTS** xxvii
1 Introduction

Using This Manual

Thank you for purchasing a Brother fax machine. This machine has been designed to be simple to use, with LCD screen prompts to guide you through programming your machine. However, you can use your machine to its fullest potential by taking a few minutes to read this manual.

Additionally, your machine has a Reports Key. Press Reports, 1 to print a list of basic step instructions and explanations.

Finding Information

All chapter headings and subheadings are listed in the Table of Contents. You will be able to find information about a specific feature or operation by checking the Index in the back of this manual.

Conventions Used in this Manual

Throughout this manual you’ll see special symbols alerting you to important information, warnings, and actions to perform. For clarification, and to help you choose the correct key presses, we’ve added illustrations of some of the LCD messages.

- **boldface**
  Bold typeface identifies a specific key on the machine control panel.

- **italics**
  Italics typeface emphasize an important point, or refer you to related topic.

- **bubble dot**
  Bubble Dot typeface identifies the messages on the LCD of the machine.

- **WARNING**
  Warnings detail precautions you must take to avoid possible personal injury.

- **Cautions**
  Cautions specify procedures you must follow or avoid to prevent possible damage to the machine.

- **Note**
  Notes tell you the proper response for a situation that may occur.

- **FYI tips**
  FYI tips provide details about how the current operation interacts with other features.

- **Improper Setup**
  Improper Setup alerts you to devices and procedures that are not compatible with the machine.
Test Sheet Procedure and Product Registration
(For USA Only)

After programming your Station ID, please fill out the TEST SHEET included with your machine and then fax it to Brother’s Automated Fax Response System as your first transmission. This will verify that your machine is properly installed. To receive a response, you must set up your Station ID. (See Setting Station ID, Page 4-3.)

When this document is received, a confirmation sheet and Product Registration form will be sent back to your machine. Please fill out the form and return it to complete your registration.

In USA: 1-877-268-9575 (fax)

To Complete Your FAX-4100e, FAX-4750e or FAX-5750e Registration On-Line (For USA Only)

1 Insert the MFL Pro CD-ROM into your CD-ROM drive.
2 Click On-Line Registration to register your product on-line from the main menu.
Control Panel Overview

FAX-4100e, FAX-4750e and FAX-5750e have the same control panel keys.

1. **Toner Empty Icon**
   The Toner icon flashes on and off when toner is low, so you’ll know to order another toner cartridge. You will be able to print until the indicator stays on.

2. **LCD (Liquid Crystal Display)**
   Displays messages to help you set up and operate your machine.

3. **Programming Keys:**
   - **Menu**
     Lets you access the Menu and Programming mode.
   - **Set**
     Stores a menu setting in the machine. Also use for sending one fax to multiple numbers.
   - **(Left Arrow) → (Right Arrow)**
     Moves the LCD cursor through text and options.
   - **Clear**
     Deletes entered data or backs up one step in Menu table.

4. **One Touch Dial Keys**
   These 16 keys give you instant access to previously stored phone numbers.

5. **Shift**
   To access memory locations 17 through 32 in the One Touch keys, hold down the Shift key.

6. **Telephone Keys:**
   - **Hook**
     Lets you dial telephone and fax numbers without lifting the handset.
   - **Hold**
     Lets you place calls on hold.
   - **Redial/Pause**
     Redials the last number called. Also inserts a pause in autodial numbers.

7. **Search/Speed Dial**
   Lets you look up numbers stored in the dialing memory. Also lets you dial stored phone numbers by pressing # and a three-digit (two-digit for FAX-4100e) number.
Dial Pad
Dials phone and fax numbers, and can be used as a keyboard for entering information into the machine.
(For Canada only) The # key lets you switch the dialing type during a telephone call from PULSE to TONE.

Volume High/Low Keys
Lets you adjust speaker, ring and handset volume.

Stop/Exit
Stops a fax, cancels an operation or exits from Menu mode.

Fax Start
Starts an operation, such as sending a fax.

Copy Keys:

Enlarge/Reduce
Lets you enlarge or reduce copies depending upon the ratio you select.

Contrast
Let you make a copy that is lighter or darker than the original.

Options
You can quickly and easily change your temporary settings (for the next copy only).

Copy Mode
Select the copy resolution for your type of original document.

Copy
Makes a copy.

Broadcast
Use this key when you send the same fax to many different locations (maximum of 282 locations, 182 locations for FAX-4100e at once).

Resolution and Indicator Lights
These LEDs show the Resolution you selected.

Mode and Indicator Lights
These LEDs show the Receive Mode you selected.

Reports
Accesses the Reports menu so you can select reports to print: Help List, Auto Dial, Fax Activity, Transmission Verification, and User Settings.
About Fax Machines

If you’re a first-time fax machine user, fax operation might seem a little mysterious. Soon, you’ll recognize the unusual fax tones on your phone line, and be able to send and receive faxes easily.

Custom Features

Do You Have Voice Mail on the Phone Line?

If you have Voice Mail on the phone line on which you will install your new fax machine, there is a strong possibility that Voice Mail and the fax machine will conflict with each other while receiving incoming calls.

Why Should There Be Trouble?

Since both fax machines and Voice Mail pick up the line at the number of rings you have set, each of them has the ability to keep the other from receiving calls. For example, if your Voice Mail is set to answer after two rings and your fax machine is set to answer after four, your Voice Mail will keep your fax machine from receiving faxes. If you set Voice Mail and the Brother machine to answer at the same number of rings, there is no way of knowing which one will answer first. It is important to remember that neither Voice Mail nor the fax machine can pass the call back to the other after the call has been answered.

How Can You Avoid Possible Problems?

A very good way to avoid a problem like the one mentioned previously is to get a second phone number on your present phone line. Many people with Voice Mail opt for this choice, which is called “Distinctive Ring”, and they are very satisfied with it. For details about this type of custom service, please see Distinctive Ring, page 8-1.

Another way to avoid a possible problem is to replace your Voice Mail with an answering machine. Your Brother fax machine is designed to work in tandem with an answering machine or TAD (telephone answering device). (See Connecting an External TAD (Telephone Answering Device), Page 2-10.)
Fax Tones and Handshake

When someone is sending a fax, the machine sends fax calling tones (CNG tones)—soft, intermittent beeps at 4-second intervals. You’ll hear them when you dial and press Fax Start; they continue for about 60 seconds after dialing. During that time, the sending machine must begin the “handshake” with the receiving machine. Each time you use automatic procedures to send a fax, you are sending CNG tones over the phone line. You’ll soon learn to listen for these soft beeps each time you answer a phone on your fax line, so you can know if you are receiving a fax message.

The receiving fax responds with fax receiving tones—loud, chirping sounds. A receiving fax chirps for about 60 seconds over the phone line, and the LCD shows RECEIVING. If your machine is set to the FAX mode, it will answer every call automatically with fax receiving tones. Even if the other party hangs up, your machine continues to send the “chirps” for about 60 seconds, and the screen continues to display RECEIVING. To cancel the receiving mode, press Stop/Exit.

When your machine answers in FAX/TEL mode, the machine listens for CNG tones and then responds with receiving tones.

The fax “handshake” is the time in which the sending machine’s CNG tones and the receiving machine’s “chirps” overlap. This must be for at least 2 to 4 seconds, so the machines can understand how each is sending and receiving the fax. The handshake cannot begin until the call is answered, and the CNG tones only last for about 60 seconds after the number is dialed. Therefore, it’s important for the receiving machine to answer the call in as few rings as possible.

When you have an external telephone answering device (TAD) on your fax line, your TAD will determine the number of rings before the call is answered. Pay special attention to the directions in the Assembly and Connections chapter for connecting a TAD to your machine.

ECM (Error Correction Mode)

The Error Correction Mode (ECM) is a way for the machine to check the integrity of a fax transmission while it is in progress. ECM transmissions are possible only between machines that both have the ECM feature. If they do, you may send and receive fax messages that are continuously checked for their integrity. Sufficient memory must be available in your machine for this feature to work.
Make sure you have the following items:

- Telephone Handset
- Drum Unit Assembly (With free Standard Toner Cartridge – up to 3,000 pages)
- Handset Curled Cord
- Power Cord
- Document Tray with Extension
- Paper Cassette
- Telephone Wire Cord
- CD-ROM (For FAX-5750e Only)
- Document Support
- Quick Setup Guide
- Accessory Order Form
- Paper Cassette #2 (Option for FAX-4100e and FAX-4750e)
- Software License Agreement (For FAX-5750e Only)

**Note**

If an item is missing, call Brother Customer Service at 1-800-284-4329 (in USA) or 1-877-BROTHER (in Canada). See Ordering Accessories and Supplies, Page ii for the correct item numbers.

**Warning**

Whenever you transport the machine, use the packing materials that came with your machine. If you do not pack the machine correctly, you may void your warranty.
Choosing a Location

Place your machine on a flat, stable surface, such as a desk. Select a place that is free of vibration and shocks. Locate the machine near a telephone jack and a standard, grounded power outlet.

Avoid placing your machine in a high-traffic area. Do not place near heaters, air conditioners, water, chemicals or refrigerators. Do not expose the machine to direct sunlight, excessive heat, moisture or dust. Make sure nothing blocks the flow of air from the fan on the sides of the machine. Do not connect your machine to electrical outlets controlled by wall switches or automatic timers. Disruption of power can wipe out information in the unit’s memory. Do not connect your machine to electrical outlets on the same circuit as large appliances or other equipment that might disrupt the power supply. Avoid interference sources, such as speakers or the base units of cordless phones.

WARNING
- Never install telephone wiring during a lightning storm.
- We recommend that this product be used with a surge protection device to protect the product against lightning storms.
- Never install a telephone jack in a wet location unless the jack is specifically designed for a wet location.
- Never touch telephone wires or terminals that are not insulated unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use the telephone to report a gas leak in the vicinity of the leak.
- For PLUGGABLE EQUIPMENT, the socket-outlet should be installed near the equipment and should be easily accessible.
- To reduce the risk of shock or fire, use only a No. 26 AWG or larger telecommunications line cord.
Assembly

Installing the Drum Unit Assembly (with Toner Cartridge)

1 Unpack the drum unit assembly, including the toner cartridge, and gently rock it from side to side five or six times to distribute the toner evenly inside the cartridge.

To prevent damage to the drum, do not expose it to light for longer than a few minutes.

2 Open the front cover of the machine.

3 Insert the drum unit assembly into the machine.

4 Close the front cover.
Attaching the Trays

1 Attach the Document Support and Document Tray with Extension.

Unfold the extension, which holds documents in place.

2 Unfold the Front Output Bin Extension, which holds printed pages in place.

Connecting Paper Cassette #2
(Option for FAX-4100e and FAX-4750e)

1 Carefully pick up the machine and place it on top of Paper Cassette #2.
2 Plug the modular cable from Cassette #2 into the modular jack on the Brother machine.

To select which cassette will be used for printing, see *Setting Cassette Usage*, Page 4-2.

If you move the machine after connecting Cassette #2, be sure to carefully lift Cassette #2 with the machine because they are not attached.

**Manual Feed Slot**

*Use the manual feed slot to print or copy on envelopes, labels, transparencies, card stock or thicker paper:*

The manual feed slot is above the paper cassette. Load paper or envelopes *one at a time.* You do not have to remove paper from the paper cassette.

You do not have to choose Manual Feed in the Setup dialog box of your printer driver. Insert the sheet of paper for Portrait (vertical) or Landscape (horizontal), with the side you wish to print on face up in the manual feed slot.

1 Align the paper at the center of the manual feed slot and insert the paper into the manual feed slot until the front edge of the paper touches the paper feed roller.

2 Adjust the paper guides to the width of the paper.
**Acceptable Paper**

<table>
<thead>
<tr>
<th>Paper Cassette #1 &amp; #2:</th>
<th>cut sheet</th>
<th>Letter, Legal, A4, A5, ISO B5, Executive</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>envelopes</td>
<td>COM-10, Monarch, C5, DL</td>
</tr>
<tr>
<td></td>
<td>post cards</td>
<td>–</td>
</tr>
<tr>
<td></td>
<td>labels and transparencies</td>
<td>Letter, A4</td>
</tr>
</tbody>
</table>

We Recommend:
- Labels: Avery laser label #5160
- Transparencies: 3M CG3300 for laser printers or equivalent

**Paper Capacity of Paper Cassette**

<table>
<thead>
<tr>
<th>Paper Cassette #1 &amp; #2:</th>
<th>Max. paper height is 1.06 inches (27 mm) (use the guides) or approx. 250 sheets of 20 lb. (75 g/m²) Letter/A4 paper, 10 transparencies.</th>

<td>4% to 6% by weight</td>
</tr>
</tbody>
</table>

Fax messages can be received on only Letter, Legal and A4 size paper. If you use legal or A4, change the Paper Size setting: (Menu, 1, 1.)

Loading Paper in Paper Cassette

1. Pull the paper cassette completely out of the machine.

2. Slide the paper width and length adjusters for the paper size you want.
3 Fan the paper well. Load paper in the paper cassette. Press down on the paper to flatten it in all four corners, keeping the paper level below the guide. The cassette can hold up to 250 sheets of 20 lb (75g/m²) paper.

4 Slide the paper cassette into the machine until it locks into place.
Connections

Connecting the Machine

Connect the handset, power cord, and telephone line.

1 Connecting the Handset
Connect the curled handset cord to the bottom of the handset and the left side of the machine.

2 Connect the power cord.

3 Connect the telephone line.
Connect one end of the telephone line cord to the jack labeled LINE on the left side of the machine. Connect the other end to a modular wall jack.

WARNING

■ This machine must be grounded using a three-prong plug.

■ Since the machine is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone line by keeping the power to your machine on when you connect it to a telephone line. When you want to move your machine, protect yourself by disconnecting the telephone line first, and then the power cord.

■ Lightning and power surges can damage this product! We recommend that you use a quality surge protection device on the AC power line and on the telephone line, or unplug the lines during a lightning storm.

■ Do not touch the rollers at the paper exit.
Connecting an External Telephone

Your machine is equipped with a handset that you can use as a regular phone. However, you can also connect a separate telephone (or telephone answering device) directly to your machine.

Connect the modular plug on the telephone’s line cord to the jack labeled EXT. on the left side of the machine.

Whenever this phone (or TAD) is in use, the LCD shows **EXT. TEL IN USE**, and, if the machine handset is lifted, an alarm sounds. To disconnect a call on the external phone and switch to the machine, press **Hook**.

Connecting an External TAD (Telephone Answering Device)

Sequence

You might choose to connect an answering system. When you have an **external** TAD on the same telephone line as the machine, the TAD answers all calls. The machine “listens” for fax calling (CNG) tones. If it hears them, the machine takes over the call and receives the fax. If it doesn’t hear CNG tones, the machine lets the TAD continue playing your outgoing message so your caller can leave you a voice message.

The TAD must answer within four rings (the recommended setting is two rings). The machine cannot hear CNG tones until the TAD has answered the call, and with four rings there are only 8–10 seconds of CNG tones left for the fax “handshake.” Make sure you carefully follow the instructions in this manual for recording your outgoing message. We do not recommend using the toll saver feature on your external answering machine if it exceeds 4 rings.

Connections

The external TAD must be plugged into the left side of the machine in the jack labeled EXT. Your machine cannot work properly if you plug the TAD into a wall jack.

**If You Subscribe to your Telephone Company’s Distinctive Ring Service:**

You may connect an external TAD to a separate wall jack only if you subscribe to your telephone company’s Distinctive Ring service, have registered the distinctive ring pattern on your machine, use that number as a fax number and have set your machine’s Receive mode to MANUAL. The recommended setting is three or four rings on the external TAD when you have the telephone company’s Distinctive Ring service.

**If You Do Not Subscribe to Distinctive Ring Service:**

You must plug your TAD into the EXT. jack of your Brother machine. If your TAD is plugged into a wall jack, both your machine and the TAD will try to control the phone line. (See illustration on Page 2-11.)
1 Plug the telephone line cord from the wall jack into the left side of the machine in the jack labeled LINE.

2 Plug the telephone line cord from your TAD into the left side of the machine in the jack labeled EXT. (Make sure this cord is connected to the TAD at the TAD’s telephone line jack, and not its telephone set jack.)

3 Set your external TAD to four rings or less. (The machine’s Ring Delay setting does not apply).

4 Record the outgoing message. (See below.)

5 Set the Receive mode to TAD by pressing Mode until both FAX and FAX/TEL lights are on.

Recording Outgoing Message (OGM) on External TAD
Timing is important in recording this message. The message sets up the ways to handle both manual and automatic fax reception.

1 Record 5 seconds of silence at the beginning of your message. (This allows your machine time to listen for the fax CNG tones of automatic transmissions before they stop.)

2 Limit your speaking to 20 seconds. (See Easy Receive, Page 5-3.)

3 End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example: “After the beep, leave a message or send a fax by pressing * 5 1 and Start.”

We recommend beginning your OGM with an initial 5-second silence because the machine cannot hear fax tones over a resonant or loud voice. You may try omitting this pause, but if your machine has trouble receiving, then you must rerecord the OGM to include it.
Special Line Considerations

Roll Over Phone Lines

A roll over phone system is a group of two or more separate telephone lines that pass incoming calls to each other if they are busy. The calls are usually passed down or “rolled over” to the next available phone line in a preset order.

Your machine can work in a roll over system as long as it is the last number in the sequence, so the call cannot roll away. Do not put the machine on any of the other numbers; when the other lines are busy and a second fax call is received, the fax call would be transferred to a line that does not have a fax machine. Your machine will work best on a dedicated line.

Two-Line Phone System

A two-line phone system is nothing more than two separate phone numbers on the same wall outlet. The two phone numbers can be on separate jacks (RJ11) or combined into one jack (RJ14). Your machine must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires (black, red, green, yellow). To test the type of jack, plug in a two-line phone and see if it can access both lines. If it can, you must separate the line for your machine.

Converting Telephone Wall Outlets

There are three ways to convert to an RJ11 receptacle. The first two ways may require assistance from the telephone company. You can change the wall outlets from one RJ14 jack to two RJ11 jacks. Or, you can have an RJ11 wall outlet installed and slave or jump one of the phone numbers to it.

The third way is the easiest: Buy a triplex adapter. You can plug a triplex adapter into an RJ14 outlet. It separates the wires into two separate RJ11 jacks (Line 1, Line 2) and a third RJ14 jack (Lines 1 and 2). If your machine is on Line 1, plug the machine into L1 of the triplex adapter. If your machine is on Line 2, plug it into L2 of the triplex adapter.
Installing Machine, External Two-Line TAD, and Two-Line Telephone

When you are installing an external two-line telephone answering device (TAD) and a two-line telephone, your machine must be isolated on one line at both the wall jack and at the TAD. The most common connection is to put the machine on Line 2, which is our assumption in the following steps. The back of the two-line TAD must have two telephone jacks: one labeled L1 or L1/L2, and the other labeled L2. You will need at least three telephone line cords, the one that came with your machine and two for your external two-line TAD. You will need a fourth line cord if you add a two-line telephone.

1. Place the two-line TAD and the two-line telephone next to your machine.

2. Plug one end of the telephone line cord for your fax machine into the L2 jack of the triplex adapter. Plug the other end into the LINE jack on the left side of the machine.

3. Plug one end of the first telephone line cord for your TAD into the L1 jack of the triplex adapter. Plug the other end into the L1 or L1/L2 jack of the two-line TAD.

4. Plug one end of the second telephone line cord for your TAD into the L2 jack of the two-line TAD. Plug the other end into the EXT. jack on the left side of the machine.

You can keep two-line telephones on other wall outlets as always. There are two ways to add a two-line telephone to the machine’s wall outlet. You can plug the telephone line cord from the two-line telephone into the L1+L2 jack of the triplex adapter. Or, you can plug the two-line telephone into the TEL jack of the two-line TAD.
Multi-Line Connections (PBX)

Most offices use a central telephone system. While it is often relatively simple to connect the machine to a key system or a PBX (Private Branch Exchange), we suggest that you contact the company that installed your telephone system and ask them to connect the machine for you. It is advisable to have a separate line for the machine. You can then leave the machine in FAX mode to receive faxes any time of day or night.

If the machine is to be connected to a multi-line system, ask your installer to connect the unit to the last line on the system. This prevents the unit from being activated each time a telephone call is received.

As with all fax units, this machine must be connected to a two wire system. If your line has more than two wires, proper connection of the machine cannot be made.

If you are installing the machine to work with a PBX:

1. It is not guaranteed that the unit will operate correctly under all circumstances with a PBX. Any cases of difficulty should be reported first to the company that handles your PBX.

2. If all incoming calls will be answered by a switchboard operator, it is recommended that the Receive Mode be set to MANUAL. All incoming calls should initially be regarded as telephone calls.

3. The machine may be used with either pulse or tone dialing telephone service.

Custom Features on Your Phone Line

If you have Voice Mail, Call Waiting, Call Waiting/Caller ID, RingMaster, an answering service, or an alarm system, or other custom feature on one phone line, it may create a problem with the operation of your fax machine. (See I have difficulty with custom features on a single line, Page 13-8.)
On-Screen Programming

User-Friendly Programming

We have designed your machine with on-screen programming and a Reports key. User-friendly programming helps you take full advantage of all the menu selections your machine has to offer.

Since your fax programming is done on the LCD, we created step-by-step on-screen prompts to help you program your machine. All you need to do is follow the prompts as they guide you through the menu selections and programming options.

Menu Mode

You can access the Menu by pressing Menu. The LCD shows:

Then

For FAX-4100e:
Press 1 for General Setup—OR—
Press 2 for Fax Operations—OR—
Press 3 for Copy Operations—OR—

For FAX-4750e:
Press 1 for General Setup—OR—
Press 2 for Fax Operations—OR—
Press 3 for Copy Operations—OR—
Press 4 for Network Operations.
(Option for FAX-4750e.)
For FAX-5750e:

Press 1 for General Setup—OR— 1. GENERAL SETUP

Press 2 for Fax Operations—OR— 2. FAX

Press 3 for Copy Operations—OR— 3. COPY

Press 4 for Print Operations—OR— 4. PRINTER

Press 5 for Network Operations. 5. LAN

You can scroll more quickly by pressing ↩️. (Use ↩️ to scroll backward and see all options, in the opposite order.)

Before you press Set after entering information in a field using the dial pad, you can correct a mistake. Use ↩️ to back up and then type over the incorrect characters.

When you finish a setting, the LCD shows ACCEPTED.

If you want to exit the Menu Mode, press Stop/Exit.
Menu Selection Table

You can probably perform most of these programming operations without the Owner’s Manual. To help you understand the menu selections and options that are found in the machine programs, use the Menu Selection Table below.

Note: The factory setting (option) is shown in bold.

See the NC-8100h Owner’s manual on the CD-ROM.
Setting Paper Size

You can use three sizes of paper for printing your faxes: letter, legal and A4. When you change the size of paper you have loaded in the machine, you will need to change the setting for the paper size, so your machine will know how to fit the incoming fax on the page.

After you connect the optional Cassette #2, you can select the paper size for each cassette. (See Turning on Cassette #2 (Option for FAX-4100e and FAX-4750e))

1. Press Menu, 1, 1.

2. If you have the Cassette #2, press ← or → to select CASSETTE #1 or CASSETTE #2, and then press Set.

3. Press ← or → to select LETTER, LEGAL or A4 (for the cassette you selected in Step 2), and then press Set.

4. Press Stop/Exit.

Turning on Cassette #2 (Option for FAX-4100e and FAX-4750e)

When the optional CASSETTE #2 is set to ON, you can set paper size and the cassette usage. (See Printing a Reduced Incoming Document, Page 5-3 and Setting Paper Size above.)

1. Press Menu, 1, 5.

2. Use ← or → to select ON (or OFF), and then press Set.

3. Press Stop/Exit.
Setting Cassette Usage

The default setting of AUTO allows your machine to choose the optional Cassette #2 if paper is out in Cassette #1 or if incoming faxes will fit best on the paper in Cassette #2. Choose CASSETTE#1 ONLY or CASSETTE#2 ONLY if you want to keep special paper in the other cassette and control when it is used.

1. Press Menu, 1, 1.
2. Press ← or → to select CASSETTE USAGE, and then press Set.
3. To set cassette usage for faxes, press ← or → to select FOR FAX, and then press Set.
   — OR — To set cassette usage for copies, press ← or → to select FOR COPY, and then press Set.
   — OR — If you are finished go to Step 5.
4. Press ← or → to select AUTO, CASSETTE#1 ONLY or CASSETTE#2 ONLY, and then press Set.
5. Press Stop/Exit.

Setting Date and Time

Your machine displays the date and time, and prints it on every fax you send. In the event of a power failure, you may have to reset the date and time. All other settings remain unaffected.

1. Press Menu, 1, 2.
2. Enter the last two digits of the year, and then press Set.
3. Enter two digits for the month and press Set. (For example, enter 09 for September, or 10 for October).
4. Enter two digits for the day, and then press Set. (For example, 06).
5. Enter the time in 24-hour format, and then press Set. (For example, enter 15:25 for 3:25 PM).
6. Press Stop/Exit.
   The screen now shows the date and time you set whenever the machine is in standby mode.
Setting Station ID

You should store your name or (company name) and fax number to be printed on all fax pages you send. The telephone number you enter will be printed only on your cover pages. (See Composing Electronic Cover Page, Page 6-6.)

1. Press Menu, 1, 3.

2. Enter your fax number (up to 20 digits), and then press Set. You must enter a fax number to proceed.

3. Enter your telephone number (up to 20 digits), and then press Set. If your telephone number and fax number are the same, enter the same number again. The number appears on Cover pages.

4. Use the dial pad to enter your name (up to 20 characters), and then press Set. (See Entering Text.)

5. Press Stop/Exit.

The LCD returns to the date and time.

If your Station ID has already been programmed, the LCD prompts “1” to make a change, or “2” to exit without changing.

**NOTICE**

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or electronic device to send any message via a telephone machine unless such messages clearly contain, in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual.

In order to program this information into your machine, you should complete the steps described on pages 4-2 and 4-3.
**Entering Text**

When you are setting certain functions, such as the Station ID, you may need to type text into the machine. Most keys on the dial pad have three or four letters printed above them. The keys for 0, # and * don’t have printed letters because they are used for special characters.

By pressing the appropriate number key repeatedly you can access the character you want.

**Inserting Spaces**

If you want to enter a blank space, press ✽ once between numbers and twice between characters.

**Making Corrections**

If you entered a letter incorrectly and want to change it, press ✽ to move the cursor after the last correct letter. Then press **Clear**; all letters above and to the right of the cursor will be deleted. Re-enter the correct characters. Also, you can back up and type over incorrect letters.

**Repeating Letters**

If you need to enter a character that is assigned to the same key as the previous character, press ✽ to move the cursor to the right.

**Special Characters and Symbols**

Press * for (space) ! " # $ % & ’ ( ) * + , - . /
Press # for : ; < = > ? @ [ ] ^ _
Press 0 for É À È Ê Î Ç Ë Ö 0
Setting the Ring Volume

1. Press Menu, 1, 4, 1.

2. Press ( or ) to select (OFF, LOW, MED, or HIGH) and press Set.

3. Press Stop/Exit.

—OR—

You can adjust the ring volume when your machine is idle. You can turn the ring OFF or you can select a ring volume level.

Press High or Low to adjust the volume level. With each key press, your machine rings so you can hear the active setting as the LCD shows it. Each key press changes the volume to the next setting. The new setting will remain until you change it again.

Setting the Beeper Volume

You can set the beeper to LOW, HIGH or OFF. The default setting is LOW. When the beeper is set to LOW or HIGH, the machine beeps every time you press a key or make an error and when fax sending or receiving is finished.

1. Press Menu, 1, 4, 2.

2. Press ( or ) to select your setting.

3. When the LCD shows the setting you want, press Set.

4. Press Stop/Exit.

Setting the Speaker Volume

1. Press Menu, 1, 4, 3.

2. Press ( or ) to select your setting (LOW, MED, HIGH or OFF), and then press Set.

3. Press Stop/Exit.

—OR—

If you are using Hook, you can adjust the speaker volume while dialing. You can turn the speaker off or you can select a speaker volume level. The default setting is the lowest volume.

Press High or Low to adjust the volume level. With each key press, the volume changes as the LCD shows the active setting. The new setting will remain until you change it again.
Setting the Handset Volume

1. Press **Menu, 1, 4, 4.**
2. Press 🔄 or 🔄 to select your setting (LOW or HIGH), and then press **Set.**
   
   The default setting is LOW.
3. Press **Stop/Exit.**
   
   —OR—

   Any time you are talking on the telephone, you can adjust the handset volume by pressing the volume **High** or **Low** keys on the control panel. The LCD shows the setting you are choosing. The new setting will remain until you change it again.

Choosing the Handset Volume (For Volume Amplify)

Before you begin to use the machine, you must decide if you need to set the handset volume to **AMPLIFY:ON** for a user who is hearing-impaired. The **AMPLIFY:ON** volume level complies with FCC standards.

**VOLUME AMPLIFY: OFF**
This default setting is appropriate if **none** of the users are hearing-impaired. During a conversation, users can press Volume **High** or **Low** on the control panel to adjust the volume to **LOW** or **HIGH**. When the handset is replaced, the handset volume will remain until you change it again.

**VOLUME AMPLIFY: ON—TEMPORARY**
This setting is appropriate if **some** of the users are hearing-impaired. During a conversation, users can press Volume **High** or **Low** on the control panel to adjust the volume to **LOW, HIGH** or **AMPLIFY**. When the handset is replaced, the handset volume returns to the default setting of **LOW**.

**VOLUME AMPLIFY:ON—PERMANENT**
Choose **VOL AMPLIFY:ON—PERMANENT** if **all** of the users are hearing-impaired. During a conversation, users can press Volume **High** or **Low** on the control panel to adjust the volume to **LOW, HIGH** or **AMPLIFY**. When the handset is replaced, the handset volume returns to the default setting of **AMPLIFY**.

![Warning]

When you press Volume **High** or **Low** on the control panel to adjust the volume, the display shows the setting you are choosing. Each key press changes the volume to the next setting.

**WARNING**

It is important that you do not choose PERMANENT unless all the users are hearing-impaired. Otherwise, the default setting of **AMPLIFY** may damage the hearing of some users.
Setting Volume Amplify (For the Hearing-Impaired)

Please carefully read Choosing the Handset Volume (For Volume Amplify), on page 4-6 before you do the following steps:

1 Press **Menu, 1, 4, 5**.

2 If *none* of the users are hearing-impaired, press ← or → to select **VOL AMPLIFY:OFF?** and then press Set, and then go to Step 4—**OR**—If *some* or *all* of the users are hearing-impaired, select **VOL AMPLIFY:ON?** and then press Set.

3 If *all* the users are hearing-impaired, press ← or → to select **PERMANENT?** and then press Set—**OR**—If only *some* of the users are hearing-impaired, select **TEMPORARY?** and then press Set.

4 Press **Stop/Exit**.

**Memory Storage**

In the event of a power failure, all menu settings are stored permanently: **GENERAL SETUP, SETUP RECEIVE, SET AUTO DIAL, REMOTE FAX OPT** plus the **COVERPG SETUP** and **COVERPG MSG** (from **SETUP SEND**). You may have to reset the date and time.

Your machine has a Memory Backup feature; after a power failure all faxes in memory will be saved for up to four days.

**Turning On Automatic Daylight Savings Time**

You can set the machine to change automatically for Daylight Savings Time. It will reset itself forward one hour in the Spring and back one hour in the Fall.

1 Press **Menu, 1, 6**.

2 Press ← or → to select **ON** (or **OFF**), and then press Set.

3 Press **Stop/Exit**.
**Toner Save**

You can conserve toner using this feature. When you set Toner Save to ON, print appears somewhat lighter. The default setting is OFF.

1. Press **Menu, 1, 7.**
2. Press ← or → to select ON (or OFF), and then press **Set.**
3. Press **Stop/Exit.**

**Sleep Mode**

Setting the Sleep Mode reduces power consumption while the machine is idle. You can choose how long the machine is idle (from 00 to 99 minutes) before it drops into sleep mode. The timer automatically resets itself after the machine receives a fax or PC data, or makes a copy. The default setting is 5 minutes.

1. Press **Menu, 1, 8.**
2. Use the Dial pad to enter the length of time the machine is idle before it drops into sleep mode (00 to 99 minutes), and then press **Set.**
3. Press **Stop/Exit.**

**Setting Tone/Pulse Dialing Mode**

Your fax machine comes set to accommodate tone (multi-frequency) dialing service.
If you have pulse (rotary) dialing service, you need to change the dialing mode.

1. Press **Menu, 1, 9.**
2. Press ← or → to select TONE or PULSE and then press **Set.**
3. Press **Stop/Exit.**
5 Setup Receive

Basic Receiving Operations

Select Your Receive Mode

There are four different receive modes for your machine. You may choose the mode that best suits your needs by pressing the Mode button repeatedly until you have changed the FAX and FAX/TEL lights to the setting you want to use.

NOTE: The lighted indicators mean ○ = not selected ● = is selected and lit.

</table>

*In FAX/TEL mode you must set the Ring Delay and F/T Ring Time. If you have extension phones on the line, set the Ring Delay to 4 rings.
Setting Ring Delay

The Ring Delay setting determines the number of times the machine rings before it answers. If you have extension phones on the same line as the machine, keep the Ring Delay default setting of 4. (See Easy Receive, Page 5-3 and Operation from Extension Telephone or External Telephone and For FAX/TEL Mode Only, Page 5-5.)

1 Press Menu, 2, 1, 1.

2 Press or to select how many times the line rings before the machine answers (00 – 04), and then press Set. (If you select 00, the line doesn’t ring at all.)

3 Press Stop/Exit.

Setting F/T Ring Time (For FAX/TEL Mode Only)

If you set the receive mode to FAX/TEL, you’ll need to determine how long the machine will send you its special double-ring when you have a voice call. This ringing happens after the initial ringing from the phone company. Only the machine rings, for 20, 30, 40 or 70 seconds; no other phones on the same line ring the special double-ring. However, you can answer the call on any extension phone (in a separate wall jack) on the same line as the machine. (See Operation from Extension Telephone, page 5-5.)

1 Press Menu, 2, 1, 2.

2 Press or to select how long the machine will ring to alert you that you have a voice call, and then press Set.

3 Press Stop/Exit.

Now, when a call comes in and the machine is set to FAX/TEL mode, all phones on this line will ring the number of times you selected in Ring Delay.

You can let the machine pick up and detect if it’s a fax or voice call. If it’s a fax call, the machine prints the fax. If it’s a voice call, the machine signals you with a double-ring for the length of time you selected in F/T Ring Time.

Even if the caller hangs up during the double-ranging, the machine continues for the set time.
Easy Receive

When you use this feature, you don’t have to press Fax Start when you answer a fax call and hear calling beeps. Just hold the handset and wait a few seconds. When you see RECEIVING on the LCD or when you hear “chirps” through the handset of an extension phone connected to another wall jack, just replace the handset. Your machine does the rest. Selecting ON allows the machine to receive fax calls automatically, even if you lift the handset of an extension or external phone. Selecting SEMI lets the machine receive the call only if you’ve answered it at the Brother machine. Selecting OFF means you’ll have to activate the machine yourself, by pressing Fax Start—OR—by pressing * 5 1 if you are not at the machine.

If you’ve set this feature to ON, but your machine doesn’t automatically connect a fax call when you lift an external or extension phone handset, press the Fax Receive code * 5 1. At the machine, lift the handset and then press Fax Start. (See Operation from Extension Telephone or External Telephone and For FAX/TEL Mode Only, Page 5-5.)

If you send faxes from a computer on the same phone line and your Brother machine intercepts them, set Easy Receive to OFF.

1 Press Menu, 2, 1, 3.

2 Use or to select ON, SEMI or OFF, and then press Set.

3 Press Stop/Exit.

Printing a Reduced Incoming Document

Your machine can reduce the size of an incoming fax to fit the size of the paper in your machine. Select ON to turn on this feature.

After you connect Cassette #2, you can turn on Automatic Reduction for each cassette. (See Turning on Cassette #2 (Option for FAX-4100e and FAX-4750e), Page 4-1)

1 Press Menu, 2, 1, 5.

2 If you have the optional Cassette #2, press or to select CASSETTE #1 or CASSETTE #2, and then press Set.

3 Use or to select ON (or OFF), and then press Set.

4 Press Stop/Exit.

Cassette #2 can be purchased.
Setting the Print Density

If your machine is printing too light or too dark, you can adjust print density, making your printed documents darker or lighter. The new setting will remain until you change it again.

1 Press **Menu, 2, 1, 6.**

2 Press ← to make print lighter, or → to make print darker.

3 Press **Stop/Exit.**
Advanced Receiving Operations

Operation from Extension Telephone or External Telephone

If you answer a fax call on an extension phone (or on an external phone in the EXT. jack), you can make your machine take over by using the Fax Receive Code. When you press the Fax Receive Code * 5 1, the machine starts to receive a fax. (See Setting Ring Delay, Page 5-2 and Easy Receive, Page 5-3.)

If the machine answers a voice call and double-rings for you to take over, use the Telephone Answer Code # 5 1 to take the call at an extension phone.

If you answer a call, and no one is on the line, assume you’re receiving a fax. At the machine’s phone, press Fax Start, then hang up. At an extension phone, press * 5 1, wait for fax receiving tones (chirps), then hang up. At an external phone, press * 5 1 and wait for the phone to be disconnected (the LCD shows RECEIVING) before you hang up. (Your caller will have to press Fax Start to send the fax.)

For FAX/TEL Mode Only

When the machine is in FAX/TEL mode, it will use the F/T Ring Time (double-ringing) to alert you to pick up a voice call. If you’re at the machine, you can lift the handset to answer.

If you’re at an extension phone, you’ll need to lift the handset during the F/T Ring Time and then press # 5 1 between the double rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing * 5 1.

Changing Remote Codes

Remote Codes might not work with some telephone systems. The preset Fax Receive Code is * 5 1. The preset Telephone Answer Code is # 5 1.

If you are always disconnected when accessing your external TAD remotely, try changing the Fax Receive Code from * 5 1 to ## # and the Telephone Answer Code from # 5 1 to 9 9 9.

1 Press Menu, 2, 1, 4.
2 Press ☐ or ☐ to select ON (or OFF) and then press Set.
3 If you want to, type a new Fax Receive Code, and then press Set.
4 If you want to, type a new Telephone Answer Code, and then press Set.
5 Press Stop/Exit.
**Printing a Fax in Memory**

If you have Fax Storage ON for Remote Retrieval you can still print a fax in the memory when you are at your machine. (See Setting Fax Storage, Page 9-3.)

1. Press Menu, 2, 5, 4.
2. Press Fax Start.
3. After printing is finished, and then press Stop/Exit.

**Memory Security (Not available for FAX-4100e)**

Memory Security lets you prevent unauthorized access to the machine. The machine will not send faxes or print received faxes without the password. You cannot continue to schedule Delayed Faxes or Polling jobs. However, any pre-scheduled Delayed Faxes will be sent when you turn Memory Security ON so they won’t be lost.

If Fax Storage is ON before you turn Memory Security ON, then Fax Forwarding and Remote Retrieval will continue to work.

While Memory Security is ON the following operations are available:

- Receiving faxes into memory (limited by memory capacity)
- Fax Forwarding (If Fax Storage was already ON)
- Remote Retrieval

To print the faxes in memory, turn Memory Security OFF.

**Setting Up the Password**

1. Press Menu, 2, 0, 4.
2. Enter a 4-digit number for the password, and then press Set.
   If you are entering the password for the first time, the LCD shows VERIFY.
3. Re-enter the password, and then press Set.

**Turning Memory Security ON**

1. Press ₀ or ₀ to select SET SECURITY, and then press Set.
2. Enter the registered 4-digit password, and then press Set.
   The machine goes OFFLINE and the LCD shows SECURE MODE.
Turning Memory Security OFF

1 Press Menu, and then enter the registered 4-digit password. Memory Security is automatically turned off and the LCD shows the Date and Time.

Note: If you enter the wrong Password, the LCD shows WRONG PASSWORD and stays OFFLINE. The machine will stay in Secure Mode until the registered password is entered.

Polling

Polling is the process of retrieving faxes from another fax machine. You can use your machine to “poll” other machines, or you can have someone poll your machine.

All parties involved in polling need to set up their fax machines to accommodate polling. When someone polls your machine to receive a fax, they pay for the call; if you poll someone’s fax machine to receive a fax, you pay for the call.

Some fax machines do not respond to the polling function.

Setting Up Polling Receive

Polling Receive is when you call another fax machine to receive a fax from it. (See Canceling a Scheduled Job, Page 5-8.)

1 Press Menu, 2, 1, 7.

2 Press ← or → to choose ON (or OFF), and then press Set.

3 Enter the fax number you are polling.

4 Press Fax Start. The LCD shows DIALING.
Setting Up Sequential Polling Receive

Your machine can request documents from several fax units in a single operation. Afterward, a Sequential Polling Report will be printed. (See Canceling a Scheduled Job, Page 5-8.)

1 Press Menu, 2, 1, 7.

2 Press ← or → to select Polling ON (or OFF), and then press Set.

3 Specify the destination fax machines you wish to poll using One Touch, Speed Dial, a Group or the dial pad. You must press Broadcast between each location.

4 Press Fax Start.
The LCD shows DIALING.
Your machine will poll each number or group member in turn for a document.

Canceling a Scheduled Job

You can cancel tasks you’ve scheduled, such as Delayed Fax or Polling Transmit.

1 Press Menu, 2, 6.

Any waiting jobs will appear on the LCD. If no jobs are waiting, the LCD shows NO JOB WAITING.

2 If you have more than two jobs waiting, use ← or → to select the job you want to cancel, and then press Set.
—OR—
If you have only one job waiting, go to Step 3.

3 Press 1 to cancel—OR—Press 2 to exit without canceling.
To cancel another job, return to Step 2.

4 Press Stop/Exit.

You can check which jobs are waiting in memory by following Steps 1 and 2 above.
Setup Send

Before You Begin

Before you begin sending faxes, please be sure to read all the instructions and cautions listed below for placing originals in the automatic document feeder.

Using the ADF (Automatic Document Feeder)

- Documents must be between 5.8 and 8.5 inches wide between 3.9 and 14.1 inches long. Your machine can scan an image only 8.15 inches wide, regardless of how wide the paper is.
- Fan the pages before placing them in the ADF.
- Make sure you insert documents face down, top edge first.
- Adjust the paper guides to fit the width of your document.
- The ADF (automatic document feeder) can hold up to 30 Pages, feeding each one individually through the machine. If you “Stagger” the pages, the ADF can hold up to 50 pages. Use standard (17 lb–24 lb) paper when using the ADF. If you’re using heavier paper, feed each sheet individually to prevent paper jams.
- DO NOT use curled, wrinkled, folded or ripped paper, or paper with staples, paper clips, paste or tape attached. DO NOT use cardboard, newspaper or fabric.
- Make sure documents written in ink are completely dry.
- Before you send a fax press Resolution to select the resolution for the document you’re sending. (See Fax Resolution, Page 6-5.)

If you send faxes from a computer on the same phone line and your Brother machine intercepts them, set Easy Receive to OFF.
Sending Faxes with Multiple Settings

When you send a fax you can choose any combination of these settings: add a coverpage and select a comment; set the contrast or resolution; send using overseas mode, or delayed fax timer, polling transmission or real time transmission. After each menu selection is accepted, the LCD will ask if you want to enter other settings:

Press 1 if you want to select additional settings. The LCD returns to the SETUP SEND menu—OR—
Press 2 if you are finished choosing settings, and then go to the next step.

Manual Transmission

Manual transmission lets you hear the dial tone, ringing and fax receiving tones while sending a fax.

1 Place the original face down in the ADF.
2 Pick up the handset and listen for a dial tone—OR—
Press Hook and listen for a dial tone.
3 Dial the fax number you want to call (you can enter the digits using the dial pad, or you can enter a One Touch or Speed Dial number or you can call from the Search). (See One Touch Dialing, Page 7-5.)
4 When you hear the fax tone, press Fax Start.
5 If you’re using the handset, hang up.

Automatic Transmission

This is the easiest way to send a fax. IMPORTANT: Do not pick up the handset, or press Hook to listen for a dial tone.

1 Place the original face down in the ADF.
2 Enter the fax number using One Touch, Speed Dial, Search or the dial pad. (See Speed Dialing, Page 7-5.)
3 Press Fax Start.

Manual and Automatic Fax Redial

If you’re sending a fax manually and the line is busy, after you disconnect the call press Redial/Pause to retry the number.

If you’re sending a fax automatically and the line is busy, the machine will redial automatically redial (up to three times at 5 minute intervals).
Dual Access
You can scan up to 50 documents into the fax memory, even while the machine is receiving or sending another fax (from memory). You can set temporary settings for each fax you’re scanning, except Timer and Polling.

If you try to scan and store a 51st fax, the machine will send it immediately, without storing it in memory.

If you get a OUT OF MEMORY message while scanning the first page of a fax, press Stop/Exit to cancel scanning. If you get a OUT OF MEMORY message while scanning in a subsequent page, you’ll have the option to press Fax Start to transmit the pages scanned so far, or to press Stop/Exit to cancel the operation.

1 Place the original face down in the ADF.
2 Enter the fax number.
3 Press Fax Start. As the machine scans the original, the LCD shows the job number (#XXX) of the fax and how much memory is available. Then the machine starts dialing. You can immediately repeat Steps 1 to 3 for the next fax.

Your machine normally operates in Dual Access mode. However, you can override Dual Access by using Real Time Transmission.

Real Time Transmission
When you are sending a fax, the machine will scan originals into memory before sending. Then, as soon as the phone line is free, the machine will start dialing and sending the fax. If memory becomes full, the machine will send the document in real time (even if REAL TIME TX is set to OFF).

Sometimes you may want to send an important document immediately, without waiting for memory transmission. You can set REAL TIME TX to ON.

1 Place the original face down in the ADF.
2 Press Menu, 2, 2, 6.

3 To change the default setting, and then press or to select ON (or OFF) and then press Set. Go to Step 5—OR—For the next fax transmission only, press or to select NEXT FAX ONLY, and then press Set.

4 For the next fax only, press or to select ON (or OFF), and then press Set.
5 Press 1 if you want to select additional settings. The LCD returns to the SETUP SEND menu—OR—Press 2 if you are finished choosing settings, and then go to Step 6.
6 Enter fax number and then press Fax Start.
Checking the Jobs Status

Check which jobs are still waiting in memory to be sent. (If no jobs are waiting, the LCD shows NO JOB WAITING.) (Canceling Jobs in Memory on this page.)

1 Press Menu, 2, 6.
2 If you have multiple jobs waiting, use ⬊ or ⬊ to scroll through the list.
3 Press Stop/Exit.

Canceling a Job While Scanning the Original

You can cancel a job while you are scanning it into memory by pressing Stop/Exit. Eject the document by pressing Stop/Exit again.

Canceling Jobs in Memory

You can cancel tasks you’ve scheduled, such as Delayed Fax, Polling Receive, Polling Transmit or faxes in memory waiting to be sent.

1 Press Menu, 2, 6.
Any waiting jobs appear on the display. If no jobs are waiting, the LCD shows NO JOB WAITING.
2 If you have more than two jobs waiting, use ⬊ or ⬊ to select the job you want to cancel, and then press Set.
—OR—
If you have only one job waiting, go to Step 3.
3 Press 1 to cancel—OR—Press 2 to exit without canceling. To cancel another job, return to Step 2.
4 Press Stop/Exit.
Basic Sending Operations

Contrast
If your document is very light or very dark, you might want to set the contrast. Use S.LIGHT to send a very light document. Use S.DARK to send a very dark document.

1. Place the original face down in the ADF.
2. Press Menu, 2, 2, 1.
3. Use ▼ or ▲ to select AUTO, S.LIGHT or S.DARK, and then press Set.
4. Press 1 if you want to select additional settings. The LCD returns to the SETUP SEND menu—OR—Press 2 if you are finished choosing settings, and go to Step 5.
5. Enter a fax number, and then press Fax Start to send a fax.

Fax Resolution
When you have an original in the ADF, you can use the Resolution key to temporarily change the setting. Press Resolution repeatedly until the LCD shows the setting you want.

—OR—
You can change the default setting.

1. Press Menu, 2, 2, 2.
2. Press ▼ or ▲ to select the resolution you want, and then press Set.
3. Press Stop/Exit.

STANDARD—Suitable for most typed documents.
FINE—Good for small print; transmits a little slower than Standard resolution.
S. FINE—Good for small print or artwork; transmits slower than Fine resolution.
PHOTO—Use when original has varying shades of gray; slowest transmission time.
Composing Electronic Cover Page

The cover page is generated at the receiving party’s machine. Your cover page includes the name stored in the One Touch or Speed Dial memory. If you’re dialing manually, the name is left blank. (See One Touch Dialing, Page 7-5 and Speed Dialing, Page 7-5.)

The cover page indicates your Station ID, and the number of pages you’re sending. If you have Cover Page Setup set to ON, the number of pages remains blank. (Menu, 2, 2, 8.) (See Setting Station ID, Page 4-3.)

You can select a comment to include on your cover page.

1. COMMENT OFF
2. PLEASE CALL
3. URGENT
4. CONFIDENTIAL

Instead of using one of the comments above, you can enter up to two customized messages, each 27 characters long. Use the chart on Page 4-4 to help enter characters. (See Composing Your Own Comments, Page 6-7.)

5. (USER DEFINED)
6. (USER DEFINED)

Most of the SETUP SEND menu selections are temporary settings that allow you to make adjustments for each document you send. However, so you can set up your cover page and cover page comments in advance, the Cover Page Setup and Cover Page Message menu selections change the default settings.
Composing Your Own Comments

You can set up two custom comments.

1. Press **Menu, 2, 2, 9.**

2. Use ▼ or ▲ to choose position 5 or 6 for your customized comment and then press **Set.**

3. Use the dial pad to enter your customized comment, and then press **Set.**
   (See *Entering Text*, Page 4-4.)

4. Press 1 if you want to select additional settings. The LCD returns to the **SETUP SEND** menu—**OR**—Press 2 to exit.

Cover Page for the Next Fax Only

Make sure the Station ID is set up. (See Page 4-4.) This feature does not work without the Station ID.

You can set the fax to send a cover page with a particular document. This cover page will include the number of pages in your document.

1. Place the original face down in the ADF.

2. Press **Menu, 2, 2, 8.**

3. When the LCD shows **NEXT FAX ONLY,** and then press **Set.**

4. Press ▼ or ▲ to select **ON** (or **OFF**), and then press **Set.**

5. Press ▼ or ▲ to select one of the standard or custom comments, and then press **Set.**

6. Enter two digits to indicate the number of pages you are sending, and then press **Set.** (For example, press **02** for 2.) (Enter **0 0** to leave the number of pages blank.) If you make a mistake, and then press ▼ to back up and reenter the number of pages.

7. Press 1 if you want to select additional settings. The LCD returns to the **SETUP SEND** menu—**OR**—Press 2 if you are finished choosing settings, and then go to Step 8.

8. Enter the fax number you’re calling.

9. Press **Fax Start.**
**Always Send Cover Page**

Make sure the Station ID is set up. This feature does not work without the Station ID. (See *Setting Station ID*, Page 4-3.)

You can set the machine to send a cover page whenever you send a fax. The number of pages in your fax is not included when you use this setting.

1. Press **Menu, 2, 2, 8.**

2. Press **←** or **→** to select **COVERPAGE: ON** and then press **Set.**

3. If you selected **ON**, press **←** or **→** to select one of the standard or custom comments, and then press **Set.**

4. Press **1** if you want to select additional settings. The LCD returns to the **SETUP SEND** menu—**OR**—Press **2** to exit if you are finished choosing settings.

**Using a Printed Cover Page**

If you prefer using a printed cover page that you can write on, you can print the sample page and attach it to your fax.

1. Press **Menu, 2, 2, 8.**

2. Press **←** or **→** to select **PRINT SAMPLE**, and then press **Set.**

3. Press **Fax Start**. Your machine prints a copy of your cover page.
Advanced Sending Operations

Overseas Mode

After you send a fax using this feature, the feature turns itself off.

1 Place the original face down in the ADF.

2 Press **Menu**, **2**, **2**, **0**.

3 Press ↩ or ⇔ to select **ON** (or **OFF**), and then press **Set**.

4 Press **1** if you want to select additional settings. The LCD returns to the **SETUP SEND** menu—**OR**—Press **2** if you are finished choosing settings and go to Step 5.

5 Enter the fax number you’re calling.

6 Press **Fax Start**.

Delayed Timer

You can set up the time of day that delayed faxes will be sent. This time will be displayed for acceptance or you can override it in **Delayed Fax**. (See **Delayed Fax**, Page 6-10.)

1 Press **Menu**, **2**, **2**, **3**.

2 Enter the time (in 24-hour format) that you want delayed faxes to be sent, and then press **Set**.

3 Press **Stop/Exit**.
Delayed Fax

During the day you can store up to 50 documents into memory for delayed sending. Transmission of these documents will begin at the time of day you enter in Step 3. If you have set up in Delayed Timer on page 6-9, you can accept it in Step 3 or enter another time for this fax.

1 Place the original face down in the ADF.
2 Press Menu, 2, 2, 4.
3 Accept the displayed time or enter another time for this fax, and then press Set.
4 Press 1 to leave the originals waiting in the document feeder—OR—Press 2 to scan the document into memory.
5 Press 1 if you want to select additional settings. The LCD returns to the SETUP SEND menu—OR—Press 2 if you are finished choosing settings, and then go to Step 6. The screen will prompt you to enter the fax number.
6 Enter the fax number.
7 Press Fax Start. The machine will wait to send the fax at the time you set.

The number of documents you can scan into memory varies with the data they contain.

Delayed Batch Transmission

Before sending the delayed faxes, your Brother machine will economize by sorting all the documents in memory by destination and scheduled time. All delayed faxes scheduled at the same time to the same fax number will be sent as one transmission.

1 Press Menu, 2, 2, 5.
2 Press \( \text{or} \) to select ON (or OFF), and then press Set.
3 Press Stop/Exit.
Setting Up Polling Transmit

Polling Transmit is when you set up your machine to wait with a document so another fax machine can retrieve it.

1 Place the original face down in the ADF.

2 Press **Menu, 2, 2, 7.**

3 Press $or$ $to choose **POLLED TX:ON,** and then press **Set.**

4 Press 1 to leave the originals waiting in the document feeder—**OR**—Press 2 to scan the document into memory.

5 Press 1 if you want to select additional settings. The LCD returns to the **SETUP SEND** menu—**OR**—Press 2 if you are finished choosing settings and go to Step 6.

6 Press **Fax Start.**

**Note** If you pressed 1 in Step 4, the original remains in the ADF until your machine is polled. If you must use your machine before the polled transmit occurs, you must cancel this job.
Auto Dial Numbers and Dialing Options

Storing Numbers for Easy Dialing

You can set up your machine to do three types of easy dialing: One Touch, Speed Dial, and Groups for Broadcasting of faxes. You can store names with these numbers for easy identification.

- If you must wait for another dial tone at any point in the dialing sequence, store a pause at that point in the number by pressing **Redial/Pause**. Each key press adds a 3.5 second delay.
- If you lose electrical power, auto dial numbers stored in memory will **not** be lost.

### Storing One Touch Dial Numbers

You can store 32 fax/phone numbers that you can dial by pressing one key (and **Fax Start**). To access numbers 17 to 32, hold down the **Shift** key. When you press a One Touch dial location, the LCD shows the name or number as the call is dialed. (See **One Touch Dialing**, Page 7-5.)

*One Touch keys are the 16 keys (numbers 01–32) located on the left side of the control panel.*

(For FAX-4750e and FAX-5750e, USA only) One-Touch key **1** has been pre-programmed for the Brother fax back system.

1. Press **Menu, 2, 3, 1.**
2. Press the One Touch key where you want to store a number.
   The LCD shows the location you selected.
3. Enter a number (up to 20 digits) and then press **Set.**
   (See **Changing One Touch and Speed Dial Numbers**, Page 7-2.)
4. If you want to enter a pause in the dialing sequence (for example, to access an outside line), press **Redial/Pause** as you’re entering digits. A dash appears on the LCD, pressing **Redial/Pause** enters a 3.5 second pause when the number is dialed.
5. Use the dial pad to enter the name (up to 15 characters), and then press **Set.** You can use the chart on Page 4-4 to help you enter letters—**OR**—Press **Set** to store the number without a name.
6. Return to Step 2 to store another One-Touch number—**OR**—Press **Stop/Exit.** When you dial an auto dial number, the LCD shows the name you’ve stored, or if you haven’t stored a name, the number you’re stored.
Storing Speed Dial Numbers

You can store Speed Dial numbers, so you can dial by pressing only six keys (five keys for FAX-4100e) (Search/Speed Dial, #, and the Speed Dial location, and Fax Start). E-mail addresses can be stored in locations 01-100. E-mail address cannot be stored in FAX-4100e.

1 Press **Menu, 2, 3, 2**.

2 Use the dial pad to enter a Speed Dial location, and then press **Set**. (01-200) (00-99 for FAX-4100e)

3 Enter the number (up to 20 digits) and then press **Set**.

4 Use the dial pad to enter the name (up to 15 characters), and then press **Set**. You can use the chart on Page 4-4 to help you enter letters—**OR**—Press **Set** to store the number without a name.

5 Return to Step 2 to store another Speed Dial number—**OR**—Press **Stop/Exit**.

Changing One Touch and Speed Dial Numbers

If you try to store a One Touch or Speed Dial number in a location where a number is already stored, the LCD shows the current name stored at that location, then prompts you to either

1 Press 1 to change the number, or press 2 to exit without changing it.

2 Enter a new number and then press **Set**.
   ▪ If you want to erase the number, press **Clear** when the cursor is to the left of the digits.
   ▪ If you want to change a digit, use ← or → to position the cursor under the digit you want to change, then type over it.

3 Follow the directions beginning at Step 4 for Storing One Touch Numbers or Storing Speed Dial Numbers.
Setting Up Groups for Broadcasting

Groups allow you to send the same fax message to many fax numbers by pressing only one One Touch Group key (and Fax Start). First, you’ll need to store each fax number as a One Touch or Speed Dial number. Then, you can combine them into a Group. Each Group uses up a One Touch key or a Speed Dial location. Finally, you can have up to six small Groups, or you can assign up to 231 numbers (131 numbers for FAX-4100e) to one large Group.

(See Storing One Touch Dial Numbers, Page 7-1 and Storing Speed Dial Numbers, Page 7-2.)

1 Press Menu, 2, 3, 3.

2 Select a One Touch key where you wish to store the Group number. (For example, press One Touch key 02 for Group 1.)

3 Use the dial pad to enter the Group number and then press Set.
   (For example, press 1 for Group 1.)

4 To include One Touch or Speed Dial numbers in the Group, enter them as if you were dialing. For example, for One Touch key 05, and then press One Touch key 05. For Speed Dial location 09, press Search/Speed Dial, then press 0, 0, 9 (0, 9 for FAX-4100e) on the dial pad. The LCD shows *005, #009 (*05, #09 for FAX-4100e).

5 When you’re finished adding numbers, and then press Set.

6 Use the dial pad and the chart on Page 4-4 to enter a name for the Group and then press Set. (For example, NEW CLIENTS)

7 Press Stop/Exit.

You can print a list of all One Touch and Speed Dial numbers.
(See Printing Reports, Page 10-1.)
Dialing Options

You can use your machine to make voice telephone calls, by dialing manually, or by using Search, One Touch or Speed Dial memory. When you dial an auto dial number, the LCD shows the name you’ve stored, or, if you haven’t stored a name, the fax number you’ve stored.

Manual Dialing

Manual dialing is simply pressing all of the digits of the phone number.

1 Pick up the handset—OR—Press Hook.
2 When you hear a dial tone, dial the call using the dial pad.
3 If you pressed Hook to dial the call, pick up the handset when the other party answers. (The speaker works only one way; the other party won’t be able to hear you unless you pick up the handset.)
4 To hang up, replace the handset.

Search

You can search for names you have stored in One Touch and Speed Dial memories. Names are stored alphabetically. (See Storing One Touch Dial Numbers, Page 7-1 and Storing Speed Dial Numbers, Page 7-2.)

1 Press Search/Speed Dial, and then enter the first letter of the name you’re looking for.
2 Press  or  to search the names that are stored alphabetically.
3 When the LCD shows the name you want to call, pick up the handset or press Hook.
4 Press Fax Start to begin dialing.
5 If you pressed Hook to dial the call, pick up the handset when the other party answers. (The speaker works only one way; the other party won’t be able to hear you unless you pick up the handset.)
6 When the call is over, hang up.
**Speed Dialing**

1. Pick up the handset—**OR**—Press **Hook**.  
   (See *Storing Speed Dial Numbers*, Page 7-2.)

2. When you hear a dial tone, press **Search/Speed Dial**, and then press # then the three-digit (two-digit for FAX-4100e) Speed Dial number.

3. If you pressed **Hook** to dial the call, pick up the handset when the other party answers. (The speaker works only one way; the other party won’t be able to hear you unless you pickup the handset.)

4. To hang up, replace the handset.

   If you are sending a fax, press **Fax Start** after pressing the Speed Dial number.  
   If you picked up the handset, press **Fax Start** when the receiving fax machine answers with fax tones.

**One Touch Dialing**

1. Pick up the handset—**OR**—Press **Hook**.

2. When you hear a dial tone, press the One Touch key of the location you want to call. (See *Storing One Touch Dial Numbers*, Page 7-1.)

   To dial One Touch numbers 17 to 32, hold down **Shift** as you press the One Touch key.

3. If you pressed **Hook** to dial the call, pick up the handset when the other party answers. (The speaker works only one way; the other party won’t be able to hear you unless you pickup the handset.)

4. To hang up, replace the handset.

   If you try to use a One Touch location with no number stored in it, you’ll hear a warning sound, and screen will display **NOT REGISTERED**. The display will return to normal after 2 seconds.

   If you are sending a fax, press **Fax Start** after pressing the One Touch key. If you picked up the handset, press **Fax Start** when the receiving fax machine answers with fax tones.
Broadcasting

Broadcasting is automatically sending the same fax message to multiple fax numbers. Using the Broadcast key, you can include Groups, One Touch locations, Speed Dial locations, plus up to 50 manually dialed numbers. However, available memory will vary with the types of jobs in memory and the number of locations used for broadcasting. If you broadcast to more than the maximum locations available, you will not be able to set up transmissions using dual access and the timer. (See Setting Up Groups for Broadcasting, Page 7-3.)

The easiest way to broadcast is to press Group keys, you can include One Touch, Speed Dial, and manually, dialed numbers in the same broadcast. You must press Broadcast between each of these locations. Use the Telephone Index to help you choose the numbers easily.

After the broadcast is completed, a Broadcast Report will be printed automatically to let you know the results.

- Enter the long dialing sequence numbers as you normally would, but keep in mind that each key counts as one location, so the number of locations you can call become limited.

- If the line is busy or for some other reasons a connection could not be made while broadcasting, the machine will redial the number automatically.

- If the memory is full, press Stop/Exit to abort the job; (if more than one page has been scanned) or press Fax Start to send the portion that is in the memory.

1 Place the original face down in the ADF.

2 Enter a number using One Touch, Speed Dial, Group number, Search or the dial pad.
   Example: Group number

3 Press Broadcast. You will be prompted to press the next number.

4 Enter the next number. Example: Speed Dial number.

5 Press Broadcast.

6 Enter the next fax number.
   Example: Manual dialing, using the dial pad

7 Press Fax Start.

Your machine will read the document into memory and then start sending faxes to all the numbers you entered.
Access Codes and Credit Card Numbers

Sometimes you may want to choose from among several long distance carriers when you make a call. Rates may vary depending upon the time and destination. To take advantage of low rates, you can store the access codes or long-distance carriers as One Touch and Speed Dial numbers. You can store these long dialing sequences by dividing them and setting them up separately in any combination. You can even include manual dialing using the dial pad. The combined number will be dialed in the order you entered it, as soon as you press Fax Start. (See Storing One Touch Dial Numbers, Page 7-1.)

For example, you store “555” on One Touch key 03 and “7000” on One Touch key 04. If you press One Touch 03, 04 and Fax Start you can dial “555-7000”. To temporarily change a number, you can substitute part of the number with manual dialing using the dial pad. For example, to change the number to 555-7001 you could press One Touch 03 and then press 7, 0, 0, 1 using the dialing pad.

If you must wait for another dial tone at any point in the dialing sequence, store a pause at that point in the number by pressing Redial/Pause. Each key press adds a 3.5 second delay.

Pause

Press Redial/Pause to insert a 3.5 second pause between numbers. If you are dialing overseas, you can press Redial/Pause as many times as needed to increase the length of the pause.

Hold

1 Press Hold to place a call on Hold.
2 You can replace the handset without disconnecting the call.
3 Pick up the machine’s handset to release the call from Hold. Picking up an extension handset will not release the call from Hold.

Redial

If you’re sending a fax manually and the line is busy, press Redial/Pause to try again. Anytime you want to make a second call to the last number dialed, press Redial/Pause to save time.

Tone/Pulse (For Canada Only)

If you have pulse dialing service, but need to send tone signals (for example, telephone banking), follow the directions below. If you have touch tone service, you do not need this feature to send tone signals.

1 Lift the handset.
2 Press #: Digits dialed after # will send tone signals.
3 When you hang up, the machine returns to pulse dialing service.
Custom Features

Your fax machine supports the Distinctive Ring and Caller ID telephone services offered by some telephone companies.

If you have Voice Mail, Call Waiting, Call Waiting/Caller ID, RingMaster, an answering service, or on alarm system custom feature on your telephone line, it may create a problem in the operation of your machine. (See *I have difficulty with custom features on a single line*, Page 13-8.)

If you have Voice Mail on your phone line, please read the following carefully.

Distinctive Ring

The term “Distinctive Ring” is used by Brother to identify a phone company service that is given *many names, depending on the Telephone Company you are using*. For example, this service may be called SmartRing, RingMaster, Teen-Ring, Indent-a-Call or Indent-a-Ring.

What Does Your Telephone Company’s “Distinctive Ring” Do?

Your telephone company’s Distinctive Ring service allows more than one number to be on the same phone line. **If you need more than one phone number, it is an inexpensive alternative to paying for an additional line.** Each phone number has its own distinctive ring pattern, so you will know which phone number is ringing. This is one way you can have a separate phone number for your fax machine.

Please consult your telephone company for availability and rates.

What Does Brother’s “Distinctive Ring” Do?

The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company’s Distinctive Ring service. You can dedicate the new phone number on your line to receiving only faxes.

You must purchase your telephone company’s Distinctive Ring service *before* you program the Brother machine to work with it.
Do You Have Voice Mail?

If you have Voice Mail on the phone line you on which will install your new machine on, there is a strong possibility that Voice Mail and the fax machine will conflict with each other while receiving incoming calls. However, this Distinctive Ring feature allows the use of more than one number on your line, so both Voice Mail and the fax machine can coexist peacefully. If each one has a separate phone number, neither will interfere with the other’s work.

If you decide to get the Distinctive Ring Service from the telephone company, you will need to follow the directions below to “register” the new Distinctive Ring pattern they provided, so your fax machine can recognize its incoming calls.

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily and later turn it back on. When you get a new fax number, make sure you reset this setting.

Before You Choose the Ring Pattern to Register

You can register only one Distinctive Ring pattern with the machine. Some ring patterns cannot be registered. Please refer to some popular ring pattern examples that will be provided from the phone company in the USA and Canada that are shown in the Brother compatibility table below.

<table>
<thead>
<tr>
<th>Ring Pattern</th>
<th>Rings</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>long - long</td>
</tr>
<tr>
<td>2</td>
<td>short - long - short</td>
</tr>
<tr>
<td>3</td>
<td>short - short - long</td>
</tr>
<tr>
<td>4</td>
<td>very long (normal pattern)</td>
</tr>
</tbody>
</table>

If the ring pattern the phone company provided cannot be registered by the fax, please check for other available ring pattern choices from the phone company.

- The fax machine will answer only calls to its registered number.
- The first two rings are silent on the fax machine. This is because the fax must «listen» to the ring pattern (compare it to the pattern that was “registered”). (Other telephones on the line will ring.)
- If you program the fax machine correctly, it will recognize the registered ring pattern of the “fax number” within 2 ring patterns and then automatically answer with a fax tone. When the “voice number” is called, the fax machine will not interrupt the call.
Very Important

If you have Voice Mail, or a TAD (Telephone Answering Device) and want to keep one of your phone numbers dedicated only to fax calls, you must leave the machine in **MANUAL** mode at all times while using the Distinctive Ring Feature. Here’s why: Manual mode will never pick up a call by itself, since it is «Neutral». When the machine is in this «neutral» mode, the Distinctive Ring Feature can be activated. The distinctive ring feature is actually an answering mode. So, do not activate FAX mode or FAX/TEL mode while using distinctive ring; otherwise, the fax machine will answer calls for *all* the numbers.

**Registering the Distinctive Ring Pattern**

1. Set the machine to MANUAL mode.
2. Press **Menu, 2, 0, 1**.
3. Press < or > to select **DISTINCTIVE:SET** and then press **Set**.
4. Press < or > to select the prestored ring pattern you want to assign, and then press **Set**. (You will hear each pattern as you scroll through the four patterns.) Be sure to choose the pattern assigned by the Telephone Company.
5. Press **Stop/Exit**.

**Caller ID**

The Caller ID feature of this machine lets you use the Caller ID subscriber service offered by many local phone companies. This service provides the name or telephone number of your caller on the LCD as the line rings.

After a few rings, the LCD shows the telephone number of your caller (or name, if available). Once you pick up the handset, the Caller ID information disappears from the screen, but the call information remains stored in the Caller ID memory.

- You will see the first 16 characters of the number or name.
- **OUT OF AREA** display means call originates outside your Caller ID service area.
- **PRIVATE CALL** display means the caller has intentionally blocked transmission of information.
- **CALL PICKUP** display remains on the screen when no Caller ID information was transmitted.

If both the name and number are received, the LCD shows only the name. You can print a list of Caller ID information received by your machine.

Caller ID service varies with different carriers. Call your local phone company to determine the kind of service available in your area.
Viewing Caller ID List

Caller ID memory stores information for up to thirty calls; when the thirty-first call comes in, information about the first call is erased. You can scroll through Caller ID information to review those calls made to your machine.

1 Press Menu, 2, 0, 2.

2 Press ← or → to select DISPLAY # and then press Set.
   If the name was not received, it will not be displayed.

3 Press ← or → to scroll through the Caller ID memory to select the Caller ID you want to view and then press Set.
   The next LCD shows the caller's telephone number and the date and time of the call.

4 Press ← or → to return to the Caller ID listing—OR—Press Stop/Exit.

Clearing a Caller ID Stored in Memory

For effective use of the memory, we recommend that you clear the Caller IDs stored in memory by pressing Clear when the LCD shows each caller ID number or name.

Printing Caller ID List

1 Press Menu, 2, 0, 2.

2 Press ← or → to select PRINT REPORT and then press Set.

3 Press Fax Start to exit.
Remote Fax Options

Fax Forwarding/Paging

You cannot use Paging and Fax Forwarding at the same time.
You cannot use Paging and Fax Forwarding when “Fax Storage” is set to OFF.

Programming a Fax Forwarding Number

When Fax Forwarding is set to ON, your machine stores the received fax in memory, then dials the fax number you’ve programmed, and forwards the fax message.

1 Press Menu, 2, 5, 1.

2 Press or until the LCD shows FAX FORWARD and then press Set.

3 The screen prompts you to enter the number of the fax machine where faxes will be forwarded. Enter the forwarding number (up to 20 digits) and then press Set.

4 Press Stop/Exit.
Programming Your Pager Number

When Paging is selected, your machine dials the pager number you’ve programmed, and then dials your Personal Identification Number (PIN); this activates your pager so you know you have a fax message in the memory.

1. Press **Menu, 2, 5, 1.**

2. Press ← or → until the LCD shows **PAGING** and then press **Set.**

3. Enter your pager phone number (up to 20 digits) followed by # #, and then press **Set.** Do not include the area code if it is the same as that of your machine.
   *For example, 1 8 0 0 5 5 5 1 2 3 4 # #.*

4. If your pager requires a PIN, enter the PIN, press #, press **Redial/Pause,** enter your fax number followed by # #, and then press **Set.**
   *For example, 1 2 3 4 5 # #, Redial/Pause 1 8 0 0 5 2 1 8 4 6 # #.*
   —OR—If you do not need a PIN, press **Redial/Pause,** enter your fax number followed by # #, and then press **Set.**
   *For example, Redial/Pause 1 8 0 0 5 2 1 2 8 4 6 # #.*

5. Press **Stop/Exit.**

You cannot change a Paging number or PIN remotely.

*Note* Press **Redial/Pause** for each 3.5 second delay, as needed.
Setting Fax Storage

If you set Fax Storage to **ON**, you will be able to retrieve fax messages from another location using Fax Forwarding, Paging or Remote Retrieval functions. The LCD will indicate when you have a fax stored in memory. (See *Remote Retrieval*, Page 9-4.)

1. Press **Menu, 2, 5, 2.** The screen prompts you to choose a fax setting.
2. Press  or  to select **ON** (or **OFF**), and then press **Set.**
3. Press **Stop/Exit.**

If there are faxes in memory when you turn Fax Storage to OFF, the LCD prompts you to erase any faxes in memory.

4. If you press 1, all fax data is erased and Fax Storage is turned off. If you press 2, data is not erased and Fax Storage remains on.

*Note* Fax Forwarding and Remote Retrieval will work while Memory Security is **ON** if you turn Fax Storage **ON** first.

Backup Print Setting (Not available for FAX-4100e)

If you have set **FAX STORAGE** to **ON**, your faxes will be received into memory, so you can retrieve them remotely. With **BACKUP PRINT** set to **ON**, your machine automatically prints faxes as they are received into memory. FAX-4750e and FAX-5750e users can turn Backup Print OFF to save paper or prevent confidential documents from printing in your absence; however, the FAX-4100e always prints the “Safety” paper copy.

1. Press **Menu, 2, 5, 5.** The screen prompts you to choose a fax setting.
2. Press  or  to select **ON** (or **OFF**), and then press **Set.**
3. Press **Stop/Exit.**
Changing Remote Retrieval Access Code

Enter your Remote Retrieval Access Code when the machine picks up your call, so you can access features remotely. The access code is preset to 1 5 9 *, but you can change this. The * cannot be changed.

1 Press Menu, 2, 5, 3.
2 Enter a three-digit number from 000 to 999, and then press Set.
   (Do not use the same digits that appear in your Fax Receive Code or Telephone Answer Code.)
3 Press Stop/Exit.

Remote Retrieval

You can call your machine from any fax machine using touch tone and use a Remote Retrieval Access Code and other button presses to retrieve fax messages. Cut out the Remote Retrieval Access Card on the last page and keep it in your wallet as an aid.

Using Remote Retrieval Access Code

1 Dial your fax number from a fax machine using touch tone.
   (See Changing Remote Retrieval Access Code, Page 9-4.)
2 When your machine answers and beeps, immediately enter your Remote Retrieval Access Code (1 5 9 *).
3 Your machine signals the kinds of messages received:
   1 long beep — Fax message(s)
   No long beeps — No messages
4 Your machine then prompts you with two short beeps to enter a command. If you wait longer than 30 seconds to enter a command, your machine hangs up. If you enter an invalid command, your machine beeps three times.
5 Press 9 0 to reset your machine when you’re finished.
6 Hang up.

If your machine is set to MANUAL mode, you can access your machine by waiting about 2 minutes, and then entering the Remote Retrieval Access Code within 30 seconds.
## Remote Commands

Follow the commands below to access features remotely. When you call your machine and enter your Remote Retrieval Access Code (1 5 9 *), the system will signal you with two short beeps to enter a remote command.

<table>

</tbody>
</table>
**Retrieving Fax Messages**

1. Dial your fax number.
2. When your machine answers, immediately enter your Remote Retrieval Access Code (1 5 9 #).
3. As soon as you hear two short beeps, use the dial pad to press 9 6 2.
4. Using the dial pad, enter the number (up to 20 digits) of the remote fax machine where you want your fax messages forwarded, followed by # #.
5. After you hear your machine beep, hang up and wait.

Your machine calls the remote fax machine. The remote fax machine prints your fax messages.

**Changing Fax Forwarding Number**

You can change the default setting of your fax forwarding number from a remote fax machine.

1. Dial your fax number.
2. When your machine answers, immediately enter your Remote Retrieval Access Code (1 5 9 #).
3. When you hear two short beeps, enter 9 5 4.
4. Enter the new telephone number of the remote fax machine (up to 20 digits) where you want your fax messages forwarded, followed by # #.
5. After you hear your machine beep, hang up.
10 Printing Reports

Machine Settings and Activity

Two reports require initial setup in the Menu: Transmission Verification Report and Fax Activity Report Interval. For initial setup:

Press **Menu, 2, 4, 1.**

—OR—

Press **Menu, 2, 4, 2.**

Customizing the Transmission Verification Report

You can use the Transmission Report as proof that you sent a fax. This report lists the job number time and date of transmission and whether the transmission was successful (OK). If you select **ON** or **ON+IMAGE**, the report will print for every fax you send.

When the feature is **OFF**, the report prints only if a transmission *error* prevented delivery (NG).

If you typically send multiple faxes to the same destinations, you may need more than the job numbers to identify the faxes you must send again. Selecting **OFF+IMAGE** will print a portion of the fax’s first page on the report to help you remember.

1. Press **Menu, 2, 4, 1.**
2. Press or to select **OFF**, **OFF+IMAGE**, **ON** or **ON+IMAGE**, and then press **Set.**
3. Press **Stop/Exit.**

Setting the Fax Activity Report Interval

You can set the machine to print activity reports at specific intervals (EVERY 50 FAXES, 6, 12, 24 hours, 2 or 7 days). If you set the interval to **OFF**, you can print the report by following the Steps in the next page.

1. Press **Menu, 2, 4, 2.**
2. Press or to choose an interval, and then press **Set.**

(If you choose 7 days, the LCD prompts you to choose a day at which to begin the 7-day countdown.)
3 Enter the time to begin printing, in 24-hour format, and then press Set. (For example: enter 19:45 for 7:45 PM.)

4 Press Stop/Exit.

**Using the Reports Key**

1 Press Reports.

2 Press ← or → to select the report you want, and then press Set.

— OR —

Enter the number of the report you want to print. For example, press 1 to print the Help List.

Five reports are available:

1. HELP LIST
   - Prints the Help List so you can see at-a-glance how to quickly program every menu selection.

2. AUTO DIAL
   - Lists names and numbers stored in One Touch and Speed Dial memory, in numerical order.

3. FAX ACTIVITY
   - Lists information about the incoming and outgoing faxes. TX means Transmit; RX means Receive.
   - Prints a Transmission Verification Report for your last transmission.

4. TRANSMISSION
   - Lists settings for GENERAL SETUP, SETUP RECEIVE, SETUP SEND, SETUP REPORT, REMOTE FAX OPT and MISCELLANEOUS.

5. USER SETTINGS

Don’t forget to set up the Fax Activity Report and Transmission Verification Report as explained on page 10-1.
Making Copies

Using Your Machine as a Copier

You can use your machine as a copy machine, making up to 99 copies at a time. The machine can stack the copies or collate (sort) them.

The scannable area of your Brother machine begins at approximately one-sixth inch (4mm) from the edge of the paper.

Incoming faxes cannot be received on paper or into memory while the machine is copying.

Making a Single Copy

1. Place the original face down in the ADF.
2. Press Copy.
   Do NOT pull on the paper while copying is in progress.

   To Stop the copy process, press Stop/Exit.
   To release the original document, press Stop/Exit again.

Making Multiple Copies

1. Place the original face down in the ADF.
2. Use the dial pad to enter the number of copies you want (up to 99).
3. Press Copy.
   To sort the copies, use the Options key.
   (See Using the Options Key, page 11-4.)
Out of Memory Message

If the memory becomes full while you are scanning a document to be copied the LCD shows:

![Out of Memory Message](image)

If the OUT OF MEMORY message appears while you are scanning the first page of your original, press Stop/Exit to cancel. You will need to clear some faxes from memory before you can continue.

—Note—To gain extra memory, you can turn off Fax Storage (see page 9-3).

Temporary Copy Settings

You can improve your copies by using the Copy keys: Enlarge/Reduce, Contrast, Options and Copy Mode. These settings are temporary, and the machine returns to its default settings when you finish copying.

Copying Using Multiple Settings

You can try different combinations of settings for the best results. After you finish your settings using the Enlarge/Reduce, Contrast, Options or Copy Mode keys, the LCD shows:

- Press 🔄 or 🔄 if you want to select additional settings.
- OR — Press Copy if you are finished choosing settings.
Using the Enlarge/Reduce Key

AUTO sets the machine to calculate the ratio that fits the size of your paper. ZOOM allows you to enter a ratio from 50% to 200% in 1% increments.

1 Place the original face down in the ADF.
2 Use the dial pad to enter the number of copies you want (up to 99).
3 Press Enlarge/Reduce. (Enlargement or reduction ratios appear.)
4 Press \( \text{ } \) or \( \text{ } \) to select 50%, 78%, 94%, AUTO, 100%, 104%, 150%, 200% or ZOOM, and then press Set. (Enlargement or reduction ratios appear.)
   —OR—
   For more choices select ZOOM, and the press Set. Use the dial pad to enter any percentage between 50% and 200%.
5 Press Copy—OR—Press \( \text{ } \) or \( \text{ } \) for additional settings.

Special Copy Options (2 in 1, 4 in 1 or OFF) are not available with Enlarge/Reduce.

When selecting an enlargement or reduction ratio, you will need to know the size of the paper you registered in Menu 1-1.

Selecting a Fixed Ratio:

<table>
<thead>
<tr>
<th>Original is the size of…</th>
<th>Paper size is…</th>
<th>Recommended ratio is…</th>
</tr>
</thead>
<tbody>
<tr>
<td>LETTER</td>
<td>LEGAL</td>
<td>100%</td>
</tr>
<tr>
<td>A4</td>
<td>LETTER</td>
<td>94%</td>
</tr>
<tr>
<td>LEGAL</td>
<td>LETTER</td>
<td>78%</td>
</tr>
</tbody>
</table>
Copy Contrast
You can adjust copy contrast to make copies darker or lighter.

1 Place the original face down in the ADF.
2 Use the dial pad to enter the number of copies you want (up to 99).
3 Press Contrast.
4 Press ← to make a copy lighter, or → to make a copy darker, and then press Set.
5 Press Copy.

Using the Options Key
Use the Options key to temporarily change the copy mode (resolution), contrast and special copy options for the next fax only. See the explanations below the table.

<table>
<thead>
<tr>
<th>Press Options</th>
<th>Menu Selections</th>
<th>Options</th>
<th>Factory Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Options</td>
<td>OPT:# OF COPIES</td>
<td>NO. OF COPIES:XX</td>
<td>01</td>
</tr>
<tr>
<td></td>
<td>OPT:STACK/SORT</td>
<td>STACK/SORT</td>
<td>STACK</td>
</tr>
<tr>
<td></td>
<td>OPT:SPECIAL</td>
<td>2IN1/4IN1/OFF</td>
<td>OFF</td>
</tr>
<tr>
<td></td>
<td>OPT:PAPER TYPE</td>
<td>THIN/PLAIN/THICK/THICKER/TRANSPARENCY</td>
<td>PLAIN</td>
</tr>
</tbody>
</table>

Number of Copies
If you are using the Options key for sorting or choosing a special layout, you can also enter the number of copies here first for convenience.

1 Place the original face down in the ADF.
2 Press Options and ← or → to select OPT: # OF COPIES, and then press Set.
3 Use the dial pad to enter the number of copies (up to 99).
4 Press Copy. —OR— Press ← or → for additional settings.
Sorting Multiple Copies

1 Place the original face down in the ADF.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Options** and \(<\) or \(>\) to select **OPT:STACK/SORT**, and then press **Set**.

4 Press \(<\) or \(>\) to select **SORT**, and then press **Set**.

5 Press **Copy**. — **OR** — Press \(<\) or \(>\) for additional settings.

Special Layout Options

You can save paper by copying either two or four pages onto one page.

1 Place the original face down in the ADF.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Options** and \(<\) or \(>\) to select **OPT: SPECIAL**, and then press **Set**.

4 Press \(<\) or \(>\) to select **2 IN 1** or **4 IN 1** and then press **Set**.

5 Press **Copy**.

2in1

4in1

Special Copy Options (2in1 or 4in1 Copy) are not available with **Enlarge/Reduce** or **SORT**.
**Paper Type**

You can use the following types of paper for copying. For the best print quality, select the type of media that you are using.

- **THIN** (16lb - 18.4lb) - For thin paper or transparency
- **PLAIN** (18.7lb - 25.3lb) - For ordinary plain paper
- **THICK** (25.6lb - 32lb) - For heavy weight paper or rough paper
- **THICKER** (32.3lb - 42.1lb) - For heavier weight paper, rough paper or bond paper.
- **TRANSPARENCY** - For transparency (OHP)

1. Press **Options** and or  or  to select **OPT:PAPER TYPE**, and then press **Set**.
2. Press  or  to select your type of paper, and then press **Set**.
3. Press **Copy**—**OR**—Press  or  for additional settings.
Changing Default Copy Settings

Press **Menu** and 3 to change default settings for Copy mode. These settings will remain until you change them again by pressing **Menu**. Adjust the Contrast and Quality settings.

By pressing a number, you can adjust copy settings as shown in the following chart. Press ☐ or ☐ to scroll through the options for each setting. Press **Set** to save your selection. Press **Stop/Exit**—OR—Press ☞ to select the next setting you want to change.

Press **Menu**, and 3.

1. **COPY MODE**
   - AUTO?
   - TEXT?
   - PHOTO?

2. **CONTRAST**

3. **PAPER TYPE**
   - 1.CASSETTE #1
   - 2.CASSETTE #2

   THIN
   - PLAIN
   - THICK
   - THICKER

   ☐ is default

**Note**

If you have attached Cassette #2, be sure you turn it ON and setup the Paper Size and Cassette Usage. (See Setting Paper Size and Turning on Cassette #2 (Option for FAX-4100e and FAX-4750e).)

**Copy Mode (Type of Original)**

You can select the Copy resolution for your type of original. The default setting is AUTO, which is used for originals that contain both text and photographs. TEXT is used for originals containing only text. PHOTO is used for copying photographs.

2. Press ☐ or ☐ to choose the type of original (AUTO, TEXT or PHOTO), and then press **Set**.

3. Press **Stop/Exit**.
Copy Contrast

You can adjust copy contrast to make copies darker or lighter.

1 Press **Menu, 3, 2.**

2 Press ✅ to make a copy lighter—**OR**—
Press ✅ to make a copy darker, and then press **Set.**

3 Press **Stop/Exit.**

Paper Type

You can use the following types of paper for copying. For the best print quality, select the type of media that you are most often.

**THIN** (16lb - 18.4lb) - For thin paper
**PLAIN** (18.7lb - 25.3lb) - For ordinary plain paper
**THICK** (25.6lb - 32lb) - For heavy weight paper or rough paper
**THICKER** (32.3lb - 42.1lb) - For heavier weight paper, rough paper or bond paper.

1 Press **Menu, 3, 3.**

2 Press ✅ or ✅ to select your type of paper, and then press **Set.**

3 Press **Stop/Exit.**

After you connect the optional Cassette #2, you can select the paper size for each cassette. (See page 4-1.)
Memory Board (For FAX-4750e and FAX-5750e Only)

The memory board is installed on the main controller board inside the machine. When you add the optional memory board, it increases the performance for both fax and printer operations.

<table>
<thead>
<tr>
<th>Model Name</th>
<th>Optional Memory</th>
</tr>
</thead>
<tbody>
<tr>
<td>FAX-4750e and FAX-5750e with Standard Memory: 8MB</td>
<td>16MB   TECHWORKS 12456-0001</td>
</tr>
<tr>
<td></td>
<td>32MB   TECHWORKS 12457-0001</td>
</tr>
</tbody>
</table>

In general, the DIMM must have the following specifications:
- Type: 100 pin and 32 bit output
- CAS Lantency: 2 or 3
- Clock Frequency: 66MHz or more
- Capacity: 16 or 32MB
- Height: 46mm (1.8 inches) or less
- Parity: NONE
- DRAM Type: SDRAM 4 Bank

Some DIMMs might not work with this machine. For the latest information from Brother, visit:
http://solutions.brother.com

Installing the Optional Memory Board

Caution: DO NOT touch the surface of the main board within 15 minutes after turning off the power.

1. Disconnect the telephone line cord, unplug the machine power cord from the AC outlet, and then disconnect the interface cable.

Warning: Unplug the power cord before installing (or removing) the memory board.
2 Remove the screws securing the rear cover and remove the cover.

3 Remove the screws securing the access plate and remove the plate.

4 Disconnect the connector from the backup battery.
5 To install the memory board onto the main controller board, plug the attached spacer into the connectors of the main controller board.

⚠️ WARNING

- Hold the memory board by its edges. Do not touch the surface of the board.

- Make sure the memory board is securely seated on the main controller board.

6 Reconnect the connector to the backup battery.
7 Reinstall the access plate and the rear cover.
8 Reconnect the interface cable, and then plug the power cord into the AC outlet.
**Paper Cassette #2 (Option for FAX-4100e and FAX-4750e)**

You can purchase the Paper Cassette #2 accessory (LT400) to use as a third paper source. Cassette #2 holds up to 250 sheets of 20 lb. (75 g/m²) paper.

<table>
<thead>
<tr>
<th>Paper Cassette #2:</th>
<th>Holds approx. 250 sheets of 20 lb. (75 g/m²)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basis Weight:</td>
<td>16 to 28 lb. (60 to 105 g/m²)</td>
</tr>
<tr>
<td>Caliper:</td>
<td>0.003 to 0.005 inches. (0.08 to 0.13 mm)</td>
</tr>
<tr>
<td>Moisture Content:</td>
<td>4% to 6% by weight</td>
</tr>
<tr>
<td>Smoothness:</td>
<td>100 to 250 (Sheffield)</td>
</tr>
<tr>
<td>We Recommend: Cut sheet:</td>
<td>Xerox 4200 DP 20 lb, Champion Paper One 20 lb, Hammermill Laser Paper 24 lb</td>
</tr>
</tbody>
</table>

**Network (LAN) Board (Option for FAX-4750e)**

The network (LAN) board option is not available for FAX-4100e.

When you add the optional Network (LAN) Board (NC-8100h), you can connect your machine into the network to use the Internet FAX, Network Scanner, Network Printer and Network Management operations. (See *NC-8100h User’s Guide* on the CD-ROM.)
Troubleshooting and Routine Maintenance

Troubleshooting

Error Messages

As with any sophisticated office product, errors may sometimes occur. If this happens, your machine often identifies the problem and displays an error message. The table below explains the most common error messages.

You can correct most problems by yourself. If you need additional help, call the Brother fax back system.

In USA Only: 1-800-521-2846

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHANGE DRUM SOON</td>
<td>The drum unit is near the end of its life.</td>
<td>Use the drum unit until you have a print quality problem; then replace the drum unit with a new one.</td>
</tr>
<tr>
<td></td>
<td>The drum counter was not reset.</td>
<td>1. Open the front cover and then press Clear.  2. Press 1 to reset.</td>
</tr>
<tr>
<td>CHECK PAPER</td>
<td>The machine is out of paper or paper is not properly loaded in the paper cassette.</td>
<td>Refill the cassette or remove the paper and load it again.</td>
</tr>
<tr>
<td>CHECK PAPER #1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CHECK PAPER #2</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CHECK PAPER SIZE</td>
<td>When you see this error, the paper in the cassette does not match the paper size you set in Menu, 1, 1.</td>
<td>Either load the appropriate size paper or change the default setting. (See page 4-1).</td>
</tr>
<tr>
<td>COMM. ERROR</td>
<td>A poor quality phone line caused communications error.</td>
<td>Try the call again.</td>
</tr>
<tr>
<td>CONNECTION FAIL</td>
<td>The fax machine you polled is not in Polled Waiting mode.</td>
<td>Verify the other party’s polling setup.</td>
</tr>
</tbody>
</table>
## Error Messages

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>COOLING DOWN</td>
<td>The temperature of the drum unit or toner cartridge is too hot. The machine will pause its current print job and go into cooling down mode. During the cooling down mode, you will hear the cooling fan running while the display on the machine shows COOLING DOWN.</td>
<td>You must wait and allow the machine to resume printing when it is ready.</td>
</tr>
<tr>
<td>COVER OPEN PLS CLOSE COVER</td>
<td>The front cover was not completely closed.</td>
<td>Close the front cover for the drum unit.</td>
</tr>
<tr>
<td>DISCONNECTED</td>
<td>The other party or other party’s fax machine terminated the call.</td>
<td>Try to fax or receive again or call the other party to see what happened.</td>

</tr>
<tr>
<td></td>
<td></td>
<td>In Canada: 1-877-BROTHER</td>
</tr>
<tr>
<td>NO RESPONSE / BUSY</td>
<td>The number you called does not answer or is busy. Or, you may have reached a number that is not connected to a fax machine.</td>
<td>Check the number and try again.</td>
</tr>
<tr>
<td>NOT REGISTERED</td>
<td>The One Touch or Speed Dial number that you accessed is not programmed.</td>
<td>Set up the One Touch or Speed Dial number. (See Pages 7-1 and 7-2.)</td>
</tr>
</tbody>
</table>
## Error Messages

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLS OPEN COVER</td>
<td>A page, piece of paper, or paper clip may be jammed inside the machine.</td>
<td>Open the front cover. If you see any jammed paper or other item, gently pull it out, then close the scanner unit. If the error message remains, open and close the front cover again. If the machine cannot reset itself and return to the date and time prompt, it will display MACHINE ERROR XX. Please call Brother Customer Service and tell them the Machine Error number at: In USA: 1-800-284-4329 In Canada: 1-877-BROTHER</td>
</tr>
<tr>
<td>PAPER JAM</td>
<td>The paper is jammed in the machine.</td>
<td>Do not pull the paper out until you see page 13-4.</td>
</tr>
<tr>
<td>TONER EMPTY</td>
<td>Toner cartridge is not installed. —OR— Toner is used up and printing is not possible.</td>
<td>Reinstall the toner cartridge. —OR— Replace the toner cartridge with a new one. (See Page 13-20.)</td>
</tr>
<tr>
<td>TONER LOW</td>
<td>If the LCD shows TONER LOW and the Toner Empty LED on the control panel is blinking, you can still print. But the toner is depleted and the machine is telling you that the toner will soon run out.</td>
<td>Order a new toner cartridge now.</td>
</tr>
</tbody>
</table>
**Document Jam**

The originals did not feed properly, or were too long.

1 Lift the control panel.
2 Carefully pull the document toward the front of the machine.
3 Close the control panel.
4 Press *Stop/Exit*.

**Paper Jam**

Before you can clear a paper jam error, you must find out where the paper is stuck. See the following three types of paper jams.

**WARNING**

Do not use force to pull the jammed paper from the paper tray because you may damage the machine and cause toner to scatter on the next printed pages.

After you use the machine, some internal parts are extremely HOT! When you open the front or the rear cover, never touch the shaded parts shown in the following diagram.
Paper is Jammed in the Paper Cassette
1 Pull the paper cassette out of the machine.
2 Remove any crinkled sheets.
3 Adjust the guides to fit.
4 Press down on the paper to flatten it in the paper cassette.
5 Reinstall the paper cassette.

Paper is Jammed near the Drum Unit
1 Open the front cover.
2 Remove the drum unit but do not force it if it cannot be removed easily. Instead, pull the edge of the jammed paper from the paper cassette.
3 Gently pull out the jammed paper.
4 Reinstall the drum unit.
5 Close the front cover.

Paper is Jammed in the Fuser Unit
1 Open the rear cover.
2 Pull out jammed paper. When you have to pull paper out the back of the machine, the fuser may get dirty with toner powder causing the next few printed page(s) to look messy. Print a few copies of the test page until the pages print clearly.
3 Close the rear cover.
If You Are Having Difficulty with Your Machine

If you think there is a problem with your machine, *make a copy first*. If the copy looks good, the problem is probably not your machine. Check the table below and follow the troubleshooting tips.

<table>
<thead>
<tr>
<th>DIFFICULTY</th>
<th>SUGGESTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Printing and Receiving Faxes</strong></td>
<td></td>
</tr>
<tr>
<td>Condensed print and horizontal streaks; top and bottom of sentences are cut off.</td>
<td>If your copy looks good, you probably had a bad connection, with static or interference on the phone line. If the copy looks bad, clean the scanner area. If there is still a problem, call Brother Customer Service at: 1-800-284-4329 <em>(in USA)</em> or 1-877-BROTHER <em>(in Canada)</em>.</td>
</tr>
<tr>
<td>Vertical streaks; black lines appear on the faxes you receive.</td>
<td>Sometimes you may see vertical streaks/black lines on the faxes you receive. Either your machine’s primary corona wire for printing may be dirty, or the sending party’s fax scanner may be dirty. Clean your primary corona wire (see pages 13-19), or ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine. If the problem continues, call Brother Customer Service at: 1-800-284-4329 <em>(in USA)</em> or 1-877-BROTHER <em>(in Canada)</em>.</td>
</tr>
<tr>
<td>The FAX “hears” voice as CNG tone.</td>
<td>If your machine is set to Easy Receive ON, it is more sensitive to sounds. Your machine may mistakenly interpret certain voices or music on the line as a calling fax machine and respond with fax receiving tones. Deactivate the fax by pressing #51 if you are at an extension phone or press Stop/Exit if you are at the machine or an external phone. Try avoiding this problem by turning Easy Receive to OFF. <em>(See Easy Receive, Page 5-3)</em></td>
</tr>
<tr>
<td>Horizontal streaks; lines are missing.</td>
<td>You may get a fax with horizontal streaks or with missing lines. Usually this is caused by a poor telephone connection. Ask the other party to send the fax again.</td>
</tr>
<tr>
<td>Received faxes appear as split or blank pages.</td>
<td>If the received data is divided and printed on two pages or if you get an additional blank page, your Paper Size setting may not be correct for the paper you are using <em>(see page 4-1)</em>. If you are using the fixed reduction feature, check to see if the reduction ratio is suitable for the real paper. <em>(See page 11-3)</em></td>
</tr>
<tr>
<td>DIFFICULTY</td>
<td>SUGGESTIONS</td>
</tr>
<tr>
<td>------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Phone Line or Connections</td>
<td></td>
</tr>
<tr>
<td>Dialing does not work.</td>
<td>Check for a dial tone. Change TONE/PULSE setting (See Setting Tone/Pulse Dialing Mode, Page 4-8). Check all line cord connections, and make sure the curled handset cord is not in the EXT jack. Check power cord connection. Send a manual fax by pressing Hook—OR—by lifting the handset, and dialing the number. Wait to hear the fax receiving tones before pressing Fax Start.</td>
</tr>
<tr>
<td>The machine does not answer when called.</td>
<td>Make sure the machine is in the correct receiving mode for your setup (either FAX, FAX/TEL or TAD). Check for dial tone. If possible, call your machine to hear it answer. If there is still no answer, check the telephone line cord connection. Connect a standard telephone handset to the machine telephone jack. If there is no ringing when you call your machine, call your Telephone Company to check the line.</td>
</tr>
<tr>
<td>There is no dial tone on the handset.</td>
<td>Press Hook—OR—Lift the handset. If you hear no dial tone, check telephone line cord connections at the machine and wall jack. Check that the handset curled cord is connected to the machine’s handset jack. Test the jack with another single line telephone. If no dial tone on the wall outlet, call your telephone company.</td>
</tr>
<tr>
<td>Sending Faxes</td>
<td></td>
</tr>
<tr>
<td>Transmitting quality is poor.</td>
<td>Try changing your resolution to FINE or S. FINE (See Fax Resolution, Page 6-5). Make a copy to verify the machine’s scanner operation.</td>
</tr>
<tr>
<td>Transmission Verification Report prints “Results:NG”</td>
<td>There is probably temporary noise or static on the phone line. Try sending the fax again. If the problem continues, call the Telephone Company to check your phone line.</td>
</tr>
<tr>
<td>The receiving party says the picture is not clear.</td>
<td>Sometimes the resolution mode you chose when you sent your fax was not appropriate. Send the fax again, but try using the FINE or S. FINE mode. Also, your machine’s scanner may be dirty, so try cleaning it. (See page 13-18)</td>
</tr>
<tr>
<td>The receiving party says vertical streaks appear on the faxes they receive.</td>
<td>Your machine’s scanner may be dirty or the receiving party’s print head may be dirty. Clean your scanner (see page 13-18), and then make a copy to check if the problem was caused by your machine.</td>
</tr>
<tr>
<td>DIFFICULTY</td>
<td>SUGGESTIONS</td>
</tr>
<tr>
<td>------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Handling Incoming Calls</strong></td>
<td></td>
</tr>
<tr>
<td>Double-ring in FAX/TEL mode.</td>
<td>The machine knows the incoming call is not a fax, so it is signaling you to answer the telephone call. Pick up the machine handset or answer from an extension phone and then press your machine’s Telephone Answer Code (default setting is #51).</td>
</tr>
<tr>
<td>I have difficulty transferring a fax call to the machine.</td>
<td>If you answered at the machine, press <strong>Fax Start</strong> and hang up immediately. If you answered at an extension phone, press your machine’s Remote Activation Code (default setting is *51). When your machine answers, hang up.</td>
</tr>
<tr>
<td>I have difficulty with custom features on a single line.</td>
<td>If you have Call Waiting, RingMaster, Voice Mail, an answering machine, alarm system or any other custom feature on a single phone line with your fax machine, it may create a problem sending or receiving fax data. If you are sending or receiving a fax message while a custom feature signal comes through on the line, the signal can temporarily interrupt or disrupt the fax data. Brother’s ECM feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate line with no custom features is recommended.</td>
</tr>

<tbody>
<tr>
<td><strong>Software Difficulties</strong></td>
<td></td>
</tr>
<tr>
<td>“Unable to write to LPT1” or “LPT1 already in use” error message appears.</td>
<td>1. Make sure the machine is on (plugged into the AC outlet) and that it is connected directly to the computer using an IEEE-1284 bi-directional parallel cable. The cable must not go through another peripheral device (such as a Zip Drive, External CD-ROM Drive, or Switch box).</td>
</tr>
<tr>
<td></td>
<td>2. Make sure the machine’s LCD screen is not displaying an error message.</td>
</tr>
<tr>
<td></td>
<td>3. Make sure no other device drivers, which also communicate through the parallel port, are running automatically when you boot up the computer (such as, drivers for Zip Drives, External CD-ROM Drive, etc…) Suggested areas to check: (Load=, Run= command lines in the win.ini file or the Startup Group)</td>
</tr>
<tr>
<td></td>
<td>4. Check with you computer manufacturer to confirm that the computer’s parallel port settings in the BIOS are set to support a bi-directional machine, i.e. (Parallel Port Mode-ECP).</td>
</tr>
<tr>
<td>“MFC is Busy” or “MFC Connect Failure” error message appears.</td>
<td></td>
</tr>
<tr>
<td><strong>MFC Connect Failure</strong></td>
<td>If the Brother machine is not connected to your PC and you have loaded the Brother software, the PC will show “MFC Connect Failure” each time you restart Windows®. You can ignore this message or you can turn it off by deselect the <strong>AutoLoad PopUp</strong> check box in the Brother Control Center chapter. (See How to Turn Off AutoLoad, Page 14-2, in On-Line Documentation (Owner’s Manual) on the CD-ROM.)</td>
</tr>
<tr>
<td><strong>Windows® Setup Printing Difficulties</strong></td>
<td></td>
</tr>
<tr>
<td>I cannot print from my application software.</td>
<td>Make sure the Windows® printer driver is installed and that you selected it in your application software.</td>
</tr>
<tr>
<td>Sometimes I get the error message <strong>OUT OF MEMORY</strong> when printing certain documents from Windows®.</td>
<td>If you are using the supplied Windows® driver, turn the error recover operation on in the Setup dialog box and try again. Reduce the print resolution or reduce the complexity of your document and try again.</td>

<tr>
<td>Toner scatters and stains the printed page.</td>
<td>Adjust the print conditions by setting the Print Density setting. Remove the drum unit and clean the machine’s interior. (See Routine Maintenance, page 13-18, Cleaning the Printer, page 13-18 and Cleaning the Drum Unit, page 13-19.) Make sure that you use paper that meets specifications. (See pages 2-6.) If you still have scattered toner and the LCD shows CHANGE DRUM SOON, replace the drum unit with a new one. Check the machine’s environment. Conditions such as humidity and high temperatures may cause this print defect to occur.</td>
</tr>
<tr>
<td>Scattering Toner</td>
<td></td>
</tr>
<tr>
<td>The whole page is printed black.</td>
<td>Wipe the electric terminals referring to page 13-18. Also, do not use heat-sensitive paper because it will cause this problem. After cleaning, if the printed pages are still black and the LCD shows CHANGE DRUM SOON, replace the drum unit with a new one.</td>
</tr>
<tr>
<td>Black Page</td>
<td></td>
</tr>
<tr>
<td>Nothing is printed on the page.</td>
<td>Make sure that the toner cartridge is not empty. Wipe the electric terminals. (See Routine Maintenance, page 13-18, Cleaning the Printer, page 13-18 and Cleaning the Drum Unit, page 13-19.) Make sure that a torn piece of paper does not remain on the scanner window.</td>
</tr>
<tr>
<td>White page</td>
<td></td>
</tr>
<tr>
<td>Printed pages are marked at regular intervals.</td>
<td>Marks may disappear by themselves. Try copying multiple pages to clear this problem. Marks may occur if the machine has not been used for a long time. A possible cause is that the surface of the drum is scratched. You must then replace the drum unit with a new one. If the marks do not disappear, it may be that the drum was marked or damaged by excessive exposure to light. In this case, replace the drum unit with a new one.</td>
</tr>
<tr>
<td>Example of Regular Marks</td>
<td></td>
</tr>
<tr>
<td>DIFFICULTY</td>
<td>SUGGESTIONS</td>
</tr>
<tr>
<td>------------------------------------------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Printed pages are blurred at the center or at either edge.</td>
<td>Certain environmental conditions such as humidity and high temperatures may cause this condition to occur. Make sure the machine is placed on a flat, horizontal surface. Remove the drum unit with the toner cartridge installed. Try rocking them from side to side. You may clear a blurred page by wiping the scanner windows with a clean soft cloth. (See Routine Maintenance, page 13-18, Cleaning the Printer, page 13-18 and Cleaning the Drum Unit, page 13-19.) If a blurred page occurs after cleaning and the LCD shows CHANGE DRUM SOON, replace the drum unit with a new one.</td>
</tr>
<tr>
<td><img src="image" alt="Blurred Page" /></td>
<td></td>

<tr>
<td>Ghost images appear on the printed page.</td>
<td>Adjust the print conditions by setting the Print Density setting, page 5-4. Make sure you use paper that meets the specifications. Rough surfaces or thick media can cause a ghost image.</td>
</tr>
<tr>
<td><img src="image" alt="Ghost Images" /></td>
<td></td>
</tr>
</tbody>
</table>

*Note*  
The drum unit is a consumable item and it is necessary to replace it periodically.
Packing and Shipping the Machine

Whenever you transport the machine, use the packing materials that came with your machine. Also, follow the steps below to pack the machine so it won’t be damaged, which would void the machine’s warranty.

1. Remove the telephone line cord and unplug the machine from the AC outlet.
2. Open the front cover.
3. Remove the drum unit.

**Caution**

Remove the drum unit and toner cartridge assembly. Leave the toner cartridge installed in the drum unit.

4. Place the drum unit and toner cartridge assembly into the plastic bag and seal the bag.

5. Close the front cover. Fold down the front output bin extension. Remove the telephone line cord, document tray, document support, handset, and handset cord, and pack them.

6. If Cassette #2 is connected, unplug the modular cable from the modular jack of the Brother machine.
7 If you have the Cassette #2 option, carefully pick up the machine and remove Cassette #2 to pack it separately.

8 Pack additional parts (cord, paper cassette, printed materials) in the carton.

If you are returning the machine to Brother as part of the Exchange Service, pack only the machine. Keep all separate parts to use with your “Exchange” machine.

**Caution**

Be sure to take out any optional memory upgrade boards or network cards before packing the machine.
9 Close the carton and tape it shut.
Routine Maintenance

Keep your machine in optimum condition by cleaning it on a regular basis. It is a good idea to clean the drum unit during this routine. Avoid using thinners or other organic solvents and do not use water.

Cleaning the Document Scanner

1. Unplug the telephone line, and then the power cord. When you reconnect these lines later, connect the power cord first, and then the telephone line.

2. Lift the control panel cover.

3. Clean the white bar and glass cover under the white bar. Moisten a small, clean, soft, lint-free cloth with isopropyl alcohol and carefully remove dirt from the glass cover and the white bar.

Cleaning the Printer

Caution

- Do not use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.
- Do not use isopropyl alcohol to clean the scanner window.
- Do not touch the scanner window with your finger.
- The drum unit contains toner, so handle it carefully. If toner scatters and your hands or clothes get dirty, immediately wipe or wash it off with cold water.

1. Open the front cover.
2. Remove the drum unit assembly.
WARNING

Just after you have used the machine, some internal parts of the machine are extremely HOT! When you open the front cover of the machine, never touch the shaded parts as shown in the diagram below.

3 Gently clean the scanner window by wiping with a clean soft dry cloth. Do not use isopropyl alcohol.

Cleaning the Drum Unit

We recommend placing the drum unit on a drop cloth or large disposable paper to avoid spilling and scattering toner.

1 Clean the primary corona wire inside the drum unit by gently sliding the tab from right to left several times.

2 Return the tab and snap it into the Home position (▼).

Caution

If the tab is not at the Home position, printed pages may have vertical stripes.
3 Reinstall the drum unit into the machine. 
   (See Replacing the Drum Unit, Page 13-23.)

4 Close the front cover.

5 Plug in the power cord first, and then plug in the telephone cord.

**Replacing the Toner Cartridge**

The machine can print up to 6,000 pages using a high yield toner cartridge. When the toner cartridge is running low, the display shows TONER LOW. The machine is supplied with a standard toner cartridge that must be replaced after approximately 3,000 pages. Actual page count will vary depending on your average document type (i.e., standard letter, detailed graphics).

It is a good idea to keep a new toner cartridge ready for use when you see the toner low warning.

Discard the used toner cartridge according to local regulations, keeping it separate from domestic waste. Be sure to seal the toner cartridge tightly so toner powder does not spill out of the cartridge. If you have questions, call your local waste disposal office.

We recommend that you clean the machine when you replace the toner cartridge.

**Toner Empty Indicator**

When the toner cartridge is running low, the LCD shows TONER LOW and the Toner Empty icon on the control panel flashes on and off to indicate the toner is low.

The Toner Empty icon appears and the LCD shows TONER EMPTY. Once this icon appears, your machine will not resume printing until you install a new toner cartridge.
WARNING

Just after you use the machine, some internal parts of the machine will be extremely HOT! So, never touch the shaded parts shown in the illustration.

1 Open the front cover and pull out the drum unit.

Place the drum unit on a drop cloth or large piece of disposable paper to avoid spilling and scattering the toner.

2 Hold down the lock lever on the right as you pull the toner cartridge out of the drum unit.

Caution

Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe it off or wash it with cold water.

3 Unpack the new toner cartridge. Place the used toner cartridge into the aluminum bag and discard it according to local regulations.
**Caution**

- Wait to unpack the toner cartridge until immediately before you install it into the machine. If a toner cartridge is left unpacked for a long period of time, the toner life is shortened.

- You can use only a genuine Brother Toner Cartridge (TN-430 or TN-460), which is specially formulated to ensure top print quality. Using another brand of toner cartridge may void your machine’s warranty. Warranty coverage does not apply to problems caused by the use of 3rd party Toner, 3rd party Toner cartridge or 3rd party Drum unit.

4 Gently rock the toner cartridge from side to side five or six times to distribute the toner evenly inside the cartridge.

5 Remove the protective cover.

6 Install the new toner cartridge into the drum unit until it clicks into place.

7 Clean the primary corona wire inside the drum unit by gently sliding the blue tab from right to left several times. Return the blue tab to the Home position before reinstalling the drum unit assembly.
8 Reinstall the drum unit and close the front cover.

Replacing the Drum Unit

The machine uses a drum unit to create print images on paper. If the LCD shows **CHANGE DRUM SOON**, the drum unit is near the end of its life and it is time to purchase a new one.

Even if the LCD shows **CHANGE DRUM SOON**, you may be able to continue printing without having to replace the drum unit for a while. However, if there is a noticeable deterioration in the output print quality (even before **CHANGE DRUM SOON** is shown), then the drum unit should be replaced. You should clean the machine when you replace the drum unit. (See Page 13-19.)

Caution

When removing the drum unit, handle it carefully because it contains toner. If toner scatters and your hands or clothes get dirty, immediately wipe or wash with cold water.

The drum unit is a consumable item, and it is necessary to replace it periodically. There are many factors that determine the actual drum life, such as temperature, humidity, type of paper and how much toner you use for the number of pages per print job. The estimated drum life is **up to 20,000 pages**. The actual number of pages your drum will print may be significantly less than these estimates. Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

WARNING

Just after you have used the machine, some internal parts of the machine are extremely HOT! So please be careful.

Follow these steps to replace the drum unit:
1. Open the front cover.

2. Remove the old drum unit. Place the drum unit on a drop cloth or disposable paper to avoid scattering toner.

3. Hold down the lock lever on the right and pull the toner cartridge out of the drum unit assembly. (See Replacing the Toner Cartridge, Page 13-20.)

4. Wait to unpack the new drum unit until immediately before installing it. Place the old drum unit into the aluminium bag, and then discard it according to local regulations.

5. Reinstall the toner cartridge into the new drum unit. (See Replacing the Toner Cartridge, Page 13-20.)

6. Reinstall the new drum unit, keeping the front cover open.

7. Press Clear.

8. Press 1 and when the LCD shows ACCEPTED, and then close the front cover.

Caution
If toner scatters and your hands or clothes get dirty, immediately wipe off or wash with cold water.

Checking the Drum Life
You can see the percentage of the drum’s life that remains available.

1. Press Menu, 2, 0, 3.

2. For five seconds, the LCD shows the available percentage of drum life.

Even if the remaining drum life is 0%, you may continue to use the drum unit until you have a print quality problem.
Standard telephone and FCC Notices
These notices are in effect on models sold and used in the United States only.

This equipment is hearing-aid compatible.

When programming emergency numbers or making test calls to emergency numbers:

■ Remain on the line and briefly explain to the dispatcher the reason for the call before hanging up.

■ Perform these activities in the off-peak hours, such as early morning or late evening.

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the backside of this equipment is a label that contains, among other information, a product identifier in the format US: AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

You may safely connect this equipment to the telephone line by means of a standard modular jack, USOC RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US: AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 06 is a REN of 0.6). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.
The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact Brother Customer Service. (See Brother Numbers, on page i.) If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, call your telephone company or a qualified installer.

If you are not able to solve a problem with your machine, call Brother Customer Service. (See Brother Numbers, on page i.)

⚠️ WARNING

For protection against the risk of electrical shock, always disconnect all cables from the wall outlet before servicing, modifying or installing the equipment.

This equipment may not be used on coin service lines provided by the telephone company or connected to party lines.

Brother cannot accept any financial or other responsibilities that may be the result of your use of this information, including direct, special or consequential damages. There are no warranties extended or granted by this document.

**Laser Safety**

This equipment is certified as a Class I laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. This means that the equipment does not produce hazardous laser radiation.

Since radiation emitted inside the equipment is completely confined within protective housings and external covers, the laser beam cannot escape from the fax machine during any phase of user operation.

**FDA Regulations**

U.S. Food and Drug Administration (FDA) has implemented regulations for laser products manufactured on and after August 2, 1976. Compliance is mandatory for products marketed in the United States. One of the following labels on the back of the machine indicates compliance with the FDA regulations and must be attached to laser products marketed in the United States.
WARNING

Use of controls, adjustments or performance of procedures other than those specified in this manual may result in hazardous invisible radiation exposure.

Caution

Changes or modifications not expressly approved by Brother Industries, Ltd. may void the user’s authority to operate the equipment.

Internal laser radiation

Max. Radiation Power  5 mW
Wave Length     760 - 810 nm
Laser Class     Class IIIb (Accordance with 21 CFR Part 1040.10)

Federal Communications Commission (FCC) Declaration of Conformity (For USA Only)

Responsible Party: Brother International Corporation
100 Somerset Corporate Boulevard
Bridgewater, NJ 08807-0911 USA
TEL: (908) 704-1700

declares, that the products

Product Name: FAX-4100e
FAX-4750e
FAX-5750e

comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Ask the dealer or an experienced radio/TV technician for help.

Important

Changes or modifications not expressly approved by Brother Industries, Ltd. could void the user’s authority to operate the equipment.

Industry Canada Compliance Statement
(For Canada Only)

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Warranty

You use the IEEE-1284 shielded parallel cable provided by Brother Industries, Ltd. (See Ordering Accessories and Supplies, page ii.)

Important Safety Instructions

1 Read all of these instructions.
2 Save them for later reference.
3 Follow all warnings and instructions marked on the product.
4 Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
5 Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6 Slots and openings in the cabinet and the back or bottom are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heater. This product should never be placed in a built-in installation unless proper ventilation is provided.
7 This product should be operated from the type of power source indicated on the label. If you are not sure of the type of power available, ask your dealer or local power company.
8 This product is equipped with a 3-wire grounding type plug, a plug having a third (grounding) pin. This plug will fit into only a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the purpose of the grounding-type plug by using an adapter.

9 Do not allow anything to rest on the power cord. Do not place this product where people can walk on the cord.

10 If an extension cord is used with this product, make sure that the total ampere ratings on the products plugged into the extension cord do not exceed the extension cord ampere rating. Also, make sure that the total of all products plugged into the wall outlet does not exceed 15 amperes (USA only).

11 Never push objects of any kind into this product through cabinet slots, since they may touch dangerous voltage points or short out parts resulting in the risk of fire or electric shock. Never spill liquid of any kind on the product.

12 This product does not have an ON/OFF switch. Therefore, it is very important that you have easy access to the main plug and the main socket to which the plug is connected, in case the main power to the Brother machine must be disconnected quickly.

13 Unplug this product from the wall outlet and refer servicing to Authorized Service Personnel under the following conditions:
   
   A  When the power cord is damaged or frayed.
   B  If liquid has been spilled into the product.
   C  If the product has been exposed to rain or water.
   D  If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
   E  If the product has been dropped or the cabinet has been damaged.
   F  If the product exhibits a distinct change in performance, indicating a need for service.

14 Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points and/or other risks, and may void your warranty. Refer all servicing to Authorized Service Personnel. A list of Authorized Service Centers has been included for your convenience, or you may contact Customer Service for your nearest Brother Authorized Service Center. (See Brother Numbers, page i.)

15 To protect your product against power surges, we recommend the use of a power protection device (Surge Protector).
When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- Do not use this product near water (for example, near a bathtub, sink, swimming pool or in a wet basement).
- Do not use the machine’s telephone during an electrical storm (there is the remote possibility of an electrical shock) or to report a gas leak in the vicinity of the leak.
- Use only the power cord indicated in this manual.

Hammermill copyplus white is a registered trademark of International Paper.

**All other terms and brand and product names mentioned in this manual are registered trademarks of their respective companies.**
**ADF (Automatic Document Feeder)**  Originals can be placed in the ADF and scanned one at a time automatically.

**Auto Dial List**  A listing of names and numbers stored in One Touch and Speed Dial memory, in numerical order.

**automatic fax transmission**  Sending a fax without picking up the handset or pressing **Hook**.

**Automatic Redial**  If the fax did not go through because the line was busy, the Brother machine redials the number.

**Auto Reduction**  Reduces the size of incoming faxes.

**Backup Print (Not available for FAX-4100e)**  Sets your Brother machine to print a copy of faxes that are received and stored in memory.

**Batch Transmission**  As a cost savings feature, all delayed faxes to the same fax number will be sent as one transmission.

**Beeper**  The sound the keys make when they are pressed, an error occurs or a document has been received or transmitted.

**Beeper Volume**  Volume setting for the beep when you press a key or make an error.

**Broadcasting**  The ability to send the same fax message to more than one location.

**Caller ID**  A service purchased from the Telephone Company that lets you see the number (or name) of the party calling you. Your Brother machine stores the latest callers so you can print a Log, view caller information, register selected callers as auto dial numbers.

**Cancel Job**  Cancels a programmed job, like Delayed Fax or Polling.

**CNG tones**  The special tones (beeps) sent by fax machines during automatic transmission to tell the receiving machine that a fax machine is calling.

**communication error (or Comm. Error)**  An error during fax sending or receiving, usually caused by line noise or static.

**coding method**  Method of coding the information contained in an original. All fax machines must use a minimum standard of Modified Huffman (MH). Your Brother machine is capable of greater compression methods: Modified Read (MR) Modified Modified Read (MMR) and Joint Bi-level Image export working Group (JBIG) if the receiving machine has the same capability.

**compatibility group**  The ability of one fax unit to communicate with another. Compatibility is assured between ITU-T Groups.

**Contrast**  A setting that compensates for dark or light originals, by lightening dark documents or darkening light originals.
Cover Page  Prints a page at the other party’s machine that contains the sender and recipient’s name and fax number, number of pages and comment. You can generate an electronic cover page at the other end with pre-programmed information from memory or you can print a sample cover page to fax with your original.

Cover Page Message  The comment that is on the Cover Page. This is a programmable feature.

Delayed Fax  Sends your fax at a later time that day.

Delayed Timer  You can program a certain time each day that all delayed faxes will be sent on a first come/first served basis.

Distinctive Ring  A service purchased from your telephone company that provides another phone number on an existing phone line. The Brother machine uses the new number to simulate a dedicated fax line.

drum unit  A printing device for your machine.

Dual Access  Your Brother machine can scan outgoing faxes or scheduled jobs into memory at the same time it is sending a fax or receiving or printing an incoming fax.

Easy Receive  Enables your Brother machine to respond to CNG tones if you interrupt a fax call by answering it.

ECM (Error Correction Mode)  Detects errors during fax transmission and automatically resends the page(s) that had an error.

extension phone  A telephone on the fax number that is plugged into a separate wall jack.

external phone  A TAD (telephone answering device) or telephone that is plugged into the EXT jack of your Brother machine.

F/T Ring Time  The length of time the Brother machine rings (when the receive mode setting is FAX/TEL) to notify you to pick up a voice call that it answered.

Fax Activity Report  Lists information about the last 200 incoming and outgoing faxes. TX means Transmit. RX means Receive.

Fax Forwarding  Sends a fax received in memory to another preprogrammed fax number.

Fax Receive Code  Press this code (51) when you answer a fax call from an extension or external phone.

Fax Storage  You can print stored faxes later, or retrieve them from another location using Fax Forwarding, Paging, or Remote Retrieval commands.

FAX/TEL  You can receive faxes and telephone calls. Do not use this mode if you are using a telephone answering device (TAD).

fax tones  The signals sent by sending and receiving fax machines while communicating information.

Fine Mode  Resolution is 203 × 196 dpi. It is used for small print and graphs.

gray scale  The shades of gray available for copying and faxing photographs.

Group number  A combination of One Touch and Speed Dial numbers that are stored on a One Touch key for Broadcasting.

Help List  By pressing the Reports key and 1, you can get a printout of the complete Menu so you can use it to program your Brother machine when you do not have the Owner’s Manual with you.
Interval  The preprogrammed time period between automatically printed Fax Activity Reports. You can print Activity Reports on demand without interrupting this cycle.

LCD (liquid crystal display)  The LCD screen on the Brother machine that shows interactive messages during On-Screen Programming and defaults to the date and time when the machine is idle.

manual fax  When you press Hook—OR—lift the handset so you can hear the receiving fax machine answer before you press Fax Start to begin transmission.

Menu mode  Programming mode for changing the settings of your Brother machine.

Multi-Function Link® Pro Suite software (Not available for FAX-4100e and FAX-4750e)  Turns your Brother machine into a printer and a scanner and enables PC faxing using the Brother machine.

One Touch  Keys on the Brother machine’s control panel where you can store numbers for easy dialing. You must use a separate key for each number.

Out of Paper Reception  Receives faxes into the machine’s memory when the machine is out of paper.

Overseas mode  Makes temporary changes to the fax tones to accommodate noise and static on overseas phone lines.

Paging  Feature enables your fax unit to call your pager when a fax message is received into its memory.

Pause  Allows you to place a 3.5 second delay in the dialing sequence stored on One Touch and Speed Dial numbers.

Photo mode  A resolution setting that uses varying shades of gray for the best representation of photographs.

Polling  The process of a fax machine calling another fax machine to retrieve waiting fax messages.

Pulse  A form of dialing on a telephone line.

Real Time Transmission  When memory is full, send documents in real time.

Remaining Jobs  You can check which jobs are waiting in memory and cancel jobs individually.

Remote Activation  Allows you to transfer a fax call, answered at an external or extension phone, to the Brother machine.

Remote Retrieval Access  The ability to access your Brother machine remotely from a touch tone phone.

Remote Retrieval Access Code  The four-digit code (159.*) that allows you to call your Brother machine to retrieve fax messages or change fax storage settings.

Resolution  The number of vertical and horizontal lines per inch. See: Standard, Super Fine and Photo.

Ring Delay  The number of rings before the Brother machine answers in FAX mode.

Ring Volume  Volume setting for the Brother machine’s ring.

scanning  The process of sending an electronic image of an original paper document into your computer.
**ScanSoft® PaperPort® for Brother** (Not available for FAX-4100e and FAX-4750e)

Document management application where you can view received faxes and scanned originals.

**ScanSoft® TextBridge® OCR** (Not available for FAX-4100e and FAX-4750e)

Optional Character Recognition (OCR) software that converts a scanned image of text into text you can edit in your word processing application.

**Search**  You can scroll through an alphabetical listing on the LCD of the One Touch and Speed Dial numbers you stored.

**Speaker Volume**  You can set the volume when your Brother machine is on **Hook**.

**Speed Dial**  A preprogrammed number for easy dialing. You must press the Speed Dial button and then a three-digit code (two-digit code for FAX-4100e) to start the dialing process.

**Standard resolution**  $203 \times 98$ dpi.  It is used for regular size text and quickest transmission.

**Station ID**  The stored information that appears on the top of faxed pages. It includes the sender’s name and fax number.

**Super Fine resolution**  $203 \times 392$ dpi. Best for very small print and line art.

**TAD (telephone answering device)**  You can connect an external TAD to the EXT. jack for **EXT. TEL/TAD** mode.

**Telephone Answer Code (FAX/TEL mode only)**  When the Brother machine answers a voice call, it double-rings. You can pick up at an extension or external phone by pressing this code (#51).

**temporary settings**  You can select certain options for each fax transmission or copy you make without changing the default settings.

**Tone**  A form of dialing on the telephone line used for Touch Tone telephones.

**toner cartridge**  Accessory that holds toner for the drum unit on Brother laser models.

**Toner Save**  A process of affixing less toner to the page to extend the life of the toner cartridge. This will make the print on received documents significantly lighter.

**transmission**  The process of sending documents over the phone lines from your Brother machine to the receiving fax machine.

**Transmission Verification Report**  A listing of each transmission, showing caller ID, date, time, and number of pages.

**True Type fonts**  The fonts that are used in the Windows® operating systems. If you install the Brother True Type fonts, more types of fonts will be available for Windows® applications.

**User Settings List**  Printed report of your Brother machine’s settings.
Specifications

Product Description

The FAX-4100e and FAX-4750e are plain paper fax models. The FAX-5750e is a plain paper fax model with PC interface.

## Fax

**Compatibility**
ITU-T Group 3

**Coding System**
- MH/MR/MMR (FAX-4100e)
- MH/MR/MMR/JBIG (FAX-4750e, FAX-5750e)

**Modem Speed**
- 33600/31200/28800/26400/24000/19200/16800/14400/12000/9600/7200/4800/2400
- Automatic Fallback:

**Document Input Width**
5.8 inches to 8.5 inches (148 mm to 216 mm)

**Document Input Length**
3.9 inches to 14.1 inches (100 mm to 360 mm)

**Printing Width**
8.2 inches (208 mm)

**Scanning Width**
8.15 inches (207 mm)

**Automatic Document Feeder (ADF)**
- Up to 30 pages*
- With Conditions: Up to 50 pages*

**Paper Cassette**
250 sheets (20 lb)

**Gray Scale**
64 levels

**Polling Types**
Standard or Sequential

**Contrast Control**
Automatic/Super Light/Super Dark
(Manual setting using control panel keys)

**Resolution**
- **Horizontal**
  - 203 dot/inch (8 dot/mm)
  - Standard—98 line/inch (3.85 line/mm)
  - Fine, Photo—196 line/inch (7.7 line/mm)
  - Superfine, Photo—392 line/inch (15.4 line/mm)

- **Vertical**

**LCD (Liquid Crystal Display)**
16 characters × 2 Lines

**One Touch dial**
32 stations

**Speed Dial**
- 100 stations (FAX-4100e)
- 200 stations (FAX-4750e, FAX-5750e)

**Broadcasting**
- Up to 182 locations; Up to 6 Groups (FAX-4100e)
- Up to 282 locations; Up to 6 Groups (FAX-4750e, FAX-5750e)

**Memory Transmission**
- Up to 400 pages**
- Up to 500 pages***

**Automatic Redial**
3 times at 5 minute intervals

**Out of Paper Reception**
- Up to 500 pages** (FAX-4100e)
- Up to 600 pages*** (FAX-4750e, FAX-5750e)

**Speaker Type**
Monitor

**Auto Answer**
0, 1, 2, 3 or 4 rings

* Using standard 17 lb to 24 lb paper.

** “Pages” refers to the “Brother Standard Chart No.1” with MMR Coding System and Standard Resolution.

*** “Pages” refers to the “Brother Standard Chart No.1” with JBIG Coding System and Standard Resolution.

Specifications and printed materials are subject to change without prior notice.
Scanner (Not available for FAX-4100e. Option for FAX-4750e. Standard for 5750e.)

- Scanner operations are not available for FAX-4100e.
- Download the Scanner Driver for FAX-4750e from: http://solutions.brother.com

**TWAIN Compliant**

Yes

**Document Size**

- ADF Width: 5.8” to 8.5” (148 mm to 216 mm)
- ADF Length: 3.9” to 14.1” (100 mm to 360 mm)

**Resolution**

- Up to 9,600 × 9,600 (interpolated)
- Up to 300 × 600 (optical)

**Scanning/Printing Width**

8.15 inches (208 mm)

**Automatic Document Feeder (ADF)**

- Up to 30 pages*
- With Conditions: Up to 50 pages*

**Gray Scale**

256 levels

**Consumable Items**

- Toner cartridge Life Expectancy:
  - Up to 6,000 pages/high yield toner cartridges
  - Up to 3,000 pages/standard toner cartridges

  (when printing letter size or A4 paper at 5% print coverage)

- Toner life expectancy will vary depending upon the type of average print job.
- Drum Unit Life Expectancy: up to 20,000 pages

- There are many factors that determine the actual drum life, such as temperature, humidity, type of paper, toner you use and number of pages per print job.

**Electrical and Environment**

- **Temperature**
  - Operating: 50 - 90.5°F (10 - 32.5°C)
  - Storage: 32 - 104°F (0 - 40°C)

- **Humidity**
  - Operating: 20 to 80% (without condensation)
  - Storage: 20 to 80% (without condensation)

- **Warm-Up**
  - Max. 25 seconds at 73.4°F (23°C)

- **First Print**
  - 15 seconds (using Letter size paper in paper cassette)

- **Power Source**
  - 120V AC 50/60Hz (USA and Canadian Version Only)
### Power Consumption
- Average Operating (Copying): 350 W (25°C)
- Peak: 940 W
- Sleep Mode: 10 W or less
- Stand by: 70 W or less (25°C)

### Noise
- Operating: 53 dB A or less
- Stand by: 30 dB A or less

### Dimensions
- FAX-4100e and FAX-4750e: 17.1 × 17.4 × 12.7 inches (435 × 442 × 323 mm)
- FAX-5750e: 17.1 × 17.4 × 17 inches (435 × 442 × 432 mm)

### Weight
- FAX-4100e and FAX-4750e: 26.4 lbs/(12.0kg) (Without Carton)
- FAX-5750e: 34.3 lbs/(15.5 kg) (Without Carton)

---

**Printer**

---

**Emulation**
- All models: Brother Printing System for Windows®
- FAX-5750e: PCL 5e (Emulation mode of HP LaserJet 5P)

**Printer Driver**
- Windows® 95/98/98SE/Me/2000/XP and Windows NT® Workstation Version 4.0 driver supporting Brother Native Compression mode and bi-directional capability
- Apple® Macintosh® QuickDraw® Driver for OS 8.5-9.2/OS X v.10/10.1

**Interface**
- Bi-directional parallel (IEEE-1284);
- USB (Universal Serial Bus) 1.1

**Print Method**
- Electrophotography by semiconductor laser beam scanning

**Resolution**
- 600 dots/inch

**Print Quality**
- Normal printing mode
- Economy printing mode (saves up to 50% of the normal toner usage)

**Print Speed**
- Up to 15 pages/minute (when loading letter size paper from paper cassette)

**Output Tray Paper Capacity**
- 150 sheets

**Manual Feed Slot**
- Custom size paper (2.75” × 5 to 8.5” × 14”)
- Envelopes (DL, C5, Com10, Monarch)

**Handles these Paper Sizes and Types**
- Letter, Legal, A4, B5, A5, Executive, OHP
- Envelopes, Labels, Organizer
TrueType Fonts on CD-ROM

35 TrueType compatible soft-fonts for Windows® on the bundled CD-ROM. (Available only for FAX-5750e.)

If you plan to receive fax messages while away from your machine, carrying the Remote Retrieval Access Card printed below will serve as a convenient reminder of the retrieval procedures. Simply cut out the card and fold it to fit your wallet or organizer. Keeping it handy will help you derive the full benefit of your machine’s Forwarding, Paging and Remote Retrieval features.

Remote Retrieval Access Card

**Using Remote Access Code**

1. Dial your fax number from a fax machine using touch tone.
2. When your machine answers and beeps, immediately enter your Remote Retrieval Access Code (159†).
3. Your machine signals the kinds of messages received:
   - 1 long beep — Fax message(s)
   - No beeps — No messages
4. After 2 short beeps, enter a command.
5. Press 9 0 to reset your machine when you finish.
6. Hang up.

**Check Receiving Status**

Press 9 7 1
- 1 long beep — Fax message(s)
- 3 short beeps — No messages

**Change Answer Mode**

Press 9 8
- then for TAD, press 1.
- FAX/TEL (Fax/Telephone), press 2.
- FAX, press 3.

**Exit Remote Operation**

Press 9 0.
Press Menu, 2, 5, 3.

Changing Remote Retrieval Access Code

1. Press Menu, 2, 5, 3.
2. Enter a three-digit number from 000 to 999.
3. Press Set.
4. Press Stop/Exit.
5. The access code cannot be changed.
8. After the beep, hang up and wait.
9. Press 9, then to Retrieve all faxes, press 2, then enter the number of remote fax machine followed by # #.
11. Enter the new fax number where you want your fax messages forwarded followed by # #.
15. Then to Turn feature off, press 1.
16. Turn Fax Storage ON, press 6.
17. RETRIEVE A FAX Press 9, 6.
18. Fold
NOTICE:

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE:

The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.
These machines are made for use in the USA and Canada only. We cannot recommend using them overseas because it may violate the Telecommunications Regulations of that country and the power requirements of your multi-function center may not be compatible with the power available in foreign countries. **Using USA or Canada models overseas is at your own risk and may void your warranty.**
