

## Erin Bassett

Yay, fall is just about here and I'm excited to welcome in the cooler weather of my favorite time of year. Autumn always reminds me of comfort and so when I was trying to think of a project to create that symbolizes that I thought what could be better represent that than a wool felt appliqué project!

### MATERIALS:

ScanNCut Machine and accessories; ScanNCut Deep Cut blade; ScanNCut Pen Holder; ScanNCut air soluble marker; Wool felt in a variety of colors; Fusible Backing/Iron-on Contact Sheet; Embroidery floss; Embroidery needle

Download Appliqué: [http://www.erinbassett.com/Freebies/Cut\\_Files/Fall\\_Wool\\_Felt\\_Ap.fcm](http://www.erinbassett.com/Freebies/Cut_Files/Fall_Wool_Felt_Ap.fcm)

**step 1.** Write "happy" onto a piece of scrap paper and then scan it into the ScanNCut. Using the "Scan To Cut Data" option and then save your design.

**step 2.** Press the home button and then open up your design by going to "patterns" and then "saved data". Unify the letters so you're able to move them around your screen.

- step 3.** Prepare your felt by ironing on the fusible backing/iron-on contact sheet onto the backside of it. Once your design is unified you can then apply your felt to the mat and scan it into the machine so you can line up your word "hello" exactly where you want it.

- step 4.** Insert the fabric pen into the pen holder and insert that into the ScanNCut. Use the "draw" option instead of "cut" to draw the design onto the felt.

- step 5.** Choose the designs and colors of felt that you want to use and then cut them out using the Deep Cut Blade on your ScanNCut. Make sure you do a test cut first to ensure you're cutting through the felt but not through your mat. If your mat gets too much lint on it from the felt use a baby wipe (fragrance free, alcohol free) to gently clean it off then allow it to dry and it will be good to continue using.

- step 6** Iron your designs onto your felt (the one you wrote "hello" onto) and then have fun embroidering it!
