Secure Printing

SOLUTIONS & SERVICES PORTFOLIO

Safeguarding printed documents is a critical requirement. Brother printers and MFPs offer secure printing solutions that address these needs. Help protect confidential or sensitive documents while meeting document-handling guidelines and regulations.

Secure printing solutions are ideal for environments that need to ensure the security of printed data. Brother offers a variety of solutions that do not require a sophisticated server network or print management middleware, as well as partners that offer more powerful solutions if required.

Secure Print+

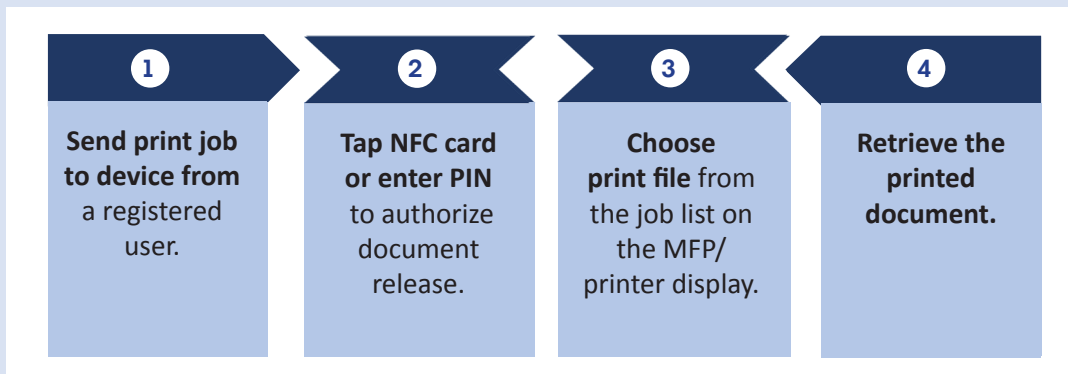

Simple on-demand printing

Secure Print+ offers a secured printing environment via an easy user profile setup, and management using Secure Function Lock. This is a cost-effective solution that does not require a server network or print management middleware.

Sensitive documents are printed only when the assigned users on the device are ready to release them. Multiple layers of authentication include print job release via NFC card for devices with an integrated NFC card reader¹, as well as PIN authentication.

Secure Print+

¹ Not compatible with all NFC formats. For a list of compatible NFC formats, see manufacturer's specifications.

² Requires Internet connection.

³ Requires additional purchase.
