## Christopher Palu

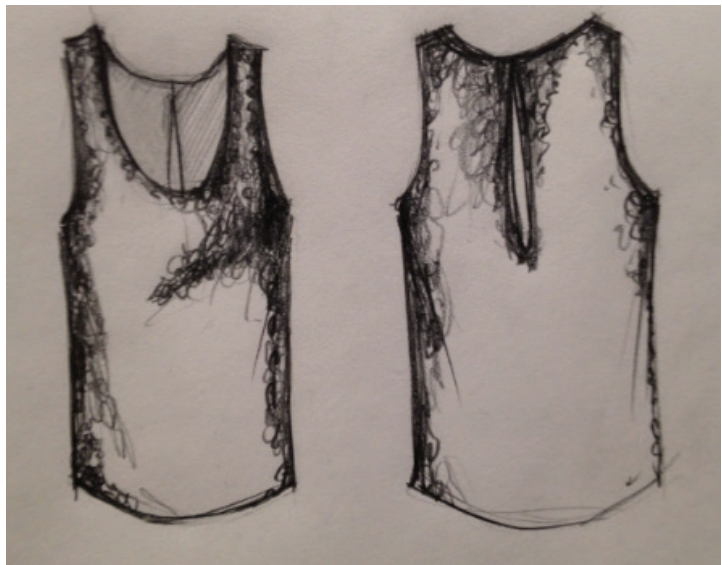

### Sparkly Top

Today we will be making a fun sequined top! The pattern is a super simple tank with a keyhole in the back, because we don't want to take away from the embellishment.

**MATERIALS:** 5/8 of a yard of sequins fabric 58" in width (black), 1/2" snap for the closure in the back

The top I will be making will look like this and be made out of black sequins.

This is a great silhouette to put under a blazer, wear with leggings, leather pants, a skirt, or basically anything.

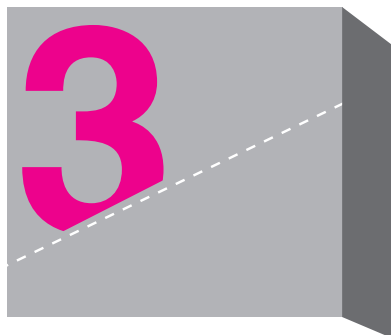

Take a similar looking top that you already have, and if you don't have one, it is very simple to make a pattern for. Make sure that it has a great fit and no stretch; basically a very similar hand to the sequins material we are using and transfer the pattern to a muslin.

Place and cut the muslin pattern on the fold of sequins. Cut out the pattern, leaving 1/4" seam allowance on the shoulders and side seams, and no seam allowance on armholes and neckline.

Cut straight down the center back, approximately 7"-8" long to act as a keyhole.

*Note: Be sure you can get this on easily because the material does not have stretch.*

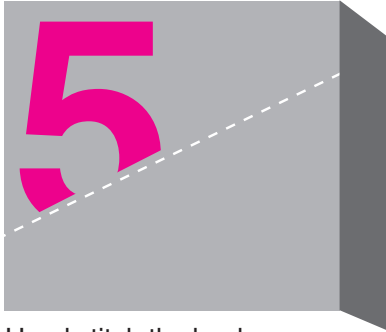

Edge stitch the entire perimeter of both pattern pieces (including up and down the keyhole), with a zigzag stitch to ensure the sequins are secure and will not come apart with wearing.

*Note: When sewing the shoulders and side seams together, place back over front and stitch with zigzag stitch and don't forget to back tack!*

Hand stitch the back snap as so.

The finished product should look like this! Congratulations on creating your fabulous new sparkly top!

(This project was created from the designer's perspective.)
