Welcome to Pacesetter BES4 Dream Edition. This Installation Guide gives you some basic information about Pacesetter BES4 Dream Edition (such as the minimum systems requirements) and also instructions on how to install and activate the program.

Installing the Software
System Requirements

Specifications are subject to change without prior notice. For additional information on setup and system requirements, contact your distributor.

Recommended System Requirements:

- Genuine Intel Pentium IV, 2GHz PC computer (or higher) with a CD-ROM drive
- At least one USB port.
- Monitor 1024x768 video resolution with 16-bit color display (or higher)
- Microsoft® Windows® 7/8/10 operating system
- 1 gigabyte of RAM
- Minimum 1 gigabyte hard disk drive space available
- Mouse

For assistance, please contact Brother Customer service:
either by telephone at 1-877-276-8437, or by e-mail at
hadsupp@brother.com. Please enter the product name in
the subject line of the e-mail.

For customers outside the United States, please contact
your distributor.

The Software Activation Number

In your Pacesetter Embroidery Lettering Software package, you will have been given a software activation serial number. Use this number to activate your software once it is installed.

Please note that, while this is a single user license, it does allow you to activate the software on two computers that you own and operate.
Installing Pacesetter BES4 Dream Edition

To install Pacesetter BES4 Dream Edition:

1. Insert the Pacesetter BES4 Dream Edition USB device in your computer’s USB port.

2. Browse in your directory, and run the Menu.exe file.  
   The following dialog will open.

3. Click on “Install BES®4 Dream Edition® Software.”  
   You will see the InstallShield introductory screen.
4 Click Next to proceed with the installation. 
   You will see the License Agreement dialog.
5 Check the radio button next to “I accept the terms in the license agreement” and click next to continue.
6 Follow the instructions on each screen; the InstallShield Wizard will then Install the software on your computer.

   The Pacesetter BES4 Dream Edition icon will now appear on your desktop.

Program Updates
From time to time, the Pacesetter BES4 Dream Edition software may be updated to a new version. If so, you will see a dialog upon opening the software, asking if you want to do the update. Select yes to download the new version, or click No to use the version you have installed (you can always download the new version at a later time).
If you choose to download the update, you will see a Save as dialog. Select a location to save the install file to, and then install it as above.

If you experience any issues with downloading the new install file (e.g., if your connection being is blocked by your firewall) note that Pacesetter BES4 Dream Edition uses port 443 to download the latest build.

**Activating Pacesetter BES4 Dream Edition**

In order to use the Pacesetter BES4 Dream Edition software (once it is installed), you must activate it first. The Activation Wizard will quickly and easily lead you through this activation process. You can choose one of the following options to obtain a license:

- Using an activation serial number (requires Internet connection).
- By obtaining a site key from Brother Customer Service (for computers without a connection to the Internet).

**Activating Pacesetter BES4 Dream Edition via the Internet**

If the computer on which you are installing Pacesetter BES4 Dream Edition has an internet connection, all you need for your activation is the activation serial number that came with your copy of the software. The activation code can be found on the back of the installation USB stick.

**To obtain an activation over the Internet:**

1. Do one of the following:
   - Double-click the Pacesetter BES4 Dream Edition Icon on your desktop.

   *You will see the activation screen.*
2 Fill in the required activation information in the appropriate fields.
   Fields marked with an asterisk (*) are required - your software will not be activated otherwise.

3 Type your individual activation serial number (that came with your copy of Pacesetter BES4 Dream Edition) into the Activation Serial Number field.

4 Click the Activate Now button on the dialog.
   *Pacesetter BES4 Dream Edition will open.*
Activating Pacesetter BES4 Dream Edition without an Internet Connection

If you have installed the software on a computer that does not have an Internet connection, you will need a site key (in addition to the activation serial number) to complete the activation.

To obtain your activation code, please contact Brother Customer Service; either by telephone at 1-877-276-8437, or by e-mail at hadsupp@brother.com. Please enter the product name in the subject line of the e-mail.

For customers outside the United States, please contact your distributor.

To obtain an activation without an internet connection:

1. Do one of the following:
   - Double-click the Pacesetter BES4 Dream Edition Icon on your desktop.

You will see the activation screen.
2. Fill in the required activation information in the appropriate fields.

   Fields marked with an asterisk (*) are required - your software will not be activated otherwise.

3. Type your individual activation serial number (that came with your copy of Pacesetter BES4 Dream Edition) into the serial number field.

4. Click the Activate Now button on the dialog.

   You will see the following warning message:
5 Contact Technical support; they will give you an activation code.

Contact Brother Customer Service either by telephone at 1-877-276-8437, or by e-mail at hadsupp@brother.com. Please enter the product name in the subject line of the e-mail.
For customers outside the United States, please contact your distributor.

6 Click OK to dismiss the warning message.
The Activation wizard dialog now displays the new Site Code and Site Key fields.

![Activation wizard dialog]

7 Enter the site key.
8 Click the Activate Now button.

Pacesetter BES4 Dream Edition will open.
Important Safety Information

Regarding use of the SD Wireless Card (the "Card"), note the following precautionary information.

Warning
- Keep the Card out of reach of children and pets.
- Do not disassemble or modify the Card.
- Turn off the device in case the Card overheats.

Precautions about Wireless LAN

Wireless LAN communication sends and receives data between devices, such as personal computers, and access points by means of radio transmissions rather than wires. The radio transmissions enable a wireless LAN connection even if there are obstructions. Users should take appropriate security measures to prevent third parties from hacking or stealing data transmitted wirelessly. Do the initial settings in this manual carefully before using the Card.

Note that there is a possibility that communications over a wireless LAN may be hacked by using some heretofore unheard of way.

Safety Information and Rules and Regulations for Wireless LAN
- Wireless LAN devices may cause interference with medical equipment such as cardiac pacemakers. If you use personal medical equipment, consult with your physician and medical equipment instructions before using the Card. The Card should not be used in environments with medical equipment such as hospitals and medical offices, or near users of personal medical equipment.
- Always turn off wireless functionality if the computer is near automatic control equipment or appliances such as automatic doors or fire detectors. Radio waves can cause malfunction of such equipment, possibly resulting in serious injury.
- Do not use the wireless LAN functionality near a microwave oven or in areas subject to radio interference or magnetic fields. Interference from a microwave oven or other source can disrupt wireless LAN operation.
The transmission speed over the wireless LAN, and the distance over which the wireless LAN can reach, may vary depending on surrounding electromagnetic environment, obstacles, access point design and configuration, client design and software/hardware configurations. The transmission rate described is the theoretical maximum speed as specified under the appropriate standard—the actual transmission speed will be lower than the theoretical maximum speed.

The Card is compliant with local radio regulations in the following countries or regions (as of March 2013): Japan, United States of America, Canada, EU (European Union), China, Hong Kong, Taiwan, Korea, Australia, New Zealand, Russia, South Africa. Use in other countries and regions may violate local ordinances. You can check the latest information in the online manual for the Card (http://www.toshiba.co.jp/p-media/wwsite/flashair.htm).

**Regulatory Statements**
When being used in U.S/Canada (international roaming), the range is restricted to 2412-2462MHz and 1 - 11 channels.

**Federal Communications Commission (FCC) Notice (USA)**
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. To comply with the FCC RF exposure compliance requirements, this device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

**Card Reader (USB Adapter)**

Actual available capacity for data storage is less than as listed on the products due to formatting and other functions.
