Faux fur, rhinestones, feathers, ribbon, beaded elastic string, beads, glue

●Accessory available separately
Iron-on fabric appliqué contact sheet

Tip When attaching the eyeglass part, arranging it to match the three points on the stars as shown in the figure can make for a more attractive design.

1. Make the bunny parts.
First, load the built-in pattern for the bunny and save it on your USB flash drive, and import the pattern into ScanNCutCanvas (http://scanncutcanvas.brother.com/) from your USB flash drive.
Next, from the basic shapes, select a rectangle. Resize it until it is large enough to cover the entire area beneath the bunny's eyes, and lay it out.
Select everything, and use the "Shape Cutout" editing function.
Built-in Pattern: AR-I023 (part B)
ScanNCutCanvas Built-in Pattern: Rectangle
ScanNCutCanvas Function: Shape Cutout

2. In ScanNCutCanvas, choose the rectangle and resize it so that it is just large enough to cover the bunny's eyes, and place it.
Select all pieces and use the "Welding" editing function to join them together, then save them onto your USB flash drive.
ScanNCutCanvas Built-in Pattern: Rectangle
ScanNCutCanvas Function: Editing Functions (Welding)

3. Load the part saved on your USB flash drive in step 2 into the machine. Enlarge it to maximum size, keeping the vertical and horizontal sizes proportional. Select the built-in pattern for eyeglasses, then resize and arrange it as shown in the photo.
Built-in Pattern: AR-F010

4. Choose the built-in pattern for the star to use for the mask's eye holes. On the eyeglass part joined in step 3, arrange two stars as shown in the photo.
Built-in Pattern: BA-A073

5. Place the eyeglass part at a location away from the bunny part, then group the eyes and face using Unify and save. Select a circle built-in pattern (for the ear-band holes), arrange two circles at the edges of the eyeglasses, and group the parts using Unify.
Built-in Pattern: BA-A045

6. Cut out the parts on the paper of your choice, and decorate with feathers, faux fur, rhinestones, lamé ribbons, and the like. Attach elastic bands for the ears to complete.
Built-in Patterns: AR-A011 x 2, AR-A013 (part A) x 2, AR-A014
   AR-A020 (part A), AR-I025 x 2
