

Julie Fei-Fan Balzer

Looking for a fun way to personalize your nails for St. Patrick's Day? Look no further – we have just the thing for you! Impress your friends and family with the tiny vinyl pieces you can make with your ScanNCut. You can either use preloaded designs or make your own unique shapes to wear. Follow along as we accessorize your digits with decals.

MATERIALS:

ScanNCut; Adhesive Backed Vinyl*; Standard Mat; Hook Tool; Tweezers; Orange Stick; Nail Polish; Nail File

**Consult the manufacturer of the adhesive backed vinyl before applying it to your skin or nails.*

step 1. Place vinyl onto mat, and then load mat into the ScanNCut.

step 2. Go to "Home" screen > "Pattern" >> Shamrock (Club) design.

step 3. Resize the design to fit your nail (approx. 0.25"). Then, change the number to add as many as you'd like, and press "Set."

step 4. Go to "Add" > "Words" >> "Lucky." Then resize (approx. 0.20" height). Change number, if desired.

step 5. If you wish, you can create or add your own designs to the project as well.

step 6. Scan your mat that was loaded with the vinyl.

step 7. Move and place your shapes over the patterns on the vinyl and then press "OK."

step 8. Perform a test cut to ensure your blade settings are appropriate for the vinyl.

step 9. Go to "Cut" > "Start." Once finished, you can unload the mat.

step 10. Remove vinyl from the mat and trim down as needed.

step 11. Weed the background from the design with a hook tool.

step 12. Place your vinyl as you wish on to the nail. (Tweezers can help place the small decals.)

step 13. Use an orange stick to press down any edges and smooth out bumps.

step 14. If a design extends past the nail, use a nail file to create a crease and remove the excess.

step 15. Coat with a clear polish to seal in the design.

Tip: Using a base coat first can help the vinyl stick more securely.
