

May 25, 2016

Dear Valued Customer:

Effective July 1, 2016 Brother Gearmotors will be introducing new and larger conduit boxes (W-Box) with terminal blocks included as a standard offering for all of our 1-3 horsepower gearmotors. Any order placed after July 1<sup>st</sup> will come with the new conduit box and a terminal block inside.

There are many benefits to the new conduit boxes that will replace the existing E-Box.

**These benefits include:**

- More efficient – all 1-3 horsepower gearmotors will include conduit boxes with terminal blocks
- Easier wiring- larger size allows for easier handling of wires
- Quicker installation- terminal block allows for quicker and more secure wiring connections
- Flexible - easily accommodates wiring changes

There will be a part number change for all conduit boxes ordered after July 1<sup>st</sup>. Currently, the conduit box is ordered with an “E.” The new conduit box will be ordered with a “W.” Please reference the attached PowerPoint for additional details on the dimensional differences and the new nomenclature for part numbers.

We look forward to a long-term partnership with our customers and we welcome your feedback. If you have questions or concerns about this product change, please contact us via email at [gearmotortechnical@brother.com](mailto:gearmotortechnical@brother.com) or by phone 866-523-6283.

Don't forget to visit our new website for latest news and product updates - [www.brother-usa.com/GearMotors](http://www.brother-usa.com/GearMotors).

All the best,

*Takeshi Kouchi*
