

Julie Fei-Fan Balzer

Do you have containers that are in need of a little charm and personality? We're here to show you a way to add a bit of charm to your snack storage (or any storage for that matter). Gather a few materials and follow along to make yours today!

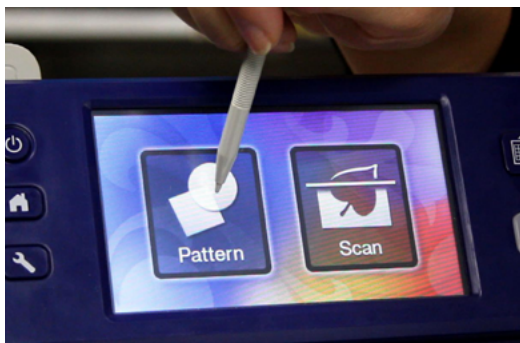

MATERIALS:

Containers; Chalkboard Contact Paper; Chalk; ScanNCut Machine; Middle Tack Mat; Standard Blade

step 1. Place chalkboard contact paper onto your middle tack mat, and load mat.

step 2. Choose the shape you prefer from the preloaded "Patterns" menu on your ScanNCut.

step 3. Size the shape down to ensure it will fit your container. Select “Add” to place on your mat.

step 4. Scan the mat and place shape on the material.

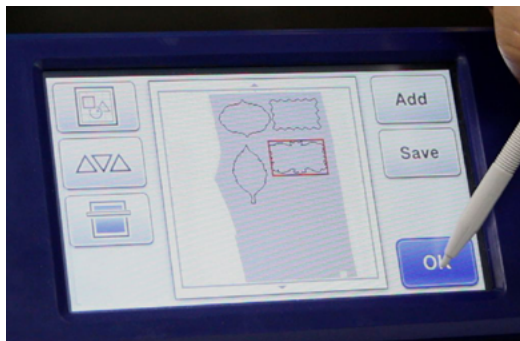

Tip: If the chalkboard contact paper is too dark, adjust the scan in the settings (Wrench button) and pick the dots over the gray in Background.

step 5. Add more shapes if desired.

step 6. Cut your labels.

Tip: Be sure to perform a test cut for best results. For ease of peeling, set the blade so that it doesn't pierce the backing.

step 7. Adhere these new labels to the containers. You now have versatile containers to use (and reuse!).
