

Legal Solutions from Brother

Technology to help manage billable hours and capture information digitally.

Technology is Changing Fast

Managing IT in legal has never been easy. Technology is developing at a rapid pace. IT departments are challenged to control costs while keeping up with rapid change. Brother understands. We offer cost-effective solutions to the overlooked input and output functions common in legal operations. As a partner, we can work with you to create solutions to the workflow challenges throughout your organization.

Today's Legal Challenges

Cost Recovery

Spend more time working and less time worrying about billing reconciliation. Brother seamlessly integrates with third-party cost recovery solutions like PaperCut so you can manage, account for, and charge back print, copy, fax and scan output to specific clients. PaperCut is compatible with the most popular office billing systems available in the market, such as, ProLaw, Juris, Tabs3, PC Law and Timeslips. With this integration, you can assign client codes and IDs by job to track and bill back specific accounts for improved cost recovery and greater workflow efficiency.

Upholding Security

Technology allows legal professionals to do more than ever before, but it also increases the risk of security breaches. Today's environment demands law officials use tools to protect confidential and sensitive client data from both internal and external security threats. Brother offers products with security features such as data encryption, user authorization, password protected printing, Swipe Card Technology, and more. These help organizations comply with security regulations such as The Sarbanes-Oxley Act and ensure data remains safe.

Shifting to Digital

Law firms are required to keep both hard and soft copies of all legal documents for a minimum of seven years, which means both scanning and printing are essential to the workflow of the office. Courts are also keen on the idea of electronic filing of documents, so law officials should be, too. Brother products can help capture documents and convert them into electronic images and files. Documents can be scanned to email, folders or other applications for easy archiving, organization, and retrieval. These can then be shared between employees, courts, departments and other law firms at the click of a button.

5 Key Reasons to Choose Brother:

1 Competitive Pricing and Total Cost of Ownership

Brother offers a Volume Print Program (VPP) for customers who commit to using Brother products and their Genuine Brother Supplies (toners and drums) for a three-year term. Under this program, organizations receive limited warranty extensions for up to three years and discounts on Genuine Brother Supplies.

2 Security and Compliance

Brother supports the latest industry security standards and protocols. These include secure function lock, print job logging, secure PDF, and Active Directory*. Brother also offers SSL-based solutions that can easily integrate with security standards including IPPS, secure management, IEEE 802.1x, Secure Email Certificate, and more.

3 Reliability

Brother markets a wide selection of products designed and built with a single goal in mind – to exceed customer expectations. Brother has won numerous awards for reliability including the PC Magazine coveted “Business Choice” Award for four years in a row.

4 Advanced Software and Technology Solutions

Brother wireless and wired products offer advanced technology features, which include network scanning, Scan to FTP, Scan to SFTP, and Scan to Network Folder (CIFS) to name a few. Our solutions can help your IT department manage and support your operations efficiently and effectively.

5 Major Account Program

Our Major Account Program ensures Brother products and services are just what your organization requires.

- Customized Service Programs tailored to meet your specific needs
- Express Exchange with warranty replacement units delivered next business day
