Steps:

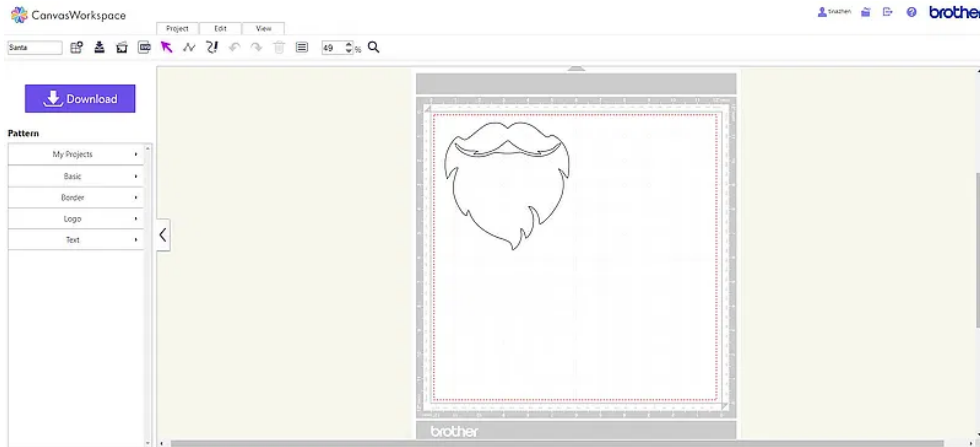

1. Measure the area where you would like the design to appear on the fabric

Thanksgiving

video vinyl

2. Create and size the design to the area on the fabric with your design via **CanvasWorkspace**

3. Retrieve data on the ScanNCut DX SDX85 machine to select the design created

4. Place the heat transfer vinyl with plastic facing down on the standard mat

5. Scan in background to locate exact placement of the material on the mat
6. Drag and place design over the material
7. Make sure to select the mirror option for the design

8. Select the half cut setting to only cut through the heat transfer vinyl, leaving the plastic in tack

9. Select cut

10. Remove the cut vinyl from mat

11. Peel vinyl to reveal cut out design

12. Weed out additional vinyl

13. Place design over desired position on fabric

14. Iron on design to the fabric

Note: Let cool before moving plastic covering

15. Remove plastic covering revealing the cut out design

*For more information on face coverings visit the CDC website.
