# COOL LAMINATOR™

MODEL LX-900

MULTI-FINISHING SYSTEM

# It's more than...

**If it has to last...  
it has to be laminated!**

Laminating used to mean expensive manually trimmed pouches that had to be carefully fed into the machine with the hope that the heat didn't damage your material. It also used to mean a difficult, time-consuming and expensive procedure.

**With Cool Laminator, your lamination can now be perfect, every time.**

That's because Cool Laminator uses a revolutionary cold pressure system—so there's no heat to harm originals or warm-up times to delay your deadlines.

It also uses an easy to use no-pouch cartridge-based system that makes laminating as easy as pushing a button.

**The Cool Laminator is faster, safer and easier to use.** Plus, its innovative technology gives you a variety of document finishing options to choose from: double-sided, magnetic backed or adhesive. And more options means more uses... it's a laminator, it's a sign maker and it's a sticker maker.

The Cool Laminator is ideal for virtually every type of business application.

## IDEAL FOR VIRTUALLY EVERY BUSINESS

*Automatic one-touch lamination of any document up to 8 1/2" wide*

**COMMERCIAL**

**ONE-STEP OPERATION**

It laminates the front side and finishes the back in a single pass.

## From magnetic backed to double-sided lamination

The Cool Laminator takes laminating to the next performance level by giving you access to a variety of options that will make this system an indispensable part of your operation. The Cool Laminator uses a variety of refillable cassette film rolls, available in 4.8" and 9" widths.

**Double Side Lamination**

**IT'S A LAMINATOR!** Classic lamination made better. Laminates both sides of a document to protect it from heat, moisture, grease, chemicals, dust and the wear and tear of constant handling.

- Danger signs
- Plumbing notices
- Security badges

## SAFE, FAST AND EASY TO USE!

### Revolutionary, no-heat technology

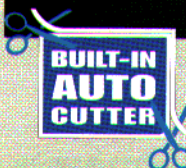

Lamination now enters the 21st century with the Brother Cool Laminator. Unlike other laminators, the Cool Laminator operates using a revolutionary cold pressure system—which means there's no heat to harm sensitive documents or warm-up times to delay your deadlines.

### One-touch operation, fully automatic

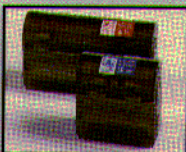

Forget about pouches. Forget about hand-feeding a document. Forget all the old-fashioned ways of laminating. The Cool Laminator is one-touch and easy to use. Simply insert a document into the feeder and press start. After that, everything is fully automatic.

### Auto size sensor with built-in auto cutter

An advanced system that provides "perfect every time" lamination. The single pass sheet feeder ensures perfect alignment, while the bi-directional cutter automatically detects the length and width, and trims to size.

### Easy to use cartridge-based system

Cool Laminator's intuitively easy to use, cartridge-based film system gives you the ability to laminate virtually any type of material, in a variety of finishes, in seconds.

### Built-in rounded corner cutter

No better way to finish your document. Everybody wants rounded corners but nobody wants to go through the hassle of creating them. Cool Laminator automates this process and gives you rounded corners in a single automated pass.

## In a new way to laminate, it's the total laminating solution.

Magnetic

Laminate

Adhesive  
Back  
Laminate

**IT'S A SIGN MAKER!** Suddenly, a whole new group of surfaces...surfaces! Provides a laminated front and a magnetized back, enabling a document to be converted into an instant sign and mounted on most metal surfaces ...from metal doors, to file cabinets, refrigerators and other metal surfaces.

**IT'S A STICKER MAKER!** We've just added "endless" to your list of display options. It laminates one side and applies an adhesive film to the other. By applying the adhesive to the back you can create a wall sign and by applying it on the front of the document, you can create an instant window sign.

# COOL LAMINATOR™

## MULTI-FINISHING SYSTEM

MODEL LX-900

### Model LX-900 Features:

- Easy to use, one-step operation  
Just turn it on, insert your document, press start and your document is laminated
