Included Accessories

After opening the box, check that the following accessories are included. If any item is missing or damaged, contact your retailer.

Accessories

Note
(For U.S.A. only)

- Foot controller: Model N5V
  This foot controller can be used on this machine model SE-270D.
- The screw of the presser foot holder is available through your authorized dealer.
  (Part code: XA4813-051)

*75/11 2 needles
90/14 2 needles
90/14 2 needles: Ball point needle (gold colored)
The names of the various parts of the sewing machine and their functions are described below. Before using the sewing machine, carefully read these descriptions to learn the names of the machine parts.

**Front view**

1. **Thread cassette compartment cover**
2. **Thread cassette compartment**
   Insert a thread cassette into the thread cassette compartment.
3. **Thread cassette eject lever**
   Press this lever to eject the installed thread cassette.
4. **Thread tension dial**
   Use the thread tension dial to adjust the tension of the upper thread.
5. **Thread cutter**
   Pass the threads through the thread cutter to cut them.
6. **Arm**
   Plug in the connector for the embroidery unit.
7. **Embroidery unit connector slot**
   Plug in the connector for the embroidery unit.
8. **Flap**
   Use the flap to create a table. When the sewing machine is not being used, store the machine with the flap folded up. Remove the flap to sew cylindrical pieces such as sleeve cuffs.
9. **Sliding leg**
   Pull out the sliding leg during free-arm sewing.
10. **Operation buttons**
    Use the operation buttons to start the sewing machine and raise and lower the needle. (page Cover D)
11. **Operation panel**
    Select a stitch from those that appear in the operation panel. (page Cover E)
12. **Bobbin winder**
    Use the bobbin winder when winding the bobbin.
13. **Bobbin thread spool pin**
    Place the spool of thread for the bobbin onto this spool pin in order to wind the bobbin.
14. **Bobbin storage compartment**
    Store the bobbins designed specifically for this sewing machine in this compartment.
15. **Bobbin winder cover**
    Open this cover when winding the bobbin.
16. **Thread guide for bobbin winding**
    Pass the thread around this thread guide when winding the bobbin thread.
Needle and presser foot section

1. **Buttonhole lever**
   Lower the buttonhole lever when sewing buttonholes and bar tacks.

2. **Needle bar thread hooks**
   Pass the upper thread through the needle bar thread hooks.

3. **Needle plate**
   The needle plate is marked with guides for sewing straight seams.

4. **Bobbin cover/Shuttle**
   Remove the bobbin cover, and then insert the bobbin into the shuttle.

5. **Feed dogs**
   The feed dogs feed the fabric in the sewing direction.

6. **Presser foot**
   The presser foot applies pressure consistently on the fabric as the sewing takes place. Attach the appropriate presser foot for the selected stitching.

7. **Presser foot holder**
   The presser foot is installed onto the presser foot holder.

Right-side/rear view

1. **Handle**
   Carry the sewing machine by its handle when transporting the machine.

2. **Balance wheel**
   Turn the balance wheel toward you to raise and lower the needle to sew one stitch.

3. **Embroidery card slot**
   Insert the embroidery card.

4. **Main power switch**
   Use the main power switch to turn the sewing machine on and off.

5. **Power supply jack**
   Insert the plug on the power supply cord into the power supply jack.

6. **Foot controller jack**
   Insert the plug on the end of the foot controller cable into the foot controller jack.

7. **Air vent**
   The air vent allows the air surrounding the motor to be exchanged. Do not cover the air vent while the sewing machine is being used.

8. **Feed dog position switch**
   Use the feed dog position switch to lower the feed dogs.

---

**Memo**

- Refer to Cover B, C, D or E pages while you are learning to use your machine.
Operation buttons

The operation buttons help you to easily perform various basic sewing machine operations.

1. **Thread cassette indicator**
The indicator lights up or goes off depending on the condition of the sewing machine.

- **Green:** A thread cassette can be inserted.
- **Red:** A thread cassette cannot be inserted.
- **Off:** The sewing machine has been turned off or a thread cassette is already inserted.

2. **Thread cutter button**
Press the thread cutter button after sewing is stopped to cut both the upper and the bobbin threads. For details, refer to "Cutting the thread" (page 50).

3. **Needle position button**
Press the needle position button to raise or lower the needle. Pressing the button twice sews one stitch.

4. **Start/stop button**
Press the start/stop button to start or stop sewing. The machine sews at a slow speed at the beginning of sewing while the button is depressed. When sewing is stopped, the needle is lowered in the fabric. For details, refer to "Starting to sew" (page 47).

5. **Presser foot lever**
Raise and lower the presser foot lever to raise and lower the presser foot.

6. **Reverse/reinforcement stitch button**
Press the reverse/reinforcement stitch button to sew reverse stitches or reinforcement stitches. Reverse stitches are sewn by keeping the button pressed down to sew in the opposite direction. Reinforcement stitches are sewn by sewing 3 to 5 stitches on top of each other. For details, refer to "Securing the stitching" (page 49).

7. **Sewing speed controller**
Slide the sewing speed controller to adjust the sewing speed.

---

**CAUTION**

- Do not press the thread cutter button after the threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.

---

**Note**

- Do not press the thread cutter button if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.
- When cutting thread thicker than #30, nylon thread or other special threads, use the thread cutter on the side of the machine. For details, refer to "Cutting the thread" (page 50).
The front operation panel has an LCD (liquid crystal display) and operation keys.

1. **LCD (liquid crystal display) (touch panel)**
   Selected pattern settings and messages are displayed. Touch the keys displayed on the LCD to perform operations. For details, refer to "LCD (liquid crystal display) operation" (page 12).

2. **Back key**
   Press to return to the previous LCD display.

3. **Previous page key**
   Displays the previous screen when there are items that are not displayed on the LCD.

4. **Next page key**
   Displays the next screen when there are items that are not displayed on the LCD.

5. **Embroidery key**
   When it is in embroidery, press to return to the initial embroidery screen.

6. **Settings key**
   Press to set the needle stop position, the buzzer sound, and more.

7. **Memory key**
   Press to enter character embroidery into the sewing machine memory.

8. **Sewing machine help key**
   Press to get help on using the sewing machine. Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement.
Thank you for purchasing this sewing machine. Before using this sewing machine, carefully read the "Important Safety Instructions" (page 5), and then study this manual for the correct operation of the various functions. In addition, after you have finished reading this manual, store it where it can quickly be accessed for future reference.

**Sewing Machine Features**

1. **Thread cassette**
   Easily thread the upper thread by loading a spool of thread into the thread cassette. Then, simply insert the thread cassette into the compartment to thread the needle. (page 22)

2. **Simple bobbin-winding**
   The bobbin can quickly and easily be wound with thread. (page 16)

3. **Built-in stitches**
   You can select from the built-in stitches available, including utility stitches and decorative stitches. (page 64)

4. **One-touch lower threading**
   You can start sewing without pulling up the bobbin thread. (page 19)

5. **Automatic thread cutting**
   The thread can be cut automatically after sewing. (page 57)

6. **Embroidery**
   You can embroider built-in embroidery patterns, characters, framed decorations, and designs from optional embroidery cards. (page 111)

Important Safety Instructions

When using this machine, basic safety precautions should always be taken, including the following:

Read all instructions before using.

**DANGER** - To reduce the risk of electric shock:

1. The machine should never be left unattended while plugged in. Always unplug the machine from the electrical outlet immediately after using and before cleaning.

**WARNING** - To reduce the risk of burns, fire, electric shock, or injury to persons:

1. Do not allow this machine to be used as a toy. Close attention is necessary when the machine is used by or near children.
2. Use this machine only for its intended use as described in this manual. Use only accessories recommended by the manufacturer as contained in this manual.
3. Never operate this machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.
4. Never operate the machine with any air openings blocked. Keep ventilation openings of the machine and foot control free from the accumulation of lint, dust, and loose cloth.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
8. To disconnect, turn the main switch to the symbol "O" position which represents off, then remove plug from outlet.
9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
10. Keep fingers away from all moving parts. Special care is required around the machine needle.
11. Always use the proper needle plate. The wrong plate can cause the needle to break.
12. Do not use bent needles.
13. Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
14. Switch the machine to the symbol "O" position when making any adjustments in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, and the like.
15. Always unplug the machine from the electrical outlet when removing covers, lubricating, or when making any other user servicing adjustments mentioned in the instruction manual.
16. This sewing machine is not intended for use by young children or infirm persons without supervision.
17. Young children should be supervised to ensure that they do not play with this machine.
18. If the Light unit is damaged, it must be replaced by authorized dealer.

SAVE THESE INSTRUCTIONS
This machine is intended for household use.
FOR USERS IN THE UK, EIRE, MALTA AND CYPRUS ONLY

If this machine is fitted with a three-pin non-rewireable BS plug then please read the following.

IMPORTANT

If the available socket outlet is not suitable for the plug supplied with this equipment, it should be cut off and an appropriate three-pin plug fitted. With alternative plugs an approved fuse must be fitted in the plug.

NOTE

The plug served from the main lead must be destroyed as a plug with bared flexible cords is hazardous if engaged in a live socket outlet. In the event of replacing the plug fuse, use a fuse approved by ASTA to BS 1362, i.e. carrying the mark, rating as marked on plug. Always replace the fuse cover, never use plugs with the fuse cover omitted.

WARNING

DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER ‘E’, BY THE EARTH SYMBOL OR COLOURED GREEN OR GREEN AND YELLOW.

The wires in this main lead are colored in accordance with the following code:

- Blue Neutral
- Brown Live

As the colors of the wiring in the main lead of this appliance may not correspond with the colored markings identifying the terminals in your plug, proceed as follows.

The wire which is colored blue must be connected to the terminal which is marked with the letter ‘N’ or colored black or blue.

The wire which is colored brown must be connected to the terminal which is marked with the letter ‘L’ or colored red or brown.
CONGRATULATIONS ON CHOOSING OUR MACHINE

Your machine is one of the most advanced computerized household sewing machines. To fully enjoy all the features, we suggest that you study the manual before using the machine.

PLEASE READ BEFORE USING THIS MACHINE

For safe operation
1. Be sure to keep your eye on the needle while sewing. Do not touch the balance wheel, thread take-up lever, needle, or other moving parts.
2. Remember to turn off the power switch and unplug the cord when:
   - Operation is completed
   - Replacing or removing the needle or any other parts
   - A power failure occurs during use
   - Maintaining the machine
   - Leaving the machine unattended
3. Do not store anything on the foot controller.
4. Plug the machine directly into the wall. Do not use extension cords.

For a longer service life
1. When storing this machine, avoid direct sunlight and high humidity locations. Do not use or store the machine near a space heater, iron, halogen lamp, or other hot objects.
2. Use only neutral soaps or detergents to clean the case. Benzene, thinner, and scouring powders can damage the case and machine, and should never be used.
3. Do not drop or hit the machine.
4. Always consult the operation manual when replacing or installing any assemblies, the presser feet, needle, or other parts to assure correct installation.

For repair or adjustment
In the event a malfunction occurs or adjustment is required, first follow the troubleshooting table in the back of the operation manual to inspect and adjust the machine yourself. If the problem persists, please consult your local authorized Brother dealer.

For additional product information and updates, visit our web site at www.brother.com
GETTING READY

The various preparations required before starting to sew are described in this chapter.

Turning the Machine On/Off ................................................................. 10

Sewing Cylindrical Pieces ................................................................. 41
Turning the Machine On/Off

This section explains how to turn the sewing machine on and off.

Power supply precautions

Be sure to observe the following precautions concerning the power supply.

⚠️ WARNING

- Use only regular household electricity for the power source. Using other power sources may result in fire, electric shock, or damage to the machine.
- Turn off the main power and remove the plug in the following circumstances:
  - When you are away from the machine
  - After using the machine
  - When the power fails during use
  - When the machine does not operate correctly due to a bad connection or a disconnection
  - During electrical storms

⚠️ CAUTION

- Do not use extension cords or multi-plug adapters with many other appliances plugged in to them. Fire or electric shock may result.
- Do not touch the plug with wet hands. Electric shock may result.
- When unplugging the machine, always turn off the main power first. Always grasp the plug to remove it from the outlet. Pulling on the cord may damage the cord, or lead to fire or electric shock.
- Do not allow the power cord to be cut, damaged, modified, forcefully bent, pulled, twisted, or bundled. Do not place heavy objects on the cord. Do not subject the cord to heat. These things may damage the cord and cause fire or electric shock. If the cord or plug is damaged, take the machine to your authorized dealer for repairs before continuing use.
- Unplug the power cord if the machine is not to be used for a long period of time. Otherwise a fire may result.
Turning on the machine

Prepare the included power cord.

1. Make sure that the sewing machine is turned off (the main power switch is set to "○"), and then plug the power supply cord into the power supply jack on the right side of the machine.

2. Insert the plug of the power supply cord into a household electrical outlet.

3. Press the right side of the main power switch on the right side of the machine (set it to "||").

   The sewing lamp comes on when the machine is turned on.

4. Fold the flap at the front of the sewing machine down toward you.

Turning off the machine

When you are finished using the sewing machine, turn it off. In addition, before transporting the sewing machine to another location, be sure to turn it off.

1. Make sure that the machine is not sewing.

2. Press the left side of the main power switch on the right side of the machine (set it to "○").

   The sewing lamp goes off when the machine is turned off.

3. Unplug the power supply cord from the electrical outlet.

   Grasp the plug when unplugging the power supply cord.

4. Unplug the power supply cord from the power supply jack.

Note

- If a power outage occurs while the sewing machine is being operated, turn off the sewing machine and unplug the power supply cord. When restarting the sewing machine, follow the necessary procedure to correctly operate the machine.

   (For U.S.A. only)

- This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electrical shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.
LCD (liquid crystal display) operation

Selected stitch, pattern settings and messages are displayed on the LCD (liquid crystal display) on the front of the sewing machine.

Viewing the LCD

When the power is turned on, the LCD comes on, and the following screen is displayed. The LCD display is changed using the keys on the right, and operations performed by directly touching the LCD. If it is difficult to press the buttons on the LCD by hand, you can use the touch pen to operate the LCD display.

Utility stitch selection screen

- Selected stitch
- Presser foot to be used
- Stitches
- Stitch width (mm)
- Stitch length (mm)
- Automatic reverse/reinforcement
- Automatic thread cutting
- Horizontal mirror image key
- Number of stitches in group
- Number of the selected stitch
- Increase value
- Decrease value

Memo

- A different screen is displayed when the embroidery unit is attached.
- Refer to "Error messages" (page 153) for messages displayed on the LCD.
- Depending on the model of sewing machine, an animation may be displayed when the power is turned on. When an animation is displayed, the screen above will be displayed if you touch the LCD with your finger.
## Changing the Machine Settings

Various sewing machine operations and sewing settings can be changed. The stitch or machine attributes that can be set are listed below.

<table>
<thead>
<tr>
<th>Attribute</th>
<th>Icon</th>
<th>Details</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thread color/needle count</td>
<td></td>
<td>You can switch among thread color/needle count when embroidering.</td>
<td>Thread color/Embroidery thread number/Country Embroidery thread number/Needle count/Time to Embroider (after ( \text{TIME} ) is pressed)</td>
</tr>
<tr>
<td>Needle position</td>
<td></td>
<td>Specifies where the needle is positioned when the sewing machine is stopped.</td>
<td>Down ( \text{↓} ) Up</td>
</tr>
<tr>
<td>Twin needle sewing</td>

</tbody>
</table>

1. **Turn on the sewing machine.**

   ![LCD on](image)

   - The LCD comes on.

2. **Press \( \text{Settings key} \) on the display panel.**

   ![Settings screen](image)

   - The settings screen appears.
**GETTING READY**

---

3 Press the item to be set. Switch screens using [Previous page key] and [Next page key].

![Current settings]

- **Thread color index**
  - ON OFF
- **Automatic thread cutting for embroidery**
  - ON OFF
- **No.: XXXXXXXXXXX

4 When settings are complete, press [Back key].

![Completed settings]

- **Name of color**
- **Needle position**
- **Twin needle**

The initial screen appears again.

**Note**

- The "Thread color index" is the color number display used when embroidery cards made by "PE-Design" are used.
- The "NO." is the number for the sewing machine.
- Settings that are changed are not lost when the power is turned off.

---

- The items shown in reverse highlighting are the settings at the time of purchase.

**Example:** Changing the needle stop position

![Example settings]

---

14
Checking machine operating procedures

Displays simple explanations of setting upper thread / bobbin winding / setting bobbin thread / needle replacement / embroidery unit attachment / embroidery frame attachment / embroidery foot attachment / presser foot replacement on the LCD.

1 Turn on the sewing machine.

The LCD comes on.

2 Press \( \text{Sewing machine help key} \) (Sewing machine help key) on the display panel.

The sewing machine help screen appears.

3 Press the item to be displayed.

Threading the upper thread
Winding the bobbin
Installing the bobbin
Needle replacement
Embroidery unit attachment
Embroidery frame attachment
Embroidery foot attachment
Replacing the presser foot

The first screen describing the procedure for the selected topic appears.

4 Press \( \text{Next page key} \) (Next page key) to switch to the next page.

If you press \( \text{Previous page key} \) (Previous page key), you return to the previous page.

Example: Upper threading

5 After you finish looking, press \( \text{Back key} \) (Back key) two times.

The initial stitch screen appears again.

Note

- For details on each topic, refer to the corresponding page in this Operation Manual.
Winding/Installing the Bobbin

This section describes how to wind the thread onto the bobbin, and then insert the bobbin thread.

**Bobbin precautions**

Be sure to observe the following precautions concerning the bobbin.

**CAUTION**

- Only use the Bobbin (part code: SA156, SFB:XA5539-151) designed specifically for this sewing machine. Use of any other bobbin may result in injuries or damage to the machine.
- The included bobbin was designed specifically for this sewing machine. If bobbins from older models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB:XA5539-151).
- Please use a transparent bobbin.

**Winding the bobbin**

Wind the thread around the bobbin to prepare the bobbin thread.

1. Turn on the sewing machine.

2. Open the bobbin winder cover at the top on the right side of the sewing machine. Raise until it stops with a click.

3. Swing up the bobbin thread spool pin. Move the bobbin thread spool pin up as far as possible.
1. Place the bobbin on the bobbin winder shaft so that the spring on the shaft fits into the notch in the bobbin.

2. Slide the bobbin winder shaft to the right.

3. Place the spool of thread for the bobbin onto the bobbin thread spool pin.

4. Use the special Brother embroidery bobbin thread when embroidering.

5. Slide the spool cap onto the bobbin thread spool pin.

   - With the rounded side of the spool cap positioned toward the left, slide the spool cap onto the bobbin thread spool pin as far as possible until the right side of the spool touches the right end of the bobbin thread spool pin.

   - Two spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.

   - Note: If a spool of thread 12 mm (1/2 inch) in diameter and 75 mm (3 inch) high is inserted onto the bobbin thread spool pin, use the special spool cap.
Getting Ready

**Memo**
- When using thread that winds off quickly, such as transparent nylon thread or metallic thread, place the spool net over the spool before placing the spool of thread onto the spool pin. If the spool net is too long, fold it to fit the size of the spool.

![Diagram of spool net, spool, spool pin, and spool cap]

- ① Spool net
- ② Spool
- ③ Spool pin
- ④ Spool cap

**Pull out some thread, and then thread the thread guide for bobbin winding.**
Be sure that the thread is fully in the two thread guides for bobbin winding.

![Diagram of thread guide for bobbin winding and two slits]

- ① Thread guide for bobbin winding
- ② Two slits

**Wind the thread that was pulled out onto the bobbin.**
Wind the thread that was pulled clockwise five or six times without any slack.

![Diagram of bobbin winder seat with slit and built-in cutter]

- ① Slit in bobbin winder seat (with built-in cutter)
- The thread is cut to a suitable length.

**CAUTION**
- Be sure to cut the thread as described. If the bobbin is wound without cutting the thread using the cutter built into the slit in the bobbin winder seat, the thread may become tangled in the bobbin or the needle may bend or break when the bobbin thread starts to run out.

**Pull the thread to the right and pass it through the slit in the bobbin winder seat.**

![Diagram showing pulling the thread to the right and passing it through the slit]

**Slide the sewing speed controller to the right (so that the speed will be fast).**

![Diagram showing sewing speed controller]

- ① Sewing speed controller

**Press (Start/stop button) once.**

![Diagram showing start/stop button]

- ① Start/stop button

- If it does not start when the start/stop button is pressed, an animation is displayed on the LCD. Press the start/stop button after touching the LCD.
The bobbin starts spinning and winding the thread, and "Winding bobbin thread..." appears on the LCD.

When winding is complete, the bobbin stops spinning or spins freely.

When the bobbin either stops spinning or spins freely, press \( \text{(Start/stop button)} \).

The sewing machine stops, and the "Winding bobbin thread..." display disappears from the LCD.

Use scissors to cut the end of the thread wound around the bobbin.

Slide the bobbin winder shaft to the left.

Remove the bobbin from the shaft.

Remove the spool cap and spool.

Swing down the bobbin thread spool pin, close the bobbin winder cover, and then slide the sewing speed controller back to its original position.

Memo

- When the sewing machine is started or the balance wheel is turned after winding the bobbin, the machine will make a clicking sound; this is not a malfunction.

Installing the bobbin

Install the bobbin wound with thread.

**CAUTION**

- Use a bobbin that has been correctly wound with thread, otherwise the needle may break or the thread tension will be incorrect.

- The bobbin was designed specifically for this sewing machine. If bobbins from older models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: SA156, SFB:XA5539-151).

- Be careful not to drop the bobbin.
4 Insert the bobbin into the shuttle so that the thread unrolls to the left.

- Be sure to insert the bobbin correctly.

**CAUTION**
- Be sure to hold down the bobbin with your finger and unroll the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.

**Memo**
- The order that the bobbin thread should be passed through the shuttle is indicated by marks around the shuttle. Be sure to thread the machine as indicated.

5 Lightly hold down the bobbin with your right hand, and then guide the thread as shown with your left hand.

6 Pass the thread through the slot as shown, and then pull the thread out toward the front.

- Cutter
  - The cutter cuts the thread.
- Make sure that the thread is correctly inserted through the tension-adjusting spring of the shuttle. If it is not inserted, re-insert the thread.

7 Reattach the bobbin cover.
- Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.

- The bobbin threading is finished.

Next, thread the upper thread. Continue with the procedure in "Upper Threading" (on the next page).

**Memo**
- You can begin sewing without pulling up the bobbin thread. If you wish to pull up the bobbin thread before starting to sew, pull up the thread according to the procedure in "Pulling up the bobbin thread" (page 31).
Upper Threading

In this section, the procedures for positioning the spool for the upper thread and threading the needle are described.

**CAUTION**

- When threading the upper thread, carefully follow the instructions. If the upper threading is not correct, the thread may become tangled or the needle may bend or break.

**About the spool of thread**

With this sewing machine, a spool of thread can be loaded into the thread cassette, and then the thread cassette can be threaded. Information about the spools of thread is described below.

- **Spools that can be loaded into the thread cassette**
  Normally, a spool of thread is loaded into the thread cassette and used. The spools that can be loaded must have a diameter smaller than the orange spool cap and a height shorter than the mark on the cover of the thread cassette.

- **Spools that cannot be loaded into the thread cassette**
  When using spools that cannot be loaded into the thread cassette, use the extra spool pin.

When using the extra spool pin, attach either the large or small white spool cap, depending on the size of the spool. Use the spool cap with a diameter that is slightly larger than the diameter of the spool.

---

**Memo**

- For details on using the extra spool pin, refer to "Using the extra spool pin" (page 27).
- When using a spool of cross-wound thread, install the small white spool cap with some space between the cap and the spool.
**CAUTION**

- Two spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the needle may break.

---

**Loading the spool into the thread cassette**

Load the spool of thread into the thread cassette to prepare the upper thread.

---

**Memo**

- The order for threading the thread cassette is indicated on the thread cassette. Also check the markings on the thread cassette while threading it.

---

1. **Turn on the sewing machine.**

2. **Open the thread cassette compartment cover at the top on the left side of the machine.**
Push the thread cassette eject lever on the left side of the machine toward the back.

- The thread cassette is raised.
- If the sewing machine is turned off, the thread cassette will not be ejected correctly.

Remove the thread cassette.

Pull the cover of the thread cassette out toward you, and then pull off the spool cap that is inserted onto the spool pin.

Place the spool for the upper thread onto the spool pin.
Slide the spool onto the spool pin so that the thread unwinds from the left, as seen from the top.

Slide the spool cap onto the spool pin.
With the rounded side of the spool cap positioned toward the top, slide the spool cap onto the spool pin as far as possible until the down side of the spool touches the down end of the spool pin.

- Only the orange spool cap should be placed on the spool pin in the thread cassette.
CAUTION

- If the spool or the spool cap is not positioned correctly, the thread may become tangled around the spool pin or the needle may break.

While holding the end of the thread with your right hand and the thread cassette with your left hand, close the cover.
Close until it clicks.

Pass the thread through the slit in the top of the thread cassette.
Follow arrow 2 indicated on the thread cassette.

Pull the thread to the left and pass it through the slit along the left side of the thread cassette.
Follow arrow 3 indicated on the thread cassette.

- When using special thread such as metallic thread, use the thumb of your left hand to lightly press down on the area indicated in the illustration to create an opening that allows for easier threading.

Pass the thread along the bottom of the thread cassette.
Follow arrow 4 indicated on the thread cassette.

Pass the thread through the notch in the lower-right corner of the thread cassette, and then pull the thread to the left.
Follow arrow 5 indicated on the thread cassette.
Threading the needle

In this section, the procedures for installing the thread cassette and threading the needle are described. The needle threader is used to thread the needle at the same time that the thread cassette is inserted.

**Memo**
- The needle threader can be used with sewing machine needles 75/11 through 100/16.
- Thread with a thickness of 130/20 or thicker cannot be used with the needle threader.
- The needle threader cannot be used with the wing needle or the twin needle.
- If the needle threader cannot be used, refer to "Thread the needle manually (without using the needle threader)" (page 28).

1. **Check that the thread cassette indicator is lit up in green.**

   ![Diagram](image)

   - Thread cassette indicator
   - Needle position button

   - If the thread cassette indicator is lit up in red, the needle has not been raised to the correct position. Press (Needle position button) once to raise the needle.

   ![Diagram](image)

   - Needle position button

   - If the needle is not raised to the correct position, the needle cannot be threaded with the needle threader. Be sure to check that the thread cassette indicator is lit up in green before inserting the thread cassette.

---

**Note**
- Be sure the thread is cut as described above, otherwise the needle threader cannot be used to thread the needle.

---

**13** Pull the thread under the disc at the front in the lower-left corner and around to the right, and then the thread will be cut with the cutter. Follow arrow 6 indicated on the thread cassette.

- Disc
- Cutter

- The spool of thread is now loaded in the thread cassette.
2 Insert the thread cassette into the thread cassette compartment.
Slowly press down on the thread cassette until it clicks into place.

- At the same time that the thread cassette is inserted, the needle is threaded.
- The thread cassette indicator goes off.
- If any of the following operations are performed, the needle may not be threaded or the machine may be damaged.

- If the needle could not be threaded or the thread was not passed through the needle bar thread hook, refer to "Loading the spool into the thread cassette" (page 22) and perform the procedure again starting from step 2.
- The thread cassette can be inserted whenever the presser foot lever is raised or lowered. However, when the side cutter is attached, be sure to lower the presser foot lever before installing the thread cassette. For more details, refer to "Sewing overcasting stitches using the optional side cutter" (page 71).

CAUTION
- The needle threader will automatically thread the needle when the thread cassette is pushed down. Be sure to keep your hands and other items away from the needle, otherwise injuries may occur.
3 Carefully pull on the loop of thread passed through the eye of the needle to pull out the end of the thread.

- When embroidering, go to 5.

4 Pass the thread through the presser foot, and then pull out about 10-15 cm (3/8-5/8 inch) of thread toward the rear of the machine.

10-15 cm (3/8-5/8 inch)

- The upper threading is finished.

5 Close the thread cassette compartment cover.

Now that the upper threading and the lower threading are finished, you are ready to begin sewing.

- When embroidering, go to 5 in "Embroidering a pattern" (page 134).

![Image of upper threading process]

**Note**

- When inserting the thread cassette into its compartment, slowly press it down.
- If the sewing machine could not be threaded, try performing the procedure again starting from loading the spool of thread into the thread cassette.

---

**Using the extra spool pin**

When using spools with a size that cannot be loaded into the thread cassette, use the extra spool pin.

1 Place the spool of thread onto the extra spool pin.

![Image of extra spool pin]

1 Extra spool pin

2 Slide the spool cap for the size of the spool onto the spool pin.

![Image of spool cap]

1 Spool cap

- For more details, refer to "About the spool of thread" (page 21).

3 Insert the tabs on the extra spool pin into the holes on the top of the thread cassette.

![Image of inserting spool pin tabs]
Thread the thread cassette with the thread from the spool on the extra spool pin.

- For more details, refer to "Loading the spool into the thread cassette" (page 22).

Check that the thread cassette indicator is lit up in green, and insert the thread cassette (with the extra spool pin attached) into the thread cassette compartment.

Use both hands to press down on both sides of the extra spool pin.

➤ At the same time that the thread cassette is inserted, the needle is threaded.

➤ The extra spool pin is now installed.

---

**Thread the needle manually (without using the needle threader)**

When using special thread, thread with a thickness of 130/20 or thicker, the wing needle or the twin needle which cannot be used with the needle threader, thread the needle as described below.

1. **Remove the needle.**
   - Refer to "Replacing the needle" (page 35).
   - When using the wing needle, the twin needle or thread that cannot be used with the needle threader, be sure to remove the needle, otherwise the machine may be damaged.

2. **Check that the thread cassette indicator is lit up in green, and then insert the thread cassette into the thread cassette compartment.**
   - For details, refer to 1 through 2 (page 25).
   - Pass the thread through the needle bar thread hooks.

3. **Replace the needle.**
   - Refer to "Replacing the needle" (page 35).

4. **Pass the thread through the eye of the needle from front to back.**
Using the twin needle

Using the twin needle, you can sew two parallel lines of the same stitch with two different colors. Both upper threads should have the same thickness and quality. Be sure to use the twin needle and the extra spool pin. For details on the stitches that can be sewn with the twin needle, refer to "Stitch Settings" (page 64).

**CAUTION**

- Only use the twin needle (Part code: X59296-051). Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Do not try installing the twin needle while the thread cassette is not installed, otherwise the needle may break or damage to the machine may result.

1. Remove the needle.
   - For details, refer to "Replacing the needle" (page 35).

2. Load the spool for the first thread color into the thread cassette.
   Thread the thread cassette up to arrow 2, indicated on the thread cassette.

   • For more details, refer to steps 1 through 4 in "Using the extra spool pin" (page 27).

3. Load the spool for the second thread color onto the extra spool pin.

4. Use the two threads to thread the thread cassette, and then cut the threads.
   Thread the thread cassette along arrows 3 through 6, indicated on the thread cassette.

   • For more details, refer to steps 10 through 13 in "Loading the spool into the thread cassette" (page 22).
Insert the thread cassette (with the extra spool pin attached) into the thread cassette compartment.

- For more details, refer to step 6 in "Using the extra spool pin" (page 27).

  - Pass both threads through the needle bar thread hooks.
  - If the thread cassette is inserted with the twin needle attached, the sewing machine may be damaged.

Install the twin needle.

- For details, refer to "Replacing the needle" (page 35).

Manually thread the left needle with the thread for the left side of the stitch.

- For details, refer to "Thread the needle manually (without using the needle threader)" (page 28).

Remove the thread for the right side of the stitch from only the lower hook of the needle bar thread hooks, and then use it to thread the right needle.

Attach zigzag foot "J".

- For details on changing the presser foot, refer to "Replacing the Presser Foot" (page 38).

CAUTION

- When using the twin needle, be sure to attach zigzag foot "J", otherwise the needle may break or the machine may be damaged.

Turn on the sewing machine and select a stitch.

- For stitch selection see "Selecting stitching" (page 45).
- See "Stitch Settings" (page 64) for stitches that use a twin needle.

CAUTION

- When using the twin needle, be sure to select an appropriate stitch, otherwise the needle may break or the machine may be damaged.

Press 📋 (Settings key) in the operation panel.

- The settings screen appears.

Press 📋.

- 📋 displays in reverse highlight.
- If pressed again, it returns to 📋.
- The twin needle can now be used.
Press  (Back key).
  The initial screen appears again, and  appears.

**CAUTION**

• When using the twin needle, be sure to select the twin needle setting, otherwise the needle may break or the machine may be damaged.

Start sewing.
  • For details on starting to sew, refer to "Starting to sew" (page 47).
  
Two lines of stitching are sewn parallel to each other.

**Note**

• When changing the sewing direction, press  (Needle position button) to raise the needle from the fabric, and then raise the presser foot lever and turn the fabric.

**CAUTION**

• Do not try turning the fabric with the twin needle left down in the fabric, otherwise the needle may break or the machine may be damaged.

• When the twin needle mode is selected ( ), do not turn the balance wheel after removing the thread cassette. Otherwise the needle may break or the machine may be damaged.

---

**Pulling up the bobbin thread**

When making gathers or before free-motion quilting, first pull up the bobbin thread as described below.

1. Insert the bobbin into the shuttle.
   • Refer to steps 1 through 5 of "Installing the bobbin" (page 19).

2. Pass the bobbin thread through the slot.
   Do not cut the thread with the cutter.

3. While lightly holding the upper thread with your left hand, press  (Needle position button) twice to raise the needle.

4. Carefully pull the upper thread upward to pull out the end of the bobbin thread.

1 Needle position button

  The bobbin thread is looped around the upper thread and can be pulled up.
GETTING READY

5 Pull out about 10-15 cm (4-5 inches) of the bobbin thread under the presser foot toward the rear of the machine.

6 Reattach the bobbin cover.
Insert the tab in the lower-left corner of the bobbin cover, and then lightly press down on the right side.
Replacing the Needle

This section provides information on sewing machine needles.

Needle precautions

Be sure to observe the following precautions concerning the handling of the needle. Failure to observe these precautions is extremely dangerous, for example, if the needle breaks and fragments are dispersed. Be sure to read and carefully follow the instructions below.

CAUTION

- Only use home sewing machine needles. Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
Needle types and their uses

The sewing machine needle that should be used depends on the fabric and thread thickness. Refer to the following table when choosing the thread and needle appropriate for the fabric that you wish to sew.

<table>
<thead>
<tr>
<th>Fabric Type/Application</th>
<th>Thread Type</th>
<th>Size of Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Medium weight fabrics</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Broadcloth</td>
<td>Cotton thread</td>
<td>60–80</td>
</tr>
<tr>
<td>Taffeta</td>
<td>Synthetic thread</td>
<td></td>
</tr>
<tr>
<td>Flannel, Gabardine</td>
<td>Silk thread</td>
<td>50–80</td>
</tr>
<tr>
<td><strong>Thin fabrics</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Lawn</td>
<td>Cotton thread</td>
<td>60–80</td>
</tr>
<tr>
<td>Georgette</td>
<td>Synthetic thread</td>
<td></td>
</tr>
<tr>
<td>Challis, Satin</td>
<td>Silk thread</td>
<td>50–80</td>
</tr>
<tr>
<td><strong>Thick fabrics</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Denim</td>
<td>Cotton thread</td>
<td>30–50</td>
</tr>
<tr>
<td>Corduroy</td>
<td>Synthetic thread</td>
<td>50</td>

<tr>
<td><strong>For top-stitching</strong></td>
<td>Synthetic thread</td>
<td>30</td>
</tr>
<tr>
<td></td>
<td>Silk thread</td>
<td>90/14–100/16</td>
</tr>
</tbody>
</table>

- **Thread and needle number**
  The lower the thread number is, the larger the thread, and the larger the needle number, the larger the needle.

- **Ball point needle (gold colored)**
  To avoid skipped stitches use ball point needles with stretch fabrics.

- **Transparent nylon thread**
  Use a 90/14 to 100/16 needle, regardless of the fabric or thread.

- **Embroidery needles**
  Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 or 100/16 home sewing machine needle.

- A 75/11 needle is already installed when the sewing machine is purchased.

- The appropriate fabric, thread and needle combinations are shown in the table above. If the combination of the fabric, thread and needle is not correct, particularly when sewing thick fabrics (such as denim) with thin needles (such as 65/9 to 75/11), the needle may bend or break. In addition, the stitching may be uneven or puckered or there may be skipped stitches.
Checking the needle

Sewing with a bent needle is extremely dangerous since the needle may break while the machine is being operated. Before using the needle, place the flat side of the needle on a flat surface and check that the distance between the needle and the flat surface is even.

- **Correct needle**
  - Flat side
  - Needle type marking

- **Incorrect needle**
  - If the distance between the needle and the flat surface is not even, the needle is bent. Do not use a bent needle.

Replacing the needle

Replace the needle as described below. Use the screwdriver and a needle that has been determined to be straight according to the instructions in “Checking the needle”.

1. Press (Needle position button) once or twice to raise the needle.

2. Turn off the sewing machine.

3. Lower the presser foot lever.

⚠️ **CAUTION**

- Before replacing the needle, be sure to turn off the sewing machine, otherwise injuries may occur if the start/stop button is accidentally pressed and the machine starts sewing.
Hold the needle with your left hand, and then use a screwdriver to turn the needle clamp screw counterclockwise to remove the needle.

- Do not apply a strong force when loosening or tightening the needle clamp screw, otherwise certain parts of the sewing machine may be damaged.

With the flat side of the needle toward the rear of the machine, insert the needle until it touches the needle stopper.

While holding the needle with your left hand, use the screwdriver to tighten the needle clamp screw.

Install the twin needle in the same way.

---

**CAUTION**

- Be sure to insert the needle until it touches the needle stopper and securely tighten the needle clamp screw with the screwdriver, otherwise the needle may break or damage may result.

**Using the needle-changing tool**

Use the needle-changing tool to replace the needle as described below.

1. Place the needle in the hole in the needle-changing tool.

2. Lift up the needle-changing tool so that the fork hooks onto the needle clamp screw.
3 Using the screwdriver, loosen the needle clamp screw.

4 Lower the needle-changing tool.

5 Insert the new needle into the hole in the needle-changing tool.
   Insert the needle with the flat side of the needle toward the rear of the machine.

6 Lift up the needle-changing tool so that the fork hooks onto the needle clamp screw.

7 Insert the needle until it touches the needle stopper, and then use the screwdriver to tighten the needle clamp screw.

8 Lower the needle-changing tool off of the needle.

Note
- The needle-changing tool can not be used for the twin needle.
Replacing the Presser Foot

The presser foot presses down on the fabric.

Presser foot precautions

Be sure to observe the following precautions concerning the presser feet.

⚠️ CAUTION

● Use the presser foot appropriate for the type of stitch that you wish to sew, otherwise the needle may hit the presser foot, causing the needle to bend or break.
● Only use presser feet designed specifically for this sewing machine. Use of any other presser foot may result in injuries or damage to the machine.

Replacing the presser foot

Replace the presser foot as described below.

1. Press ② (Needle position button) once or twice to raise the needle.

   ① Needle position button

   • If the needle does not move when the needle position button is pressed, an animation is displayed on the LCD. Press the needle position button after touching the LCD.

   ▶ The needle is raised.

2. Turn off the sewing machine.

3. Raise the presser foot lever.

   ① Presser foot lever

   ▶ The presser foot is raised.

4. Press the black button at the back of the presser foot holder.

   ① Black button
   ② Presser foot holder

   ▶ The presser foot holder releases the presser foot.
5 Place a different presser foot below the holder so that the presser foot pin is aligned with the notch in the holder.
Position the presser foot so that the letter indicating the presser foot type (A, G, I, J, M, N or R) is positioned to be read.

![Diagram](image)

1 Presser foot holder
2 Notch
3 Pin

6 Slowly lower the presser foot lever so that the presser foot pin snaps into the notch in the presser foot holder.

![Diagram](image)

1 Presser foot lever

The presser foot is attached.

7 Raise the presser foot lever to check that the presser foot is securely attached.

![Diagram](image)

**Note**
- When a stitch is selected, the icon for the presser foot that should be used appears in the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.

![Stitch Settings](image)

- Buttonhole foot "A"
- Overcasting foot "G"
- Zigzag foot "J"
- Button fitting foot "M"
- Monogramming foot "N"
- Blind stitch foot "R"
- Side cutter "S"
- Embroidery foot "Q"

- For details on the presser foot that should be used with the selected stitch, refer to "Stitch Settings" (page 64).
Removing the presser foot holder

Remove the presser foot holder when cleaning the sewing machine or when installing a presser foot that does not use the presser foot holder, such as the embroidery foot and quilting foot. Use the screwdriver to remove the presser foot holder.

1 Remove the presser foot.
   • For details, refer to "Replacing the presser foot" (page 38).

2 Use the screwdriver to loosen the presser foot holder screw.

   - Screwdriver
   - Presser foot holder
   - Presser foot holder screw

Attaching the presser foot holder

1 Align the presser foot holder with the lower-left side of the presser bar.

   - Screwdriver

   1 Screwdriver
   2 Presser foot holder
   3 Presser foot holder screw

Note

- If the presser foot holder is not correctly installed, the thread tension will be incorrect.
Sewing Cylindrical Pieces

Free-arm sewing makes sewing cylindrical pieces easy.

### Free-arm sewing

Removing the flap allows for free-arm sewing, making it easier to sew cylindrical pieces such as sleeve cuffs and pant legs.

1. Slide the flap off to the left.

   With the flap removed, free-arm sewing is possible.

2. Pull the sliding leg (at the bottom of the machine) out toward you.

   ① Sliding leg
   - During free-arm sewing, be sure to pull out the sliding leg.

3. Slide the part that you wish to sew onto the arm, and then sew from the top.

4. When you are finished with free-arm sewing, push the sliding leg back into position.

5. Then, install the flap back to its original position.
SEWING BASICS

The necessary preparations for sewing are described in this chapter.

Sewing.....................................................................................................................44
Adjusting the Thread Tension..................................................................................52
Adjusting the Stitch Width and Length....................................................................54
Useful Functions......................................................................................................56
Useful Sewing Tips ..................................................................................................59
Sewing

Basic sewing operations are described below.
Before operating the sewing machine, read the following precautions.

⚠️ CAUTION ⚠️

- While the machine is in operation, pay special attention to the needle location. In addition, keep your hands away from all moving parts such as the needle and balance wheel, otherwise injuries may occur.
- Do not pull or push the fabric too hard while sewing, otherwise injuries may occur or the needle may break.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Make sure that the needle does not strike basting pins, otherwise the needle may break or bend.

General sewing procedure

Follow the basic procedures below to sew.

<table>
<thead>

</tbody>
</table>
Selecting stitching

Stitches are selected using LCD operations. There are 67 utility stitches. Right after turning the power on, the straight stitch (left needle position) is selected.

1. **Determine the stitch to be used, and get the matching presser foot ready.**
   - Refer to "Stitch Settings" (page 64).

2. **Attach the presser foot.**
   - The machine comes with zigzag foot "J" attached.
   - For details, refer to "Replacing the presser foot" (page 38).

3. **CAUTION**
   - Use the presser foot appropriate for the stitch. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.

4. **Turn on the sewing machine.**

   - The straight stitch (left needle position) is shown selected in the LCD.

5. **Press the stitch selection.**
   - (Previous page key) displays the previous screen, and (Next page key) displays the next screen.

   ![Example: 11 is selected:](example_image)

   - The stitch is selected, and the stitch number and settings are displayed.

6. **If necessary, specify the setting for automatic reverse/reinforcement stitching and adjust the stitch length, etc.**

   **Memo**
   - Uses of stitches and other stitch selections are explained in "UTILITY STITCHES" (page 63).
   - Automatic reverse/reinforcement stitching and other settings are explained in "Useful Functions" (page 56).

**Note**
- When a stitch is selected, the icon for the presser foot that should be used appears in the screen. For details, refer to "Replacing the Presser Foot" (page 38). Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, turn off the sewing machine, attach the correct presser foot, and then select the desired stitch again.
Positioning the fabric

Be sure that the fabric pieces are sewn in the correct order and that the right and wrong sides of the fabric are aligned correctly.

1. Turn on the sewing machine.

2. Press \( 2 \) (Needle position button) once or twice to raise the needle.

3. Place the fabric under the presser foot.
   - If the seam allowance is positioned on the right side, sewing in a straight line is easier and the extra fabric does not get in the way.

4. While holding the end of the thread and the fabric with your left hand, turn the balance wheel toward you with your right hand to lower the needle to the starting point of the stitching.

5. Lower the presser foot lever.

   The fabric is now positioned to be sewn.
Starting to sew

Once you are ready to start sewing, you can start the sewing machine. The sewing speed can be adjusted using either the sewing speed controller or the foot controller.

**Note**
- When the foot controller is plugged in, the start/stop button cannot be used to start or stop sewing.

**Using the operation button**
Sewing can be started and stopped using the operation button \( \text{(Start/stop button)} \).

1. **Slide the sewing speed controller to the left or right to select the desired sewing speed.**
   Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed controller to the right to sew at a faster speed.

   ![Sewing speed controller](image)

   1. Sewing speed controller

2. **Press \( \text{(Start/stop button)} \) once.**
   - The machine starts sewing.

   ![Start/stop button](image)

   1. Start/stop button

3. **When the end of the stitching is reached, press \( \text{(Start/stop button)} \) once.**
   - The machine stops sewing with the needle down (in the fabric).

4. **When you have finished sewing, press \( \text{(Needle position button)} \).**
   - The needle is raised.

5. **Cut the threads.**
   - For details, refer to "Cutting the thread" (page 50).

**Using the foot controller**
Sewing can be started and stopped using the foot controller.

1. **Turn off the sewing machine.**
   When connecting the foot controller, be sure to turn off the sewing machine in order to prevent the machine from accidentally being started.

2. **Insert the foot controller plug into its jack on the back side of the sewing machine.**

   ![Foot controller jack](image)

   1. Foot controller jack
Note
(For U.S.A. only)
◆ Foot controller: Model N5V
This foot controller can be used on this machine model SE-270D.

3 Turn on the sewing machine.

4 Slide the sewing speed controller to the left or right to select the desired sewing speed.
Slide the sewing speed controller to the left to sew at a slower speed, or slide the speed controller to the right to sew at a faster speed.

5 Once you are ready to start sewing, slowly press down on the foot controller.
Pressing down on the foot controller increases the sewing speed; releasing the pressure on the foot controller decreases the sewing speed.

6 When the end of the stitching is reached, completely release the foot controller.
△ The machine stops sewing with the needle lowered (in the fabric).

7 When you have finished sewing, press  ● (Needle position button).
△ The needle is raised.

8 Cut the threads.
• For details, refer to "Cutting the thread" (page 50).

Memo
◆ When the foot controller is plugged in, the start/stop button cannot be used to start or stop sewing.
◆ When sewing is stopped, the needle remains lowered (in the fabric). The machine can be set so that the needle will stay up when sewing is stopped. For details on setting the machine so that the needle stays up when sewing is stopped, refer to "Changing the Machine Settings" (page 13).

CAUTION
◆ Do not allow thread or dust to accumulate in the foot controller, otherwise a fire or an electric shock may occur.
◆ Do not place objects on the foot controller, otherwise damage to the machine or injuries may occur.
◆ If the machine is not to be used for a long period of time, unplug the foot controller, otherwise a fire or an electric shock may occur.

Slowly press down on the foot controller. Pressing it down hard starts sewing too quickly.
△ The machine starts sewing.
Securing the stitching

When sewing with the straight stitch, for example, at the end of an opening or where seams do not overlap, use reverse stitching or reinforcement stitching to secure the end of the thread.

1 **Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.**

2 **Press \(\text{Start/stop button}\) or press down on the foot controller.**
   
   At this time, if the start/stop button is held pressed, the machine sews at a low speed.

3 **After sewing 3 to 5 stitches, press \(\text{Reverse/reinforcement stitch button}\).**
   
   Keep the reverse/reinforcement stitch button held down until you reach the beginning of the stitching.
   
   • The machine sews at a slow speed when the reverse/reinforcement stitch button is held down.

4 **After sewing back to the beginning of the stitching, release the reverse/reinforcement stitch button.**
   
   • The machine stops sewing.

5 **Press \(\text{Start/stop button}\), or press down on the foot controller.**
   
   • The machine starts sewing in the normal sewing direction.

6 **When the end of the stitching is reached, press \(\text{Reverse/reinforcement stitch button}\).**
   
   Keep the reverse/reinforcement stitch button held down until 3 to 5 reverse stitches are sewn.
   
   • While the reverse/reinforcement stitch button is depressed, reverse stitches are sewn.
After 3 to 5 reverse stitches have been sewn, release (Reverse/reinforcement stitch button).

- The machine stops sewing.

Press (Start/stop button), or press down on the foot controller.
At this time, if the start/stop button is held pressed, the machine sews at a low speed.

- The machine starts sewing in the normal sewing direction.

After sewing to the end of the stitching, the sewing machine stops.
Release the start/stop button or foot controller.

**Sewing stitches**
Reverse stitches are set for the 1 3  and 7 stitches.
When (Reverse/reinforcement stitch button) is pressed with stitches other than these, reinforcement stitches are used. Reinforcement stitches are 3 to 5 stitches sewn on top of each other in one place.

- Reverse stitching
- Reinforcement stitching

**Memo**
- The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. For details, refer to "Automatically sewing reverse/reinforcement stitches" (page 56).

---

**Cutting the thread**

When you have finished sewing, cut the threads.

- **Using the thread cutter button**

  When you wish to finish the stitching, press (Thread cutter button) once.

  1. Thread cutter button
  - The threads are cut and the needle is raised.

  2. Raise the presser foot lever, then remove the fabric.

**CAUTION**

- Do not press the thread cutter button after the threads have already been cut, otherwise the needle may break, the threads may become tangled or damage to the machine may occur.
- Do not press the thread cutter button if there is no fabric under the presser foot or while the machine is sewing, otherwise damage to the machine may occur.
Memo

- The machine can be set so that the threads will be cut when sewing is finished. For details on setting the machine so that the threads are cut automatically, refer to "Automatically cutting the thread" (page 57).

Using the thread cutter

When sewing with thread thicker than #30, nylon or metallic threads, or other special threads, use the thread cutter on the side of the machine to cut the threads.

1. When you wish to finish the stitching and the sewing machine is stopped, press ① (Needle position button) once.

   ① Needle position button

   ▶ The needle is raised.

2. Raise the presser foot lever.

   ① Presser foot lever

3. Pull the fabric to the left side of the machine, and then pass the threads through the thread cutter to cut them.

   ① Thread cutter
Adjusting the Thread Tension

The tensions of the upper thread and of the bobbin thread (thread tension) should be adjusted so that they are equal.

Thread tension

You may need to change the thread tension, depending on the fabric and thread being used.

■ Correct thread tension

The upper thread and the bobbin thread should cross near the center of the fabric. Only the upper thread should be visible from the right side of the fabric, and only the bobbin thread should be visible from the wrong side of the fabric.

■ Upper thread is too tight

If the bobbin thread is visible from the right side of the fabric, the upper thread is too tight.

■ Upper thread is too loose

If the upper thread is visible from the wrong side of the fabric, the upper thread is too loose.

Turn the thread tension dial upward to a higher number to tighten the upper thread.

Turn the thread tension dial downward to a lower number to loosen the upper thread.
Changing the upper thread tension

The tension is changed using the thread tension dial on the left side of the sewing machine.

1. Test the stitching using a scrap of the actual fabric to be used.

2. Referring to the illustration below, turn the thread tension dial on the left side of the sewing machine.
The larger the number is, the greater the upper thread tension.

3. Test it until the thread tension is suitable.

Memo

- Recommended tension setting for normal stitching is 3-4-5 within the shaded area of the upper tension dial.
Adjusting the Stitch Width and Length

The stitch width and length can be adjusted. Normally, when a stitch is selected, the appropriate width and length are automatically selected.

Adjusting the stitch width

The zigzag width can be adjusted on the LCD.

1. Turn on the sewing machine.

The LCD comes on.

2. Select a stitch.

A screen containing settings for the selected stitch appears.

- For details on selecting a stitch, refer to "Selecting stitching" (page 45).
- Immediately after the stitch is selected, the standard settings (highlighted) appear.

3. To make the stitch width narrower, press .
To make the stitch width wider, press +.

The stitch width is changed.

- If the setting is changed, the highlighted value is erased.

Memo

- To reset the stitch width to its standard setting, select the same stitch again or change the setting to the highlighted value.
- If the straight stitch (left needle position or triple stretch stitch) was selected, changing the stitch width changes the needle position. Increasing the width moves the needle to the right; reducing the width moves the needle to the left.
- The sewing machine can be set so that the stitch width can easily be changed with the sewing speed controller. For details, refer to "Satin stitching" (page 97).
- means the setting cannot be adjusted.

CAUTION

- After adjusting the stitch width, slowly turn the balance wheel toward you and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
Adjusting the stitch length

The stitch length can be adjusted on the LCD.

1. Turn on the sewing machine.

   The LCD comes on.

2. Select a stitch.

   A screen containing settings for the selected stitch appears.

   - For details on selecting a stitch, refer to “Selecting stitching” (page 45).
   - Immediately after the stitch is selected, the standard settings (highlighted) appear.

3. To make the stitch length shorter, press —. To make the stitch length longer, press +.

   The stitch length is changed.

   - If the setting is changed, the highlighted value is erased.

Memo

- To reset the stitch length to its standard setting, select the same stitch again or change the setting to the highlighted value.
- ❌ means the setting cannot be adjusted.

CAUTION

- If the stitches are bunched together, increase the stitch length. Continuing to sew with the stitches bunched together may result in the needle bending or breaking.
Useful Functions

Functions useful in improving sewing efficiency are described below.

Automatically sewing reverse/reinforcement stitches

The sewing machine can be set to automatically sew reverse or reinforcement stitches at the beginning and end of the stitching. Whether reverse stitches or reinforcement stitches are sewn depends on the stitch that is selected. For details, refer to "Stitch Settings" (page 64).

1. Turn on the sewing machine.

   - The LCD comes on.

2. Select a stitch.

   - For details on selecting a stitch, refer to "Selecting stitching" (page 45).

3. Press [ ] on the LCD.

   - It turns to [ ], and the sewing machine is set for automatic reverse/reinforcement stitching.

   - To turn automatic reverse/reinforcement stitching off, press [ ].

   - When the sewing machine is turned off, the automatic reverse/reinforcement stitching setting is cancelled.

4. Position the fabric under the presser foot, and then press [ ] (Start/stop button) once.

   - After reverse/reinforcement stitches are sewn, the machine starts sewing.

5. After reaching the end of the stitching, press [ ] (Reverse/reinforcement stitch button) once.

   - This step is not necessary if a stitch such as those for sewing buttonholes and bar tacks is selected where reinforcement stitches are automatically sewn.

   - After reverse/reinforcement stitches are sewn, the sewing machine stops.
Memo

Reverse/reinforcement stitches will not be sewn if the start/stop button is pressed at the end of the stitching. Be sure to press the reverse/reinforcement stitch button at the end of the stitching.

Automatically cutting the thread

The sewing machine can be set to automatically cut the threads at the end of the stitching. This is called "programmed thread-cutting." If programmed thread-cutting is set, automatic reverse/reinforcement stitching is also set.

1. Turn on the sewing machine.
   - The LCD comes on.

2. Select a stitch.
   - For details on selecting a stitch, refer to "Selecting stitching" (page 45).

3. Press on the LCD.
   - You get , and the sewing machine is set for programmed thread-cutting and automatic reverse/reinforcement stitching.

   - To turn programmed thread cutting off, press .
Set the fabric in place, and press \( \square \) (Start/stop button) once.

Stitching starts after reverse stitching or reinforcement stitching.

Once you have reached the end of the stitching, press \( \square \) (Reverse/reinforcement stitch button) once.

If stitching, such as buttonholes and bar tacking, that includes reinforcement stitching has been selected, this operation is unnecessary.

After the reverse stitching or reinforcement stitching has been done, the sewing machine stops, and the thread is cut.

Memo
- Programmed thread-cutting will not be performed if the start/stop button is pressed while sewing. Press the reverse/reinforcement stitch button at the end of the stitching.
- If the power is turned off, programmed thread-cutting will be turned off.

Mirroring stitches

You can sew the mirror image of a stitch horizontally (left and right).

1. Turn on the sewing machine.

   The LCD comes on.

2. Select a stitch.

   • For details on selecting a stitch, refer to "Selecting stitching" (page 45).

3. Press \( \square \) on the LCD.

   It turns to \( \square \), and the pattern is mirrored.

   • To turn the mirrored stitching off, press \( \square \).

Memo
- Mirroring is not possible for buttonholes and other stitches where \( \square \) shows.
- When the sewing machine is turned off, the mirroring setting is cancelled.
Various ways to achieve better results for your sewing projects are described below. Refer to these tips when sewing your project.

**Trial sewing**

After you have set up the machine with the thread and needle appropriate for the type of fabric being sewn, the machine automatically sets the thread tension and stitch length and width for the stitch that is selected. However, a trial piece of fabric should be sewn since, depending on the type of fabric and stitching being sewn, the desired results may not be achieved.

For the trial sewing, use a piece of fabric and thread that are the same as those used for your project, and check the thread tension and stitch length and width. Since the results differ depending on the type of stitching and the number of layers of fabric sewn, perform the trial sewing under the same conditions that will be used with your project.

**Changing the sewing direction**

1. **When the stitching reaches a corner, stop the sewing machine.**
   Leave the needle lowered (in the fabric). If the needle remained up when the machine stopped sewing, press ① (Needle position button) to lower the needle.

2. **Raise the presser foot lever, and then turn the fabric.**
   Turn the fabric using the needle as a pivot.

3. **Lower the presser foot lever and continue sewing.**

**Sewing curves**

Stop sewing, and then slightly change the sewing direction to sew around the curve. For details on sewing with an even seam allowance, refer to “Sewing an even seam allowance” (page 61).

When sewing along a curve while using a zigzag stitch, select a shorter stitch length in order to obtain a finer stitch.
Sewing thick fabrics

- If the fabric does not fit under the presser foot
  If the fabric does not fit easily under the presser foot, raise the presser foot lever even higher to bring the presser foot to its highest position.

- If thick seams are being sewn and the fabric does not feed at the beginning of stitching
  Zigzag foot "J" is equipped with a feature that keeps the presser foot level.

  ![Sewing direction](image)

  ① Sewing direction

  ① When you encounter a seam that is too thick to feed under the foot, raise the presser foot lever.

  ② Press the black button (Presser foot holding pin) on the left side of zigzag foot "J". Keep the button held in and lower the presser foot.

  ![Presser foot holding pin](image)

  ① Presser foot holding pin

  ▶ Release the button. The foot will lock in place level with the seam, allowing the fabric to feed.

  ![Once the trouble spot has been passed, the foot will return to its normal position.](image)

  ▶ Once the trouble spot has been passed, the foot will return to its normal position.

  ![CAUTION](image)

  ● If fabric more than 6 mm (15/64 inch) thick is sewn or if the fabric is pushed with too much force, the needle may bend or break.

Sewing thin fabrics

When sewing thin fabrics, the stitching may become misaligned or the fabric may not feed correctly. If this occurs, place thin paper or stabilizer material under the fabric and sew it together with the fabric. When you have finished sewing, tear off any excess paper.

![Stabilizer material or paper](image)

① Stabilizer material or paper

Sewing stretch fabrics

First, baste the pieces of fabric together, and then sew without stretching the fabric.

![Basting](image)

① Basting

Besides, using the stretch stitching or the thread for knits gives an attractive finishes.
Sewing an even seam allowance

To sew an even seam, start sewing so that the seam allowance is to the right of the presser foot, and the edge of the fabric is aligned with either the right edge of the presser foot or a marking on the needle plate.

- **Aligning the fabric with the presser foot**
  Sew while keeping the right edge of the presser foot a fixed distance from the edge of the fabric.

- **Aligning the fabric with a needle plate marking**
  The markings on the needle plate show the distance from the needle position of a seam sewn with the straight stitch (left needle position). Sew while keeping the edge of the fabric aligned with a marking in the needle plate. The distance between the markings in the upper scale is 1/8 inch (3 mm) and the distance between the markings in the grid is 5 mm (3/16 inch).
The various stitches and their applications are described in this chapter.

Overcasting Stitches

Sew overcasting stitches along the edges of cut fabric to prevent them from fraying. Fifteen stitches are available for overcasting. The procedure for sewing overcasting stitch is explained according to the presser foot that is used.

Sewing overcasting stitches using overcasting foot "G"

Three stitches can be used to sew overcasting with overcasting foot "G".

</tr>
</tbody>
</table>

1. Remove the presser foot.
   - For details, refer to "Replacing the presser foot" (page 38).

2. Hook the connecting fork of the side cutter onto the needle clamp screw.

3. Position the side cutter so that side cutter pin is aligned with the notch in the presser foot holder, and then slowly lower the presser foot lever.

4. Raise the presser foot lever to check that the side cutter is securely attached.

**CAUTION**

- If the thread cassette is to be installed with the side cutter attached, be sure to lower the presser foot lever. If the presser foot lever remains raised, the needle threader will hit the presser foot, which may result in damages.
5 Pass the upper thread under the side cutter, and then pull it out toward the rear of the sewing machine.

6 Select a stitch.

- For details, refer to "Selecting stitching" (page 45).

7 Make a cut of about 2 cm (3/4 inch) long in the fabric at the beginning of the stitching.

8 Position the fabric in the side cutter. The cut in the fabric should be positioned over the guide plate of the side cutter.

9 Lower the presser foot lever, and then start sewing.

- A seam allowance is cut while the stitching is sewn.
  - If the stitching is sewn in a straight line $\frac{63}{64}$, the seam allowance will be about 5 mm (3/16 inch).

Memo
- The side cutter can cut as much as one layer of 13-oz. denim.
- After using the side cutter, clean it by removing any lint or dust.
- If the side cutter can no longer cut fabric, use a rag to apply a small amount of oil to the cutting edge of the cutter.
Basic Stitching

Straight stitches are used for sewing plain seams. Five stitches are available for basic stitching.

**Basting**

Sew basting with a stitch length between 5 mm (3/16 inch).

1. **Attach zigzag foot “J”**.

   - For details, refer to "Replacing the presser foot" (page 38).

2. **Select stitch 6**.

   - For details, refer to "Selecting stitching" (page 45).

3. **Start sewing**.

   - For details, refer to "Starting to sew" (page 47).

**Basic stitching**

1. **Baste or pin together the fabric pieces**.

2. **Attach zigzag foot “J”**.

   - For details, refer to "Replacing the presser foot" (page 38).

3. **Select a stitch**.

   - For details, refer to "Selecting stitching" (page 45).

4. **Lower the needle into the fabric at the beginning of the stitching**.
Start sewing.
- For details, refer to "Starting to sew" (page 47).
- For details on sewing reverse/reinforcement stitches, refer to "Securing the stitching" (page 49).

When sewing is finished, cut the thread.
- For details, refer to "Cutting the thread" (page 50).

---

### Changing the needle position

The needle position used as the baseline is different for the straight stitch (left needle position) and the straight stitch (center needle position).

1. Straight stitch (left needle position)
2. Straight stitch (center needle position)

When the stitch width of the straight stitch (left needle position) is set to its standard setting (0.0 mm), the distance from the needle position to the right side of the presser foot is 12 mm (1/2 inch). If the stitch width is changed (between 0 and 7.0 mm (1/4 inch)), the needle position will also change. By changing the stitch width and sewing with the right side of the presser foot aligned with the edge of the fabric, a seam allowance can be sewn with a fixed width.

- For details, refer to "Adjusting the stitch width" (page 54).
Secure the bottoms of skirts and pants with a blind hem. Two stitches are available for blind hem stitching.

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch.)]</th>
<th>Stitch Length [mm (inch.)]</th>
<th>Presser Foot</th>

<td>Blind hem stitching on stretch fabrics</td>
<td>0.0 (0)</td>
<td>3 – 3</td>
<td>2.0 (1/16)</td>
</tr>
</tbody>
</table>

Sew a blind hem according to the following procedure.

1. Fold the fabric along the desired edge of the hem, and then baste it about 5 mm (3/16 inch) from the edge of the fabric.

2. Fold back the fabric along the basting, and then position the fabric with the wrong side facing up.

3. Attach blind hem foot “R”.

4. Select a stitch.

5. Position the fabric with the edge of the folded hem against the guide of the presser foot, and then lower the presser foot lever.

- For details, refer to "Replacing the presser foot" (page 38).
- For details, refer to “Selecting stitching” (page 45).
6 Adjust the stitch width until the needle slightly catches the fold of the hem.

- Needle drop point
  When you change the needle drop point, raise the needle, and then change the stitch width.

- Stitch width

If the needle catches too much of the hem fold
The needle is too far to the left. Press  to decrease the stitch width so that the needle slightly catches the fold of the hem.

- Wrong side of fabric
- Right side of fabric

If the needle does not catch the hem fold
The needle is too far to the right. Press  to increase the stitch width so that the needle slightly catches the fold of the hem.

- Wrong side of fabric
- Right side of fabric

7 Sew with the fold of the hem against the presser foot guide.

8 Remove the basting stitching.

- Wrong side of fabric
- Right side of fabric
# Buttonhole Stitching

Buttonholes can be sewn and buttons can be sewn on. Ten stitches are available for sewing one-step buttonholes, one for sewing on buttons.

**Utility Stitches**

**Buttonhole sewing**

The maximum buttonhole length is about 28 mm (1-1/8 inch) (diameter + thickness of the button). Buttonholes are sewn from the front of the presser foot to the back, as shown below.

1. **Use chalk to mark on the fabric the position and length of the buttonhole.**

   ![Marking Fabric](image)

   ① Marks on fabric

2. **Pull out the button guide plate of buttonhole foot "A", and then insert the button that will be put through the buttonhole.**

   ![Inserting Button](image)

   ① Reinforcement stitching

   ② Button guide plate
   ③ Presser foot scale
   ④ Pin
   ⑤ Marks on buttonhole foot
   ⑥ 5 mm (3/16 inch)
If the button does not fit in the button guide plate
Add together the diameter and thickness of the button, and then set the button guide plate to the calculated length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

Example: For a button with a diameter of 15 mm (9/16 inch) and a thickness of 10 mm (3/8 inch), the button guide plate should be set to 25 mm (1 inch) on the scale.

Attach buttonhole foot "A".
- For details, refer to “Replacing the presser foot” (page 38).

Select a stitch.
- For details, refer to “Selecting stitching” (page 45).

Position the fabric with the front end of the buttonhole mark aligned with the red marks on the sides of the buttonhole foot, and then lower the presser foot lever.
- When lowering the presser foot, do not push in the front of the presser foot.

Pull down the buttonhole lever as far as possible.
The buttonhole lever is positioned behind the bracket on the buttonhole foot.

Gently hold the end of the upper thread in your left hand, and then start sewing.

Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

Raise the presser foot lever, remove the fabric, and then cut the thread.

Raise the buttonhole lever to its original position.

Insert a pin along the inside of one bar tack at the end of the buttonhole stitching to prevent the stitching from being cut.

Use the seam ripper to cut towards the pin and open the buttonhole.

For keyhole buttonholes, use the eyelet punch to make a hole in the rounded end of the buttonhole, and then use the seam ripper to cut open the buttonhole.

When opening the buttonhole with the seam ripper, do not place your hands in the cutting direction, otherwise injuries may result if the seam ripper slips.

Changing the density of the stitching
Adjust the stitch length.

- For details, refer to "Adjusting the stitch length" (page 55).
- If the fabric does not feed (for example, if it is too thick), decrease the density of the stitching.
## Changing the stitch width
Adjust the stitch width.

- For details, refer to "Adjusting the stitch width" (page 54).

### Memo
- Before sewing buttonholes, check the stitch length and width by sewing a trial buttonhole on a scrap piece of fabric.

## Sewing buttonholes on stretch fabrics
When sewing buttonholes on stretch fabrics, use a gimp thread.

1. Hook the gimp thread onto the part of buttonhole foot "A" shown in the illustration.
2. It fits into the grooves, and then loosely tie it.
3. Attach buttonhole foot "A".
   - For details, refer to "Replacing the presser foot" (page 38).
4. Select stitch 46 or 47.
5. Adjust the stitch width to the thickness of the gimp thread.
6. Lower the presser foot lever and the buttonhole lever, and then start sewing.
7. When sewing is finished, gently pull the gimp thread to remove any slack.
8. Use a handsewing needle to pull the gimp thread to the wrong side of the fabric, and then tie it.
Button sewing

Buttons can be sewn on with the sewing machine. Buttons with 2 or with 4 holes can be attached.

1. Measure the distance between the holes in the button to be attached.

2. Raise the presser foot lever, and then slide the drop feed lever, located at the rear of the machine on the base, to (to the left as seen from the rear of the machine).

3. Attach button-sewing foot "M".

4. Select stitch 55.

5. Adjust the stitch width so that it is the same as the distance between the holes in the button.

6. Place the button in the position where it will be sewn, and lower the presser foot lever.

7. Turn the balance wheel toward you to check that the needle correctly goes into the two holes of the button. Adjust the stitch width to the distance between the button holes.

- For details, refer to "Selecting stitching" (page 45).
- Since the end of the thread will be tied off later, do not set the sewing machine for programmed-thread cutting.

CAUTION

- When sewing, be sure that the needle does not touch the button, otherwise the needle may bend or break.

* Drop feed lever (as seen from the rear of the machine)
  - The feed dogs are lowered.

* Button
  - The button is held in place.

* When attaching four-hole buttons, first sew the two holes closest to you. Then, slide the button so that the needle goes into the two holes toward the rear of the sewing machine, and then sew them in the same way.
8 **Start sewing.**
Set the sewing speed controller to the left (so that the speed will be slow).

! The sewing machine automatically stops after sewing reinforcement stitches.

- Do not press the thread cutter button.

9 **Pull the upper thread at the end of the stitching to the wrong side of the fabric, and then tie it with the bobbin thread.**
Use scissors to cut the upper thread and the bobbin thread at the beginning of the stitching.

10 **When you are finished attaching the button,**
slide the drop feed lever to (to the right as seen from the rear of the machine) to raise the feed dogs.

**Memo**
- The feed dog position switch is normally set to the right side.
- The feed dogs come up when you start sewing again.
Zipper Insertion

A zipper can be sewn in place.

<table>
<thead>
<tr>

<tr>
<td></td>
<td></td>
<td>pintucks</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

There are many methods for inserting zippers. The procedures for inserting a centered zipper and a side zipper are described below.

**Inserting a centered zipper**

Stitching is sewn on both pieces of fabric butted against each other.

1. Attach zigzag foot "J".
2. Sew straight stitches up to the zipper opening.
   - With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
   - For details, refer to "Basic stitching" (page 73).
3. Using a basting stitch, continue sewing to the edge of the fabric.
4. Press open the seam allowance from the wrong side of the fabric.

- ① Right side of fabric
- ② Stitching
- ③ End of zipper opening
- ④ Basting stitching
- ⑤ Reverse stitches
- ⑥ Wrong side of fabric
- ⑦ End of zipper opening
- ⑧ Wrong side of fabric
5. Align the seam with the center of the zipper, and then baste the zipper in place.

6. Remove about 5 cm (2 inch) from the end of the basting on the outside.

7. Attach the presser foot holder to the right pin of zipper foot "I".

8. Select stitch 3.

9. Topstitch around the zipper.

CAUTION
- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the balance wheel toward you to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

CAUTION
- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the balance wheel toward you to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

10. Remove the basting stitching.
## Inserting a side zipper

Stitching is sewn on only one piece of fabric. Use this type of zipper for side openings and back openings.

1. **Attach zigzag foot “J”**.
2. **Sew straight stitches up to the zipper opening.** With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.
   - For details, refer to “Basic stitching” (page 73).
3. **Using a basting stitch, continue sewing to the edge of the fabric.**
   - For details, refer to “Replacing the presser foot” (page 38).

4. **Press open the seam allowance from the wrong side of the fabric.**
5. **Press the seam allowance so that the right side (the side that will not be stitched) has an extra 3 mm (1/8 inch).**
6. **Align the zipper teeth with the pressed edge of the fabric having the extra 3 mm (1/8 inch), and then baste or pin the zipper in place.**
7. **Attach the presser foot holder to the right pin of zipper foot “I”.**
   - If the stitching will be sewn on the right side, attach the presser foot holder to the left pin of the zipper foot.
Select stitch 3.

- For details, refer to "Selecting Stitching" (page 45).

**CAUTION**

- When using zipper foot "I", be sure to select the straight stitch (center needle position), and slowly turn the balance wheel toward you to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

Sew the zipper to the piece of fabric with the extra 3 mm (1/8 inch), starting from the base of the zipper.

**CAUTION**

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.

When you are about 5 cm (2 inch) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), raise the presser foot lever.

Open the zipper and continue sewing.

Close the zipper, turn over the fabric, and then baste the other side of the zipper to the fabric.

Attach the presser foot holder to the other pin of zipper foot "I". If the presser foot holder was attached to the right pin in step 7, change it to the left pin.

① Basting stitching

① Pin on the left side
② Needle drop point
14 **Topstitch around the zipper.**
Sew reverse stitches at the end of the zipper opening and align the zipper teeth with the side of the presser foot.

![Diagram showing topstitching around a zipper]

- Right side of fabric
- End of zipper opening
- Reverse stitches
- Beginning of stitching
- Basting stitching

**CAUTION**

- When sewing, be sure that the needle does not touch the zipper, otherwise the needle may bend or break.

15 When you are about 5 cm (2 inch) from the end of the zipper, stop the sewing machine with the needle lowered (in the fabric), and then raise the presser foot lever.

16 Remove the basting stitching, open the zipper, and then continue sewing.
Sewing Stretch Fabrics and Elastic Tape

Stretch fabrics can be sewn and elastic tape can be attached.

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch.)]</th>
<th>Stitch Length [mm (inch.)]</th>
<th>Presser Foot</th>
</tr>
</thead>

<td>28</td>
<td>Attaching elastic to stretch fabrics</td>
<td>4.0 (3/16)</td>
<td>0.0–7.0 (0–1/4)</td>
<td>J</td>
</tr>
</tbody>
</table>

Observe the corresponding precautions when performing each of the following stitching operations.

**Stretch stitching**

1. Attach zigzag foot "J".
   - For details, refer to "Replacing the presser foot" (page 38).

2. Select stitch $5 \frac{1}{2}$.
   - For details, refer to "Selecting stitching" (page 45).

**Elastic attaching**

When elastic tape is attached to the cuff or waist of a piece of clothing, the finished dimensions will be that of the stretched elastic tape. Therefore, it is necessary that a suitable length of the elastic tape be used.

1. Pin the elastic tape to the wrong side of the fabric.
   - Pin the elastic tape to the fabric at a few points to make sure that the tape is uniformly positioned on the fabric.

2. Attach zigzag foot "J".
   - For details, refer to "Replacing the presser foot" (page 38).
Select a stitch.

- For details, refer to "Selecting stitching" (page 45).

Sew the elastic tape to the fabric while stretching the tape so that it is the same length as the fabric.
While pulling the fabric behind the presser foot with your left hand, pull the fabric at the pin nearest the front of the presser foot with your right hand.

CAUTION

- When sewing, be sure that the needle does not touch any pins, otherwise the needle may bend or break.
The stitches that can be used for sewing appliqués, patchwork and quilts are described below.

### Appliqué, Patchwork and Quilt Stitching

</tbody>
</table>

**Memo**

- Patterns showing a "Q" on the LCD are for quilting and those showing a "P" are for piecing.

**Appliqué stitching**

1. Cut out the appliqué, leaving a seam allowance of between 3 and 5 mm (1/8 and 3/16 inch).

![Seam allowance](image)
2 Place a pattern made of thick paper on the back of the appliqué, and then fold over the seam allowance using an iron.

- After ironing the appliqué, remove the thick paper pattern.

3 Turn the fabric over, and then baste or fuse it onto the fabric that it will be attached to.

4 Attach zigzag foot "J".

- For details, refer to "Replacing the presser foot" (page 38).

5 Select a stitch.

- For details, refer to "Selecting stitching" (page 45).

6 Turn the balance wheel toward you, and then begin sewing around the edge of the appliqué, making sure that the needle drops just outside of the appliqué.

When sewing around corners, stop the machine with the needle in the fabric just outside of the appliqué, raise the presser foot lever, and then turn the fabric as needed to change the sewing direction.
**Patchwork (crazy quilt) stitching**

1. Fold the edge of the top piece of fabric and place it over the lower piece.
2. Sew the two pieces of fabric together so the pattern spans over both pieces.

**Piecing**

Sewing together two pieces of fabric is called "piecing". The fabric pieces should be cut with a 7 mm (1/4 inch) seam allowance. Sew a piecing straight stitch 7 mm (1/4 inch) from either the right side or the left side of the presser foot.

1. Baste or pin along the seam allowance of the fabric that you wish to piece together.
2. Attach zigzag foot "J".

- For details, refer to "Replacing the presser foot" (page 38).
3. Select stitch 57 or 58.

- For details, refer to "Selecting stitching" (page 45).
- The piecing straight stitch shows a "P" on the LCD.
4. Sew with the side of the presser foot aligned with the edge of the fabric.

- For a seam allowance on the right side
  Align the right side of the presser foot with the edge of the fabric, and sew using stitch 57.

1. 7 mm (1/4 inch)
For a seam allowance on the left side
Align the left side of the presser foot with the edge of the fabric, and sew using stitch 58.

Memo
To change the width of the seam allowance (The needle position), adjust the stitch width. For details, refer to "Adjusting the stitch width" (page 54).

Quilting

Sandwiching batting between the top and bottom layers of fabric is called "quilting". Quilts can easily be sewn using the optional walking foot and the optional quilting guide.

1. Baste the fabric to be quilted.
2. Remove the presser foot holder.
   - For details, refer to "Removing the presser foot holder" (page 40).
3. Hook the connecting fork of the walking foot onto the needle clamp screw.
4. Lower the presser foot lever, insert the presser foot holder screw, and then tighten the screw with the screwdriver.

The walking foot is attached.
**CAUTION**

- Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.
- Before starting to sew, slowly turn the balance wheel toward you and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.

5 Select a stitch.
   - For details, refer to "Selecting stitching" (page 45).

6 Place one hand on each side of the presser foot, and then evenly guide the fabric while sewing.

**Note**

- When sewing with the walking foot, sew at a speed between slow and medium.
- When quilting, use a 90/14 home sewing machine needle.

■ Using the optional quilting guide

Use the quilting guide to sew parallel stitches that are equally spaced.

1 Insert the stem of the quilter into the hole at the rear of the walking foot or presser foot holder.
   - Walking foot

2 Adjust the stem of the quilter so that the quilt guide aligns with the seam that has already been sewn.
Free-motion quilting

With free-motion quilting, the feed dogs can be lowered (using the drop feed lever) so that the fabric can be moved freely in any direction. When using free-motion quilting, use the optional quilting foot or the embroidery foot "Q".

1. Remove the presser foot and the presser foot holder.
   - Refer to "Removing the presser foot holder" (page 40).

2. Secure the quilting foot with the presser foot folder screw.
   The pin on the quilting foot should be positioned over the needle clamp screw.

3. Hold the quilting foot in place with your right hand, and then tighten the presser foot holder screw using the screwdriver in your left hand.

4. Slide the drop feed lever, located at the rear of the machine on the base, to (to the left as seen from the rear of the machine).

5. Turn on the sewing machine, and then select a stitch.
   - For details, refer to “Selecting stitching” (page 45).

6. Use both hands to hold the fabric taut, and then move the fabric to follow the pattern. Reinforcement stitches are sewn at the beginning and end of sewing.

7. After sewing is finished, slide the drop feed lever to (to the right as seen from the rear of the machine) to raise the feed dogs.
   - Normally, the drop feed lever is positioned at the right.

CAUTION

- Be sure to securely tighten the screws with the screwdriver, otherwise the needle may touch the presser foot, causing it to bend or break.
Satin stitching

A decorative stitch can be sewn by changing the stitch width of a satin stitch. If the sewing machine is set so that the stitch width can be adjusted using the sewing speed controller, the stitch width can quickly and easily be adjusted. In this case, the sewing speed is adjusted with the foot controller.

1. **Connect the foot controller.**
   - For details, refer to "Starting to sew" (page 47).

2. **Attach zigzag foot "J".**
   - For details, refer to "Replacing the presser foot" (page 38).

3. **Turn on the sewing machine, and then press (Settings key) in the operation panel.**
   - The settings screen appears.

4. **Press (Next page key) until "WIDTH CONTROL" is on LCD screen, and the press ON for stitch width control setting.**
   - The machine is now set so that the stitch width can be controlled with the sewing speed controller.

5. **Press (Back key).**
   - The initial screen appears again.

6. **Select stitch 60.**
   - For details, refer to "Selecting stitching" (page 45).

7. **While sewing, slide the sewing speed controller to adjust the stitch width.**
   - Slide the controller to the left to make the width narrower. Slide the controller to the right to make the width wider.

8. **When you are finished sewing, set the stitch width control setting back to OFF.**

**Memo**
- Although the stitching result differs depending on the type of fabric being sewn and the thickness of the thread being used, for best results, adjust the stitch length to between 0.3 and 0.5 mm (1/64 and 1/32 inch).
Reinforcement Stitching

Reinforce points that will be subject to strain, such as sleeve holes, inseams and pocket corners.

<table>
<thead>

</table>

### Triple stretch stitching

Use triple stretch stitching to reinforce sleeve holes and inseams.

1. **Attach zigzag foot "J".**

   ![Attachment of zigzag foot](image)

   - For details, refer to "Replacing the presser foot" (page 38).

2. **Select stitch 4.**

   ![Selection of triple stretch stitch](image)

   - For details, refer to "Selecting stitching" (page 45).

3. **Start sewing.**

   - For details, refer to "Starting to sew" (page 47).

### Bar tack stitching

Bar tacks are used to reinforce points subject to strain, such as pocket corners and openings. As an example, the procedure for sewing bar tacks at pocket corners is described below.

1. **Determine the desired length of the bar tack.**

   Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

   ![Setting the button guide plate](image)

   - A bar tack with a maximum length of about 28 mm (1–1/8 inch) can be sewn.
2 Attach buttonhole foot "A".
   • For details, refer to "Replacing the presser foot" (page 38).

3 Select stitch 54.
   • For details, refer to "Selecting stitching" (page 45).

4 Position the fabric so that the opening of the pocket faces toward you, and then lower the presser foot lever so that the needle drops 2 mm (1/16 inch) in front of the pocket opening.

5 Pull down the buttonhole lever as far as possible.

6 Gently hold the end of the upper thread in your left hand, and then start sewing.

7 Raise the presser foot lever, remove the fabric, and then cut the threads.

8 Raise the buttonhole lever to its original position.

Memo
   • If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 55).
Darning

Fabric that has been torn can be darned.
Darning is sewn as shown below.

1. **Determine the desired length of the darning.**
   Set the button guide plate on buttonhole foot "A" to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

2. **Attach buttonhole foot "A".**
   - For details, refer to "Replacing the presser foot" (page 38).

3. **Select stitch 52 or 53.**
   - For details, refer to "Selecting stitching" (page 45).

4. **Position the fabric so that the needle is 2 mm (1/16 inch) in front of the area to be darned, and then lower the presser foot lever.**

   - A bar tack with a maximum length of about 28 mm (1-1/8 inch) can be sewn.

   Pass the upper thread down through the hole in the presser foot.
   - When lowering the presser foot, do not push in the front of the presser foot, otherwise the darning will not be sewn with the correct size.
1. Do not reduce the gap.

5. Pull down the buttonhole lever as far as possible.

8. Raise the buttonhole lever to its original position.

Memo
- If the fabric does not feed, for example, because it is too thick, increase the stitch length. For details, refer to "Adjusting the stitch length" (page 55).

Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

X Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
Eyelet Stitching

Eyelets, such as those on belts, can be sewn. Three sizes of eyelets are possible: 7 mm, 6 mm and 5 mm (1/4, 15/64 and 3/16 inch).

<table>
<thead>
<tr>
<th>Stitch Name</th>
<th>Pattern</th>
<th>Application</th>
<th>Stitch Width [mm (inch.)]</th>
<th>Stitch Length [mm (inch.)]</th>
<th>Presser Foot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eyelet stitch</td>
<td>56</td>
<td>Sewing eyelets, for example, on belts</td>
<td>Auto 7.0 (1/4) Manual 5.0 (1/4, 15/64 or 3/16)</td>
<td>Auto 7.0 (1/4) Manual 5.0 (1/4, 15/64 or 3/16)</td>
<td>N</td>
</tr>
</tbody>
</table>

1. Attach monogramming foot "N".

   - For details, refer to "Replacing the presser foot" (page 38).

2. Select stitch 56 .

   - For details, refer to "Selecting stitching" (page 45).

3. Adjust either the stitch width or the stitch length to select the desired eyelet size.

   - For details, refer to "Adjusting the Stitch Width and Length" (page 54).

4. Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.

5. Start sewing.

   - Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

6. Use the eyelet punch to cut a hole in the center of the eyelet.

   - When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

Memo

- If thin thread is used, the stitching may be too open. If this occurs, sew the eyelet twice before removing the fabric, one on top of the other.
### Decorative Stitching

The utility stitch group contains the following decorative stitches.

</tbody>
</table>
Fagoting

Stitching across an open seam is called "fagoting". It is used on blouses and children's clothing. This stitch is more decorative when thicker thread is used.

1. Use an iron to fold the two pieces of fabric along their seams.
2. Baste the two pieces of fabric, separated by about 4 mm (3/16 inch), onto thin paper or a sheet of water-soluble stabilizer. If you draw a line down the middle of the thin paper or water-soluble stabilizer, sewing is easier.
3. Attach zigzag foot "J".

- For details, refer to "Replacing the presser foot" (page 38).

4. Select stitch 26 or 27.

- For details, refer to "Selecting stitching" (page 45).

5. Set the stitch width to 7.0 mm (1/4 inch).
- For details, refer to "Adjusting the stitch width" (page 54).

6. Sew with the center of the presser foot aligned along the center of the two pieces of fabric.

7. After sewing is finished, remove the paper.
Scallop stitching

The wave-shaped repeating pattern that looks like shells is called "scalloping". It is used on the collars of blouses and to decorate the edges of projects.

1. Attach monogramming foot "N".

   • For details, refer to "Replacing the presser foot" (page 38).

2. Select stitch 21.

   • For details, refer to "Selecting stitching" (page 45).

3. Stitch along the edge of the fabric, making sure not to sew directly on the edge of the fabric.

   • For better results, apply spray starch onto the fabric and press with a hot iron before it is sewn.

4. Trim along the stitches.

   • Be careful not to cut the stitches.

Smocking

The decorative stitch created by stitching or embroidering over gathers is called "smocking". It is used to decorate the front of blouses or cuffs. The smocking stitch adds texture and elasticity to fabric.

1. Attach zigzag foot "J".

   • For details, refer to "Replacing the presser foot" (page 38).

2. Select the straight stitch, and then adjust the stitch length to 4.0 mm (3/16 inch) and loosen the thread tension.

   • For details, refer to "Adjusting the stitch length" (page 55) and "Thread tension" (page 52).

   • Pull up the bobbin thread. For details, refer to "Pulling up the bobbin thread" (page 31).

3. Sew parallel stitching at intervals of 1 cm (3/8 inch).

   • Do not use reverse/reinforcement stitching or thread cutting.

   • At the end of the stitching, the thread is pulled out about 5 cm (2 inch).

4. Pull the bobbin threads to create gathers.

   Smooth the gathers by ironing them.
Select stitch 25, 26 or 27.

Shell tuck stitching

The gathers that look like shells are called "shell tucks". They are used to decorate trims, the front of blouses or cuffs made of thin fabrics.

1. Fold the fabric along the bias.

2. Attach zigzag foot "J".

3. Select stitch 20, and then increase the thread tension.

- For details, refer to "Selecting stitching" (page 45) and "Changing the upper thread tension" (page 53).
Sew while making sure that the needle drops slightly off the edge of the fabric.

Unfold the fabric, and then iron the tucks down to one side.

Joining

Decorative bridging stitches can be sewn over the seam allowance of joined fabrics. This is used when making a crazy quilt.

1. Attach zigzag foot "J".

   • For details, refer to "Replacing the presser foot" (page 38).

2. Sew together the right sides of the two pieces of fabric, and then open up the seam allowances.

3. Select stitch 22, 23 or 24.

   • For details, refer to "Selecting stitching" (page 45).

4. Turn the fabric over so that the right side faces up, and then sew over the seam with the center of the presser foot aligned with the seam.
Heirloom stitching

When sewing with the wing needle, the needle holes are enlarged, creating a lace-like decorative stitch. This is used to decorate hems and tablecloths on thin or mediumweight fabrics in addition to plain weave fabrics.

1. Install the wing needle.
   - Use a 130/705H 100/16 wing needle.
   - For details on installing a needle, refer to "Replacing the needle" (page 35).
   - The needle threader cannot be used with the wing needle, otherwise the sewing machine may be damaged. Manually pass the thread through the eye of the needle from the front to the back. For details, refer to "Thread the needle manually (without using the needle threader)" (page 28).

2. Attach monogramming foot "N".
   - For details, refer to "Replacing the presser foot" (page 38).

3. Select a stitch.
   The stitches that can be used are 33, 34, 35, 36, 37, 38, 39, 40, or 41.

4. Start sewing.

   **CAUTION**
   - When sewing with the wing needle, select a stitch width of 6.0 mm (15/64 inch) or less, otherwise the needle may bend or break.
   - After adjusting the stitch width, slowly turn the balance wheel toward you and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.

Partially removing threads is called "drawnwork". This gives a beautiful result with fabrics that have a loose weave. Two ways to create drawnwork are described below.
Drawnwork (Example 1)

1. Pull out several threads from the fabric.
2. Attach monogramming foot "N".
3. Select stitch 33.
4. For details, refer to "Selecting stitching" (page 45).
5. With the right side of the fabric facing up, sew along the right edge of the frayed section.
6. Sew along the other edge of the frayed section so that it looks like the previous stitching.
7. Press on the LCD.
   a. The pattern is flipped.
   b. Press and set the horizontal mirror image key back to OFF.

For details, refer to "Replacing the presser foot" (page 38).
■ Drawnwork (Example 2)

1 Pull out several threads from two sections of the fabric, separated by an unfrayed section of about 4 mm (3/16 inch).

2 Attach monogramming foot "N".

   • For details, refer to "Replacing the presser foot" (page 38).

3 Select stitch 36.

   • For details, refer to "Selecting stitching" (page 45).

4 Sew along the center of the unfrayed section.
The steps for embroidering will be explained here.

Embroidering neatly .......................................................... 112

Preparing the fabric .......................................................... 122
Attaching the embroidery frame ......................................... 126
Selecting embroidery patterns ............................................. 128
Embroidering ................................................................. 134
Convenient Functions ......................................................... 138
Embroidering neatly

What is necessary before embroidering will be explained here.

What to prepare

The following is necessary for embroidering.

■ Fabric
Prepare the fabric for embroidery. Prepare a piece of fabric a little larger than the embroidery frame that matches the size of the pattern you want to sew.

Note
- Always use stabilizer when sewing embroidery projects, especially when embroidering on lightweight or stretch fabrics. Not using a stabilizer may result in poor quality embroidery designs.
- When embroidering on large pieces of fabric, arrange the fabric so that it does not hang off the table where the sewing machine is placed. If embroidery is done with the fabric hanging off, the embroidery unit movement may be impaired, this could cause the pattern to sew incorrectly.

Stabilizer material
Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

We recommend stabilizer material for embroidery. Use a water soluble sheet on thin materials like organdy and fabrics with a nap like towels.

■ Embroidery thread
For the upper thread, use the embroidery thread or country thread.

For the bobbin thread, use the embroidery bobbin thread.

Note
- For good quality embroidery designs be sure to use embroidery thread designed for embroidery machines.
- Before starting to sew, be sure there is enough bobbin thread. If you continue embroidering when the bobbin thread is low, the thread may become tangled.

Memo
- Two thread cassettes for setting up embroidery thread are included. It is convenient if the next color to embroider is set up in another embroidery thread cassette while the one is embroidering.

CAUTION
- Do not embroider fabrics that are too thick. To check the fabric thickness, attach the embroidery frame to the embroidery unit, and use the "Needle Position" button to raise the needle. If there is space between the presser foot and the fabric, the fabric can be embroidered. If there is not space, do not embroider the fabric. Otherwise, the needle may break, resulting in injury.
- Be careful when sewing overlapping patterns. The needle may not easily pierce the fabric, causing the needle to break.
**Needle**

Use a 75/11 home sewing machine needle. When embroidering on thick fabrics such as denim, use a 90/14 home sewing machine needle.

---

**Memo**

- A 75/11 needle is already installed when the sewing machine is purchased.
- When replacing the needle, refer to "Replacing the needle" (page 35).

---

**CAUTION**

- Since ball point needles (gold colored) are needles for fabrics where stitches are easily skipped, such as pattern stitching and stretch fabrics, be absolutely sure not to use them for embroidery. The needle may be broken or bent.
## Embroidery step by step

The basic steps for embroidery are as follows.

<table>
<thead>
<tr>
<th></th>
<th>Presser foot attachment</th>
<th>Attach the embroidery foot &quot;Q&quot;. For details on attaching the embroidery foot, refer to &quot;Attaching the embroidery foot&quot; (on the next page)</th>

Attaching the embroidery foot

Attachment of the embroidery foot is explained here.

**Attaching the embroidery foot**

Attach the embroidery foot when embroidering. Have the included embroidery foot "Q" and a screwdriver ready.

**CAUTION**

- Always use the embroidery foot "Q" when embroidering. If the wrong presser foot is used, the needle may hit the presser foot and break or bend.

1. Press (Needle position button) once or twice to raise the needle.

   - The needle goes up.

2. Turn off the sewing machine.

**CAUTION**

- Before replacing the presser foot, be sure to turn off the sewing machine, otherwise injuries may occur if the start/stop button is accidently pressed and the machine starts sewing.

3. Raise the presser foot lever.

   - The presser foot is raised.
   - At the time of purchase, the presser foot lever is up.

4. Press and hold the black button on the back of the presser foot holder to release it.

   - Detach the presser foot from the presser foot holder.
5 Loosen the presser foot holder screw and remove the presser foot holder.
Turn the screwdriver toward the back.

- Screwdriver
- Presser foot holder
- Presser foot holder screw

- Remove the presser foot holder.

6 Set the bar on the embroidery foot onto the needle clamp screw bar.

- Embroidery foot bar
- Needle clamp screw

7 Secure the embroidery foot with the presser foot holder screw.
Set the embroidery foot perpendicular.

8 Tighten the presser foot holder screw.
Turn the screwdriver toward the front.

**CAUTION**

- Do not hit the needle with your finger or the embroidery foot "Q" when attaching it. The needle might break or cause injury.
- Be sure to tighten the screw with the included screwdriver. If the screw is loose, the needle might hit the presser foot and break or bend.
- Before sewing, always turn the balance wheel toward you slowly, and check to be sure that the needle does not hit the presser foot. The needle could be broken or bent.
Removing the embroidery foot

1. Press  (Needle position button) once or twice to raise the needle.

   The needle is raised.

2. Turn off the sewing machine.

3. Raise the presser foot lever.

   The presser foot is raised.

4. Loosen the presser foot holder screw and remove the embroidery foot "Q".
   Turn the screwdriver toward the back.

5. Attach the presser foot holder.
   - For details, refer to "Attaching the presser foot holder" (page 40).
Attaching the embroidery unit

Attach the embroidery unit for embroidering.

Embroidery unit precautions

Cautions for the embroidery unit will be explained here.

**CAUTION**

- Do not move the sewing machine with the embroidery unit in place. The embroidery unit may be dropped and cause injury.
- Do not bring your hands or anything else close when the embroidery carriage and embroidery frame are moving. It could cause injury.

**Note**

- Do not touch the connector in the embroidery unit connector slot. The connector could be damaged, and it could be a cause of malfunctions.
- Do not lift up on the embroidery carriage, and do not forcefully move it. It could be the cause of malfunctions.

- Put the cover on the embroidery unit for storage.

Attaching the embroidery unit

Get the included embroidery unit ready.

1. Turn off the sewing machine.

2. Pull the flap to the left and remove it.
Open the cover of the embroidery unit connector slot, which is on the left side of the sewing machine arm. Pull the cover open toward you and then push it all the way back into the slot.

**CAUTION**

- Push the cover all the way back into the slot. If the embroidery unit is attached without the cover being pushed all the way in, it could be the cause of malfunctions.

Slide the embroidery unit onto the sewing machine arm. Push it in until it clicks and stops.

Turn on the sewing machine.

Be sure that no objects or hands are near the embroidery unit and touch **OK** on the LCD.

- When an animation is displayed on the LCD, the message above will be displayed if you touch the LCD with your finger.
- The embroidery unit carriage moves to its initial position.
Removing the embroidery unit

After removing the embroidery frame, turn off the machine and remove the embroidery unit.

1. Be sure that the sewing machine is stopped.

2. **Remove the embroidery frame.**
   - For details on removing the embroidery frame, refer to "Removing the embroidery frame" (page 127).

3. Press [ ] on the LCD.

   ▶ The embroidery carriage moves into a position where it can be stored.

4. Turn off the sewing machine.

---

**Note**

- If the initial settings are made with hands or objects near the carriage, the LCD may return to the initial display. In such a case, turn the power on again after removing whatever is near the carriage.

- The screen for selecting the embroidery pattern group is displayed.

- For details on Embroidery patterns, refer to “Selecting embroidery patterns” (page 128).

---

**Memo**

- Utility stitches cannot be selected when the embroidery unit is attached.

---

**CAUTION**

- Do not put your hands or anything else near the carriage. It could cause injury.

- Always turn off the sewing machine before removing the embroidery unit. It could cause malfunctions if removed when the machine was turned on.
Hold the removal lever on the bottom left of the embroidery unit, and slowly pull the embroidery unit to the left.

**Memo**

- The embroidery unit can be stored with embroidery frame (medium) or (small) attached.
Preparing the fabric

After attaching a stabilizer material to the embroidery fabric, it is stretched on an embroidery frame.

Attaching a stabilizer material to the fabric

Attach a stabilizer material for embroidery to the fabric to prevent poor quality embroidery designs.

1. Prepare stabilizer material that is larger than the embroidery frame being used.

2. If you are using stabilizers with adhesive, place the adhesive surface of the stabilizer material against the back of the fabric, and iron it with a steam iron.

Memo

- We recommend the stabilizer material for embroidery. Use a water soluble stabilizer on thin materials like organdy and fabrics with a nap like towels.

Note

- Always use stabilizer material for embroidery with stretch fabrics, thin fabrics, fabrics with a loose weave and fabrics where stitches easily contract.

CAUTION

- Always use stabilizer material when sewing embroidery projects. The needle may break or bend if you embroider without using a stabilizer material for thin fabrics or stretch fabrics. Furthermore, the pattern may be sewn incorrectly.

- When it cannot be ironed or placed in the hoop.

For fabrics, such as towels, which cannot be ironed or for embroidering in places where ironing is difficult, place the stabilizer material under the fabric, and stretch it on the embroidery frame without attaching it.
Setting the fabric in the embroidery frame

The fabric is stretched on the embroidery frame. If the fabric is loose, the quality of the embroidery pattern may be poor. Put the fabric in the frame without slack following the steps below. Have a fabric with a stabilizer material attached and the embroidery frame (medium), (small) and (large) ready.

■ Embroidery set (medium)
Patterns with a height of up to 10 cm (4 inch) and a width of up to 10 cm (4 inch) can be sewn.

■ Embroidery frame (small) (optional)
Patterns with a height of up to 2 cm (1 inch) and a width of up to 6 cm (2-1/2 inch) can be sewn. This is used for letters and other small embroidery.

• There are patterns for which embroidery frame (small) cannot be used.

■ Embroidery frame (large) (optional)
Embroidery can be done in an area with a height of up to 17 cm (6-7/10 inch) and a width of up to 10 cm (4 inch). This is used to embroider multiple patterns without changing the fabric position in the frame.

---

**CAUTION**

- Use the embroidery frame that matches the size of the pattern being embroidered. If the wrong size embroidery frame is used, the embroidery frame may be hit by the presser foot and cause injury or needle breakage.

---

1. Loosen the embroidery frame adjustment screw and remove the inner and outer frames, placing the outer frame on a flat surface. Separate the inner and outer frame by removing inner frame upward.

![Diagram of inner and outer frame separation](https://via.placeholder.com/150)

   - Inner frame
   - Outer frame
   - Adjustment screw

2. Place the fabric with the stabilizer material on top of the outer frame. Have the front side of the cloth up.

![Diagram of fabric placement on outer frame](https://via.placeholder.com/150)

   - Front

3. Press the inner frame in from the top of the fabric.
Line up △ on the inner frame and ▽ on outer frame.

![Diagram of inner frame press](https://via.placeholder.com/150)

4. Tighten the adjustment screw by hand just enough to secure the fabric.
5. Gently remove the fabric from the frame without loosening the adjustment screw.

6. Press the inner frame in from the top of the fabric again, lining up △ on the inner frame and ▽ on outer frame.

Memo
- This precautionary step will help reduce pattern distortion while embroidering.

7. Tighten the adjustment screw while removing any slack in the fabric by hand. The goal is to have a drum-like sound when the stretched fabric is struck lightly.

- Using embroidery sheets
  If the embroidery sheet attached to the embroidery frame is used, the embroidery can be sewn in exactly the right position on the fabric.

1. Make a mark with a chalk pen at the center of the position for the pattern to be embroidered.

- Press down firmly until the inner frame is securely pressed against the ledge of the outer frame.

<table>
<thead>
<tr>
<th>1</th>
<th>Outer frame</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Inner frame</td>
</tr>
<tr>
<td>3</td>
<td>Fabric (front)</td>
</tr>
<tr>
<td>4</td>
<td>Stabilizer material</td>
</tr>
<tr>
<td>5</td>
<td>Ledge of outer frame</td>
</tr>
</tbody>
</table>
2. Place the embroidery sheet on the inner frame.

3. Line the mark on the fabric up with the base line on the embroidery sheet.

4. Place the inner frame with the fabric on the outer frame and stretch the fabric.
   - For details, refer to page 123.

5. Remove the embroidery sheet.

---

- **Embroidery on fabrics that cannot be stretched on an embroidery frame**

  When small pieces of fabric that cannot be stretched on an embroidery frame or thin pieces like ribbon are being embroidered, use stabilizer material as a base to stretch on the frame. We recommend stabilizer material for embroidery.

   - **Stabilizer material**
   - **Tack or spray glue**
   - **Fabric**

   After completing the embroidery, remove the stabilizer material carefully.
Attaching the embroidery frame

The embroidery frame with the stretched fabric is attached to the embroidery unit.

Attaching the embroidery frame

1. Wind the embroidery bobbin thread onto the bobbin and set it into the shuttle.
   - For details, refer to "Winding/Installing the Bobbin" (page 16).

2. Raise the presser foot lever.

3. Pass the embroidery frame under the presser foot while raising the presser foot lever even further.

4. Firmly insert the embroidery frame guide into the embroidery carriage frame holder from the top.
   Line up the embroidery frame guide tabs and the embroidery carriage frame holder slots and push in until it clicks and stops.
   - Embroidery frame guide tabs
   - Embroidery carriage frame holder slots
   - The embroidery frame is attached.

**CAUTION**

- Correctly set the embroidery frame into the embroidery frame holder. If it is not set in correctly, the presser foot may hit the embroidery frame, resulting in injury.

**CAUTION**

- Do not hit the needle with your finger or the embroidery frame. It could result in injury or the breaking of the needle.
Removing the embroidery frame

1. Be sure that the sewing machine is stopped.
2. Raise the presser foot lever.

3. Press the part of the embroidery frame holder in the figure to the left side, and raise the embroidery frame.

4. Pass the embroidery frame under the presser foot while raising the presser foot lever even further.

CAUTION

- Do not hit the needle with your finger or the embroidery frame. It could result in injury or the breaking of the needle.

- Do not hit the needle with your finger or the embroidery frame. It could result in injury or the breaking of the needle.
Selecting embroidery patterns

The pattern for the embroidery is selected.

Copyright Information

The patterns stored in the sewing machine and embroidery cards are intended for private use only. Any public or commercial use of copyrighted patterns is an infringement of copyright law and is strictly prohibited.

Embroidery pattern types

These are the following groups of patterns.

1 Embroidery patterns
2 Frame patterns
3 Embroidery card
4 Character (sans serif)
5 Character (bold)
6 Character (serif)
7 Character (italics)
8 Character (outline style)

■ Character pattern (sans serif/serif/bold/italics/outline style)

There are uppercase/lowercase/numbers/symbols (11 characters)/European characters. 25 continuous characters can be specified.

- For details, refer to “Selecting characters" (page 130).

■ Embroidery patterns

There are 70 patterns from fruit to animals, etc. The patterns are completed by changing the upper thread according to the instructions displayed on the LCD.

- For details, refer to "Selecting embroidery patterns" (page 131).

■ Frame patterns

Ten shapes, such as squares and circles, can be combined with 12 stitch types.

- For details, refer to "Selecting a frame pattern" (page 132).

■ Embroidery card

Press when selecting patterns from an embroidery card.

- For details, refer to "Using an embroidery card" (page 133).
The LCD (liquid crystal display) is operated using the operation keys on the display panel. The use of the keys for embroidery will be explained here.

**Operation keys**

- **[ ]** Returns to the previous screen.
- **< >** When there are patterns that are not displayed on the screen (when < or > is displayed), the previous patterns/subsequent patterns are displayed.
- **[ ]** When it is in embroidery, returns to the initial embroidery screen.
- **[ ]** Under embroidery, information to be displayed on the LCD can be selected from thread color/thread number/needle count/time to embroider (after **[ ]** is pressed).

**NAME OF COLOR:** Typical color name  
**EMBROIDERY:** Embroidery thread color number  
**COUNTRY:** Country thread color number

When one of above two settings is selected, number of the next thread will be also displayed when embroidering.  
(example; 001 \( \rightarrow \) 800)

**NEEDLE COUNT:** Needle progress number

**LCD button**

- **CHECK** When a specific pattern is selected, touch this key and then, press **[ ]** to switch the display. The sewing settings such as the specified character string and color are confirmed.

- **TIME** When an embroidery pattern has been selected, the time to completion of the embroidery and the elapsed time can be checked.

- **ADJUST** The characters and frame pattern density can be changed.

- **MULTI COLOR** There are **[ ]** (for character patterns), **[ ]**, and **[ ]** keys.
Press when you want to change the color character by character in character embroidery. Since the sewing machine stops at the end of each character, the upper thread is changed as you sew.

![Character selection](image)

The needle progresses one color or one stitch (if pressed continuously, 9 stitches to 20 stitches) at a time and changes the position for starting the embroidery. This is used when a specific color is not sewn or when restarting the sewing machine after power has been turned off in the middle of the operation.

Selecting characters

Specify the characters for embroidery. A maximum of 25 continuous characters from the same group can be combined.

**Memo**

- When "The pattern is too large for the embroidery frame." is displayed, no more characters can be input.
- Characters from different groups (sans serif and serif, etc.) cannot be combined.

**1. Select the type of characters.**

![Character selection](image)

**2. Select the characters for embroidery.**

If a character is pressed by mistake, press **DELETE**.

Example: Welcome

- Switch between uppercase/lowercase
- Switch among large/medium/small sizes

![Character selection](image)

**Memo**

- When an LCD button has dashed lines around it (i.e.: 
  ![Dashed lines](image)), that button cannot be selected.

For details, refer to "Resewing" (page 141).

The position of the pattern within the embroidery frame can be checked, and the size and angle can be changed.

![Size adjustment](image)

- For details, refer to "Adjusting the layout" (page 138).
Selecting embroidery patterns

There are 70 embroidery patterns, such as fruit and animals, stored in the machine's computer memory.

**Memo**

- The characters you entered can be stored for later use. For details, refer to "Storing characters" (page 139).

1. Press embroidery pattern.

   - The pattern selection screen is displayed.

2. Select the pattern.

   - Switch screens using ‹ (Previous page key) and › (Next page key).

   - When -10/+10 is pressed, the display of patterns moves backward/forward 10 patterns.

   - If a pattern is selected, it can be embroidered.
Selecting a frame pattern

Ten shapes, such as squares and circles, can be combined with 12 stitch types.

Memo
- Refer to "Frame patterns" in the Quick reference guide for frame pattern shapes and stitches.

1. Press the frame pattern.
   - The frame shape selection screen is displayed.

2. Select the frame shape.
   - Switch the screen using \(<\) (Previous page key) \(>\) (Next page key), and select from the ten types.

   Select The Frame.
   \(< 1/10 \ 2/10 >\)
   - The stitch selection screen is displayed.

3. Select the stitch.
   - Switch the screen using \(<\) (Previous page key) \(>\) (Next page key), and select from the 12 stitches.

If a stitch is selected, it can be embroidered.
Using an embroidery card

If an embroidery card is used, you can embroider patterns other than the patterns stored in the sewing machine. There are various cards with different themes.

Note
- Always turn off the sewing machine to insert and remove embroidery cards.
- Insert the embroidery card into the embroidery card slot, facing it in the right direction.
- Do not put anything other than an embroidery card in the embroidery card slot.
- When embroidery cards are not in use, keep them in their storage cases.
- Use only embroidery cards manufactured for this machine. Using unauthorized cards may cause your machine to operate incorrectly.
- Embroidery cards purchased in foreign countries may not work with your machine.

Turn off the sewing machine.

Insert the embroidery card in the embroidery card slot on the right side of the sewing machine.
Face the arrow on the embroidery card toward you, and insert it in the direction of the arrow.

Press the embroidery card on the LCD.

The selection screen for the patterns stored in the card is displayed.

Select a pattern.
The operation is the same as in "Selecting embroidery patterns" (page 131).
Embroidering

After the preparations are done, you can try embroidering. An example of the steps for an embroidery pattern will be given here.

**Embroidering a pattern**

Embroidery patterns are embroidered with a change of thread after each color.

1. **Prepare embroidery thread of the color shown on the LCD.**

   - Embroidery foot "Q" (recommended presser foot)
   - Current color step/Number of colors in design
   - Current name of color
   - Current color part
   - Next color part

   • Typical color names, embroidery thread/country thread color number, needle count, and time to sew (after **TIME** is pressed) can be displayed on the LCD. When switching the display, press (Settings key) to change it. Refer to "LCD (liquid crystal display) operation" (page 129).

2. **Set the embroidery thread in the thread cassette, and thread the needle.**

   - Refer to "Loading the spool into the thread cassette" (page 22) and "Threading the needle" (page 25).

3. **Pass the thread through the embroidery foot hole, and hold it gently in your left hand.**

   Give the thread a little slack.

---

**CAUTION**

- If the thread is pulled too tight, the needle may break or bend.
- Do not let hands or objects hit the carriage while sewing. The pattern may misalign.
4 Lower the presser foot lever.

5 Press \( \text{(Start/stop button)}. \)

6 After progressing 5-6 stitches, press \( \text{(Start/stop button)}, \) and the sewing machine will stop.

7 Use scissors to cut the thread at the beginning of the stitching.
Cut the thread at the edge of the stitching.

8 Press \( \text{(Start/stop button) again.} \)

- The embroidery begins again.
- Stitching stops automatically with reinforcement after one color has been completed. When automatic thread cutting is set, the thread is cut.

9 Remove the thread cassette.

10 Set up embroidery thread for the next color, and repeat steps 1-9.

- When the final color is complete, it returns to the initial screen.

11 Cut the excess thread.

- If the thread is left at the beginning of the stitching, it will be sewn into the pattern, and it cannot be taken care of neatly. Take care of the thread at the beginning of the stitch for each color.

Memo
- It is convenient if the next color is set up in another thread cassette while the sewing is going on.
- For the automatic cutting setting, refer to "Changing the Machine Settings" (page 13).
Appliquéing

With embroidery patterns that display "APPLIQUE", you can appliqué. Prepare the base fabric and the appliqué fabric (appliqué piece).

1 Select an appliqué pattern.

When "APPLIQUE MATERIAL" is displayed on the LCD, apply the stabilizer material to the back of the appliqué piece fabric, and stretch it on the embroidery frame.

2

3 Lower the presser foot lever, and press (Start/stop button).

   The cut-out for the appliqué piece is sewn, and the sewing machine stops.

4 Remove the fabric from the embroidery frame, and cut it out along the stitching. Cut carefully along the stitching and remove the thread.

   • If it is not cut right on the stitching, it will not be finished neatly.

5 Stretch the base fabric on the embroidery frame.

6 Set up the thread for appliquéing.

7 Lower the presser foot lever, and press (Start/stop button).

   The position for the appliqué is stitched, and the sewing machine stops.

8 Apply a thin layer of fabric glue or spray adhesive to the back of the appliqué piece, and attach it in the appliqué position.

   "APPLIQUE" will be displayed on the LCD.
9. Lower the presser foot lever, and press (Start/stop button).

10. Follow the instructions on the LCD, and change thread colors as you sew.
Convenient Functions

Ways for fixing problems when there are mistakes in adjustments and colors for the pattern and convenient functions will be explained here.

Adjusting the layout

The pattern is normally positioned in the center of the embroidery frame. You can check the layout before starting embroidery and change the position and the size.

1 After selecting the embroidery pattern, press \( \text{[adj]} \).

   The screen for changing the pattern is displayed.

2 Press \( \text{[lay]} \).

   The layout screen is displayed.

3 Check and adjust the layout.

   - Layout within the frame
   - Embroidery frame (M/S) used
   - 90 degree rotation key
   - Size key
   - Horizontal mirror image key
   - Stitch beginning key
   - Trial key
   - Change position key
   - Pattern size/position switching key
   - Embroidery size (cm)

   If you make a note of the values in the lower left when you change the size and position, you can sew with the same size and layout even if you have to turn the power back on in the middle of your work.

Embroidery frame size

The size of embroidery frame that can be used is displayed. When the smaller mark is grayed out in the display, embroidery frame (small) cannot be used.

Size key

Increases/decreases the size of the embroidery. If \( \text{[size]} \) is pressed, it returns to the previous screen.

Decrease size

Return to original size

Increase size

Pattern size/position switching key

Switches between pattern size and position displays. When it is \( \text{[size]} \), the pattern size is displayed in the lower left (Example: \( 0.8 \times 4.7 \)). When it is \( \text{[position]} \), the distance moved is displayed (Example: \( -1.25 \leftrightarrow +1.25 \)).

Change position key

Moves the embroidery position up, down, left and right.

Return to center position (when the pattern was moved with the change position key)

90 degree rotation key

Rotates the embroidery 90° each time. The direction of the arrow points to the top of design.
Convenient Functions

Storing characters

The characters you entered can be stored in the sewing machine memory. Since the stored characters will not be erased when the power is turned off, you can always recall them for embroidery. This is convenient for storing names and the like. You can store up to five groups.

1. After inputting the characters to be stored, press (Memory key).

   - The screen for selecting the storage location (pocket) is displayed.

2. Select the pocket for storage from pockets 1 - 5.

   - indicates an empty pocket. indicates a pocket where a character is already stored.

   - The selected pocket is shown in reverse highlighting.

3. Press .

   - "Saving..." appears while the character is being stored in the pocket.

   - Do not turn off the sewing machine while a character is being stored, otherwise the character data may be lost.

Memo

- If new characters or blanks are saved to a pocket where characters are already stored, the previously stored characters are erased.

CAUTION

- Never lower the needle when the embroidery frame is moving. The needle could be broken or bent.
- If the movement for the stitching position exceeds the range where embroidery can be done, you cannot use that size embroidery frame. Check the display for a frame that can be used and use it. If a frame other than the ones displayed is used, it could result in injury.

Press (Back key) to return to the original screen.

Memo

- When the power is turned off, the layout returns to the original setting.
Recalling stored characters.

Recall stored characters.

1. Press  (Memory key).
   This can be pressed no matter what screen is being displayed.

   ![Image of a memory key and screen]

   ▶ The pocket selection screen is displayed.

2. Select the pocket (1 - 5) where the characters you wish to recall are stored.
   ▣ indicates an empty pocket. □ indicates a pocket where a character is already stored.

   ![Image of a selection screen]

   ▶ The selected pocket is shown in reverse highlighting, and the stored characters are displayed.

3. After checking the content, press  .
   Press  to check a pattern that is not displayed completely.

   ![Image of a check symbol and characters]

   ▶ The stored characters are recalled.
   ▶ The screen for inputting characters appears, and you can embroider the recalled characters.

---

**Note**

- Only characters (not designs) can be stored in the machine memory.
- Characters saved from an embroidery card must have the embroidery card inserted in the machine in order to retrieve the memory saved from the embroidery card.
Adjusting the thread tension

If embroidery fails, it is difficult to undo the thread and the fabric may be damaged. Before embroidering, use a scrap of the same fabric to check the adjustment of the thread tension, etc. Thread tension adjustment will be explained here. The upper thread tension is changed using the thread tension dial on the left side of the sewing machine.

1. Thread tension dial

- **Correct thread tension**
  The thread tension is correct when upper thread is just visible on back of the fabric.

  ![Correct thread tension](image)

  1. right side
  2. wrong side

- **Upper thread is too tight**
  The lower thread will be visible on the front of the fabric. In this instance, decrease the upper thread tension.

  ![Upper thread too tight](image)

  1. right side
  2. wrong side

- **Upper thread is too loose**
  The upper thread has slack. In this instance, increase the upper thread tension.

  ![Upper thread too loose](image)

  1. right side
  2. wrong side

Resewing

When the wrong color upper thread has been sewn, it can be resewn with the correct color.

1. Press (Start/stop button) to stop the sewing machine.

2. Press .

3. Press (Back one color) to return to the beginning of the mistaken color. Press one more time to go to previous color.

4. Set up the correct color for the upper thread.
**Thread runs out partway through a design**

When the upper thread or the bobbin thread runs out while sewing, the sewing machine stops. Move the needle back about ten stitches and resume sewing.

1. Set up the upper or bobbin thread.
2. Press $\bar{V}$.  
3. Press $\bar{V}$ (Back one stitch) to move the needle back about 10 stitches. $\bar{V}$ (Forward one stitch) increases the stitch number.
4. Restart the embroidery.

**Stopping while embroidering**

If the embroidery is stopped before it is complete, check the current needle count before turning off the sewing machine.

- **Memo**
  - When the sewing machine is turned off, the embroidery size and layout return to the original setting.
1. Press $\bar{V}$ (Start/stop button) to stop the sewing machine.
2. Check the current needle count on the LCD and make a note of it.
3. If the needle count is not displayed, press $\bar{V}$ (Settings key) to switch the display.
4. Press $\bar{V}$ (Back key) to return to the embroidery screen.
5. Press $\bar{V}$ (Embroidery key).
6. The screen for checking the pattern is displayed.
Convenient Functions

4. Press OK.

The selected pattern is turned off, and it returns to the initial embroidery screen.

5. Turn off the sewing machine.

- Always detach the embroidery unit when you move the sewing machine.

6. Turn on the sewing machine and select the pattern.

7. Press .

8. Press .

9. Press (Forward one color) to move to the beginning of the color you want to sew.

10. Press (Forward one stitch) to increase the needle count.

If is pressed continuously, it moves forward 1 → 9 → 20 stitches.

Move forward to about ten stitches before the total number of stitches confirmed in 8.

11. Restart the embroidery.
The various maintenance and troubleshooting procedures are described in this chapter.

Maintenance..........................................................................................................146
Troubleshooting ....................................................................................................148
Index .....................................................................................................................157
Maintenance

Simple sewing machine maintenance operations are described below.

Cleaning the machine surface

If the surface of the machine is dirty, lightly soak a cloth in neutral detergent, squeeze it out firmly, and then wipe the surface of the machine. After cleaning it once with a wet cloth, wipe it again with a dry cloth.

**CAUTION**

- Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.

Cleaning the shuttle

Sewing performance will suffer if dust collects in the shuttle; therefore, it should be cleaned periodically.

1. **Turn off the sewing machine.**

2. Unplug the power cord from the power supply jack on the right side of the sewing machine.

**CAUTION**

- Unplug the power supply cord before cleaning the machine, otherwise injuries or an electric shock may occur.

3. Grasp both sides of the needle plate cover, and then slide it toward you.

[Picture of needle plate cover being removed]

- Needle plate cover
- The needle plate cover is removed.
4 Remove the shuttle.
Grasp the shuttle, and then pull it out.

5 Use the cleaning brush or a vacuum cleaner to remove any lint and dust from the race and its surrounding area.

6 Insert the shuttle so that the projection on the shuttle aligns with the spring.

7 Insert the tabs on the needle plate cover into the needle plate, and then slide the cover back on.

CAUTION
- Never use a shuttle that is scratched, otherwise the upper thread may become tangled, the needle may break or sewing performance may suffer. For a new shuttle (part code: XC3153-051), contact your nearest authorized service center.
- Be sure that the shuttle is correctly installed, otherwise the needle may break.
## Troubleshooting

If the machine stops operating correctly, check the following possible problems before requesting service. If the problem persists, contact your retailer or the nearest authorized service center.

<table>

Troubleshooting

Nothing appears in the LCD

If nothing appears in the LCD when the sewing machine is turned on, the brightness of the LCD is either too light or too dark. If this is the case, perform the following operation.

1. Turn off the sewing machine.

2. Turn the power on while pressing any of the display panel buttons.

3. Press - or +.

4. Turn off the sewing machine, then turn it on again.

Operation beep

Each time a key is pressed or an incorrect operation is performed, a beep is sounded.

- **For a correct operation**
  One beep is sounded.

- **If an incorrect operation is performed**
  Two or four beeps are sounded.

- **If the machine locks up, for example, because the thread is tangled**
  The sewing machine continues to beep for four seconds. The machine automatically stops. Be sure to check for the cause of the error, and correct it before continuing to sew.
 Cancelling the operation beep

When the sewing machine is purchased, it is set to beep each time an operation panel key is pressed. This setting can be changed so that the machine does not beep.

1. **Turn on the sewing machine.**

   ![The LCD comes on.]

2. **Press (Settings key) in the operation panel.**

   ![The settings screen appears.]

3. **Press (Next page key).**

4. **Press OFF for the buzzer.**

   ![The screen for changing the beep setting appears.]

5. **Press (Back key).**

   ![The initial stitch screen appears again.]
