Computerized Sewing and Embroidery Machine
Operation Manual
Important Safety Instructions

Please read these safety instructions before attempting to use the machine. This machine is intended for household use.

DANGER - To reduce the risk of electric shock

1 Always unplug the machine from the electrical outlet immediately after using, when cleaning, when making any user servicing adjustments mentioned in this manual, or if you are leaving the machine unattended.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons.

2 Always unplug the machine from the electrical outlet when removing covers, lubricating, or when making any adjustments mentioned in the instruction manual

   • To unplug the machine, switch the machine to the symbol “O” position to turn it off, then grasp the plug and pull it out of the electrical outlet. Do not pull on the cord.
   • Plug the machine directly into the electrical outlet. Do not use an extension cord.
   • Always unplug your machine if the power is cut.

3 Never operate this machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or water is spilled on the unit. Return the machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.

4 Always keep your work area clear:

   • Never operate the machine with any air openings blocked. Keep ventilation openings of the sewing machine and foot control free from the build up of lint, dust, and loose cloth.
   • Do not store objects on the foot controller.
   • Do not use extension cords. Plug the machine directly into the electrical outlet.
   • Never drop or insert any object into any opening.
   • Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
5 Special care is required when sewing:

- **Always** pay close attention to the needle. Do not use bent or damaged needles.
- Keep fingers away from all moving parts. Special care is required around the machine needle.
- Switch the sewing machine to the symbol “O” position to turn it off when making any adjustments in the needle area.
- **Do not** use a damaged or incorrect needle plate, as it could cause the needle to break.
- **Do not** push or pull the fabric when sewing, and follow careful instruction when freehand stitching so that you do not deflect the needle and cause it to break.

6 This machine is **not** a toy:

- Your close attention is necessary when the machine is used by or near children.
- Do not use outdoors.

7 **For a longer service life:**

- When storing this machine, avoid direct sunlight and high humidity locations. Do not use or store the machine near a space heater, iron, halogen lamp, or other hot objects.
- Use only neutral soaps or detergents to clean the case. Benzene, thinner, and scouring powders can damage the case and machine, and should never be used.
- Always consult the operation manual when replacing or installing any assemblies, the presser feet, needle, or other parts to assure correct installation.

8 **For repair or adjustment:**

- If the Light unit is damaged, it must be replaced by authorized dealer.
- In the event a malfunction occurs or adjustment is required, first follow the troubleshooting table in the back of the operation manual to inspect and adjust the machine yourself. If the problem persists, please consult your local authorized Brother dealer.

*Use this machine only for its intended use as described in the manual.*

*Use accessories recommended by the manufacturer as contained in this manual.*

*Save these instructions.*

*The contents of this manual and specifications of this product are subject to change without notice.*

Introduction

Thank you for purchasing this sewing machine. Before using this sewing machine, carefully read the "Important Safety Instructions" (page 1), and then study this manual for the correct operation of the various functions. In addition, after you have finished reading this manual, store it where it can quickly be accessed for future reference.

Sewing Machine Features

1. Simple bobbin-winding
   The bobbin can quickly and easily be wound with thread (page 23).

2. Built-in stitches
   You can select from the built-in stitches available, including utility stitches and decorative stitches (page 66).

3. Quick-set bobbin
   You can start sewing without pulling up the bobbin thread (page 27).

4. Automatic thread cutting
   The thread can be cut automatically after sewing (page 60).

5. Embroidery
   You can embroider built-in embroidery patterns, characters, framed decorations, and designs from optional embroidery cards (page 129).
## Included accessories

After opening the box, check that the following accessories are included. If any item is missing or damaged, contact your retailer.

### Note

(For U.S.A. only)

- **Foot controller:** Model T
  This foot controller can be used on this machine model NV1000.

- **The screw of the presser foot holder** is available through your authorized dealer. (Part code: XA4813-051)

- **The organized accessory tray** is available, through your authorized dealer. (Part code: XC4489-051)

**Memo**

- To obtain optional accessories or parts, contact your sales representative or the nearest authorized service center.
- All specifications are correct at the time of printing. The part codes are subject to change without notice.
- Visit your nearest authorized retailer for a complete listing of optional accessories available for your machine.
The names of the various parts of the sewing machine and their functions are described below. Before using the sewing machine, carefully read these descriptions to learn the names of the machine parts.

**Front view**

1. **Thread guide plate**
   Pass the thread around the thread guide plate when threading the upper thread.

2. **Thread guide cover**
   Like with the thread guide plate, pass the thread around the thread guide cover when threading the upper thread.

3. **Spool pin**
   Place a spool of thread on the spool pin.

4. **Bobbin winding thread guide**
   Pass the thread around this thread guide when winding the bobbin thread.

5. **Top cover**
   Open the top cover to place the spool of thread on the spool pin.

6. **Bobbin winder**
   Use the bobbin winder when winding the bobbin.

7. **Operation panel**
   From the operation panel, stitch settings can be viewed and edited, and operations for using the machine can be displayed (page 13).

8. **Embroidery unit connector slot**
   Plug in the connector for the embroidery unit.

9. **Presser foot lever**
   Raise and lower the presser foot lever to raise and lower the presser foot.

10. **Operation buttons**
    Use these buttons to operate the machine.

11. **Flat bed attachment**
    Insert the accessories tray into the accessory compartment of the flat bed attachment. Remove the flat bed attachment when sewing cylindrical pieces such as sleeve cuffs.

12. **Thread cutter**
    Pass the threads through the thread cutter to cut them.

13. **Needle threader lever**
    Use the needle threader lever to thread the needle.
Needle and presser foot section

Buttonhole lever:
Lower the buttonhole lever when sewing buttonholes and bar tacks.

Thread guide disk:
Pass the thread through the thread guide disk when using the needle threader to thread the needle.

Needle bar thread guide:
Pass the upper thread through the needle bar thread guide.

Needle plate:
The needle plate is marked with guides for sewing straight seams.

Needle plate cover:
Remove the needle plate cover to clean the bobbin case and race.

Bobbin cover/bobbin case:
Remove the bobbin cover, and then insert the bobbin into the bobbin case.

Feed dogs:
The feed dogs feed the fabric in the sewing direction.

Presser foot:
The presser foot applies pressure consistently on the fabric as the sewing takes place. Attach the appropriate presser foot for the selected stitching.

Presser foot holder:
The presser foot is installed onto the presser foot holder.

Right-side/rear view

Handle:
Carry the sewing machine by its handle when transporting the machine.

Handwheel:
Turn the handwheel toward you (counterclockwise) to raise and lower the needle to sew one stitch.

Embroidery card slot:
Insert the embroidery card.

Air vent:
The air vent allows the air surrounding the motor to be exchanged. Do not cover the air vent while the sewing machine is being used.

Main power switch:
Use the main power switch to turn the sewing machine on and off.

Foot controller jack:
Insert the plug on the end of the foot controller cable into the foot controller jack.

Power supply jack:
Insert the plug on the power supply cord into the power supply jack.

Feed dog position switch:
Use the feed dog position switch to lower the feed dogs.

Presser foot pressure dial:
Use the presser foot pressure dial to adjust the amount of pressure that the presser foot applies.

Memo:
Refer to pages 10 through 13 while you are learning to use your machine.
Operation buttons

The operation buttons help you to easily perform various basic sewing machine operations.

1. **Start/stop button**
   - Press the start/stop button to start or stop sewing. The machine sews at a slow speed at the beginning of sewing while the button is pressed. When sewing is stopped, the needle is lowered in the fabric. For details, refer to "Starting to sew" (page 51).
   - The button changes color according to the machine’s operation mode.
     - **Green**: The machine is ready to sew or is sewing.
     - **Red**: The machine can not sew.
     - **Orange**: The machine is winding the bobbin thread, or the bobbin winder shaft is moved to the right side.

2. **Reverse/reinforcement stitch button**
   - Press the reverse/reinforcement stitch button to sew reverse stitches or reinforcement stitches. Reverse stitches are sewn by keeping the button pressed down to sew in the opposite direction. Reinforcement stitches are sewn by sewing 3 to 5 stitches on top of each other. For details, refer to "Securing the stitching" (page 53).

3. **Needle position button**
   - Press the needle position button to raise or lower the needle. Pressing the button twice sews one stitch.

4. **Thread cutter button**
   - Press the thread cutter button after sewing is stopped to cut both the upper and the bobbin threads. For details, refer to "Cutting the thread" (page 54).

5. **Sewing speed controller**
   - Slide the sewing speed controller to adjust the sewing speed.

**Note**

- Do not press the thread cutter button if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.
- When cutting thread thicker than #30, nylon thread or other special threads, use the thread cutter on the side of the machine. For details, refer to "Using the thread cutter" (page 55).

**CAUTION**

- Do not press the thread cutter button after the threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.
The front operation panel has an LCD (liquid crystal display) and operation keys.

1. **LCD (liquid crystal display) (touch panel)**
   - Selected pattern settings and messages are displayed.
   - Touch the keys displayed on the LCD to perform operations.
   - For details, refer to "LCD (Liquid Crystal Display) Operation" (page 18).

2. **Back key**
   - Press to return to the previous screen.

3. **Previous page key**
   - Displays the previous screen when there are items that are not displayed on the LCD.

4. **Next page key**
   - Displays the next screen when there are items that are not displayed on the LCD.

5. **Memory key**
   - Press to enter character embroidery, combined stitch patterns, My Custom Stitch patterns, etc into the sewing machine memory.

6. **Utility stitch key**
   - Press this key to select a utility stitch or decorative stitch or to design a stitch pattern using the My Custom Stitch function.

7. **Embroidery key**
   - Press this key to sew embroidery.

8. **Settings key**
   - Press to set the needle stop position, the buzzer sound, and more.

9. **Sewing machine help key**
   - Press to get help on using the sewing machine.
   - Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement.

Turning the Machine On/Off

This section explains how to turn the sewing machine on and off.

Power supply precautions

Be sure to observe the following precautions concerning the power supply.

WARNING

- Use only regular household electricity for the power source. Using other power sources may result in fire, electric shock, or damage to the machine.
- Turn off the main power and remove the plug in the following circumstances:
  - When you are away from the machine
  - After using the machine
  - When the power fails during use
  - When the machine does not operate correctly due to a bad connection or a disconnection
  - During electrical storms

CAUTION

- Do not use extension cords or multi-plug adapters with many other appliances plugged in to them. Fire or electric shock may result.
- Do not touch the plug with wet hands. Electric shock may result.
- When unplugging the machine, always turn off the main power first. Always grasp the plug to remove it from the outlet. Pulling on the cord may damage the cord, or lead to fire or electric shock.
- Do not allow the power cord to be cut, damaged, modified, forcefully bent, pulled, twisted, or bundled. Do not place heavy objects on the cord. Do not subject the cord to heat. These things may damage the cord and cause fire or electric shock. If the cord or plug is damaged, take the machine to your authorized dealer for repairs before continuing use.
- Unplug the power cord if the machine is not to be used for a long period of time. Otherwise a fire may result.
### Turning on the machine

Prepare the included power cord.

1. Make sure that the sewing machine is turned off (the main power switch is set to "○"), and then plug the power supply cord into the power supply jack on the right side of the machine.

2. Insert the plug of the power supply cord into a household electrical outlet.

3. Press the right side of the main power switch on the right side of the machine to turn the machine on (set it to "1").

![Power supply jack](image)

- The light, LCD and (Start/stop button) light up when the machine is turned on.

### Turning off the machine

When you are finished using the sewing machine, turn it off. In addition, before transporting the sewing machine to another location, be sure to turn it off.

1. Make sure that the machine is not sewing.

2. Press the left side of the main power switch on the right side of the machine to turn the machine off (set it to "○").

- The sewing lamps go off when the machine is turned off.

3. Unplug the power supply cord from the electrical outlet.

Grasp the plug when unplugging the power supply cord.

4. Unplug the power supply cord from the power supply jack.

### Note

- If a power outage occurs while the sewing machine is being operated, turn off the sewing machine and unplug the power supply cord. When restarting the sewing machine, follow the necessary procedure to correctly operate the machine.

(For U.S.A. only)

- This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electrical shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.
LCD (Liquid Crystal Display) Operation

Selected stitch, pattern settings and messages are displayed on the LCD (liquid crystal display) on the front of the sewing machine.

Viewing the LCD

When the power is turned on, the LCD comes on, and the following screen is displayed. The screen is changed using the keys below the screen, and operations performed by directly touching the icons on the LCD screen.

■ Utility stitch selection screen

- Selected stitch
- Presser foot to be used
- Stitches
- Stitch settings and twin needle sewing
- Stitch width (mm)
- Stitch length (mm)
- Thread tension
- Number of the selected stitch
- Number of stitches contained in the selected stitch type
- Horizontal mirror image
- Automatic thread cutting
- Automatic reverse/reinforcement
- Single/twin needle sewing and needle stop position

■ Stitch type selection screen

Press (Utility stitch key) to display the screen for selecting the stitch type. The details are explained in "Selecting stitching" (page 49).

Memo

- A different screen is displayed when the embroidery unit is attached.
- Refer to "Error messages" (page 171) for messages displayed on the LCD.
- Depending on the model of sewing machine, an animation may be displayed when the power is turned on. When an animation is displayed, the screen above will be displayed if you touch the LCD with your finger.
## Changing the machine settings

Various sewing machine operations and sewing settings can be changed. The stitch or machine attributes that can be set are listed below.

<table>

</table>
1 Turn on the sewing machine.

- The LCD comes on.

2 Press (Settings key) on the display panel.

- The settings screen appears.

3 Press the item to be set.

Switch screens using (Previous page key) and (Next page key).

- The items shown in reverse highlighting are the settings at the time of purchase.

Example: Changing the needle stop position
When settings are complete, press \[\text{Back key}\].

The initial screen appears again.

**Note**
- Settings that are changed are not lost when the power is turned off.

---

**Checking machine operating procedures**

Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement on the LCD.

1. **Turn on the sewing machine.**

   - The LCD comes on.

2. **Press \[\text{(Sewing machine help key)}\] on the display panel.**

   - The sewing machine help screen appears.

3. **Press the item to be displayed.**

   - The first screen describing the procedure for the selected topic appears.

   - Pressing \[\text{(Back key)}\], returns you to the item selection screen.
4 Press ➡ (Next page key) to switch to the next page. If you press ◄ (Previous page key), you return to the previous page.

Example: Upper threading

5 After you finish looking, press ◄ (Back key) two times.

The initial stitch screen appears again.

Note

For details on each topic, refer to the corresponding page in this Operation Manual.
Winding/Installing the Bobbin

This section describes how to wind the thread onto the bobbin, and then insert the bobbin thread.

Bobbin precautions

Be sure to observe the following precautions concerning the bobbin.

⚠️ CAUTION

- Only use the Bobbin (part code: SA156, SFB: XA5539-151) designed specifically for this sewing machine. Use of any other bobbin may result in injuries or damage to the machine.
- The included bobbin was designed specifically for this sewing machine. If bobbins from other models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB: XA5539-151).

Winding the bobbin

Wind the thread around the bobbin to prepare the bobbin thread.

1. Turn on the sewing machine.

2. Open the top cover.

3. Place the bobbin on the bobbin winder shaft so that the spring on the shaft fits into the notch in the bobbin. Press down on the bobbin until it snaps into place.

4. Slide the bobbin winder in the direction of the arrow until it snaps into place.

- (Start/stop button) lights up in orange.
5 Remove the spool cap that is inserted onto the spool pin.

6 Place the spool of thread for the bobbin onto the spool pin.
   Slide the spool onto the pin so that the spool is horizontal and the thread unwinds to the front at the bottom.

- If the spool is not positioned so that the thread unwinds correctly, the thread may become tangled around the spool pin.

7 Slide the spool cap onto the spool pin.
   Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

**CAUTION**

- If the spool or the spool cap is not installed correctly, the thread may become tangled around the spool pin, causing the needle to break.
- Three spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.
Memo

- When sewing with fine, cross-wound thread, use the small spool cap, and leave a small space between the cap and the spool.

1. Spool cap (small)
2. Spool (cross-wound thread)
3. Space

- When using thread that winds off quickly, such as transparent nylon thread or metallic thread, place the spool net over the spool before placing the spool of thread onto the spool pin. If the spool net is too long, fold it to fit the size of the spool.

1. Spool net
2. Spool
3. Spool cap
4. Spool pin

8. While holding the thread near the spool with your right hand, as shown, pull the thread with your left hand, and then pass the thread behind the thread guide cover and to the front.

9. Pass the thread under the thread guide plate, and then pull it to the right.

10. Pass the thread under the hook on the thread guide, and then wind it counterclockwise under the pretension disk.

11. While holding the thread with your left hand, wind the thread that was pulled out clockwise around the bobbin five or six times with your right hand.
Pass the end of the thread through the guide slit in the bobbin winder seat, and then pull the thread to the right to cut it.

Guide slit in bobbin winder seat (with built-in cutter)

Be sure to cut the thread as described. If the bobbin is wound without cutting the thread using the cutter built into the slit in the bobbin winder seat, the thread may become tangled in the bobbin or the needle may bend or break when the bobbin thread starts to run out.

CAUTION

Slide the sewing speed controller to the right.

Speed controller

Press [Start/stop button] once to start winding the bobbin.

Start/stop button

When the bobbin winding becomes slow, stop the machine, otherwise the sewing machine may be damaged.

Use scissors to cut the end of the thread wound around the bobbin.

Slide the bobbin winder shaft to the left, and then remove the bobbin from the shaft.

Remove the spool for the bobbin thread from the spool pin, and then close the top cover.

Memo

When the sewing machine is started or the handwheel is turned after winding the bobbin, the machine will make a clicking sound; this is not a malfunction.
Installing the bobbin

Install the bobbin wound with thread.

**CAUTION**

- Use a bobbin that has been correctly wound with thread, otherwise the needle may break or the thread tension will be incorrect.

- The bobbin was designed specifically for this sewing machine. If bobbins from other models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB: XA5539-151).

- Be careful not to drop the bobbin.

1. Slide the bobbin cover latch to the right.

   ![Bobbin cover latch](image)

   ① Bobbin cover
   ② Latch

   The bobbin cover opens.

2. Remove the bobbin cover.

3. Hold the bobbin with your right hand and hold the end of the thread with your left.

   ![Bobbin and thread](image)

4. Insert the bobbin into the bobbin case so that the thread unrolls to the left.

   ![Bobbin insertion](image)

   - Be sure to insert the bobbin correctly.

5. Lightly hold down the bobbin with your right hand, and then guide the thread as shown with your left hand.

   ![Thread guiding](image)

**Memo**

- The order that the bobbin thread should be passed through the bobbin case is indicated by marks around the bobbin case. Be sure to thread the machine as indicated.

- Be sure to hold down the bobbin with your finger and unroll the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.

- Be sure to hold down the bobbin with your finger and unroll the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.

- Be sure to hold down the bobbin with your finger and unroll the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.
Pass the thread through the slot as shown, and then pull the thread out toward the front.

Cutter

The cutter cuts the thread.

**Note**

- Make sure that the thread is correctly inserted through the tension-adjusting spring of the bobbin case. If it is not inserted correctly, reinsert the thread.

Reattach the bobbin cover.

Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.

The bobbin threading is finished.

Next, thread the upper thread. Continue with the procedure in "Upper Threading" (page 29).

**Memo**

- You can begin sewing without pulling up the bobbin thread. If you wish to pull up the bobbin thread before starting to sew, pull up the thread according to the procedure in "Pulling up the bobbin thread" (page 36).
Upper Threading

This section describes how to position the spool for the upper thread, and then thread the needle.

**CAUTION**

- When threading the upper thread, carefully follow the instructions. If the upper threading is not correct, the thread may become tangled or the needle may bend or break.

About the spool of thread

Information about the spools of thread is described below.

**CAUTION**

- Three spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.

Threading the upper thread

Set the spool of thread on the spool pin, and then thread the machine.

1. Turn on the sewing machine.

2. Raise the presser foot lever to raise the presser foot.

   ① Presser foot lever

**Note**

- If the presser foot is not raised, the sewing machine cannot be threaded.
3 Press \( \text{Needle position button} \) once or twice to raise the needle.

4 Open the top cover.

5 Remove the spool cap that is inserted onto the spool pin.

6 Place the spool of thread onto the spool pin. Slide the spool onto the pin so that the spool is horizontal and the thread unwinds to the front at the bottom.

7 Slide the spool cap onto the spool pin. Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

8 While holding the thread lightly with your right hand, pull the thread with your left hand, and then pass the thread behind the thread guide cover and to the front.

**CAUTION**

- If the spool or the spool cap is not positioned correctly, the thread may become tangled around the spool pin or the needle may break.
9. Pass the thread under the thread guide plate, and then pull it up.

While using your right hand to lightly hold the thread passed under the thread guide plate, pass the thread through the guides in the order shown below.

Note
- If the presser foot has been lowered and the shutter is closed, the machine cannot be threaded. Be sure to raise the presser foot and open the shutter before threading the machine. In addition, before removing the upper thread, be sure to raise the presser foot and open the shutter.
- This machine is equipped with a window that allows you to check the position of the take-up lever. Look through this window and check that the thread is correctly fed through the take-up lever.

10. Pass the thread behind the needle bar thread guide.
The thread can easily be passed behind the needle bar thread guide by holding the thread in your left hand, then feeding the thread with your right hand, as shown.
**Thread the needle**

This section describes how to thread the needle.

**Memo**

- The needle threader can be used with sewing machine needles 75/11 through 100/16.
- Thread with a thickness of 130/20 or thicker cannot be used with the needle threader.
- The needle threader cannot be used with the wing needle or the twin needle.
- If the needle threader cannot be used, refer to "Threading the needle manually (without using the needle threader)" (page 33).

1. Pull the end of the thread passed through the needle bar thread guide to the left, and then pass the thread through the thread guide disk from the front.

   ![Thread guide disk](image)

2. Cut the thread with the cutter on the left side of the machine.

   ![Cutter](image)

3. Lower the presser foot lever to lower the presser foot.

   ![Presser foot lever](image)

4. Lower the needle threader lever on the left side of the machine until it clicks, and then slowly return the lever to its original position.

   ![ Needle threader lever](image)

**Note**

- If the thread is pulled through and cannot be cut correctly, lower the presser foot so that the thread is held in place before cutting the thread. If this operation is performed, skip step 3.
- When using thread that quickly winds off the spool, such as metallic thread, it may be difficult to thread the needle if the thread is cut. Therefore, instead of using the thread cutter, pull out about 80 mm (approx. 3 inches) of thread after passing it through the thread guide disks (marked "7").

**Tip**

- The thread is passed through the eye of the needle.
**Note**

- If the needle was not completely threaded, but a loop in the thread was formed in the eye of the needle, carefully pull the loop through the eye of the needle to pull out the end of the thread.

---

**CAUTION**

- When pulling out the thread, do not pull it with extreme force, otherwise the needle may break or bend.

---

**Threading the needle manually (without using the needle threader)**

When using special thread, thread with a thickness of 130/20 or thicker, the wing needle or the twin needle which cannot be used with the needle threader, thread the needle as described below.

1. **Thread the machine to the needle bar thread guide.**
   - For details, refer to “Upper Threading” (page 29).

2. **Lower the presser foot lever.**

3. **Pass the thread through the eye of the needle from front to back.**

4. **Raise the presser foot lever, pass the end of the thread through the presser foot, and then pull out about 5 cm of thread toward the rear of the machine.**

---

**Note**

- If the needle is not raised, the needle threader cannot thread the needle. Be sure to press the (Needle position button) to raise the needle before using the needle threader.
Using the twin needle

With the twin needle, you can sew two parallel lines of the same stitch with two different threads. Both upper threads should have the same thickness and quality. Be sure to use the twin needle, the extra spool pin and the spool cap.

For details on the stitches that can be sewn with the twin needle, refer to "Stitch Setting Chart" (page 66).

**CAUTION**

- Only use the twin needle (part code: X59296-151). Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.

1. **Install the twin needle.**
   - For details on installing a needle, refer to "Replacing the needle" (page 40).

2. **Thread the upper thread for the left needle eye.**
   - For details, refer to steps 1 through 11 of "Threading the upper thread" (page 29).

3. **Manually thread the left needle with the upper thread.**
   - Pass the thread through the eye of the needle from the front.

4. **Insert the extra spool pin onto the bobbin winder shaft.**
   - Insert the extra spool pin so that it is perpendicular to the bobbin winder shaft.

5. **Swing down the spool pin so that it is horizontal.**

6. **Place the upper thread spool for the needle on the right side onto the extra spool pin, and then secure it with the spool cap.**
   - The thread should unroll from the top front of the spool.

- The needle threader cannot be used with the twin needle. If the needle threader is used with the twin needle, the sewing machine may be damaged.
Thread the upper thread in the same way that the upper thread for the left side was threaded.

---

Without passing the thread through the needle bar thread guide, manually thread the right needle. Pass the thread through the eye of the needle from the front.

- The needle threader cannot be used with the twin needle. If the needle threader is used with the twin needle, the sewing machine may be damaged.

Attach zigzag foot "J".
- For details on changing the presser foot, refer to "Replacing the Presser Foot" (page 42).

---

Turn on the sewing machine and select a stitch.
- For stitch selection see "Selecting stitching" (page 49).
- See "Stitch Setting Chart" (page 66) for stitches that use a twin needle.

---

Press \[ \text{W} \].

The screen for setting the twin needle appears.

Press \[ \text{W} \].

\[ \text{W} \] displays in reverse highlight.
- If pressed again, it returns to \[ \text{W} \].

The twin needle can now be used.

---

**CAUTION**

- When using the twin needle, be sure to select an appropriate stitch, otherwise the needle may break or the machine may be damaged.
Press \( \rightarrow \) (Back key).

The initial screen appears again, and \( \mathbb{H} \) appears.

---

**CAUTION**

- When using the twin needle, be sure to select the twin needle setting, otherwise the needle may break or the machine may be damaged.

---

**Start sewing.**

- For details on starting to sew, refer to "Starting to sew" (page 51).

- Two lines of stitching are sewn parallel to each other.

---

**Note**

- When changing the sewing direction, press \( \uparrow \) (Needle position button) to raise the needle from the fabric, and then raise the presser foot lever and turn the fabric.

---

**Pulling up the bobbin thread**

When making gathers or before free-motion quilting, first pull up the bobbin thread as described below.

1. Insert the bobbin into the bobbin case.
   - Refer to steps 1 through 3 of "Installing the bobbin" (page 27).

2. Pass the bobbin thread through the slot.
   - Do not cut the thread with the cutter.

3. While lightly holding the upper thread with your left hand, press \( \uparrow \) (Needle position button) twice to raise the needle.

4. Carefully pull the upper thread upward to pull out the end of the bobbin thread.

---

**CAUTION**

- Do not try turning the fabric with the twin needle left down in the fabric, otherwise the needle may break or the machine may be damaged.
Pull out about 10-15 cm (4-5 inches) of the bobbin thread under the presser foot toward the rear of the machine.

Reattach the bobbin cover.
Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.
Replacing the Needle

This section describes how to replace the needle.

Needle precautions

Be sure to observe the following precautions concerning the handling of the needle. Failure to observe these precautions is extremely dangerous, for example, if the needle breaks and fragments are dispersed. Be sure to read and carefully follow the instructions below.

**CAUTION**

- Only use home sewing machine needles. Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
**Needle types and their uses**

The sewing machine needle that should be used depends on the fabric and thread thickness. Refer to the following table when choosing the thread and needle appropriate for the fabric that you wish to sew.

<table>
<thead>
<tr>
<th>Fabric Type/Application</th>
<th>Thread Type</th>
<th>Size of Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Medium weight fabrics</strong></td>
<td></td>
<td></td>
</tr>

<tr>
<td><strong>For top-stitching</strong></td>
<td>Synthetic thread</td>
<td>30</td>
</tr>
<tr>
<td>Silk thread</td>
<td>90/14–100/16</td>
<td></td>
</tr>
</tbody>
</table>

- **Thread and needle number**
  The lower the thread number is, the larger the thread, and the larger the needle number, the larger the needle.

- **Ball point needle (gold colored)**
  To avoid skipped stitches use ball point needles with stretch fabrics.

- **Transparent nylon thread**
  Use a 90/14 to 100/16 needle, regardless of the fabric or thread.

- **Embroidery needles**
  Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 or 100/16 home sewing machine needle.

- **CAUTION**
  - A 75/11 needle is already installed when the sewing machine is purchased.
  - The appropriate fabric, thread and needle combinations are shown in the table above. If the combination of the fabric, thread and needle is not correct, particularly when sewing thick fabrics (such as denim) with thin needles (such as 65/9 to 75/11), the needle may bend or break. In addition, the stitching may be uneven or puckered or there may be skipped stitches.
Checking the needle

Sewing with a bent needle is extremely dangerous since the needle may break while the machine is being operated. Before using the needle, place the flat side of the needle on a flat surface and check that the distance between the needle and the flat surface is even.

![Drawing of a needle with flat side and needle type marking]

1 Flat side
2 Needle type marking

**CAUTION**

- If the distance between the needle and the flat surface is not even, the needle is bent. Do not use a bent needle.

Replacing the needle

Replace the needle as described below. Use the screwdriver and a needle that has been determined to be straight according to the instructions in "Checking the needle".

1. Press (Needle position button) once or twice to raise the needle.

   ![Drawing of needle position button]

2. Turn off the sewing machine.

   ![Drawing of sewing machine power switch]

**CAUTION**

- Before replacing the needle, be sure to turn off the sewing machine, otherwise injuries may occur if (Start/stop button) is accidentally pressed and the machine starts sewing.

3. Lower the presser foot lever.

   ![Drawing of presser foot lever]

   1 Presser foot lever
4. Hold the needle with your left hand, and then use a screwdriver to turn the needle clamp screw toward you (counterclockwise) to remove the needle.

5. With the flat side of the needle toward the rear of the machine, insert the needle until it touches the needle stopper.

6. While holding the needle with your left hand, use the screwdriver to tighten the needle clamp screw.

- Do not apply a strong force when loosening or tightening the needle clamp screw, otherwise certain parts of the sewing machine may be damaged.

- Be sure to insert the needle until it touches the needle stopper and securely tighten the needle clamp screw with the screwdriver, otherwise the needle may break or damage may result.
Replacing the Presser Foot

This section describes how to replace the presser foot.

Presser foot precautions

Be sure to observe the following precautions concerning the presser feet.

⚠️ CAUTION

- Use the presser foot appropriate for the type of stitch that you wish to sew, otherwise the needle may hit the presser foot, causing the needle to bend or break.
- Only use presser feet designed specifically for this sewing machine. Use of any other presser foot may result in injuries or damage to the machine.

Replacing the presser foot

Replace the presser foot as described below.

1. Press (Needle position button) once or twice to raise the needle.

   ![Needle position button](image1)
   
   ① Needle position button

2. Turn off the sewing machine.

   ![Power switch](image2)

3. Raise the presser foot lever.

   ![Presser foot lever](image3)
   
   ① Presser foot lever
   ▶ The presser foot is raised.

4. Press the black button at the back of the presser foot holder.

   ![Presser foot holder](image4)
   
   ① Black button
   ② Presser foot holder
   ▶ The presser foot holder releases the presser foot.

⚠️ CAUTION

- Before replacing the presser foot, be sure to turn off the sewing machine, otherwise injuries may occur if (Start/stop button) is accidentally pressed and the machine starts sewing.
5 Place a different presser foot below the holder so that the presser foot pin is aligned with the notch in the holder.
Position the presser foot so that the letter indicating the presser foot type (A, G, I, J, M, N or R) is positioned to be read.

![Presser foot holder diagram]

① Presser foot holder
② Notch
③ Pin

6 Slowly lower the presser foot lever so that the presser foot pin snaps into the notch in the presser foot holder.

![Presser foot lever diagram]

① Presser foot lever
   - The presser foot is attached.

7 Raise the presser foot lever to check that the presser foot is securely attached.

![Presser foot lever raised diagram]

---

**Note**

- When a stitch is selected, the icon for the presser foot that should be used appears in the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

![Stitch selection screen]

- Buttonhole foot "A"
- Overcasting foot "G"
- Zigzag foot "J"
- Button fitting foot "M"
- Monogramming foot "N"
- Blind stitch foot "R"
- Side cutter "S"
- Embroidery foot "Q"

- For details on the presser foot that should be used with the selected stitch, refer to "Stitch Setting Chart" (page 66).
Removing and attaching the presser foot holder

Remove the presser foot holder when cleaning the sewing machine or when installing a presser foot that does not use the presser foot holder, such as the embroidery foot and quilting foot. Use the screwdriver to remove the presser foot holder.

1 Remove the presser foot.
   - For details, refer to "Replacing the presser foot" (page 42).

2 Use the screwdriver to loosen the presser foot holder screw.

   a Screwdriver
   b Presser foot holder
   c Presser foot holder screw

■ Attaching the presser foot holder

1 Raise the presser foot lever.
2 Align the presser foot holder with the lower-left side of the presser bar.

3 Hold the presser foot holder in place with your right hand, and then tighten the screw using the screwdriver in your left hand.

   ① Screwdriver

Note
- If the presser foot holder is not correctly installed, the thread tension will be incorrect.
Sewing Cylindrical Pieces

Free-arm sewing makes sewing cylindrical pieces easy.

**Free-arm sewing**

Removing the flat bed attachment allows for free-arm sewing, making it easier to sew cylindrical pieces such as sleeve cuffs and pant legs.

1. **Pull the flat bed attachment off to the left.**

   ![Pulling the flat bed attachment](image)

   ▶ With the flat bed attachment removed, free-arm sewing is possible.

2. **Slide the part that you wish to sew onto the arm, and then sew from the top.**

   ![Sliding the part and sewing](image)

3. **When you are finished with free-arm sewing, install the flat bed attachment back in its original position.**

   ![Installing the flat bed attachment](image)
The necessary preparations for sewing are described in this chapter.

Sewing

Basic sewing operations are described below. Before operating the sewing machine, read the following precautions.

**CAUTION**

- While the machine is in operation, pay special attention to the needle location. In addition, keep your hands away from all moving parts such as the needle and handwheel, otherwise injuries may occur.
- Do not pull or push the fabric too hard while sewing, otherwise injuries may occur or the needle may break.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Make sure that the needle does not strike basting pins, otherwise the needle may break or bend.

**General sewing procedure**

Follow the basic procedures below to sew.

Selecting stitching

Stitches are selected using LCD operations. There are 67 utility stitches. Right after turning the power on, the straight stitch (left needle position) is selected. The machine can also be set to select the straight stitch (center needle position). For details on changing the setting, refer to page 19.

1. Determine the stitch to be used, and get the matching presser foot ready.
   - Refer to "Stitch Setting Chart" (page 66).

2. Attach the presser foot.
   - The machine comes with zigzag foot "J" attached.
   - For details, refer to "Replacing the presser foot" (page 42).

   **CAUTION**
   - Use the presser foot appropriate for the stitch. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.

3. Turn on the sewing machine.

   - The straight stitch (left needle position) is shown selected in the LCD.
   - When an animation is displayed on the screen, touch the screen with your finger.

4. Select a stitch.
   - (Previous page key) displays the previous screen, and (Next page key) displays the next screen.

   **Example:** 11 is selected:

   - The stitch is selected, and the stitch number and settings are displayed.

   If necessary, specify the setting for automatic reverse/reinforcement stitching and adjust the stitch length, etc.

   **Memo**
   - Uses of stitches and other stitch selections are explained in "UTILITY STITCHES" (page 65).
   - Automatic reverse/reinforcement stitching and other settings are explained in "Useful Functions" (page 59).
   - The procedures for specifying the thread tension are described in "Adjusting the thread tension" (page 57).
   - Procedures for changing the stitch width and length are described in "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

   **Note**
   - When a stitch is selected, the icon for the presser foot that should be used appears on the screen. For details, refer to "Replacing the presser foot" (page 42). Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.
Positioning the fabric

Be sure that the fabric pieces are sewn in the correct order and that the right and wrong sides of the fabric are aligned correctly.

1 Turn on the sewing machine.

2 Press (Needle position button) once or twice to raise the needle.

3 Place the fabric under the presser foot.
   - If the seam allowance is positioned on the right side, sewing in a straight line is easier and the extra fabric does not get in the way.

4 While holding the end of the thread and the fabric with your left hand, turn the handwheel toward you (counterclockwise) with your right hand to lower the needle to the starting point of the stitching.

5 Lower the presser foot lever.

   - The fabric is now positioned to be sewn.
Starting to sew

Once you are ready to start sewing, you can start the sewing machine. The sewing speed can be adjusted using either the sewing speed controller or the foot controller.

**Note**
- When the foot controller is plugged in, (Start/stop button) cannot be used to start or stop sewing.

■ Using the operation button
Sewing can be started and stopped using the operation button (Start/stop button).

1. **Slide the sewing speed controller to the left or right to select the desired sewing speed.**
   Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed controller to the right to sew at a faster speed.

   ![Sewing speed controller]

2. **Press (Start/stop button) once.**

![Start/stop button]

- If you continue to hold the (Start/stop button) pressed immediately after the sewing starts, the machine will sew at a slow speed.

3. **When the end of the stitching is reached, press (Start/stop button) once.**
   - The machine stops sewing with the needle down (in the fabric).

4. **When you have finished sewing, press (Needle position button).**
   - The needle is raised.

5. **Cut the threads.**
   - For details, refer to "Cutting the thread" (page 54).

**Note**
- This machine will automatically stop when the bobbin becomes almost empty. When the machine stops, replace the bobbin thread, and then press (Start/stop button) to begin sewing again.

■ Using the foot controller
Sewing can be started and stopped using the foot controller.

1. **Turn off the sewing machine.**
   When connecting the foot controller, be sure to turn off the sewing machine in order to prevent the machine from accidentally being started.
2 Insert the foot controller plug into its jack on the right side of the sewing machine.

![Foot controller jack](image)

3 Turn on the sewing machine.

4 Slide the sewing speed controller to the left or right to select the desired sewing speed.
   Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed controller to the right to sew at a faster speed.

![Sewing speed controller](image)

Note
(For U.S.A. only)
- Foot controller: Model T
  This foot controller can be used on this machine model NV1000.

5 Once you are ready to start sewing, slowly press down on the foot controller.
Pressing down on the foot controller increases the sewing speed; releasing the pressure on the foot controller decreases the sewing speed.

![Press slowly](image)

6 When the end of the stitching is reached, completely release the foot controller.

![Release](image)

7 When you have finished sewing, press (Needle position button).

![Press needle position button](image)

8 Cut the threads.

- For details, refer to "Cutting the thread" (page 54).

Memo
- When the foot controller is plugged in, (Start/stop button) cannot be used to start or stop sewing.
- When sewing is stopped, the needle remains lowered (in the fabric). The machine can be set so that the needle will stay up when sewing is stopped. For details on setting the machine so that the needle stays up when sewing is stopped, refer to "Changing the machine settings" (page 19).

CAUTION
- Do not allow thread or dust to accumulate in the foot controller, otherwise a fire or an electric shock may occur.
- Do not place objects on the foot controller, otherwise damage to the machine or injuries may occur.
- If the machine is not to be used for a long period of time, unplug the foot controller, otherwise a fire or an electric shock may occur.
Securing the stitching

When sewing with the straight stitch, for example, at the end of an opening or where seams do not overlap, use reverse stitching or reinforcement stitching to secure the end of the thread.

1. **Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.**

2. **Press (Start/stop button) or press down on the foot controller.**
   At this time, if (Start/stop button) is held down, the machine sews at a slow speed.

   - **Reverse/reinforcement stitch button**
   - **Start/stop button**
   - **Foot controller**

3. **After sewing 3 to 5 stitches, press (Reverse/reinforcement stitch button).**
   Keep (Reverse/reinforcement stitch button) held down until you reach the beginning of the stitching.

   - The machine sews at a slow speed when (Reverse/reinforcement stitch button) is held down.

4. **After sewing back to the beginning of the stitching, release (Reverse/reinforcement stitch button).**
   - The machine stops sewing.

5. **Press (Start/stop button), or press down on the foot controller.**
   - The machine starts sewing in the normal sewing direction.

6. **When the end of the stitching is reached, press (Reverse/reinforcement stitch button).**
   Keep (Reverse/reinforcement stitch button) held down until 3 to 5 reverse stitches are sewn.

   - While (Reverse/reinforcement stitch button) is held down, reverse stitches are sewn.
After 3 to 5 reverse stitches have been sewn, release (Reverse/reinforcement stitch button). The machine stops sewing.

Press (Start/stop button), or press down on the foot controller. At this time, if (Start/stop button) is held down, the machine sews at a slow speed. The machine starts sewing in the normal sewing direction.

After sewing to the end of the stitching, the sewing machine stops. Release (Start/stop button) or foot controller.

Sewing stitches

Reverse stitches are set for the 1 3  and 7 stitches. When (Reverse/reinforcement stitch button) is pressed with stitches other than these, reinforcement stitches are used. Reinforcement stitches are 3 to 5 stitches sewn on top of each other in one place.

Memo

The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. For details, refer to “Automatically sewing reverse/reinforcement stitches” (page 59).

Cutting the thread

When you have finished sewing, cut the threads.

Using the thread cutter button

When you wish to finish the stitching, press (Thread cutter button) once.

1. Thread cutter button

The threads are cut and the needle is raised.

2. Raise the presser foot lever, then remove the fabric.

CAUTION

Do not press (Thread cutter button) after threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.

Do not press (Thread cutter button) if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.

Memo

The machine can be set so that the threads will be cut when sewing is finished. For details on setting the machine so that the threads are cut automatically, refer to “Automatically cutting the thread” (page 60).
Using the thread cutter

When sewing with thread thicker than #30, nylon or metallic threads, or other special threads, use the thread cutter on the side of the machine to cut the threads.

1. When you wish to finish the stitching and the sewing machine is stopped, press (Needle position button) once to raise the needle.

   ![Needle position button diagram](image)

   ① Needle position button

   The needle is raised.

2. Raise the presser foot lever.

   ![Presser foot lever diagram](image)

   ① Presser foot lever

3. Pull the fabric to the left side of the machine, and then pass the threads through the thread cutter to cut them.

   ![Thread cutter diagram](image)

   ① Thread cutter
Setting the Stitch

This machine is preset with the default settings for the stitch width, stitch length, and upper thread tension for each stitch. However, you can change any of the settings by pressing in the screen, then following the procedure described in this section.

Note
- Settings for some stitches cannot be changed. For details, refer to "Stitch Setting Chart" (page 66).
- Stitch settings return to their defaults if they are changed, when the machine is turned off or a different stitch is selected before the stitch setting is saved.

Adjusting the stitch width

The stitch width (zigzag width) can be adjusted to make the stitch wider or narrower.

Each press of makes the zigzag stitch narrower.

Each press of makes the zigzag stitch wider.

Memo
- Press to return the setting to its default.
- If the straight stitch (left needle position or triple stretch stitch) was selected, changing the stitch width changes the needle position. Increasing the width moves the needle to the right; reducing the width moves the needle to the left.
- The sewing machine can be set so that the stitch width can easily be changed with the sewing speed controller. For details, refer to "Satin stitching" (page 102).
- means the setting cannot be adjusted.

CAUTION
- After adjusting the stitch width, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
Adjusting the stitch length

The stitch length can be adjusted to make the stitch coarser or finer.

Each press of \( \square \) makes the stitch finer (shorter).

Each press of \( \square \) makes the stitch coarser (longer).

Memo

- Press \( \square \) to return the setting to its default.
- \( \square \) means the setting cannot be adjusted.

CAUTION

- If the stitches are bunched together, increase the stitch length. Continuing to sew with the stitches bunched together may result in the needle bending or breaking.

Adjusting the thread tension

You may need to change the thread tension, depending on the fabric and thread being used.

Correct thread tension

The upper thread and the bobbin thread should cross near the center of the fabric. Only the upper thread should be visible from the right side of the fabric, and only the bobbin thread should be visible from the wrong side of the fabric.

Upper thread is too tight

If the bobbin thread is visible from the right side of the fabric, the upper thread is too tight.

Each press of \( \square \) makes the thread tension looser.
■ Upper thread is too loose

If the upper thread is visible from the wrong side of the fabric, the upper thread is too loose.

Each press of + makes the thread tension tighter.

MEMO

Press <RESET> to return the setting to its default.
Useful Functions

Functions useful in improving sewing efficiency are described below.

Automatically sewing reverse/reinforcement stitches

The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. Whether reverse stitches or reinforcement stitches are sewn depends on the stitch that is selected. For details, refer to "Stitch Setting Chart" (page 66).

1 Turn on the sewing machine.

The LCD comes on.

2 Select a stitch.

- For details on selecting a stitch, refer to "Selecting stitching" (page 49).

3 Press 📅 on the LCD.

It turns to 📅, and the sewing machine is set for automatic reverse/reinforcement stitching.

- To turn automatic reverse/reinforcement stitching off, press 📅.
- When the sewing machine is turned off, the automatic reverse/reinforcement stitching setting is cancelled.

4 Position the fabric under the presser foot, and then press 🍀 (Start/stop button) once.

Start/stop button

After reverse/reinforcement stitches are sewn, the machine starts sewing.

5 After reaching the end of the stitching, press 🍀 (Reverse/reinforcement stitch button) once.

This step is not necessary if a stitch such as those for sewing buttonholes and bar tacks is selected where reinforcement stitches are automatically sewn.

Reverse/reinforcement stitch button

After reverse/reinforcement stitches are sewn, the sewing machine stops.

Memo

- Reverse/reinforcement stitches will not be sewn if 🍀 (Start/stop button) is pressed at the end of the stitching. Be sure to press 🍀 (Reverse/reinforcement stitch button) at the end of the stitching.
Automatically cutting the thread

The sewing machine can be set to automatically cut the threads at the end of the stitching. This is called "programmed thread-cutting". If programmed thread-cutting is set, automatic reverse/reinforcement stitching is also set.

1 Turn on the sewing machine.

- The LCD comes on.

2 Select a stitch.

- For details on selecting a stitch, refer to "Selecting stitching" (page 49).

3 Press 📈 on the screen.

- You get 📈 📈 , and the sewing machine is set for programmed thread-cutting and automatic reverse/reinforcement stitching.

- To turn programmed thread cutting off, press 📈 .

4 Set the fabric in place, and press 🎁 (Start/stop button) once.

5 Once you have reached the end of the stitching, press 🎁 (Reverse/reinforcement stitch button) once.

If stitching, such as buttonholes and bar tacking, that includes reinforcement stitching has been selected, this operation is unnecessary.

- After the reverse stitching or reinforcement stitching has been done, the sewing machine stops, and the thread is cut.

Memo

- Programmed thread-cutting will not be performed if 🎁 (Start/stop button) is pressed while sewing. Press 🎁 (Reverse/reinforcement stitch button) at the end of the stitching.

- If the power is turned off, programmed thread-cutting will be turned off.
Mirroring stitches

You can sew the mirror image of a stitch horizontally (left and right).

1. **Turn on the sewing machine.**
   - The LCD comes on.

2. **Select a stitch.**
   - For details on selecting a stitch, refer to "Selecting stitching" (page 49).

3. **Press \[
\begin{array}{c}
\text{[Mirroring]} \\
\end{array}
\] on the screen.**
   - For stitches other than utility stitches
     - It turns to \[
\begin{array}{c}
\text{[Mirroring]} \\
\end{array}
\] , and the pattern is mirrored.
   - To turn the mirrored stitching off, press \[
\begin{array}{c}
\text{[Mirroring]} \\
\end{array}
\].

**Memo**
- Mirroring is not possible for buttonholes and other stitches where \[
\begin{array}{c}
\text{[Mirroring]} \\
\end{array}
\] shows.
- When the sewing machine is turned off, the mirroring setting is cancelled.
Useful Sewing Tips

Various ways to achieve better results for your sewing projects are described below. Refer to these tips when sewing your project.

**Trial sewing**

After you have set up the machine with the thread and needle appropriate for the type of fabric being sewn, the machine automatically sets the thread tension and stitch length and width for the stitch that is selected. However, a trial piece of fabric should be sewn since, depending on the type of fabric and stitching being sewn, the desired results may not be achieved.

For the trial sewing, use a piece of fabric and thread that are the same as those used for your project, and check the thread tension and stitch length and width. Since the results differ depending on the type of stitching and the number of layers of fabric sewn, perform the trial sewing under the same conditions that will be used with your project.

**Sewing curves**

Stop sewing, and then slightly change the sewing direction to sew around the curve. For details on sewing with an even seam allowance, refer to “Sewing an even seam allowance” (page 64).

When sewing along a curve while using a zigzag stitch, select a shorter stitch length in order to obtain a finer stitch.

**Changing the sewing direction**

1. **When the stitching reaches a corner, stop the sewing machine.**
   Leave the needle lowered (in the fabric). If the needle remained up when the machine stopped sewing, press (Needle position button) to lower the needle.

2. **Raise the presser foot lever, and then turn the fabric.**
   Turn the fabric using the needle as a pivot.

3. **Lower the presser foot lever and continue sewing.**

**Adjusting the presser foot pressure**

For best results when sewing stretch fabrics, thin fabrics or thick fabrics, adjust the presser foot pressure (amount of pressure that the presser foot applies to the fabric).

1. **Lower the presser foot lever to lower the presser foot.**

1 Presser foot lever
2 Turn the presser foot pressure dial at the back of the machine to adjust the pressure of the presser foot.
The presser foot pressure can be set to one of four levels (between 1 and 4). The larger the setting, the stronger the pressure. Use setting 1 or 2 for thick fabrics, use setting 4 for thinner fabrics.

3 When you are finished sewing, reset the dial to 3 (standard).

**Sewing thick fabrics**

- **If the fabric does not fit under the presser foot**
  If the fabric does not fit easily under the presser foot, raise the presser foot lever even higher to bring the presser foot to its highest position.

- **If thick seams are being sewn and the fabric does not feed at the beginning of stitching**
  Zigzag foot “J” is equipped with a feature that keeps the presser foot level.

1 When you encounter a seam that is too thick to feed under the foot, raise the presser foot lever.

2 Press the black button (presser foot holding pin) on the left side of zigzag foot "J". Keep the button held in and lower the presser foot.

   ① Presser foot holding pin

   ▶ Release the button. The foot will lock in place level with the seam, allowing the fabric to feed.

   ▶ Once the trouble spot has been passed, the foot will return to its normal position.

**CAUTION**

- If fabric more than 6 mm (15/64 inch) thick is sewn or if the fabric is pushed with too much force, the needle may bend or break.
Sewing thin fabrics

When sewing thin fabrics, the stitching may become misaligned or the fabric may not feed correctly. If this occurs, place thin paper or stabilizer material under the fabric and sew it together with the fabric. When you have finished sewing, tear off any excess paper.

![Stabilizer material or paper](image1)

Sewing stretch fabrics

First, baste the pieces of fabric together, and then sew without stretching the fabric.

![Basting](image2)

Besides, using the stretch stitching or the thread for knits gives an attractive finishes.

Sewing an even seam allowance

To sew an even seam, start sewing so that the seam allowance is to the right of the presser foot, and the edge of the fabric is aligned with either the right edge of the presser foot or a marking on the needle plate.

- **Aligning the fabric with the presser foot**
  Sew while keeping the right edge of the presser foot a fixed distance from the edge of the fabric.

![Presser foot](image3)

- **Aligning the fabric with a needle plate marking**
  The markings on the needle plate show the distance from the needle position of a seam sewn with the straight stitch (left needle position). Sew while keeping the edge of the fabric aligned with a marking in the needle plate. The distance between the markings in the upper scale is 1/8 inch (3 mm) and the distance between the markings in the grid is 5 mm (3/16 inch).

![Needle plate](image4)

## Utility Stitches

Applications, stitch lengths and widths and whether the twin needle can be used are listed for utility stitches in the following table.

### Utility stitches

Selecting Stitching

This section provides details on the various types of stitches available and the procedure for selecting a stitch.

**Stitch types**

A stitch can be selected from the following types available.
For details on the various stitches, refer to "Stitch Setting Chart" (page 66).

**Utility stitches**
You can select from 67 utility stitches, including straight line stitching, overcasting, button holes and basic decorative stitches. If this is selected, the utility stitch selection appears right after the power is turned on.

**Decorative stitches**
(Can be combined)
You can select from 31 decorative stitches, including leaves, flowers and hearts. You can sew combinations of multiple decorative stitches.

**Satin stitches**
(Can be combined)
You can select from 16 satin stitches. You can sew combinations of multiple decorative stitches.

**My Custom Stitch**
(For details, refer to "Designing a Pattern (My Custom Stitch)" (page 124).)

**Cross stitches**
(Can be combined)
You can select from 14 cross stitches. You can sew combinations of multiple decorative stitches.

**Combined utility stitches**
(Can be combined)
You can sew with combinations from 39 utility stitches.

**Patterns stored in the machine's memory**
You can recall a stored pattern.

**Selecting stitching**

1. **Turn on the sewing machine.**

   - When an animation is displayed on the screen, touch the screen with your finger.
   - The straight stitch (left needle position) is shown selected on the screen.

2. **Press** (Utility stitch key) on the operation panel.

   - The screen containing the various types of stitches appears.

3. **Select the stitch type.**

   - The screen containing the various stitches in the selected stitch type appears.
   - To select a different stitch type, press (Back key).
**Press the stitch selection.**

- `<` (Previous page key) displays the previous screen, and `>` (Next page key) displays the next screen.
- When a decorative stitch is selected

![Diagram of stitch selection options]

- Decorative stitch selection
- Set width, length and tension
- Single stitch sewing
- Repeat sewing
- Horizontal mirror image
- Delete a selected pattern
- Check combined pattern
- Automatic thread cutting
- Automatic reverse/reinforcement stitch

- To select a different stitch, press `DELETE` to remove the selected pattern.

**If necessary, specify the setting for automatic reverse/reinforcement stitching and adjust the stitch length, etc.**

- For details on sewing with each of the utility stitches, refer to the following pages.

---

**Note**

- When a stitch is selected, the icon for the presser foot that should be used appears on the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

---

**Memo**

- For details on adjusting the stitch width and length, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).
Saving stitch settings

This machine is preset with the default settings for the stitch width (zigzag width), stitch length, thread tension, programmed thread cutting, and automatic reverse/reinforcement stitching for each stitch. However, if you wish to save specific settings for a stitch so that they can be used later, press \[\text{MEMORY}\] after changing the settings to save the new settings with the selected stitch.

This feature can be used only with utility stitches.

- To use a stitch length of 2.0 mm for the straight stitch

1. Select a straight stitch.
2. Press \[\text{MEMORY}\].

Memo

- The default stitch length is 2.5 mm.

3. Set the stitch length to 2.0 mm.

4. Press \[\text{MEMORY}\].

- To reset the selected stitch pattern to its default settings, press \[\text{RESET}\], and then press \[\text{MEMORY}\].

Press \[\text{MEMORY}\].

The confirmation message is displayed.

**Note**

- The next time that the same straight stitch is selected, the stitch length is set to 2.0 mm.
- All stitch settings (stitch width (zigzag width), stitch length, thread tension, programmed thread cutting, and automatic reverse/reinforcement stitching, etc.) are saved, not just the setting that was changed. When the same stitch pattern is selected, the last settings saved are displayed even if the machine was turned off. If the settings are changed again and \[\text{MEMORY}\] is pressed, or if \[\text{RESET}\] is pressed to reset the setting to its default, the new settings are not saved unless \[\text{MEMORY}\] is pressed another time.

Even if \[\text{RESET}\] is pressed, the settings for programmed thread cutting and automatic reverse/reinforcement stitching cannot be reset.
UTILITY STITCHES

Overcasting Stitches

Sew overcasting stitches along the edges of cut fabric to prevent them from fraying. 15 stitches are available for overcasting. The procedure for sewing overcasting stitch is explained according to the presser foot that is used.

Sewing overcasting stitches using overcasting foot "G"

Three stitches can be used to sew overcasting with overcasting foot "G".

<table>
<thead>
<tr>

1. Attach zigzag foot "J".
2. Select a stitch.
3. Sew along the edge of the fabric with the needle dropping off the edge at the right.

- For details, refer to "Replacing the presser foot" (page 42).
- For details, refer to "Selecting stitching" (page 49).
Sewing overcasting stitches using the optional side cutter

Using the optional side cutter, seam allowances can be finished while the edge of the fabric is cut off. Five stitches can be used to sew overcasting stitches with the side cutter.

**Note**
- Thread the needle manually when using the side cutter, or only attach the side cutter after threading the needle using the needle threader.

</tr>
</tbody>
</table>

1. Remove the presser foot.
   - For details, refer to "Replacing the presser foot" (page 42).

2. Hook the connecting fork of the side cutter onto the needle clamp screw.

3. Position the side cutter so that side cutter pin is aligned with the notch in the presser foot holder, and then slowly lower the presser foot lever.
4 Raise the presser foot lever to check that the side cutter is securely attached.

5 Pass the upper thread under the side cutter, and then pull it out toward the rear of the sewing machine.

6 Select a stitch.

For details, refer to “Selecting stitching” (page 49).

7 Make a cut of about 2 cm (3/4 inch) long in the fabric at the beginning of the stitching.

8 Position the fabric in the side cutter. The cut in the fabric should be positioned over the guide plate of the side cutter.

9 Lower the presser foot lever, and then start sewing.

A seam allowance is cut while the stitching is sewn.

- If the fabric is not positioned correctly, the fabric will not be cut.

- If the stitching is sewn in a straight line, the seam allowance will be about 5 mm (3/16 inch).

Memo

- The side cutter can cut as much as one layer of 13-oz. denim.
- After using the side cutter, clean it by removing any lint or dust.
- If the side cutter can no longer cut fabric, use a rag to apply a small amount of oil to the cutting edge of the cutter.

① Guide plate

① 5 mm (3/16 inch)
## Basic Stitching

Straight stitches are used for sewing plain seams. Five stitches are available for basic stitching.

### Basting

Sew basting with a stitch length between 5 mm (3/16 inch).

1. **Attach zigzag foot "J".**  
   - For details, refer to "Replacing the presser foot" (page 42).

2. **Select stitch 6.**  
   - For details, refer to "Selecting stitching" (page 49).

3. **Start sewing.**  
   - For details, refer to "Starting to sew" (page 51).

### Basic stitching

1. **Baste or pin together the fabric pieces.**

2. **Attach zigzag foot "J".**  
   - For details, refer to "Replacing the presser foot" (page 42).

3. **Select a stitch.**  
   - For details, refer to "Selecting stitching" (page 49).

4. **Lower the needle into the fabric at the beginning of the stitching.**
5 Start sewing.
- For details, refer to "Starting to sew" (page 51).
- For details on sewing reverse/reinforcement stitches, refer to "Securing the stitching" (page 53).

6 When sewing is finished, cut the thread.
- For details, refer to "Cutting the thread" (page 54).

---

- Changing the needle position

The needle position used as the baseline is different for the straight stitch (left needle position) and the straight stitch (center needle position).

![Diagram of needle positions]

Straight stitch (left needle position)  
Straight stitch (center needle position)

When the stitch width of the straight stitch (left needle position) is set to its standard setting (0.0 mm), the distance from the needle position to the right side of the presser foot is 12 mm (1/2 inch). If the stitch width is changed (between 0 and 7.0 mm (1/4 inch)), the needle position will also change. By changing the stitch width and sewing with the right side of the presser foot aligned with the edge of the fabric, a seam allowance can be sewn with a fixed width.

![Diagram of stitch width settings]

- For details, refer to "Adjusting the stitch width" (page 56).
Blind Hem Stitching

Secure the bottoms of skirts and pants with a blind hem. Two stitches are available for blind hem stitching.

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Presser Foot</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Sew a blind hem according to the following procedure.

1. **Fold the fabric along the desired edge of the hem, and then baste it about 5 mm (3/16 inch) from the edge of the fabric.**

   ![Diagram](image1)

   ① Wrong side of fabric  
   ② Basting  
   ③ Desired edge of hem  
   ④ 5 mm (3/16 inch)

2. **Fold back the fabric along the basting, and then position the fabric with the wrong side facing up.**

   ![Diagram](image2)

   ① Wrong side of fabric  
   ② Basting

3. **Attach blind hem foot “R”.**

   ![Diagram](image3)

   - For details, refer to "Replacing the presser foot" (page 42).

4. **Select a stitch.**

   ![Diagram](image4)

   - For details, refer to “Selecting stitching” (page 49).

5. **Position the fabric with the edge of the folded hem against the guide of the presser foot, and then lower the presser foot lever.**

   ![Diagram](image5)

   ① Wrong side of fabric  
   ② Fold of hem  
   ③ Guide
Adjust the stitch width until the needle slightly catches the fold of the hem.

When you change the needle drop point, raise the needle, and then change the stitch width.

If the needle catches too much of the hem fold
The needle is too far to the left. Press [-] to decrease the stitch width so that the needle slightly catches the fold of the hem.

Wrong side of fabric
Right side of fabric

If the needle does not catch the hem fold
The needle is too far to the right. Press [+] to increase the stitch width so that the needle slightly catches the fold of the hem.

Wrong side of fabric
Right side of fabric

For details, refer to "Adjusting the stitch width" (page 56).

Sew with the fold of the hem against the presser foot guide.

Remove the basting stitching.

Wrong side of fabric
Right side of fabric
# Buttonhole Stitching

Buttonholes can be sewn and buttons can be sewn on. 10 stitches are available for sewing one-step buttonholes, one for sewing on buttons.

**A**

**Presser Foot**
Buttonhole sewing

The maximum buttonhole length is about 28 mm (1-1/8 inches) (diameter + thickness of the button). Buttonholes are sewn from the front of the presser foot to the back, as shown below.

- Reinforcement stitching

1. Use chalk to mark on the fabric the position and length of the buttonhole.

2. Pull out the button guide plate of buttonhole foot "A", and then insert the button that will be put through the buttonhole.
If the button does not fit in the button guide plate
Add together the diameter and thickness of the button, and then set the button guide plate to the calculated length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

Example: For a button with a diameter of 15 mm (9/16 inch) and a thickness of 10 mm (3/8 inch), the button guide plate should be set to 25 mm (1 inch) on the scale.

---

Select a stitch.

For details, refer to “Selecting stitching” (page 49).

Position the fabric with the front end of the buttonhole mark aligned with the red marks on the sides of the buttonhole foot, and then lower the presser foot lever.

---

Attach buttonhole foot “A”.

- For details, refer to "Replacing the presser foot" (page 42).

- When lowering the presser foot, do not push in the front of the presser foot.

---

Do not reduce the gap.
6. Pull down the buttonhole lever as far as possible.

   ![Buttonhole lever](image)

   ① Buttonhole lever
   The buttonhole lever is positioned behind the bracket on the buttonhole foot.

   ② Bracket

7. Gently hold the end of the upper thread in your left hand, and then start sewing.

   ![Sewing](image)

   Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

8. Raise the presser foot lever, remove the fabric, and then cut the thread.

9. Raise the buttonhole lever to its original position.

10. Insert a pin along the inside of one bar tack at the end of the buttonhole stitching to prevent the stitching from being cut.

   ![Pin](image)

   ① Pin

11. Use the seam ripper to cut towards the pin and open the buttonhole.

   ![Seam ripper](image)

   ① Seam ripper

   For keyhole buttonholes, use the eyelet punch to make a hole in the rounded end of the buttonhole, and then use the seam ripper to cut open the buttonhole.

   ![Eyelet punch](image)

   ① Eyelet punch

   - When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

**CAUTION**

- When opening the buttonhole with the seam ripper, do not place your hands in the cutting direction, otherwise injuries may result if the seam ripper slips.
UTILITY STITCHES

- Changing the density of the stitching
  Adjust the stitch length.
  
  ![Stitch Length Adjustments]

  - For details, refer to "Adjusting the stitch length" (page 57).
  - If the fabric does not feed (for example, if it is too thick), decrease the density of the stitching.

- Changing the stitch width
  Adjust the stitch width.
  
  ![Stitch Width Adjustments]

  - For details, refer to "Adjusting the stitch width" (page 56).

Memo

- Before sewing buttonholes, check the stitch length and width by sewing a trial buttonhole on a scrap piece of fabric.

Sewing buttonholes on stretch fabrics

When sewing buttonholes on stretch fabrics, use a gimp thread.

1. Hook the gimp thread onto the part of buttonhole foot "A" shown in the illustration.

2. It fits into the grooves, and then loosely tie it.

3. Attach buttonhole foot "A".
   - For details, refer to "Replacing the presser foot" (page 42).

4. Select stitch 52 or 53.

5. Adjust the stitch width to the thickness of the gimp thread.

6. Lower the presser foot lever and the buttonhole lever, and then start sewing.

7. When sewing is finished, gently pull the gimp thread to remove any slack.

8. Use a handsewing needle to pull the gimp thread to the wrong side of the fabric, and then tie it.
Button sewing

Buttons can be sewn on with the sewing machine. Buttons with two or with four holes can be attached.

1 Measure the distance between the holes in the button to be attached.

2 Raise the presser foot lever, and then slide the drop feed lever, located at the rear of the machine on the base, to $\text{\textbullet\textbullet}$ (to the left as seen from the rear of the machine).

3 Attach button-sewing foot "M".

4 Select stitch 61.

- For details, refer to "Selecting stitching" (page 49).
- Since the end of the thread will be tied off later, do not set the sewing machine for programmed-thread cutting.

5 Adjust the stitch width so that it is the same as the distance between the holes in the button.

6 Place the button in the position where it will be sewn, and lower the presser foot lever.

- For details, refer to "Replacing the presser foot" (page 42).
- When attaching four-hole buttons, first sew the two holes closest to you. Then, slide the button so that the needle goes into the two holes toward the rear of the sewing machine, and then sew them in the same way.
7 Turn the handwheel toward you (counterclockwise) to check that the needle correctly goes into the two holes of the button. Adjust the stitch width to the distance between the button holes.

8 Start sewing.
Set the sewing speed controller to the left (so that the speed will be slow).

9 Use scissors to cut the upper thread and the bobbin thread at the beginning of the stitching.
Pull the upper thread at the end of the stitching to the wrong side of the fabric, and then tie it with the bobbin thread.

10 When you are finished attaching the button, slide the drop feed lever to (to the right as seen from the rear of the machine) to raise the feed dogs.

Memo
- The feed dog position switch is normally set to the right side.
- The feed dogs come up when you start sewing again.

Attaching a shank to a button
To sew the button with a shank, attach the button with space between it and the fabric, and then wind the thread by hand. This attaches the button securely.

1 Place the button into button-sewing foot “M”, and then pull the shank lever toward you.

2 After sewing is finished, cut the upper thread with plenty of excess, wind it around the thread between the button and the fabric, and then tie it to the upper thread at the beginning of the stitching.
Tie together the ends of the bobbin thread at the end and at the beginning of the stitching at the wrong side of the fabric.

3 Cut off any excess thread.
Zipper Insertion

A zipper can be sewn in place.

There are many methods for inserting zippers. The procedures for inserting a centered zipper and a side zipper are described below.

**Inserting a centered zipper**

Stitching is sewn on both pieces of fabric butted against each other.

1. **Attach zigzag foot "J".**
2. **Sew straight stitches up to the zipper opening.**
   - With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
   - For details, refer to "Basic stitching" (page 78).
3. **Using a basting stitch, continue sewing to the edge of the fabric.**
4. **Press open the seam allowance from the wrong side of the fabric.**

</tbody>
</table>
5 Align the seam with the center of the zipper, and then baste the zipper in place.

6 Remove about 5 cm (2 inches) from the end of the basting on the outside.

7 Attach the presser foot holder to the right pin of zipper foot "I".

8 Select stitch $3$. For details, refer to "Selecting stitching" (page 49).

9 Topstitch around the zipper.

10 Remove the basting stitching.

CAUTION

- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the handwheel toward you (counterclockwise) to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.
**Inserting a side zipper**

Stitching is visible on only one piece of fabric. Use this type of zipper application for side openings and back openings.

1. **Attach zigzag foot "J".**
2. **Sew straight stitches up to the zipper opening.** With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
   - For details, refer to "Basic stitching" (page 78).
3. **Using a basting stitch, continue sewing to the edge of the fabric.**
4. **Press open the seam allowance from the wrong side of the fabric.**
5. **Press the seam allowance so that the right side (the side that will not be stitched) has an extra 3 mm (1/8 inch).**
6. **Align the zipper teeth with the pressed edge of the fabric having the extra 3 mm (1/8 inch), and then baste or pin the zipper in place.**
7. **Attach the presser foot holder to the right pin of zipper foot "I".**
   - For details, refer to "Replacing the presser foot" (page 42).
Select stitch 3.

- For details, refer to "Selecting stitching" (page 49).

**CAUTION**

- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the handwheel toward you (counterclockwise) to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

Sew the zipper to the piece of fabric with the extra 3 mm (1/8 inch), starting from the base of the zipper.

**CAUTION**

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.

When you are about 5 cm (2 inches) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), raise the presser foot lever.

Open the zipper and continue sewing.

Close the zipper, turn over the fabric, and then baste the other side of the zipper to the fabric.

Attach the presser foot holder to the other pin of zipper foot "I".

If the presser foot holder was attached to the right pin in step 7, change it to the left pin.

1. Basting stitching
2. Pin on the left side
3. Needle drop point
14 **Topstitch around the zipper.**
Sew reverse stitches at the end of the zipper opening and align the zipper teeth with the side of the presser foot.

![Diagram of zipper insertion]

- ➊ Right side of fabric
- ➋ End of zipper opening
- ❼ Reverse stitches
- ➍ Beginning of stitching
- ➎ Basting stitching

**CAUTION**

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.

15 When you are about 5 cm (2 inches) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), and then raise the presser foot lever.

16 Remove the basting stitching, open the zipper, and then continue sewing.
Sewing Stretch Fabrics and Elastic Tape

Stretch fabrics can be sewn and elastic tape can be attached.

</tr>
</tbody>
</table>

Observe the corresponding precautions when performing each of the following stitching operations.

**Stretch stitching**

1. **Attach zigzag foot "J".**
   - For details, refer to "Replacing the presser foot" (page 42).

2. **Select stitch 5 3/4.**
   - For details, refer to "Selecting stitching" (page 49).

3. **Sew the fabric without stretching it.**

**Elastic attaching**

When elastic tape is attached to the cuff or waist of a piece of clothing, the finished dimensions will be that of the stretched elastic tape. Therefore, it is necessary that a suitable length of the elastic tape be used.

1. **Pin the elastic tape to the wrong side of the fabric.**
   - Pin the elastic tape to the fabric at a few points to make sure that the tape is uniformly positioned on the fabric.

2. **Attach zigzag "J".**
   - For details, refer to "Replacing the presser foot" (page 42).
Select a stitch.

- For details, refer to "Selecting stitching" (page 49).

Sew the elastic tape to the fabric while stretching the tape so that it is the same length as the fabric.
While pulling the fabric behind the presser foot with your left hand, pull the fabric at the pin nearest the front of the presser foot with your right hand.

**CAUTION**
- When sewing, be sure that the needle does not touch any pins, otherwise the needle may bend or break.
Appliqué, Patchwork and Quilt Stitching

The stitches that can be used for sewing appliqués, patchwork and quilts are described below.

Memo
- Patterns showing a "Q" on the LCD are for quilting and those showing a "P" are for piecing.

Appliqué stitching

1 Cut out the appliqué, leaving a seam allowance of between 3 and 5 mm (1/8 and 3/16 inch).

① Seam allowance
2. Place a pattern made of thick paper or stabilizer on the back of the appliqué, and then fold over the seam allowance using an iron.

3. Turn the fabric over, and then baste or fuse it onto the fabric that it will be attached to.

4. Attach zigzag foot "J".

   - For details, refer to "Replacing the presser foot" (page 42).

5. Select a stitch.

   - For details, refer to "Selecting stitching" (page 49).

6. Turn the handwheel toward you (counterclockwise), and then begin sewing around the edge of the appliqué, making sure that the needle drops just outside of the appliqué.

   When sewing around corners, stop the machine with the needle in the fabric just outside of the appliqué, raise the presser foot lever, and then turn the fabric as needed to change the sewing direction.
**Patchwork (crazy quilt) stitching**

1. Fold the edge of the top piece of fabric and place it over the lower piece.

2. Sew the two pieces of fabric together so the pattern spans over both pieces.

---

**Piecing**

Sewing together two pieces of fabric is called "piecing". The fabric pieces should be cut with a 7 mm (1/4 inch) seam allowance. Sew a piecing straight stitch 7 mm (1/4 inch) from either the right side or the left side of the presser foot.

1. Baste or pin along the seam allowance of the fabric that you wish to piece together.

2. Attach zigzag foot "J".

   - For details, refer to "Replacing the presser foot" (page 42).

3. Select stitch 21 or 22.

   - For details, refer to "Selecting stitching" (page 49).
   - The piecing straight stitch shows a "P" on the LCD.

4. Sew with the side of the presser foot aligned with the edge of the fabric.

   - For a seam allowance on the right side
     Align the right side of the presser foot with the edge of the fabric, and sew using stitch 21.

   - 7 mm (1/4 inch)
**For a seam allowance on the left side**
Align the left side of the presser foot with the edge of the fabric, and sew using stitch 22.

![Diagram showing seam allowance on the left side](image)

① 7 mm (1/4 inch)

**Memo**
- To change the width of the seam allowance (needle position), adjust the stitch width. For details, refer to “Adjusting the stitch width” (page 56).

**Quilting**

Sandwiching batting between the top and bottom layers of fabric is called "quilting". Quilts can easily be sewn using the optional walking foot and the quilting guide.

1. **Baste the fabric to be quilted.**
2. **Remove the presser foot holder.**
   - For details, refer to "Removing and attaching the presser foot holder" (page 44).
3. **Hook the connecting fork of the walking foot onto the needle clamp screw.**

![Diagram showing walking foot attachment](image)

① Connecting fork  
② Needle clamp screw

4. **Lower the presser foot lever, insert the presser foot holder screw, and then tighten the screw with the screwdriver.**

![Diagram showing presser foot holder screw](image)

① Presser foot holder screw

The walking foot is attached.

**CAUTION**
- Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.
- Before starting to sew, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
Select a stitch.
- For details, refer to "Selecting stitching" (page 49).

Place one hand on each side of the presser foot, and then evenly guide the fabric while sewing.

**Note**
- When sewing with the walking foot, sew at a speed between slow and medium.
- When quilting, use a 90/14 home sewing machine needle.

- Using the optional quilting guide
  Use the quilting guide to sew parallel stitches that are equally spaced.

  1. Insert the stem of the quilting guide into the hole at the rear of the walking foot or presser foot holder.
     - Walking foot
     - Presser foot holder
  2. Adjust the stem of the quilting guide so that the guide aligns with the seam that has already been sewn.
Free-motion quilting

With free-motion quilting, lower the feed dogs (using the drop feed lever) so that the fabric can be moved freely in any direction. When free-motion quilting, use the following instructions with the optional quilting foot (sold separately).

1. Remove the presser foot and the presser foot holder.
   - Refer to "Removing and attaching the presser foot holder" (page 44).

2. Secure the quilting foot with the presser foot holder screw.
   The pin on the quilting foot should be positioned over the needle clamp screw.

3. Hold the quilting foot in place with your right hand, and then tighten the presser foot holder screw using the screwdriver in your left hand.

   **CAUTION**
   - Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.

4. Slide the drop feed lever, located at the rear of the machine on the base, to \( \text{佧} \) (to the left as seen from the rear of the machine).

5. Turn on the sewing machine, and then select a stitch.
   - For details, refer to “Selecting stitching” (page 49).

6. Use both hands to hold the fabric taut, and then move the fabric to follow the pattern.
   Reinforcement stitches are sewn at the beginning and end of sewing.

7. After sewing is finished, slide the drop feed lever to \( \text{佳} \) (to the right as seen from the rear of the machine) to raise the feed dogs.
   - Normally, the drop feed lever is positioned at the right.
Satin stitching

A decorative stitch can be sewn by changing the stitch width of a satin stitch. If the sewing machine is set so that the stitch width can be adjusted using the sewing speed controller, the stitch width can quickly and easily be adjusted. In this case, the sewing speed is adjusted with the foot controller.

1. Connect the foot controller.
   - For details, refer to "Starting to sew" (page 51).

2. Attach zigzag foot "J".
   - For details, refer to "Replacing the presser foot" (page 42).

3. Turn on the sewing machine, and then press (Settings key) in the operation panel.
   - The settings LCD appears.

4. Press ON for stitch width control setting.
   - The machine is now set so that the stitch width can be controlled with the sewing speed controller. If the stitch width control setting is set to "ON", for stitch width will change to sewing speed controller icon .

5. Press (Back key).
   - The initial screen appears again.

   - For details, refer to “Selecting stitching” (page 49).

7. While sewing, slide the sewing speed controller to adjust the stitch width.
   - Slide the controller to the left to make the width narrower. Slide the controller to the right to make the width wider.

8. When you are finished sewing, set the stitch width control setting back to OFF.

Memo
- Although the stitching result differs depending on the type of fabric being sewn and the thickness of the thread being used, for best results, adjust the stitch length to between 0.3 and 0.5 mm (1/64 and 1/32 inch).
Reinforcement Stitching

Reinforce points that will be subject to strain, such as sleeve holes, inseams and pocket corners.

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch.)]</th>
<th>Stitch Length [mm (inch.)]</th>
<th>Presser Foot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Triple stretch stitch</td>
<td></td>
<td>Reinforcing the seams of sleeves and inseams</td>
<td>Auto: 0.0 (0) Manual: 0.0–7.0 (0–1/4)</td>
<td>Auto: 2.5 (3/32) Manual: 1.5–4.0 (1/16–3/16)</td>
<td>J</td>
</tr>
<tr>
<td>Bar tack stitch</td>
<td></td>
<td>Reinforcing the ends of openings, such as the corners of pockets</td>
<td>Auto: 2.0 (1/16) Manual: 1.0–3.0 (1/16–1/8)</td>
<td>Auto: 0.4 (1/64) Manual: 0.3–1.0 (1/64–1/16)</td>
<td>A</td>
</tr>
</tbody>
</table>

**Triple stretch stitching**

Use triple stretch stitching to reinforce sleeve holes and inseams.

1. Attach zigzag foot "J".

   ![Zigzag foot](image)

   - For details, refer to "Replacing the presser foot" (page 42).

2. Select stitch 4 u.

   ![Stitch selection](image)

   - For details, refer to "Selecting stitching" (page 49).

3. Start sewing.

   - For details, refer to "Starting to sew" (page 51).

**Bar tack stitching**

Bar tacks are used to reinforce points subject to strain, such as pocket corners and openings. As an example, the procedure for sewing bar tacks at pocket corners is described below.

1. Determine the desired length of the bar tack.

   Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

   ![Bar tack](image)

   - A bar tack with a maximum length of about 28 mm (1–1/8 inches) can be sewn.
2 Attach buttonhole foot "A".
   - For details, refer to "Replacing the presser foot" (page 42).

3 Select stitch 60.5.
   - For details, refer to "Selecting stitching" (page 49).

4 Position the fabric so that the opening of the pocket faces toward you, and then lower the presser foot lever so that the needle drops 2 mm (1/16 inch) in front of the pocket opening.

5 Pull down the buttonhole lever as far as possible.

   ① Buttonhole lever
   The buttonhole lever is positioned behind the bracket on the buttonhole foot.

6 Gently hold the end of the upper thread in your left hand, and then start sewing.

   ▶ Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

7 Raise the presser foot lever, remove the fabric, and then cut the threads.

8 Raise the buttonhole lever to its original position.

   ☙ Memo
   - If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 57).
Darning

Fabric that has been torn can be darned.
Darning is sewn as shown below.

1. Determine the desired length of the darning.
   Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

2. Attach buttonhole foot "A".
   • For details, refer to "Replacing the presser foot" (page 42).

3. Select stitch 58 or 59.

4. Position the fabric so that the needle is 2 mm (1/16 inch) in front of the area to be darned, and then lower the presser foot lever.

• A bar tack with a maximum length of about 28 mm (1-1/8 inches) can be sewn.

• For details, refer to "Selecting stitching" (page 49).
Pass the upper thread down through the hole in the presser foot.

- When lowering the presser foot, do not push in the front of the presser foot, otherwise the darning will not be sewn with the correct size.

1. Do not reduce the gap.

5. **Pull down the buttonhole lever as far as possible.**

   ![Buttonhole lever](image)

   1. Buttonhole lever

   The buttonhole lever is positioned behind the bracket on the buttonhole foot.

6. **Gently hold the end of the upper thread in your left hand, and then start sewing.**

   ![Buttonhole lever](image)

   1. Buttonhole lever
   2. Bracket

   Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

7. **Raise the presser foot lever, remove the fabric, and then cut the threads.**

8. **Raise the buttonhole lever to its original position.**

   **Memo**
   - If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 57).
Eyelet Stitching

Eyelets, such as those on belts, can be sewn. Three sizes of eyelets are possible: 7 mm, 6 mm and 5 mm (1/4, 15/64 and 3/16 inch).

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Presser Foot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eyelet stitch</td>
<td>62</td>
<td>Sewing eyelets, for example, on belts</td>
<td>Auto: 7.0 (1/4), Manual: 7.0, 6.0 or 5.0 (1/4, 15/64 or 3/16)</td>
<td>Auto: 7.0 (1/4), Manual: 7.0, 6.0 or 5.0 (1/4, 15/64 or 3/16)</td>
<td>N</td>
</tr>
</tbody>
</table>

1. Attach monogramming foot "N".

   • For details, refer to "Replacing the presser foot" (page 42).

2. Select stitch 62.

   • For details, refer to "Selecting stitching" (page 49).

3. Adjust either the stitch width or the stitch length to select the desired eyelet size.

   ① 7mm  
   ② 6mm  
   ③ 5mm

   • For details, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).

4. Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.

5. Start sewing.

   • Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

6. Use the eyelet punch to cut a hole in the center of the eyelet.

   • When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

Memo

• If thin thread is used, the stitching may be too open. If this occurs, sew the eyelet twice before removing the fabric, one on top of the other.
# Decorative Stitching

The utility stitches contain the following decorative stitches.

</tbody>
</table>
Stitching across an open seam is called "fagoting". It is used on blouses and children's clothing. This stitch is more decorative when thicker thread is used.

1. Use an iron to fold the two pieces of fabric along their seams.

2. Baste the two pieces of fabric, separated by about 4 mm (3/16 inch), onto thin paper or a sheet of water-soluble stabilizer. If you draw a line down the middle of the thin paper or water-soluble stabilizer, sewing is easier.

3. Attach zigzag foot "J".

4. Select stitch 32 or 33.

5. Set the stitch width to 7.0 mm (1/4 inch).

6. Sew with the center of the presser foot aligned along the center of the two pieces of fabric.

7. After sewing is finished, remove the paper.
Scallop stitching

The wave-shaped repeating pattern that looks like shells is called "scalloping". It is used on the collars of blouses and to decorate the edges of projects.

1. Attach monogramming foot "N".
   - For details, refer to "Replacing the presser foot" (page 42).

2. Select stitch 27.
   - For details, refer to "Selecting stitching" (page 49).

3. Stitch along the edge of the fabric, making sure not to sew directly on the edge of the fabric.
   - For better results, apply spray starch onto the fabric and press with a hot iron before it is sewn.

4. Trim along the stitches.
   - Be careful not to cut the stitches.

Smocking

The decorative stitch created by stitching or embroidering over gathers is called "smocking". It is used to decorate the front of blouses or cuffs. The smocking stitch adds texture and elasticity to fabric.

1. Attach zigzag foot "J".
   - For details, refer to "Replacing the presser foot" (page 42).

2. Select the straight stitch, and then adjust the stitch length to 4.0 mm (3/16 inch) and loosen the thread tension.
   - For details, refer to "Adjusting the stitch length" (page 57) and "Adjusting the thread tension" (page 57).
   - Pull up the bobbin thread. For details, refer to "Pulling up the bobbin thread" (page 36).

3. Sew parallel stitching at intervals of 1 cm (3/8 inch).
   - 1 cm (3/8 inch)
   - Do not use reverse/reinforcement stitching or thread cutting.
   - At the end of the stitching, the thread is pulled out about 5 cm (2 inches).

4. Pull the bobbin threads to create gathers.
   Smooth the gathers by ironing them.
Select stitch 31, 32 or 33.

- For details, refer to "Selecting stitching" (page 49).

Stitch between the straight stitches.

Pull out the threads for the straight stitches.

Shell tuck stitching

The gathers that look like shells are called "shell tucks". They are used to decorate trims, the front of blouses or cuffs made of thin fabrics.

1. Fold the fabric along the bias.

2. Attach zigzag foot "J".

- For details, refer to "Replacing the presser foot" (page 42).

3. Select stitch 20, and then increase the thread tension.

- For details, refer to "Selecting stitching" (page 49) and "Adjusting the thread tension" (page 57).
4 Sew while making sure that the needle drops slightly off the edge of the fabric.

Unfold the fabric, and then iron the tucks down to one side.

Joining

Decorative bridging stitches can be sewn over the seam allowance of joined fabrics. This is used when making a crazy quilt.

1 Attach zigzag foot "J".

- For details, refer to "Replacing the presser foot" (page 42).

2 Sew together the right sides of the two pieces of fabric, and then open up the seam allowances.

3 Select stitch 28, 29 or 30.

- For details, refer to “Selecting stitching” (page 49).

4 Turn the fabric over so that the right side faces up, and then sew over the seam with the center of the presser foot aligned with the seam.
Heirloom stitching

When sewing with the wing needle, the needle holes are enlarged, creating a lace-like decorative stitch. This is used to decorate hems and tablecloths on thin or mediumweight fabrics in addition to plain weave fabrics.

1 Install the wing needle.

- Use a 130/705H 100/16 wing needle.
- For details on installing a needle, refer to "Replacing the needle" (page 40).
- The needle threader cannot be used with the wing needle, otherwise the sewing machine may be damaged. Manually pass the thread through the eye of the needle from the front to the back. For details, refer to "Threading the needle manually (without using the needle threader)" (page 33).

2 Attach monogramming foot "N".

- For details, refer to "Replacing the presser foot" (page 42).

3 Select a stitch.

The stitches that can be used are 39, 40, 41, 42, 43, 44, 45, 46 or 47.

4 Start sewing.

CAUTION

- When sewing with the wing needle, select a stitch width of 6.0 mm (15/64 inch) or less, otherwise the needle may bend or break.
- After adjusting the stitch width, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
Partially removing threads is called "drawnwork". This gives a beautiful result with fabrics that have a loose weave.

Two ways to create drawnwork are described below.

**Drawnwork (Example 1)**

1. Pull out several threads from the fabric.

2. Attach monogramming foot "N".

   - For details, refer to "Replacing the presser foot" (page 42).

   - For details, refer to "Selecting stitching" (page 49).

4. With the right side of the fabric facing up, sew along the right edge of the frayed section.

5. Press the LCD.

   - The pattern is mirrored.

6. Sew along the other edge of the frayed section so that it looks like the previous stitching.

7. Press , and set the horizontal mirror image key back to OFF.
■ Drawnwork (Example 2)

1. Pull out several threads from two sections of the fabric, separated by an unfrayed section of about 4 mm (3/16 inch).

2. Attach monogramming foot "N".

   • For details, refer to "Replacing the presser foot" (page 42).

   • For details, refer to "Selecting stitching" (page 49).

4. Sew along the center of the unfrayed section.
Sewing the Various Built-in Decorative Patterns

Besides utility stitches, you can sew decorative stitches, satin stitches and cross stitches. All are sewn with monogramming foot "N".

Sewing beautiful patterns

In order to sew the patterns correctly, the following must be considered.

■ Fabric
Before sewing stretch or thin fabrics or fabrics with a coarse weave, affix stabilizer material to the wrong side of the fabric or place a thin sheet of paper, such as tracing paper, under the fabric. Since material puckering or bunched stitches may occur when satin stitches are sewn, be sure to affix stabilizer material to the fabric.

■ Needles and threads
When sewing thin, mediumweight or stretch fabrics, use the ball point needle. When sewing thick fabrics, use a 90/14 home sewing machine needle. In addition, #50 to #60 thread should be used.

■ Trial sewing
Depending on the type and thickness of the fabric being sewn and whether or not stabilizer material is used, the desired result may not be achieved. Be sure to sew a trial piece of fabric before sewing your project. In addition, while sewing, be sure to guide the fabric with your hands in order to prevent the fabric from slipping.

Sewing patterns

1. Attach monogramming foot "N".
   • For details, refer to "Replacing the presser foot" (page 42).

2. Select a stitch.
   • For details, refer to steps 1 through 5 of "Selecting stitching" (page 71).

3. Start sewing.
   • The stitching is sewn in the direction indicated by the arrow.

4. Sew reinforcement stitches.
   • When sewing a pattern, it is useful to first set the automatic reverse/reinforcement stitching setting. For details, refer to "Automatically sewing reverse/reinforcement stitches" (page 59).

5. When you are finished sewing, use scissors to trim off any excess threads at the beginning of the stitching and between the patterns.

Memo

• For details on adjusting the stitch width and length, refer to "Adjusting the stitch width" (page 56) and "Adjusting the stitch length" (page 57).
Changing the length for satin stitches

The length for one satin stitch can be changed in five gradations.

1. Press (Utility stitch key) on the display panel, and select (Satin stitch).

   ![Image showing the display panel with the satin stitch option selected.]

2. Select a satin stitch pattern.

   ![Image showing a selection of satin stitch patterns.]

3. Press .

   - It turns to and the pattern is longer.

Realigning the pattern

The pattern may not be sewn correctly, depending on the type of fabric being sewn or the sewing speed. If this occurs, adjust the pattern while sewing on a piece of scrap fabric that is the same as that used for your project.

1. Attach monogramming foot "N".

   ![Image of monogramming foot "N".]

   • For details, refer to "Replacing the presser foot" (page 42).

2. Press (Utility stitch key) on the display panel, and select (Decorative stitch).

   ![Image showing the display panel with the decorative stitch option selected.]

   - The screen containing the various decorative stitches appears.
UTILITY STITCHES

3 Select ..................

The pattern alignment stitch is selected.

4 Start sewing.

The pattern for making the adjustment is sewn.
The sewing machine stops after it has finished sewing the pattern.

5 Check the sewn pattern.
If the part of the pattern indicated in the illustration is sewn uniformly, the pattern is correctly aligned.

If the pattern is not sewn correctly, follow the steps below to adjust the sewing.

6 Press (Settings key) in the operation panel.

The settings screen appears.

7 Press for vertical pattern adjustment.

Make the necessary adjustments according to how the pattern is sewn.

Press to increase the vertical space in the design.

Press to decrease the vertical space in the design.
8 Press \( \Rightarrow \) (Back key).

- It returns to the screen for adjusting the pattern.

9 Select \( \Rightarrow \) once again, start the sewing machine and check the stitching.
Continue adjusting the pattern until it is sewn correctly.
Sewing Combined Patterns

You can combine and sew multiple patterns, and you can store the combined patterns in the sewing machine memory.

Combining patterns

You can sew with combinations of stitches from the decorative stitch, satin stitch, cross stitch and combined utility stitch types. Up to 70 patterns can be combined.

1. Touch (Utility stitch key) on the operation panel, and select the stitch type. Select any one of the decorative stitch, satin stitch, cross stitch or combined utility stitch types.

2. Select the first pattern. The first pattern is selected and appears on the screen.

3. Select the next pattern. The combined pattern appears on the screen.

4. After all of the desired patterns are selected, start sewing.

- When the sewing is started, the selected pattern is sewn repeatedly until the sewing machine is stopped.

- To remove a selected pattern, press on the screen. The pattern that was selected last is removed.

- To combine patterns from different types, press (Back key), and after selecting the type, select the next pattern.

- The order that the patterns appear on the screen is the order that they will be sewn.
Repeating patterns
When multiple stitches are combined, the sewing machine stops when the pattern displayed on the screen has been completed. Use the following operations to sew a combined pattern repeatedly.

1. After the patterns have been combined, press 🍃. If pressed again, it turns to 🍃 (single sewing).

Mirror a pattern image
After a single pattern has been selected, press 🍃 to mirror the pattern image horizontally.
Checking the pattern
When the specified pattern is not displayed on the screen, check the pattern using the following steps.

1. Press \( \text{CHECK} \).

   The screen for checking the pattern is displayed.

2. Press \( \text{ } \) and confirm the pattern.

3. Press \( \text{ } \) (Back key).

   The initial screen appears again.

Memo
- The combined pattern can be stored for later use. For details, refer to “Storing patterns”.

Storing patterns

Combined patterns can be stored for later use. Since stored patterns are not lost after the sewing machine is turned off, they can be recalled at any time. Up to 10 patterns can be stored.

Storing a pattern

1. Create the combined pattern that you wish to store.
   - For details, refer to “Combining patterns” (page 120).

2. Press \( \text{ } \) (Memory key) in the operation panel.

   "Saving..." appears while the pattern is being stored. After the pattern is stored, the initial screen appears again.

   - Do not turn off the sewing machine while the pattern is being stored, otherwise the pattern data may be lost.
### Recalling a pattern

1. **Press**  (Recall key).
   Recall the stored pattern.

   ▶ The screen for selecting a pocket appears.

2. **Select the pocket where the combined pattern you wish to recall is stored.**
   - Indicates pockets where patterns are already stored.

   ▶ The selected pocket is shown in reverse highlighting, and the stored pattern is displayed.

3. **Check the contents, and then press**.
   Press to check a pattern that is not displayed completely.

   ▶ The stored pattern is recalled.

   ▶ The pattern selection screen appears, and you can sew the pattern you have recalled.

### Deleting a stored pattern

 Stored pattern in the pockets can be deleted.

1. **Press**  (Recall key).

2. **Select the pocket where the pattern you wish to delete is stored.**
   - Indicates pockets where patterns are already stored.

   ▶ The selected pocket is shown in reverse highlighting, and the stored pattern is displayed.

3. **Check the contents, then press**.
   - The confirmation message is displayed.

4. **Press**.
   ▶ The stored pattern and the pocket are deleted.
Designing a Pattern (My Custom Stitch)

With the My Custom Stitch function, you can sew stitch patterns that you design yourself.

**Drawing a sketch of the pattern**

Prepare a grid sheet set.

1. **Draw a sketch of the pattern on the grid sheet set.**

   Draw the pattern as one continuous line and with the start point and the end point of the design at the same height.

2. **If the pattern will be repeated, determine the space between the repeating patterns.**

   For a more attractive stitch, close the pattern by intersecting the line.

3. **Mark the points in the pattern that are positioned at intersections in the grid, and then link those points with a continuous straight line.**

4. **Determine the sewing order.**

   Mark the points in the pattern that are positioned at intersections in the grid, and then link those points with a continuous straight line.
Entering the pattern data

Follow the pattern drawn on the grid sheet and program the pattern into the sewing machine.

1 Attach monogramming foot "N".

- For details, refer to "Replacing the presser foot" (page 42).

2 Press (Utility stitch key) on the operation panel, and then press OK.

The screen for selecting pattern types is displayed.

3 Select .

The screen for entering a pattern appears.

4 Check the grid sheet set, and specify the coordinates of the first point.
Specify the coordinates using , and press .

5 Specify whether single stitching or triple stitching will be sewn between the points.  is single stitching, and  gives triple stitching.

6 Specify the coordinates of the second point, and then press SET.

7 Repeat steps 4 through 6 to specify each point.

- If you make a mistake entering a point, press DELETE, and the previous point is erased.
- To correct the content entered, press .
You can insert, delete and move points.

8 After all points have been entered, press OK.

The embroidery screen appears.
Specify the various stitching settings, such as reverse/reinforcement stitching, in the same way as with other stitches.

- To revise the pattern, press [EDIT].

Memo

- The pattern you entered can be stored for later use. For details, refer to "Storing patterns" (page 122).
### Examples of designs

Enter each of the points indicated in the table to sew the sample stitch.

Embroidering Neatly

This section describes the preparations and basic procedures for embroidering.

What to prepare

The following is necessary for embroidering.

**Fabric**
Prepare the fabric for embroidery. Prepare a piece of fabric a little larger than the embroidery frame that matches the size of the pattern you want to sew.

**Note**
- Always use stabilizer when sewing embroidery projects, especially when embroidering on lightweight or stretch fabrics. Not using a stabilizer may result in poor quality embroidery designs.
- When embroidering on large pieces of fabric, arrange the fabric so that it does not hang off the table where the sewing machine is placed. If embroidery is done with the fabric hanging off, the embroidery unit movement may be impaired, this could cause the pattern to sew incorrectly.

**Stabilizer material**
Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

We recommend stabilizer material for embroidery. Use a water soluble sheet on thin materials like organdy and fabrics with a nap like towels. For details, refer to "Optional accessories" (page 9).

**Embroidery thread**
For the upper thread, use the embroidery thread or country thread.

For the bobbin thread, use the embroidery bobbin thread. For details, refer to "Optional accessories" (page 9).

**Note**
- For good quality embroidery designs be sure to use embroidery thread designed for embroidery machines.
- Before starting to sew, be sure there is enough bobbin thread. If you continue embroidering when the bobbin thread is low, the thread may become tangled.

**CAUTION**
- Do not embroider fabrics that are too thick. To check the fabric thickness, attach the embroidery frame to the embroidery unit, and use (Needle position button) to raise the needle. If there is space between the presser foot and the fabric, the fabric can be embroidered. If there is not space, do not embroider the fabric. Otherwise, the needle may break, resulting in injury.
- Be careful when sewing overlapping patterns. The needle may not easily pierce the fabric, causing the needle to break.
■ Needle
Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 home sewing machine needle.

Memo
- A 75/11 needle is already installed when the sewing machine is purchased.
- When replacing the needle, refer to "Replacing the needle" (page 40).

CAUTION
- Since ball point needles (gold colored) are needles for fabrics where stitches are easily skipped, such as pattern stitching and stretch fabrics, be absolutely sure not to use them for embroidery. The needle may break or bend.

■ Other
Embroidery frames "small", "medium" and "extra large (multi-position)" are optional. For details, refer to "Optional accessories" (page 9).
## Embroidery step by step

The basic steps for embroidery are as follows.

<table>
<thead>
<tr>
<th>Step</th>
<th>Task</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Presser foot attachment</td>
<td>Attach the embroidery foot &quot;Q&quot;. For details on attaching the embroidery foot, refer to &quot;Attaching the embroidery foot&quot; (page 133).</td>
</tr>

</tr>
<tr>
<td>9</td>
<td>Checking the layout</td>
<td>Check and adjust the size and position of the embroidery. For details on adjusting the layout, refer to &quot;Adjusting the layout&quot; (page 156).</td>
</tr>
<tr>
<td>10</td>
<td>Embroidery thread setup</td>
<td>Set up embroidery thread according to the pattern. For details on setting up the thread, refer to &quot;Upper Threading&quot; (page 29).</td>
</tr>
</tbody>
</table>
Attaching the Embroidery Foot

This section describes how to attach the embroidery foot.

**Attaching the embroidery foot**

Attach the embroidery foot when embroidering. Have the included embroidery foot "Q" and a screwdriver ready.

**CAUTION**

- Always use the embroidery foot "Q" when embroidering. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.

1. Press \( \text{Needle position button} \) once or twice to raise the needle.

2. Turn off the sewing machine.

3. Raise the presser foot lever.

4. Press and hold the black button on the back of the presser foot holder to detach the presser foot.

**CAUTION**

- Before replacing the presser foot, be sure to turn off the sewing machine, otherwise injuries may occur if \( \text{(Start/stop button)} \) is accidentally pressed and the machine starts sewing.

- At the time of purchase, the presser foot lever is up.

---

1. Embroidery foot bar
2. Caught by the presser foot holder screw

1. Needle position button
   - The needle goes up.

1. Presser foot lever
   - The presser foot is raised.

1. Black button
2. Presser foot holder
5 Loosen the presser foot holder screw and remove the presser foot holder.  
   Turn the screwdriver toward the back.

6 Hold the embroidery foot with your right hand, as shown.  
   Hold the embroidery foot with your index finger wrapped around the lever at the back of the foot.

7 While pressing in the lever with your finger, fit the embroidery foot bar over the needle clamp screw to attach the embroidery foot to the presser foot bar.

8 Secure the embroidery foot with the presser foot holder screw.  
   Set the embroidery foot perpendicular.

9 Tighten the presser foot holder screw.  
   Turn the screwdriver toward the front.

**CAUTION**

- Do not hit the needle with your finger or the embroidery foot "Q" when attaching it. The needle may break or cause injury.
- Be sure to tighten the screw with the included screwdriver. If the screw is loose, the needle may hit the presser foot and break or bend.
- Before sewing, always turn the handwheel toward you (counterclockwise) slowly to make sure that the needle does not hit the presser foot. Otherwise, the needle may break or bend.
Removing the embroidery foot

1. Press \( \text{Needle position button} \) once or twice to raise the needle.

2. Turn off the sewing machine.

3. Raise the presser foot lever.

4. While pressing in the lever at the back of the embroidery foot with your finger, loosen the presser foot holder screw, and then remove embroidery foot “Q”.
   Turn the screwdriver toward the back.

5. Attach the presser foot holder.
   - For details, refer to "Attaching the presser foot holder" (page 44).
**Attaching the Embroidery Unit**

This section describes how to attach the embroidery unit.

### Embroidery unit precautions

Cautions for the embroidery unit will be explained below.

**CAUTION**

- Do not move the sewing machine with the embroidery unit in place. The embroidery unit may be dropped and cause injury.
- Keep your hands and other objects away from the embroidery carriage and frame. Otherwise injury may result.

**Note**

- Do not touch the connector in the embroidery unit connector slot. The connector could be damaged, and it may cause malfunctions.
- Do not lift up on the embroidery carriage, and do not forcefully move it. It may cause malfunctions.

### Attaching the embroidery unit

Get the included embroidery unit ready.

1. Turn off the sewing machine.

2. Pull the flat bed attachment off to the left.

3. Slide the tab on the cover of the connection port in the direction of the arrow to open the cover.

**Note**

- Be sure to close the cover of the connection port when the embroidery unit is not being used.
4. Slide the embroidery unit onto the sewing machine arm.
   Push it in until it clicks and stops.

   ▶ The embroidery unit is attached.

5. Turn on the sewing machine.

   ▶ The confirmation message is displayed.

6. Be sure that no objects or hands are near the embroidery unit and press OK.

   ![Alert: The carriage of the embroidery unit will move.](image)

   ▶ When an animation is displayed on the screen, the message above will be displayed if you touch the screen with your finger.

   ▶ The carriage moves to its initial position.

---

**CAUTION**

- Do not put your hands or other objects near the carriage. It may cause injury.

---

**Note**

- If the machine is initialized with hands or objects near the carriage, the screen may return to the initial display. After removing whatever is near the carriage, turn the power on again.

   ▶ The screen for selecting the embroidery pattern type is displayed.

   ![Embroidery Patterns](image)

   - For details on the embroidery patterns, refer to "Selecting Embroidery Patterns" (page 145).

---

**Memo**

- Utility stitches cannot be selected when the embroidery unit is attached.
Removing the embroidery unit

Make sure that the sewing machine is completely stopped and follow the instructions below.

1 Remove the embroidery frame.
   • For details on removing the embroidery frame, refer to "Removing the embroidery frame" (page 144).

2 Press \[ \text{OK} \], and then press \[ \text{OK} \].

   The embroidery carriage moves into a position where it can be stored.

3 Turn off the sewing machine.

   \[ \text{CAUTION} \]

4 Hold the release button on the bottom left of the embroidery unit, and slowly pull the embroidery unit to the left.

   \[ \text{Release button} \]

   The embroidery unit separates from the sewing machine.

   \[ \text{CAUTION} \]

   • Do not carry the embroidery unit by holding the release button compartment.

   \[ \text{CAUTION} \]

   • Always turn off the sewing machine before removing the embroidery unit. It may cause malfunctions if removed when the machine is turned on.

Replacing the bobbin case

Use embroidery bobbin thread intended for use with this machine (page 9). When using other kinds of embroidery bobbin thread, use the optional alternate bobbin case (pink marking). (The bobbin case originally installed in the machine has a green marking.) For details on how to remove the bobbin case, refer to "Cleaning the race" (page 164).
Preparing the Fabric

After attaching a stabilizer material to the embroidery fabric, it is stretched on an embroidery frame.

**Attaching a stabilizer material to the fabric**

Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

**Memo**

- We recommend the stabilizer material for embroidery. Use a water soluble stabilizer on thin materials like organdy and fabrics with a nap like towels. For details, refer to "Optional accessories" (page 9).

**Note**

- Always use stabilizer material for embroidery with stretch fabrics, thin fabrics, fabrics with a loose weave and fabrics where stitches easily contract.

**CAUTION**

- Always use stabilizer material when sewing embroidery projects. The needle may break or bend if you embroider without using a stabilizer material for thin fabrics or stretch fabrics. Furthermore, the pattern may be sewn incorrectly.

1. Prepare stabilizer material that is larger than the embroidery frame being used.

![Diagram of stabilizer material being placed on the embroidery frame]

- Fabric
- Size of embroidery frame
- Stabilizer material

2. If you are using stabilizers with adhesive, place the adhesive surface of the stabilizer material against the wrong side of the fabric, and iron it with a steam iron.

![Diagram of stabilizer material being ironed]

- Stabilizer material
- Fabric (wrong side)
- Attached surface

☐ When it cannot be ironed or placed in the hoop.

For fabrics, such as towels, which cannot be ironed or for embroidering in places where ironing is difficult, place the stabilizer material under the fabric, and stretch the fabric in the embroidery frame without attaching the stabilizer.
Setting the fabric in the embroidery frame

The fabric is stretched in the embroidery frame. If the fabric is loose, the quality of the embroidery pattern may be poor. Put the fabric in the frame without slack following the steps below. Have a fabric with a stabilizer material attached and the embroidery frame (medium, small, large or extra large (multi-position)) ready.

- **Embroidery frame (large)**
  Embroidery can be done in an area with a height of up to 18 cm (7 inches) and a width of up to 13 cm (5 inches). This is used to embroider multiple patterns without changing the fabric position in the frame.

- **Embroidery frame (medium)**
  Patterns with a height of up to 10 cm (4 inches) and a width of up to 10 cm (4 inches) can be sewn.

- **Embroidery frame (small)**
  Patterns with a height of up to 2 cm (1 inch) and a width of up to 6 cm (2-1/2 inches) can be sewn. This is used for letters and other small embroidery.

- **Embroidery frame (extra large (multi-position))**
  Embroidery can be done in an area with a height of up to 30 cm (12 inches) and a width of up to 13 cm (5 inches). This is used to embroider connected or combined characters or patterns, or large patterns.

CAUTION

- Use the embroidery frame that matches the size of the pattern being embroidered. Otherwise, the embroidery frame may be hit by the presser foot and cause injury or needle breakage.

1. Loosen the embroidery frame adjustment screw and remove the inner and outer frames, placing the outer frame on a flat surface. Separate the inner and outer frame by removing inner frame upward.

   ![Diagram of Embroidery Frame](image1)

   - Inner frame
   - Outer frame
   - Adjustment screw

2. Place the fabric with the stabilizer material on top of the outer frame. Have the right side of the cloth up.

   ![Diagram of Fabric Placement](image2)

   - Right side

3. Press the inner frame in from the top of the fabric. Line up △ on the inner frame and □ on outer frame.

   ![Diagram of Inner Frame Pressing](image3)
4. Tighten the adjustment screw by hand just enough to secure the fabric.

5. Gently remove the fabric from the frame without loosening the adjustment screw.

---

**Memo**

This precautionary step will help reduce pattern distortion while embroidering.

---

6. Press the inner frame in from the top of the fabric again, lining up △ on the inner frame and ▽ on outer frame.

---

7. Tighten the adjustment screw while removing any slack in the fabric by hand. The goal is to have a drum-like sound when the stretched fabric is struck lightly.

---

- **Using embroidery sheets**
  If the embroidery sheet attached to the embroidery frame is used, the embroidery can be sewn in exactly the right position on the fabric.

---

- **Make a mark with a chalk pen at the center of the position for the pattern to be embroidered.**

---

1. Outer frame
2. Inner frame
3. Fabric (right side)
4. Stabilizer material
5. Ledge of outer frame

- Press down firmly until the inner frame is securely pressed against the ledge of the outer frame.
2 Place the embroidery sheet on the inner frame.

3 Line the mark on the fabric up with the base line on the embroidery sheet.

4 Place the inner frame with the fabric on the outer frame and stretch the fabric.
   • For details, refer to page 140.

5 Remove the embroidery sheet.

■ Embroidery on fabrics that cannot be stretched on an embroidery frame
When small pieces of fabric that cannot be stretched on an embroidery frame or thin pieces like ribbon are being embroidered, use stabilizer material as a base to stretch on the frame. We recommend stabilizer material for all embroidery.

   1 Stabilizer material
   2 Tack or spray glue
   3 Fabric

After completing the embroidery, remove the stabilizer material carefully.
Attaching the Embroidery Frame

This section describes how to attach the embroidery frame.

Attaching the embroidery frame

1. Wind the embroidery bobbin thread onto the bobbin and set it into the bobbin case.
   - For details, refer to "Winding/Installing the Bobbin" (page 23).

2. Raise the presser foot lever.

3. Pass the embroidery frame under the presser foot while raising the presser foot lever even further.

4. While lightly holding the lever on the frame holder to the left, align the two pins on the embroidery frame holder with the mounting bracket on the frame, and then press the frame into the embroidery frame holder until a click is heard.

   CAUTION
   - Be sure to insert both pins. If only the forward or the back pin is inserted, the pattern may not turn out correctly.

   ![Diagram]

   - Lever
   - Pins

   CAUTION
   - Correctly set the embroidery frame into the embroidery frame holder. Otherwise, the presser foot may hit the embroidery frame, resulting in injury.

   

   CAUTION
   - Do not hit the needle with your finger or the embroidery frame. It may cause injury or needle breakage.
Removing the embroidery frame

Make sure that the sewing machine is completely stopped and follow the instructions below.

1. **Raise the presser foot lever.**
   - Press the presser foot lever to raise it.

2. **While pushing the lever of the embroidery frame holder to the left, lift the embroidery frame up to remove it.**
   - Push the lever to the left and lift the frame up.

3. **Pass the embroidery frame under the presser foot while raising the presser foot lever even further.**
   - Slide the frame under the presser foot.

**CAUTION**

- Do not hit the needle with your finger or the embroidery frame. It may cause injury or needle breakage.
Selecting Embroidery Patterns

This section provides details on the various types of embroidery patterns available and the procedure for selecting a pattern.

Copyright information

The patterns stored in the sewing machine and embroidery cards are intended for private use only. Any public or commercial use of copyrighted patterns is an infringement of copyright law and is strictly prohibited.

Embroidery pattern types

An embroidery pattern can be selected from the following types available.

1. Embroidery patterns
2. Additional embroidery patterns
3. Alphabet characters
4. Frame patterns
5. Embroidery card
6. Patterns stored in the machine's memory

Character pattern

There are 6 types of characters (European characters); upper case/lower case/numbers/symbols.

- For details, refer to "Selecting alphabet characters" (page 148).

Embroidery patterns (Embroidery patterns / Additional embroidery patterns)

There are total 136 patterns. The patterns are completed by changing the upper thread according to the instructions displayed on the screen.

- For details, refer to "Selecting an embroidery pattern" (page 149).

Frame patterns

10 shapes, such as squares and circles, can be combined with 12 stitch types.

- For details, refer to "Selecting a frame pattern" (page 150).

Embroidery card

Press when selecting patterns from an embroidery card.

- For details, refer to "Using an embroidery card" (page 151).

Patterns stored in the machine's memory

Press when recalling patterns from the machine's memory.
LCD (liquid crystal display) operation

The LCD (liquid crystal display) is operated using the operation keys on the display panel. The use of the keys for embroidery will be explained below.

### Operation keys

- **Press** (Settings key).

**NAME OF COLOR**: Typical color name  
**TIME**: Time required for embroidering  
**NEEDLE COUNT**: Needle progress number  
**#123**: Select from the following thread color number sets
  - EMBROIDERY (POLYESTER) THREAD#  
  - COUNTRY (COTTON) THREAD#  
  - MADEIRA POLY THREAD#  
  - MADEIRA RAYON THREAD#  
  - SULKY POLY THREAD#  
  - ROBISON-ANTON POLY THREAD#

- **Returns to the previous screen.**
- **When there are patterns that are not displayed on the screen (when < or > is displayed), the previous patterns/subsequent patterns are displayed.**
- **Returns to the type selection screen.**  
  The selected pattern is cancelled.  
- **Press this key to adjust language or change the thread color display or other settings.**

**DISPLAY UNIT**  
The measurement units that are displayed can be selected. [mm/inch]

**EMBROIDERY TENSION**  
The thread tension for embroidering can be adjusted. [-8 to +8]

**MAX EMBROIDERY SPEED (SPM)**  
The maximum embroidering speed can be selected. [650SPM/350SPM]
Selecting Embroidery Patterns

- **LCD button**

  - **CHECK**
    - When a specific pattern is selected, press this key and then, press \( \Rightarrow \) to switch the display. The sewing settings such as the specified alphabet character string and color are confirmed.

  - **W/T**
    - Press this key to change the thread settings.

  - **\( \Rightarrow \)\**
    - Press this key to select or cancel programmed thread cutting.

  - **\( \Rightarrow \)\**
    - Press \( \Rightarrow \) or \( \Rightarrow \) to adjust the thread tension.

  - **\( \Rightarrow \)\**
    - Press \( \Rightarrow \) or \( \Rightarrow \) to change the thread density (character patterns only).

  - **ADJUST**
    - Press this key to adjust the pattern.

  - **MULTI COLOR**
    - Press this key when you want to change the color character by character in character embroidery. Since the sewing machine stops at the end of each character, the upper thread is changed as you sew. Press this key again to cancel multi-color.

  - **1/7 BLACK**
    - The needle progresses one color or one stitch (if pressed continuously, 9 stitches to 20 stitches) at a time and changes the position for starting the embroidery. This is used when a specific color is not sewn or when restarting the sewing machine after power has been turned off in the middle of the operation.

  - **1/7 BLACK**
    - • For details, refer to "Resewing" (page 160).

  - **1/7 BLACK**
    - • For details, refer to "Adjusting the layout" (page 156).

  - **Memo**
    - Keys that appear surrounded with a dotted line cannot be used.
Selecting alphabet characters

Specify the characters for embroidery.

**Memo**

- When "The pattern is too large for the embroidery frame." is displayed, no more characters can be input.
- Characters from different fonts (sans serif and serif, etc.) cannot be combined.

1. Select the alphabet characters.

2. Select the font.

3. Enter the characters.
   - If a character is pressed by mistake, press DELETE.
   - **Example:** Welcome
     - Switch between uppercase/lowercase
     - Switch among large/medium/small sizes
Selecting an embroidery pattern

There are total of 136 embroidery patterns, such as fruits and animals, stored in the machine's memory.

70 Embroidery patterns

66 Embroidery patterns

Memo

The characters you entered can be stored for later use. For details, refer to “Storing patterns” (page 158).

Memo

Refer to “Embroidery Pattern Color Change Table” in the Quick reference guide for samples of completed patterns and the thread used.

1 Select the type of the embroidery pattern.

The pattern selection screen is displayed.

2 Select the pattern.

Switch the screen using (Previous page key) and (Next page key).

• When is pressed, the display of patterns moves backward/forward 10 patterns.

• When a pattern is selected, it can be embroidered.
Selecting a frame pattern

10 shapes, such as squares and circles, can be combined with 12 stitch types.

**Memo**

- Refer to "Frame patterns" in the Quick reference guide for frame pattern shapes and stitches.

1. Press the frame pattern.
   - The frame shape selection screen is displayed.

2. Select the frame shape.
   - Switch the screen using ← (Previous page key) → (Next page key), and select from the ten types.
   - The stitch selection screen is displayed.

3. Select the stitch.
   - Switch the screen using ← (Previous page key) → (Next page key), and select from the 12 stitches.
   - When a stitch is selected, it can be embroidered.
Using an embroidery card

If an embroidery card is used, you can embroider patterns other than the patterns stored in the sewing machine. There are various cards with different themes.

Note
- Always turn off the sewing machine to insert and remove embroidery cards.
- Insert the embroidery card into the embroidery card slot, facing it in the right direction.
- Do not put anything other than an embroidery card in the embroidery card slot.
- When embroidery cards are not in use, keep them in their storage cases.
- Use only embroidery cards manufactured for this machine. Using unauthorized cards may cause your machine to operate incorrectly.
- Embroidery cards purchased in foreign countries may not work with your machine.

1. Turn off the sewing machine.

2. Insert the embroidery card in the embroidery card slot on the right side of the sewing machine.
   Face the arrow on the embroidery card toward you, and insert it in the direction of the arrow.

3. Turn on the sewing machine.

4. Press the embroidery card on the screen.
   The selection screen for the patterns stored in the card is displayed.

5. Select a pattern.
   The operation is the same as in "Selecting Embroidery Patterns" (page 145).
Embroidering

After the preparations are done, you can try embroidering. This section describes the steps for embroidering and appliquéing.

**Embroidering a pattern**

Embroidery patterns are embroidered with a change of thread after each color.

1. **Prepare embroidery thread of the color shown on the screen.**

   ![Embroidery Frame Image]

   - Embroidery frames that can be used for embroidering
   - Current color step/Number of colors in design
   - Current name of color
   - Current color part
   - Next color part

   - The thread color number set displayed for the thread colors can be changed. Press (Settings key), and then change the setting in the settings screen. For details, refer to "LCD (liquid crystal display) operation" (page 146).

2. **Set the embroidery thread, and thread the needle.**

   - Refer to "Threading the upper thread" (page 29) and "Threading the needle" (page 32).

3. **Pass the thread through the embroidery foot hole, and hold it lightly in your left hand. Give the thread a little slack.**

   ![Embroidery Foot Image]

   **CAUTION**

   - If the thread is pulled too tight, the needle may break or bend.
   - Do not let hands or objects hit the carriage while sewing. The pattern may misalign.
4 Lower the presser foot lever.

5 Press [Start/stop button].

6 After progressing 5-6 stitches, press [Start/stop button] to stop the machine.

7 Use scissors to cut the thread at the beginning of the stitching.
   Cut the thread at the edge of the stitching.

8 Press [Start/stop button] again.
   ▶ The embroidery begins again.
   ▶ Stitching stops automatically with reinforcement after one color has been completed. When automatic thread cutting is set, the thread is cut.

9 Set up embroidery thread for the next color, and repeat steps 1 through 8.

10 Cut the excess thread.
   ▶ When the last color is sewn, “Finished sewing.” will appear on the display. Press [OK], and the display will return to the initial screen.

Memo

- For the automatic cutting setting, refer to “LCD (liquid crystal display) operation” (page 146).
Appliquéing

Prepare the base fabric and the appliqué fabric (appliqué piece).

1. Select an appliqué pattern.

2. When "APPLIQUE MATERIAL" is displayed on the screen, apply iron-on stabilizer to the back of the appliqué piece fabric, and stretch it on the embroidery frame.

3. Lower the presser foot lever, and press (Start/stop button).
   - The cut-out for the appliqué piece is sewn, and the sewing machine stops.

4. Remove the fabric from the embroidery frame, and cut it out along the cut-out line
   - Cut carefully along the stitching and remove the thread.
   - If it is not cut right on the stitching, it will not be finished neatly.

5. Stretch the base fabric on the embroidery frame.

6. Set up the thread for appliquéing.

7. Lower the presser foot lever, and press (Start/stop button).
   - The position for the appliqué is stitched, and the sewing machine stops.

8. Apply a thin layer of fabric glue or spray adhesive to the back of the appliqué piece, and attach it in the appliqué position.

   ![Diagram](image-url)

1. Appliqué position
2. Base fabric

"APPLIQUE" will be displayed on the screen.

- "APPLIQUE POSITION" will be displayed on the screen.

   ![Diagram](image-url)

1. Cut-out line
2. Appliqué piece fabric

   ![Diagram](image-url)
9 Lower the presser foot lever, and press (Start/stop button).

**Note**
- When "APPLIQUE MATERIAL", "APPLIQUE POSITION" and "APPLIQUE" are displayed, a specific color thread does not appear. Use a proper color thread to match the appliqué piece.

10 Follow the instructions on the screen, and change thread colors as you sew.
Editing and Saving Patterns

This section describes ways to edit, adjust, reposition and memorize patterns.

Adjusting the layout

The pattern is normally positioned in the center of the embroidery frame. You can check the layout before starting embroidery and change the position and the size.

**Memo**

- Keys that appear surrounded with a dotted line cannot be used.

1. **After selecting the embroidery pattern, press **JUST**.**
   - The sewing screen is displayed.

2. **Press **JUST**.**
   - The layout LCD is displayed.

3. **Check and adjust the layout.**

   ![Diagram of layout control keys]

   - **Embroidery frame size**
     - These flash if the pattern was resized, the layout was adjusted, or the recommended embroidery frame size was changed. Embroidery frame icons that appear in gray cannot be used.

   - **Size key**
     - Increases/decreases the size of the pattern. Press **JUST** to return to the previous screen.

   - **Change position keys**
     - Moves the embroidery position up, down, left and right.
     - Return to center position (when the pattern was moved with the change position key)

- If you make a note of the values in the lower part of screen when you change the size and position, you can sew with the same size and layout even if you have to turn the power back on in the middle of your work.
**Layout key**
Press this key to move to rotation screen.

**Rotation key**
Rotates the pattern one degree, 10 degrees or 90 degrees at a time.

- Press ✕ (Back key) to return to the previous screen.

- **Starting point key**
  Moves the needle start position to align the needle with the pattern position.
  - Press ✕ to return to the previous screen.

- **Horizontal mirror image key**
  Mirrors the pattern left and right.

---

**CAUTION**

- Never lower the needle when the embroidery frame is moving. The needle could be broken or bent.
- When you have revised the pattern, check the display of available embroidery frames and use an appropriate frame. If you use an embroidery frame not displayed as available for use, the presser foot may strike the frame and possibly cause injury.
Memo

- When the power is turned off, the layout returns to the original setting.
- You can also check the pattern size and distance from the center by pressing (after beginning embroidering).

Storing patterns

The embroidery patterns and the alphabet characters you have customized can be stored in the sewing machine’s memory. Since the stored patterns will not be erased when the power is turned off, you can always recall them for embroidery. This is convenient for storing names and the like. You can store up to 12 patterns or 512 KB of data.

■ Storing a pattern

After selecting the pattern to be stored, press (Memory key).

After the pattern is stored, the initial screen appears again.
- Do not turn off the sewing machine while the pattern is being stored, otherwise the pattern data may be lost.

■ Recalling a pattern

Press (Recall key).

The stored patterns are displayed.
Select the pattern you wish to recall.
Switch screens using < (Previous page key) and > (Next page key).

Press DELETE.
To delete the stored pattern, press DELETE.

Adjusting the thread tension

If embroidery fails, it is difficult to undo the thread and the fabric may be damaged. Before embroidering, use a scrap of the same fabric to check the adjustment of the thread tension, etc.

To adjust the thread tension, press Settings (Settings key).

Press — to weaken the thread tension.
Press + to tighten the thread tension.

Correct thread tension
The thread tension is correct when upper thread is just visible on back of the fabric.

<table>
<thead>
<tr>
<th>A</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>① Right side</td>
<td>② Wrong side</td>
</tr>
</tbody>
</table>

Upper thread is too tight
The lower thread will be visible on the front of the fabric. In this instance, decrease the upper thread tension.

<table>
<thead>
<tr>
<th>A</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>① Right side</td>
<td>② Wrong side</td>
</tr>
</tbody>
</table>

Upper thread is too loose
The upper thread has slack. In this instance, increase the upper thread tension.

<table>
<thead>
<tr>
<th>A</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>① Right side</td>
<td>② Wrong side</td>
</tr>
</tbody>
</table>
Resewing

When the wrong upper thread color has been sewn, it can be resewn with the correct color.

1. Press (Start/stop button) to stop the sewing machine.
2. Press .
3. Press .
4. Press (Back one color) to return to the beginning of the mistaken color. Press one more time to go to previous color.
5. Set up the correct color for the upper thread.
6. Press (Start/stop button) to continue the design.

Thread runs out partway through a design

When the upper thread or the bobbin thread runs out while sewing, the sewing machine stops. Move the needle back about 10 stitches and resume sewing.

1. Set up the upper or bobbin thread.
2. Press .
3. Press .
4. Press (Back one stitch) to move the needle back about 10 stitches. (Forward one stitch) increases the stitch number.
5. Restart the embroidery.
Stopping while embroidering

If the embroidery is stopped before it is complete, check the current needle count before turning off the sewing machine.

Memo
- When the sewing machine is turned off, the embroidery size and layout return to the original setting.

1. Press \( \) (Start/stop button) to stop the sewing machine.

2. Check the current needle count on the screen and make a note of it.

If the needle count is not displayed, press \( \) (Settings key), and then use \( \) to display the following screen.

3. Press \( \) (Embroidery key).

4. Press \( \) (Embroidery key).

5. Turn off the sewing machine.

- Always detach the embroidery unit when you move the sewing machine.

6. Turn on the sewing machine and select the pattern.

7. Press \( \).

Press \( \) (Back key) to return to the embroidery screen.
8 Press \( \text{left button} \).

9 Press \( \text{up button} \) (Forward one color) to move to the beginning of the color you want to embroider.

10 Press \( \text{right button} \) (Forward one stitch) to increase the needle count.
If \( \text{right button} \) is pressed continuously, it moves forward 1 \( \rightarrow \) 9 \( \rightarrow \) 30 stitches.

Move forward to about 10 stitches before the total number of stitches confirmed in 2.

11 Restart the embroidery.
APPENDIX

The various maintenance and troubleshooting procedures are described in this chapter.

Care and Maintenance

Simple sewing machine maintenance operations are described below.

Cleaning the machine surface

If the surface of the machine is dirty, lightly soak a cloth in neutral detergent, squeeze it out firmly, and then wipe the surface of the machine. After cleaning it once with a damp cloth, wipe it again with a dry cloth.

CAUTION

- Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.

Cleaning the race

Sewing performance will suffer if dust collects in the bobbin case, therefore, it should be cleaned periodically.

1. Turn off the sewing machine.

2. Unplug the power cord from the power supply jack on the right side of the sewing machine.

CAUTION

- Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.

3. Remove the flat bed attachment or the embroidery unit if either is attached.

4. Grasp both sides of the needle plate cover, and then slide it toward you.

   Needle plate cover

   The needle plate cover is removed.
5 **Remove the bobbin case.**
Grasp the bobbin case, and then pull it out.

6 **Use the cleaning brush or a vacuum cleaner to remove any lint and dust from the race and its surrounding area.**

7 **Insert the bobbin case so that the projection on the bobbin case aligns with the spring.**

8 **Insert the tabs on the needle plate cover into the needle plate, and then slide the cover back on.**

---

**CAUTION**

- Never use a bobbin case that is scratched, otherwise the upper thread may become tangled, the needle may break or sewing performance may suffer. For a new bobbin case (part code: XC3153-051 (green marking), XC8167-151 (pink marking)), contact your nearest authorized service center.
- Be sure that the bobbin case is correctly installed, otherwise the needle may break.
## Troubleshooting

If the machine stops operating correctly, check the following possible problems before requesting service. If the problem persists, contact your retailer or the nearest authorized service center.

Error messages

When erroneous operations are performed messages and advice on operation will be displayed on the LCD. Follow what is displayed. If you press [CLOSE] or do the operation correctly while the error message is displayed, the message disappears.

**CAUTION**

- Be sure to rethread the machine. If you press (Start/stop button) without rethreading the machine, the thread tension may be wrong or the needle may break and cause injury.

</table>
Adjusting the LCD

If nothing appears in the LCD when the sewing machine is turned on, the brightness of the LCD is either too light or too dark. In such a case, perform the following operation.

1. Turn "OFF" the sewing machine.

2. Turn the power "ON" while pressing any of the display panel buttons.

3. Press \( \downarrow \) or \( \uparrow \).

4. Turn "OFF" the sewing machine, then turn it "ON" again.

Operation beep

Each time a key is pressed you will hear one beep. If an incorrect operation is performed you will hear two or four beeps.

- **If a key is pressed (correct operation)**
  One beep sounds.

- **If an incorrect operation is performed**
  Two or four beeps sound.

- **If the machine locks up, for example, because the thread is tangled**
  The sewing machine beeps for four seconds and the machine automatically stops. Be sure to check for the cause of the error, and correct it before continuing to sew.
Troubleshooting

Canceling the operation beep

When the sewing machine is purchased, it is set to beep each time an operation panel key is pressed. This setting can be changed so that the machine does not beep.

1. Turn on the sewing machine.
   - The LCD comes on.

2. Press (Settings key) in the operation panel.
   - The settings LCD appears.

3. Press (Next page key) three times.

4. Press OFF for the buzzer.
   - The LCD for changing the beep setting appears.

5. Press (Back key).
   - The initial stitch LCD appears again.
