• Plastic bags are used in the packing of your machine. Plastic bags are not toys. To avoid the danger of suffocation, keep these bags away from babies and children and dispose of them correctly.
• When moving the machine, grasp the side handholds firmly from the front of the machine. The side handholds are located under the scanner. DO NOT carry the machine by holding it at the bottom.

• This machine is heavy and weighs more than 39.7 lb. (18.0 kg) including paper. To prevent possible injuries at least two people should lift the machine by holding it from the front and back.

• If you use a Lower Tray, DO NOT carry the machine with the Lower Tray as you may be injured or cause damage to the machine because it is not attached to the Lower Tray.
**Note**

- Keep a minimum gap around the machine as shown in the illustration.

- The components included in the box may differ depending on your country.
- We recommend that you save the original packaging.
- If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier. For how to repack the machine, see *Packing and shipping the machine* in the *Advanced User's Guide*.
- The interface cable is not a standard accessory. Buy the appropriate interface cable for the connection you want to use (USB or Network). The MFC-8810DW includes a USB 2.0 interface cable as a standard accessory.

**USB cable**
- It is recommended to use a USB 2.0 cable (Type A/B) that is no longer than 6 feet (2 meters).
- DO NOT connect the interface cable at this time. Connecting the interface cable is done during the MFL-Pro Suite installation process.

**Network cable**
Use a straight-through Category 5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.
## Remove the packing material from the machine

1. **Important**
   - DO NOT connect the AC power cord yet.

2. **Remove the packing tape from the outside of the machine and the film covering the scanner glass.**

3. **Open the MP tray, and remove the packing tape from the MP tray support, then close the MP tray.**

4. **Press the front cover release button and open the front cover. Remove the silica gel pack.**

   ### CAUTION
   - DO NOT eat the silica gel pack. Please throw away. If ingested, seek medical attention immediately.

5. **Take out the drum unit and toner cartridge assembly.**

6. **Remove the orange protective material from the drum unit and toner cartridge assembly.**

7. **Hold the drum unit and toner cartridge assembly level with both hands and gently shake it from side to side several times to distribute the toner evenly inside the cartridge.**

8. **Put the drum unit and toner cartridge assembly firmly back in the machine.**

9. **Close the front cover of the machine.**
3 Load paper in the paper tray

a Pull the paper tray completely out of the machine.

b While pressing the green paper-guide release lever 1, slide the paper guides to fit the paper size you are loading in the tray. Make sure that the guides are firmly in the slots.

c Fan the stack of paper well to avoid paper jams and misfeeds.

d Put the paper in the tray and make sure:
- The paper is below the maximum paper mark (max) 1.
- Over filling the paper tray will cause paper jams.
- The side to be printed on is face down.
- The paper guides touch the sides of the paper so it will feed properly.

e Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.

f Lift up the support flap 1 to prevent paper from sliding off the face-down output tray.

Note

For Legal or Folio size paper, press the release button 1 in the bottom of the paper tray and then pull out the back of the paper tray.

(Legal or Folio size paper are not available in some regions.)

For more information about recommended paper, see Recommended paper and print media in the Basic User's Guide.
Connect the power cord and telephone line

**Important**

DO NOT connect the interface cable yet.

**a** Connect the AC power cord to the machine and then plug it into an AC power outlet.

**b** Turn the machine's power switch on.

**c** Connect the telephone line cord. Connect one end of the telephone line cord to the jack on the machine marked **LINE** and the other end to a modular wall jack.

**Important**

The telephone line cord MUST be connected to the jack on the machine marked **LINE**.

---

**WARNING**

The machine must be grounded using a 3-prong plug.

Since the machine is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power cord connected to your machine when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your machine by disconnecting the telephone line first and then the power cord.

**Note**

If you are sharing one telephone line with an external telephone, connect it as shown below. Before you connect the external telephone, remove the protective cap ① from the EXT. jack on the machine.

- ① Extension telephone
- ② External telephone
- ③ Protective cap
5 Wireless setup (if needed)

a When the Wi-Fi setup message appears, press OK.

Do one of the following:
- If you are using a Macintosh computer or a mobile device on a wireless network, go to b.
- If you are using a Windows® computer or want to connect your Macintosh using USB or wired network, go to c.

### Setup Wi-Fi?

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select</td>
<td>▲ or OK</td>
<td></td>
</tr>
</tbody>
</table>

b Press ▲ or ▼ to choose Yes.

Press OK.

Then go to step 19 on page 25 to continue the wireless setup.

After finishing the wireless setup you will need to return to step 6 to finish the machine setup.

Note

If you want to change the initial settings on your machine first, you can choose No and you will be able to configure the wireless settings later.

C Press ▲ or ▼ to choose No.

Press OK.

Then go to step 6.

The wireless setup for Windows® users will be covered in later steps.
Choose your language (if needed)

a  Press Menu, 0, 0.

b  Press ▲ or ▼ to choose your language.
   Press OK.

c  Press Stop/Exit.
Choose the correct Receive Mode

The correct Receive Mode is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring, etc.) you have (or will be using) on the same line as the Brother machine.

**Will you be using a Distinctive Ring number for receiving faxes?**
Brother uses the term “Distinctive Ring” but telephone companies may have other names for this service such as Custom Ringing, RingMaster, Personalized Ring, Teen Ring, Ident-A-Call, and Smart Ring. See Distinctive Ring in the Basic User's Guide for instruction on setting up your machine using this feature.

**Will you be using Voice Mail on the same telephone line as your Brother machine?**
If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls. See Voice Mail in the Basic User's Guide for instructions on setting up your machine using this service.

**Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?**
Your external telephone answering device (TAD) will automatically answer every call. Voice messages are stored on the external TAD and fax messages are printed. Choose External TAD as your receive mode. See the instructions below.

**Will you be using your Brother machine on a dedicated fax line?**
Your machine automatically answers every call as a fax. Choose Fax Only as your receive mode. See the instructions below.

**Will you be using your Brother machine on the same line as your telephone?**

- **Do you want to receive voice calls and faxes automatically?**
The Fax/Tel receive mode is used when sharing the Brother machine and your telephone on the same line. Choose Fax/Tel as your receive mode. See the instructions below.

  **Important Note:** You cannot receive voice messages on either Voice Mail or an answering machine when choosing the Fax/Tel mode.

- **Do you expect to receive very few faxes?**
Choose Manual as your receive mode. You control the telephone line and must answer every call yourself. See the instructions below.

For details, see Using receive modes in the Basic User's Guide.

- **a** Press Menu, 0, 1.
- **b** Press ▲ or ▼ to choose the receive mode.
  Press OK.
- **c** Press Stop/Exit.
Set the LCD contrast (if needed)

If you are having difficulty reading the LCD, try changing the contrast setting.

a. Press Menu, 1, 7.

b. Press ▲ to increase the contrast.
   —OR—
   Press ▼ to decrease the contrast.
   Press OK.

c. Press Stop/Exit.

Set the date and time

The machine displays the date and time, and if you set up the station ID, the date and time will be added to each fax you send.

a. Press Menu, 0, 2, 1.

b. Enter the last two digits of the year on the dial pad, and then press OK.

   ![02.Date&Time][03/XX/2012]
   ![Day:25][Enter & OK Key]
   (e.g. Enter 2, 5 for 25th.)

c. Enter the two digits for the month on the dial pad, and then press OK.

   ![02.Date&Time][XX/XX/2012]
   ![Month:03][Enter & OK Key]
   (e.g. Enter 0, 3 for March.)

d. Enter the two digits for the day on the dial pad, and then press OK.

   ![02.Date&Time][03/XX/2012]
   ![Day:25][Enter & OK Key]
   (e.g. Enter 2, 5 for 25th.)

e. Do one of the following:
   ■ If you want to use the 24-hour clock, press ▲ or ▼ to choose 24h Clock, and then press OK. Go to step f.
   ■ If you want to use the 12-hour clock, press ▲ or ▼ to choose 12h Clock, and then press OK. Go to step g.

f. Enter the time in 24-hour format on the dial pad, and then press OK. Go to step i.

   ![02.Date&Time][03/25/2012]
   ![12h Clock][Select ▲▼ or OK]
   ![Time:15:25][Enter & OK Key]
   (e.g. Enter 1, 5, 2, 5 for 15:25.)

g. Enter the time in 12-hour format on the dial pad, and then press OK.

   ![02.Date&Time][03/25/2012]
   ![24h Clock][Select ▲▼ or OK]
   ![Time:03:25][Enter & OK Key]
   (e.g. Enter 0, 3, 2, 5 for 3:25.)
Press ▲ or ▼ to choose AM or PM, and then press OK.

02.Date&Time
03/25/2012 03:25
▲ AM
▼ PM
Select ▲▼ or OK

(e.g. Choose PM for 3:25 P.M.)

Press Stop/Exit.

10 Set your Station ID

The machine displays the date and time, and if you set up the Station ID, it will add it to each fax you send.

a Press Menu, 0, 3.
b Enter your fax number (up to 20 digits) on the dial pad, and then press OK.

03.Station ID
Fax:________
Enter & OK Key
c Enter your telephone number (up to 20 digits) on the dial pad, and then press OK. (If your telephone number and fax number are the same, enter the same number again.)

03.Station ID
Fax:XXXXXXXXXX
Tel:________
Enter & OK Key
d Use the dial pad to enter your name (up to 20 characters), and then press OK.

03.Station ID
Fax:XXXXXXXXXX
Tel:XXXXXXXXXX
Name:________
Enter & OK Key

Note
• See the following chart for entering your name.
• If you need to enter a character that is on the same key as the last character, press ► to move the cursor to the right.
• If you entered a character incorrectly and want to change it, press ◄ or ► to move the cursor to the incorrect character, then press Clear.

Press key One time Two times Three times Four times Five times
2 A B C 2 A
3 D E F 3 D
4 G H I 4 G
5 J K L 5 J
6 M N O 6 M
7 P Q R S 7
8 T U V 8 T
9 W X Y Z 9

For more details, see Entering text in the Basic User’s Guide.

e Press Stop/Exit.

Note
If you make a mistake and want to start again, press Stop/Exit and go back to step a.
(USA only) The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or electronic device to send any message via a telephone fax machine unless such messages clearly contain, in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity or other individual sending the message and the telephone number of the sending machines or such business, other entity or individual. To program this information into your machine, see Set the date and time on page 10 and Set your Station ID on page 11.
Fax Transmission Report

Your Brother machine is equipped with a Transmission Verification Report that can be used as confirmation that you sent a fax. This report lists the name or fax number of the receiving party, the date, time and duration of the transmission, the number of pages transmitted, and whether or not the transmission was successful. If you want to use the Fax Transmission Report feature see Printing reports in the Advanced User's Guide.

Set the telephone line compatibility

If you are connecting the machine to a VoIP service (over the Internet) you need to change the compatibility setting.

Note
If you are using an analog telephone line you can skip this step.

11  Fax Transmission Report

12  Set tone or pulse dialing mode (Canada only)

Your machine comes set for a Tone dialing service. If you have a Pulse dialing service (rotary), you need to change the dialing mode.

13  Set the telephone line compatibility

Press Menu, 2, 0, 1.

Press ▲ or ▼ to choose Basic (for VoIP).

Press OK.

Press Stop/Exit.

Press Menu, 0, 4.

Press ▲ or ▼ to choose Pulse (or Tone).

Press OK.

Press Stop/Exit.
14 Dial Prefix

The dial prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your phone system requires a 9 to dial an outside number this setting will automatically dial 9 for every fax you send.

a Press Menu, 0, 5.
   (For Canada, press Menu, 0, 6.)

b Enter the prefix number (up to 5 digits) on the dial pad, and then press OK.

c Press Stop/Exit.

Note

- You can use the numbers 0 to 9, #, *, and !. (Press Hook to display "!".)
- You cannot use ! with any other numbers or characters.
- If your telephone system requires a timed break recall (hookflash), press Hook to enter the break.
- If the pulse dialing mode is on, # and * are not available to use. (Canada only)

15 Automatic Daylight Saving Time

You can set the machine to change automatically for Daylight Saving Time. It will reset itself forward one hour in the Spring and backward one hour in the Fall.

a Press Menu, 0, 2, 2.

b Press ▲ or ▼ to choose On (or Off). Press OK.

c Press Stop/Exit.

16 Set the Time Zone

You can set the time zone (not summer time but standard time) on the machine for your location. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

a Press Menu, 0, 2, 3.

b Press ▲ or ▼ to choose the time zone. Press OK.

c Press Stop/Exit.
Send in the Product Registration and Test Sheet (USA only)

You can also register your product online using the On-Line Registration link from the installer CD-ROM or visit http://www.brother.com/registration/.

a Fill out the Product Registration and Test Sheet.

b Put the sheet face up in the ADF (Automatic Document Feeder) or face down on the scanner glass.

c Make sure (FAX) is illuminated in Blue.

d Enter the toll-free fax number: 1-877-268-9575.

e Press Start.

Note
You will receive a confirmation fax of your Product Registration.
Choose your connection type

These installation instructions are for Windows® XP Home/Windows® XP Professional, Windows® XP Professional x64 Edition, Windows Vista®, Windows® 7, and Mac OS X (versions 10.5.8, 10.6.x and 10.7.x).

Note

• You can visit us at http://solutions.brother.com/ where you can get product support, the latest driver updates and utilities, and answers to frequently asked questions (FAQs) and technical questions.

For USB Interface Users
Windows®, go to page 16
Macintosh, go to page 18

For Wired Network
Windows®, go to page 20
Macintosh, go to page 23

For Wireless Network
Windows® and Macintosh, go to page 25

Note

To connect your iOS or Android™ device or Windows® Phone to your Brother machine using Wi-Fi Direct™, please download the Wi-Fi Direct™ Guide at http://solutions.brother.com/.
For USB Interface Users
(Windows® XP/XP Professional x64 Edition/Windows Vista®/
Windows® 7)

Before you install

19

a. Make sure that your computer is ON and you are logged on with Administrator rights.

Important
• If there are any programs running, close them.
• The screens may differ depending on your operating system.

Note
The installer CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.

b. Turn off the machine and make sure the USB interface cable is NOT connected to the machine. If you have already connected the cable, disconnect it.

Install MFL-Pro Suite

20

a. Put the installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

Note
If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

b. Click Install MFL-Pro Suite, and click Yes if you accept the license agreements.

Note
• If the installation does not continue automatically, open the top menu again by ejecting and then reinserting the CD-ROM or double-click the start.exe program from the root folder, and continue from step b to install MFL-Pro Suite.
• For Windows Vista® and Windows® 7 users, when the User Account Control screen appears, click Allow or Yes.

c. Choose Local Connection (USB) and then click Next.

Note
If you want to install the PS driver (BR-Script3 printer driver), choose Custom Install and then follow the on-screen instructions.
Follow the on-screen instructions until this screen appears.

Connect the USB cable to the USB port marked with the symbol on your machine and then connect the cable to your computer.

Turn the machine on.
The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

Important
DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

Note
For Windows Vista® and Windows® 7 users, when the Windows Security screen appears, click the check box and click Install to complete the installation correctly.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup Complete screen appears, check the box of the action you want to perform, and then click Next.

Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

Note
- If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/Brother/MFC-XXXX (where MFC-XXXX is your model name).
- Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.

The installation is now complete.

Note
XML Paper Specification Printer Driver
The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista® and Windows® 7 when printing from applications that use the XML Paper Specification. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.
For USB Interface Users  
(Mac OS X 10.5.8 - 10.7.x)

**19 Before you install**

a. Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

**Important**

For users of Mac OS X 10.5.7 or lower, upgrade to Mac OS X 10.5.8 - 10.7.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

**Note**

If you want to add the PS driver (BR-Script3 printer driver), please go to the Brother Solutions Center at http://solutions.brother.com/ and visit FAQ's on your model page for instructions.

b. Connect the USB cable to the USB port marked with the symbol on your machine and then connect the cable to your Macintosh.

c. Make sure your machine’s power switch is on.

**20 Install MFL-Pro Suite**

a. Put the installer CD-ROM into your CD-ROM drive.

b. Double-click the Start Here OSX icon. If prompted, select your model.

[Image of the Start Here OSX icon]

C. Choose Local Connection (USB) and then click Next. Follow the on-screen instructions.

**Important**

DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

d. Choose your machine from the list, and then click OK.

[Image of the screen with machine selection]

e. When this screen appears, click Next.

[Image of the screen with Next button]

The installation of MFL-Pro Suite is now complete. Go to step 21 on page 19.
**Download and install Presto! PageManager**

When Presto! PageManager is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

1. On the Brother Support screen, click Presto! PageManager and follow the on-screen instructions.

**Finish**

The installation is now complete.
For Wired Network Interface Users (Windows® XP/XP Professional x64 Edition/Windows Vista®/Windows® 7)

Before you install

a Make sure that your computer is ON and you are logged on with Administrator rights.

Important
• If there are any programs running, close them.
• The screens may differ depending on your operating system.

Note
• The installer CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.
• Disable all personal firewall software (other than Windows® Firewall), anti-spyware or antivirus applications for the duration of the installation.

b Remove the protective cap from the Ethernet port marked with a symbol.

c Connect the network interface cable to the Ethernet port and then connect it to a free port on your hub.

d Make sure your machine’s power switch is on.

Install MFL-Pro Suite

a Put the installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

Note
If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

b Click Install MFL-Pro Suite, and click Yes if you accept the license agreements.

Note
• If the installation does not continue automatically, open the top menu again by ejecting and then reinserting the CD-ROM or double-click the start.exe program from the root folder, and continue from step b to install MFL-Pro Suite.
• For Windows Vista® and Windows® 7 users, when the User Account Control screen appears, click Allow or Yes.
Choose Wired Network Connection (Ethernet) and then click Next.

**Note**
If you want to install the PS driver (BR-Script3 printer driver), choose Custom Install and then follow the on-screen instructions.

When the Firewall/AntiVirus detected screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports.
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 161 and 137.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

**Important**
DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

**Note**
- If prompted, choose your machine from the list, and then click Next.
- If your machine is not found over the network, confirm your settings by following the on-screen instructions.
- If there is more than one of the same model connected on your network, the IP Address and Node Name will be displayed to help you identify the machine.
- You can find your machine’s IP address and the node name by printing out the Network Configuration Report. See Print the Network Configuration Report on page 41.
- For Windows Vista® and Windows® 7 users, when the Windows Security screen appears, click the check box and click Install to complete the installation correctly.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup Complete screen appears, check the box of the action you want to perform, and then click Next.

**Finish and restart**
Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

**Note**
- If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/Brother/MFC-XXXX LAN (where MFC-XXXX is your model name).
- Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.
Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 20 on page 20.

**Note**

**Network license (Windows®)**
This product includes a PC license for up to 5 users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to 5 PCs on the network. If you want to use more than 5 PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to 5 additional users. To purchase the NL-5 pack, contact your authorized Brother dealer or contact Brother customer service.

Finish

The installation is now complete.

**Note**

**XML Paper Specification Printer Driver**
The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista® and Windows® 7 when printing from applications that use the XML Paper Specification. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.
For Wired Network Interface Users (Mac OS X 10.5.8 - 10.7.x)

19 Before you install

a Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

Important
For users of Mac OS X 10.5.7 or lower, upgrade to Mac OS X 10.5.8 - 10.7.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

Note
If you want to add the PS driver (BR-Script3 printer driver), please go to the Brother Solutions Center at http://solutions.brother.com/ and visit FAQ’s on your model page for instructions.

b Remove the protective cap from the Ethernet port marked with a symbol.

c Connect the network interface cable to the Ethernet port and then connect it to a free port on your hub.

d Make sure your machine’s power switch is on.

20 Install MFL-Pro Suite

a Put the installer CD-ROM into your CD-ROM drive.

b Double-click the Start Here OSX icon. If prompted, select your model.

C Choose Wired Network Connection (Ethernet) and then click Next. Follow the on-screen instructions.

Important
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

d Choose your machine from the list, and then click OK.

Note
If your machine is not found over the network, confirm your network settings. See Before you install on page 23.
When this screen appears, click **Next**.

The installation of MFL-Pro Suite is now complete.

Go to step 21 on page 24.
For Wireless Network Users

For Wireless Network Interface Users

19 Before you begin

First you must configure the wireless network settings of your machine to communicate with your wireless access point/router. After the machine is configured to communicate with your wireless access point/router, computers and mobile devices on your network will have access to the machine. To use the machine from a computer, you will need to install the drivers and software. The following steps will guide you through the configuration and installation process.

Important

• If you are going to connect the machine to your network, we recommend that you contact your system administrator prior to installation. You must know your wireless network settings before you proceed with this installation.

• If you have previously configured the wireless settings of the machine, you must reset the network (LAN) settings before you can configure the wireless settings again.

2. Press 0 to choose **Network Reset**.
3. Press 1 twice for Yes to accept the change.

Note

• To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless access point/router as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer or USB for the fastest throughput speed.

• Although the Brother MFC-8710DW, MFC-8810DW and MFC-8910DW can be used in both a wired and wireless network, only one of the connection methods can be used at a time.

• If you use your machine in an IEEE 802.1x supported wireless network, see Using IEEE 802.1x authentication in the Network User's Guide.

Infrastructure Mode

![Diagram of wireless network setup]

- 1 Wireless access point/router
- 2 Wireless Network machine (your machine)
- 3 Wireless capable computer connected to the wireless access point/router
- 4 Wired computer connected to the wireless access point/router
- 5 Mobile device connected to the wireless access point/router
Choose your wireless setup method

The following instructions will offer three methods for setting up your Brother machine on a wireless network. If you began the wireless setup from step 5 on page 7 (for Macintosh and mobile devices), go to method b (Setup Wizard). For all other users, choose the method you prefer for your environment.

Note
To setup your machine in any other wireless environment, you can find instructions in the Network User’s Guide.

a Setup using the Installer CD-ROM and temporarily using a USB cable (Windows® only)

It is recommended that you use a PC wirelessly connected to your network for this method.

Important
- You must use a USB cable temporarily during configuration.
- If you are using Windows® XP, or using a network cable to connect your computer with your wireless access point/router, you need to know the SSID and Network Key of your wireless access point/router before you proceed. Please write down your wireless network settings in the area below.
- Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key or Encryption Key.

Note
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- How can I find this information (SSID and Network Key)?
  1. You should see the documentation provided with your wireless access point/router.
  2. The initial network name could be the manufacturer’s name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Now go to page 28
Manual setup from the control panel using the Setup Wizard (Macintosh, mobile devices and Windows®)

If your wireless access point/router does not support WPS (Wi-Fi Protected Setup™) or AOSS™, write down the wireless network settings of your wireless access point/router in the area below.

Important
Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key or Encryption Key.

Note
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- How can I find this information (SSID and Network Key)?
  1. You should see the documentation provided with your wireless access point/router.
  2. The initial network name could be the manufacturer’s name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Now go to page 30

One push setup using WPS or AOSS™ (Windows® and Macintosh)

If your wireless access point/router supports automatic wireless (one-push) setup (WPS or AOSS™)

Now go to page 32
Setup using the Installer CD-ROM and temporarily using a USB cable (Windows® only)

Setup the wireless settings

**Important**
- You must use a USB cable temporarily during configuration.
- If you are using Windows® XP, or using a network cable to connect your computer with your wireless access point/router, you need to know the SSID and Network Key of your wireless access point/router you wrote down in step 20-a on page 26 before you proceed.

**Note**
If you use your machine in an IEEE 802.1x supported wireless network, see Using IEEE 802.1x authentication in the Network User's Guide.

**a** Put the installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

**Note**
If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

**b** Click Install MFL-Pro Suite, and click Yes if you accept the license agreements.

**Note**
- If the installation does not continue automatically, open the top menu again by ejecting and then reinserting the CD-ROM or double-click the start.exe program from the root folder, and continue from step **b** to install MFL-Pro Suite.
- For Windows Vista® and Windows® 7 users, when the User Account Control screen appears, click Allow or Yes.

**c** Choose Wireless Network Connection and then click Next.

**Note**
If you want to install the PS driver (BR-Script3 printer driver), choose Custom Install and then follow the on-screen instructions.

**d** When the Firewall/AntiVirus detected screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

If you are not using the Windows® Firewall, see the user's guide for your software for information on how to add the following network ports.
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 161 and 137.

**e** Choose Yes, I have a USB cable to use for installation, and then click Next.

**Note**
If the Important Notice screen appears, read the notice. Check the box after you confirm the SSID and Network Key, and then click Next.
Connect the USB cable directly to the computer and the machine (you must remove the USB cable in step l, on this page).

Do one of the following:
- If the Installation confirmation screen appears, check the box and click Next, go to h.
- Otherwise, go to i.

Check Yes if you want to connect with the listed SSID. Click Next and go to k.

The wizard will search for wireless networks available from your machine. Choose the SSID that you wrote down for your network in step 20-a on page 26, and then click Next.

Enter the Network Key you wrote down in step 20-a on page 26, and then click Next.

If your network is not configured for Authentication and Encryption, the ATTENTION! screen will appear. To continue configuration, click OK.

Confirm the wireless network settings and then click Next. The settings will be sent to your machine.

Disconnect the USB cable between the computer and the machine and then click Next.

Now go to page 38

Wireless setup is now complete. A four level indicator at the top right of your machine’s LCD will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 23-e on page 38.
Manual setup from the control panel using the Setup Wizard (Macintosh, mobile devices and Windows®)

Setup the wireless settings

Important
You must have the wireless settings you wrote down for your network in step 20-b on page 27 before you proceed.

Note
If you use your machine in an IEEE 802.1x supported wireless network, see Using IEEE 802.1x authentication in the Network User's Guide.

a If you began the wireless setup from step 5 on page 7 (for Macintosh and mobile devices), press 1 to choose Setup Wizard. Then go to c. All other users, go to b.

Select Method
1. Setup Wizard
2. Setup with PC
3. WPS/AOSS

Select ▲▼ or OK

b On your machine, press Menu, 7 (Network), 2 (WLAN), 2 (Setup Wizard).

c When WLAN Enable ? is displayed, press ▲ or ▼ to choose On and press OK. This will start the wireless setup wizard. Otherwise press Stop/Exit to exit from the wireless setup wizard.

d The machine will search for available SSIDs. It will take several seconds to display a list of available SSIDs.

If a list of SSIDs is displayed, use the ▲ or ▼ key to choose the SSID you wrote down in step 20-b on page 27, then press OK.

e Do one of the following:

- If you are using an authentication and encryption method that requires a Network Key, go to g.
- If your authentication method is Open System and your encryption mode is None, go to h.

f To connect your machine using the automatic wireless mode, press 1 to choose Yes. (If you choose No (Manual), go to g to enter the Network Key.) When Start WPS on your wireless access point/router, then choose Next. appears, press the WPS button on your wireless access point/router, and then press 1. Go to h.

g Enter the Network Key you wrote down in step 20-b on page 27 using the dial pad to choose each character or number. To delete the characters you have entered, press Clear.

For example, to enter the letter a, press the 2 key on the dial pad once. To enter the number 3, press the 3 key on the dial pad seven times. The letters appear in this order: lower case, upper case and then numbers.

For more information, see Entering Text for Wireless Settings on page 36.

h Your machine will now try to connect to your wireless network using the information you have entered.

A connection result message appears on the LCD and a WLAN report will automatically be printed.

If the connection failed, check the error code on the printed report and refer to Troubleshooting on page 33.
Wireless setup is now complete. A four level indicator at the top right of your machine’s LCD will show the wireless signal strength of your wireless access point/router.

For computer users, please install MFL-Pro Suite.

For Macintosh Users:

Now go to step 22 on page 39

For Windows® Users:

Now go to step 22 on page 37

For mobile device users who began the setup from step 5 on page 7, go back to step 6 to continue the machine settings.

Note

For Mobile Device users, please go to the User’s Guide for the application you are using (e.g., AirPrint, Brother iPrint&Scan or other applications) for additional details on how to use your machine with the application. To download the User’s Guide for the application you are using, please go to the manuals download section on your model’s home page on the Brother Solutions Center at http://solutions.brother.com/.
One push setup using WPS (Wi-Fi Protected Setup) or AOSS™ (Windows® and Macintosh)

**Configure the wireless settings**

**a** Confirm your wireless access point/router has the WPS or AOSS™ symbol as shown below.

![WPS and AOSS symbols]

**b** Place the Brother machine within range of your WPS or AOSS™ access point/router. The range may differ depending on your environment. Refer to the instructions provided with your wireless access point/router.

If you began the wireless setup from step 5 on page 7, press 3 to choose WPS/AOSS. Then go to **d**.

All other users, go to **c**.

**c** On your machine, press Menu, 7 (Network), 2 (WLAN), 3 (WPS/AOSS).

**d** When WLAN Enable ? is displayed, press ▲ or ▼ to choose On and press OK. This will start the wireless setup wizard.

Otherwise press Stop/Exit to exit from the wireless setup wizard.

**e** When Start WPS/AOSS on your wireless access point/router appears, press the WPS or AOSS™ button on your wireless access point/router. See the user’s guide for your wireless access point/router for instructions. And then press OK.

This feature will automatically detect which mode (WPS or AOSS™) your wireless access point/router uses to configure your machine.

**f** A connection result message appears on the LCD and a WLAN report will automatically be printed.

If the connection failed, check the error code on the printed report and refer to **Troubleshooting** on page 33.

Wireless setup is now complete. A four level indicator at the top right of your machine’s LCD will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 22.

For Windows® Users:

Now go to page 37

For Macintosh Users:

Now go to page 39

**Note**

If your wireless access point/router supports WPS (PIN Method) and you want to configure your machine using the PIN (Personal Identification Number) Method, see **Configuration using the PIN Method of WPS (Wi-Fi Protected Setup)** in the **Network User's Guide**.
Troubleshooting

Important
Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

How can I find the wireless settings (Network Name (SSID) and Network Key)

1. You should see the documentation provided with your wireless access point/router.
2. The initial network name could be the manufacturer's name or the model name.
3. If you do not know the security information, please consult the router manufacturer, your system administrator or internet provider.

* The Network Key may also be described as the Password, Security Key or Encryption Key.
* If the wireless access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name. See Configuring your machine when the SSID is not broadcast in the Network User's Guide.

WLAN report
If the WLAN report that printed shows that the connection failed, check the error code on the printed report and refer to the following instructions.

<table>
<thead>
<tr>
<th>Error code</th>
<th>Recommended Solutions</th>
</tr>
</thead>
</table>
| TS-01      | The wireless setting is not activated, turn the wireless setting to ON.  
- If a LAN cable is connected to your machine, disconnect it and turn the wireless setting of your machine to ON.  
1. On your machine, press Menu, 7 (Network), 2 (WLAN), 2 (Setup Wizard).  
2. When WLAN Enable ? is displayed, press ▲ or ▼ to choose On and press OK. This will start the wireless setup wizard. |
| TS-02      | The wireless access point/router cannot be detected.  
1. Check the following 4 points.  
- Make sure that the wireless access point/router is powered on.  
- Move your machine to an obstruction-free area, or closer to the wireless access point/router.  
- Temporarily place your machine within about 3.3 feet (one meter) from the wireless access point/router when you are configuring the wireless settings.  
- If your wireless access point/router is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter. See Print the Network Configuration Report on page 41.  
2. If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key) the information may be incorrect. Reconfirm the SSID and security information and reenter the correct information as necessary.  
See How can I find the wireless settings (Network Name (SSID) and Network Key) on page 33 to confirm. |
For Wireless Network Users

<table>

Putting spaces
To enter a space in a name, press ▶ twice between characters.

Making corrections
If you entered a character incorrectly and want to change it, press ◀ or ▶ to move the cursor under the incorrect character, and then press Clear. Enter the correct character.

Repeating letters
If you need to enter a character that is on the same key as the character before, press ▶ to move the cursor right before you press the key again.

Special characters and symbols
Press *, # or 0, then press ◀ or ▶ to move the cursor to the special character or symbol you want. Press OK to choose it.

- Press * for (space) ! " # $ % & ' ( ) * + , . /
- Press # for : ; < > ? @ [ ] ^ _ ~ ` | { }
- Press 0 for 0 \ { | } ~
Install the Drivers & Software
(Windows® XP/XP Professional x64 Edition/Windows Vista®/Windows® 7)

Before you install

Make sure that your computer is ON and you are logged on with Administrator rights.

Important
- If there are any programs running, close them.
- The screens may differ depending on your operating system.

Note
- If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

Install MFL-Pro Suite

Put the installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

Note
- The installer CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.
- Disable all personal firewall software (other than Windows® Firewall), anti-spyware or antivirus applications for the duration of the installation.

Click Install MFL-Pro Suite, and click Yes if you accept the license agreements.

Note
- If the installation does not continue automatically, open the top menu again by ejecting and then reinserting the CD-ROM or double-click the start.exe program from the root folder, and continue from step b to install MFL-Pro Suite.
- For Windows Vista® and Windows® 7 users, when the User Account Control screen appears, click Allow or Yes.

Choose Wireless Network Connection and click Next.

Note
If you want to install the PS driver (BR-Script3 printer driver), choose Custom Install and then follow the on-screen instructions.

When the Firewall/AntiVirus detected screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

Note
If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports.
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 161 and 137.
Choose the machine from the list, and then click Next.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup Complete screen appears, check the box of the action you want to perform, and then click Next.

Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

If you are using WEP and the LCD displayed 'Connected' but your machine is not found, make sure you entered the WEP key correctly. The WEP key is case sensitive.

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

For Windows Vista® and Windows® 7 users, when the Windows Security screen appears, click the check box and click Install to complete the installation correctly.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

The installation is now complete.

The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista® and Windows® 7 when printing from applications that use the XML Paper Specification. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.

If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/Brother/MFC-XXXX LAN (where MFC-XXXX is your model name).

Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.
Install the Drivers & Software (Mac OS X 10.5.8 - 10.7.x)

Before you install

a Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

Important
For users of Mac OS X 10.5.7 or lower, upgrade to Mac OS X 10.5.8 - 10.7.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

Note
If you want to add the PS driver (BR-Script3 printer driver), please go to the Brother Solutions Center at http://solutions.brother.com/ and visit FAQ’s on your model page for instructions.

Install MFL-Pro Suite

a Put the installer CD-ROM into your CD-ROM drive.

b Double-click the Start Here OSX icon. If prompted, select your model.

c Choose Wireless Network Connection and then click Next.

d Follow the on-screen instructions.

Important
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

Note
If your wireless settings fail, the Wireless Device Setup Wizard screen appears. Follow the on-screen instructions to complete the wireless configuration.

e Choose your machine from the list, and then click OK.
When this screen appears, click **Next**.

The installation of MFL-Pro Suite is now complete.

Go to step 24 on page 40.

---

**Note**

- You can find your machine’s MAC Address (Ethernet Address) and IP Address by printing out the Network Configuration Report. See *Print the Network Configuration Report* on page 41.

- If this screen appears click **OK**.

1) Enter a name for your Macintosh in **Display Name** (up to 15 characters long).

2) If you want to use the machine’s **SCAN** key to scan over the network, you must check the **Register your computer with the “Scan To” function on the machine box.**

3) Click **OK**. Go to f.

- The name you enter will appear on the machine’s LCD when you press \( \text{SCAN} \) and choose a scan option. (For more information, see *Network Scanning (For network models)* in the Software User’s Guide.)

When this screen appears, click **Next**.

---

**Note**

- If you began the wireless setup from step 5 on page 7, go back to step 6 to continue the machine settings.
Web Based Management (web browser)

The Brother print server is equipped with a web server that allows you to monitor its status or change some of its configuration settings, using HTTP (Hyper Text Transfer Protocol).

**Note**

We recommend Windows® Internet Explorer® 7.0/8.0 or Firefox® 3.6 for Windows® and Safari 4.0/5.0 for Macintosh. Please also make sure that JavaScript and cookies are always enabled in whichever browser you use. To use a web browser, you will need to know the IP address of the print server. The IP address of the print server is listed on the Network Configuration Report.

**a** Open your browser.

**b** Type “http://machine’s IP address/” into your browser’s address bar (where “machine’s IP address” is the IP address of the Brother machine or the print server name).

- For example: http://192.168.1.2/

Print the Network Configuration Report

You can print the Network Configuration Report to confirm the current network settings.

**a** Turn on the machine and wait until the machine is in the Ready state.

**b** Press **Menu**, 6, 5.

**c** Press **Start**.

The machine will print the current network settings.

**d** Press **Stop/Exit**.

Restore the network settings to the factory default

To restore all network settings of the internal Print/Scan server to the factory default, please follow the steps below.

**a** Make sure the machine is not operating, then disconnect all the cables from the machine (except the power cord).

**b** Press **Menu**, 7, 0.

**c** Press 1 to choose **Reset**.

**d** Press 1 to choose **Yes**.

The machine will restart, re-connect the cables once this is complete.

**Note**

If you have configured an optional login password, you must enter it when prompted to access the Web Based Management.

For more information, see **Web Based Management** in the **Network User’s Guide**.

**Note**

If you have configured an optional login password, you must enter it when prompted to access the Web Based Management.
Brother CreativeCenter

Get inspired. If you're using Windows®, double-click the Brother CreativeCenter icon on your desktop to access our FREE web site with many ideas and resources for personal and professional use.

Mac users can access Brother CreativeCenter at this web address:
http://www.brother.com/creativecenter/
Options and Consumables

Options

The machine has the following optional accessories. You can expand the capabilities of the machine by adding these items. For more information about the optional Lower Tray Unit and compatible SO-DIMM Memory, visit us at http://solutions.brother.com/.

For installing the SO-DIMM Memory, see Installing extra memory in the Advanced User's Guide.

<table>
<thead>
<tr>
<th>Lower Tray Unit</th>
<th>SO-DIMM Memory</th>
</tr>
</thead>
<tbody>
<tr>
<td>LT-5400</td>
<td>You can increase the memory by installing one SO-DIMM (Small Outline Dual In-line Memory Module).</td>
</tr>
</tbody>
</table>

The lower paper tray unit can hold up to 500 sheets of paper. When the tray is installed, the machine expands total input capacity up to 800 sheets.

Consumables

When the time comes to replace consumable items, an error will be indicated by the LCD on the control panel. For more information about the consumables for your machine, visit us at http://www.brother.com/original/ or contact your local Brother reseller.
